

**TRANSACTIONS OF THE NIGERIAN ASSOCIATION OF MATHEMATICAL
PHYSICS, Vol. 6, Jan., 2018**

CONTENTS

Review of academic research works of Professor G.O.S. Ekhaguere: 1976—2017 <i>E. O. Ayoola</i>	1
On M-loop as a special class of G-loops <i>D. A. Afariogun and J. B. Omosowon</i>	5
A review of some recent results on quantum stochastic differential equations and inclusions <i>E. O. Ayoola</i>	10
The effect of financial crisis in an investment portfolio with jump models: instigators and way forward <i>C. I. Nkeki</i>	23
A novel method for solving time dependent functional differential equations <i>A. K. Adio</i>	42
Some isomorphisms in K-theory <i>O.S. Olusa</i>	50
On some properties of locally convex partial *-algebraic modules <i>F.A. Tsav and G.O.S. Ekhaguere</i>	53
On the analysis of priority scheduling and its applications in the M/G/1 queueing system <i>S. O. Agboola</i>	63
Non-commutative generalizations of some classical fixed point and selection results <i>L. A. Abimbola and E. O. Ayoola</i>	71
A robust Broyden-like method for systems of nonlinear equations <i>I. A. Osinuga and S. O. Yusuff</i>	81
Existence of solution of impulsive quantum stochastic differential inclusion <i>L. A. Abimbola and E. O. Ayoola</i>	87
On seminorms on quasi *-algebras associated with multiplier algebras <i>Y. Ibrahim</i>	97
On specification, stationarity and estimation of parameters of mixed one-dimensional seasonal autoregressive integrated moving average bilinear time series models <i>J.F. Ojo and L.O. Adekola</i>	103
Mellin transforms and its applications in perpetual American power put options valuation <i>S. E. Fadugba and C. R. Nwozo</i>	110
Forecasting Nigeria inflation: application of Bayesian model averaging <i>O. E. Olubusoye, O. B. Akanbi and O. J. Akintande</i>	126
Certain subclass of univalent functions using generalised Salagean differential operator involving modified sigmoid function <i>O.A. Fadipe-Joseph and M. O. Oluwayemi</i>	140

Two factors exponential type estimator for population mean under single phase sampling scheme	147
<i>O. O. Ishaq and A. Audu</i>	
On the solvability of a second order boundary value problem at resonance with integral boundary condition	153
<i>S.A. Iyase and S.O. Edeki</i>	
Estimators of finite population mean in two-phase sampling under transformation of sample means	161
<i>O. O. Ishaq, A. Audu and I. Abubakar</i>	
A new equivalence relation for the classification of fuzzy subgroups of symmetric group S_4	168
<i>M. E. Ogiugo and M. EniOluwafe</i>	
On fixed point theorems for sums of certain mappings in locally convex spaces	173
<i>U. D. Chukwuedo and G. O. S. Ekhaguere</i>	
Extension of information cases on mixture ratio estimators using multi-auxiliary variables and attributes in two-phase sampling	179
<i>P. I. Ogunyinka and A. A. Sodipo</i>	
Autoregressive time series modeling with asymmetric error innovations	190
<i>O. I. Shittu, A. Oyinloye and O. S. Yaya</i>	
The asymptotic behaviour of malaria dynamics equilibrium solution with non-drug compliant human compartment	200
<i>V. F. Payne and T. S. Faniran</i>	
Convergence of a finite element solution for a nonlinear parabolic equation with discontinuous coefficient	213
<i>M. O. Adewole and V. F. Payne</i>	
Mixed optimal stopping and singular stochastic control model for investment in oil field project: identifying thresholds	228
<i>C. P. Ogbogbo</i>	
3-step block hybrid linear multistep methods for solution of special second order ordinary differential equations	238
<i>S. D. Yakubu, Y. A. Yahaya and K. O. Lawal</i>	
Estimating tree growth parameters from existing height-diameter models	247
<i>K.O. Obisesan and O.J Odewole</i>	
Irreversible investment-scape in Nigeria	263
<i>E. Enoyoze, I. Omosigho and S. E. Omosigho</i>	
Efficient portfolio selection of some assets in the Nigeria market	273
<i>E. A. Adeleke, I. Adinya, M.E. Adeosun and S. O. Edeki</i>	
Secrets of the masters: model-based hyper-performance in the corporate-academic business of life	280
<i>P. O. Ezepue</i>	
A materclass on stochastic modelling in finance and economics with a focus on current and emerging research directions	308
<i>P. O. Ezepue</i>	

On the choice of two Lomax-based continuous probability distributions <i>T. G. Ieren and A. Yahaya</i>	335
Unidimensionality and local independence assumptions of item response theory of the WAEC and NECO standardised Mathematics tests <i>P. O. Olonade and J. G. Adewale</i>	344
Effects of English Language proficiency on junior secondary school students' performance in Mathematics in Bauchi State, Nigeria <i>P. Dogo, O. Miheso and S. R. Ondigi</i>	355
On the magic squares census problem <i>L. U. Uko</i>	368
Showing that our time dimension is Euclidean 3-space of another world <i>A. O. J. Adekugbe</i>	377
The theorems of Radon and Helly on convex fuzzy sets <i>T. O. Sangodapo and D.O. Ajayi</i>	382
