

# TRANSACTIONS OF THE NIGERIAN ASSOCIATION OF MATHEMATICAL PHYSICS [TNAMP]

*New*

## Guidelines for contributors

Manuscripts should be submitted in triplicate copies along with a non-refundable fee of **₦2,000.00** (Two thousand naira only) in bank draft written in favour of Professor J.O.A. Idiodi, whose address appears below. Manuscripts can also be submitted via e-mail to the Editor-in-chief (see the e-mail address below) **Currently issues of the Transactions appear every year in the months of January, March, May, etc.**

Articles are entertained all the year round but authors wishing their manuscript to be published in any of the journal issues should endeavor to submit their manuscripts at least two months earlier than the month of the Journal issue.

The submission of a paper implies *it has not been* published elsewhere, and it is not under consideration for publication with other journals. Once a paper is accepted, it is assumed that the author has ceded the copyright to the Nigerian Association of Mathematical Physics.

Manuscripts must be in English Language, should be typed in double spacing and should not exceed 20 typed A4 paper in length. Authors are urged to pay careful attention to symbols, which should be typed neatly and unambiguously, *using equation editor (NOT SYMBOLS) and separating equation number from the equation file and each equation statement should NOT BE GROUPEd and should be properly aligned to distinguish subscripts and superscripts. Any paper with mathematical equations, typed without using equation editor would not be accepted and equations should not be grouped as objects. All tables, figures and references must be cited in the body of the paper. Tables, figures and references should be numbered in the order in which they are cited in the text. All graphs and figures should be neatly drawn or plotted and bold enough in case of enlargement.*

The Standard International (SI) system of units should be used in all manuscripts. Unusual symbols, abbreviations or notations should be defined when first mentioned in the text.

*Authors should also submit CD (Compact disc, not diskette) containing their manuscripts done in Microsoft word 2003 and NOT in PDF. Authors should be sure that their soft copy is VIRUS-FREE, otherwise the paper would be rejected and any paper not on CD would also be rejected.*

Manuscripts should contain the following headings, where appropriate: **Title** (followed by the author's name, address, e-mail and phone number); **Abstract** (that is, a brief summary of the contents and conclusion of the paper, not exceeding 200 words); **Introduction, Theoretical analysis, Experimental work, Results and Discussion, Conclusion, Acknowledgement and References. The numbering of the headings and subheadings and references should be as in the Journal of NAMP.**

All papers will be acknowledged and refereed and papers once received will not be returned to authors. Contributors of an accepted paper will be expected to pay a publication charge. As a result of the highly unstable economic climate, publication charges are subject to frequent review. Contributors of articles are therefore expected to liaise with the Editor-in-chief to obtain the most recent information on the charges they are to pay.

*Professor J.O.A. Idiodi,  
Editor-in-chief,  
e-mail address:jidiodi@hotmail.com,  
Department of Physics,  
University of Benin, Benin City,  
Nigeria.*

# Contents

Comparative Study of DFT and DFT-D Methods for Electronic and Optical Properties of Zinc-Blend Zinc Sulfide (zb-ZnS)	<i>A. S. Olayinka and W.Nwankwo</i>	<b>99</b>
Calculation of Wave Function at the Origin (WFO) for the Ground State of Heavy Mesons Based on the Variational Method	<i>Ogundola S. and Temenu F.M.</i>	<b>107</b>
Solution of the Dispersion Relation for Magnetized Multi-Fluid Plasma Using PDRF: A Case Study of Magnetosphere	<i>A.M. Nura and A.J. Ado</i>	<b>111</b>
Solution of the Dispersion Relation for Magnetized Multi-Fluid Plasma Using PDRF: A Case Study of Solar Wind	<i>A M. Nura and A. J. Ado</i>	<b>119</b>
Periodic Orbits around Triangular Libration Points in the CR3BP with Zonal Harmonics and Potential from a Belt	<i>Joel John Taura and Jagadish Singh</i>	<b>125</b>
Motion around Triangular Equilibrium Points of Photogravitational Restricted Problem of Three Oblate Bodies Having Circular Cluster of Materials	<i>Oni Leke and Joel John Taura</i>	<b>137</b>
The Importance of Isochore Map in Reservoir Characterization	<i>Ikponmwen M.O. and Aseogwu I.K.</i>	<b>149</b>
Design and Construction of a Solar Based Induction Cooker	<i>Egwaile J. O. and Oyedoh M.O.</i>	<b>153</b>
Causes and Implications of Fault Trippings in a Typical Electricity Distribution Network: (Using GRA 33/11KV Feeder as Case Study)	<i>Egwaile J.O. and Oyedoh M.O.</i>	<b>163</b>
Linear Codes of Incidence Structures of the Non-Associative Structural Property of the Aunu Integer Sequence	<i>Chun P.B., Ibrahim A.A., Garba A.I., Magani M.S. and Gua P.D.</i>	<b>171</b>
Ground State Energy of the One-Dimensional Anisotropic Spin-1/2 Heisenberg Antiferromagnet	<i>Okanigbuan O.R. and Okanigbuan P.N</i>	<b>177</b>
The Diffusive Behaviours Associated With Some Of The Ocean Wave Processes	<i>E.O. Okeke</i>	<b>183</b>

# TRANSACTIONS OF THE

## NIGERIAN ASSOCIATION OF MATHEMATICAL PHYSICS

### Vol. 9

### Contents: = = = = = = = = = = = = = = = =

Determination Of Normal Subgroups of Groups of Prime ORDERS $p^\alpha q^\beta$ , $\alpha, \beta \in \{0,1,2\}$	<i>Ademola L. A., Bimwarit R. and Hosea G. G.</i>	<i>1</i>
New Class of Third Derivative Boundary Value Methods for Stiff IVPS	<i>G. C. Nwachukwu and I. T. Amaefuna</i>	<i>5</i>
Reduced Step Point Collocation Interpolation Method for the Solution of Heat Equation	<i>Sunday Babuba and I. A. Bakari</i>	<i>13</i>
Mathematical Analysis of a One-Dimensional, Advection-Dispersion Equation with a Continuous Reaction, Input Point Source Discharge in A Moving Stream with Variable Transport Properties	<i>Iyeme E. E. and Aiyesimi Y. M.</i>	<i>19</i>
Effect of Disease Transmission Coefficient on SEIR Epidemic Model with Saturated Incidence Rate	<i>Kolawole M.K. and Michael E.</i>	<i>23</i>
Dynamic Lot-Sizing Model with Backlogged Normally Distributed Demand and Multiple Supply Points	<i>Iwuji A.C., Umezurike C. and Isaac I.U.</i>	<i>27</i>
Production–Inventory Model of Delayed Deteriorating Items with Quadratic and Price Dependent Demands and Backordering	<i>Abdul'aziz Bashir, Abubakar Musa and Jamilu Adamu</i>	<i>33</i>
Enhancing Personnel Selection Criteria for Software Project Development Via Probability Modeling	<i>Egwali Annie O. and Otokiti Kareem O.</i>	<i>37</i>
Towards the Management of B2C and B2B E-Commerce Transaction Failures through Bot-Mediated Component	<i>W. Nwankwo and A. S. Olayinka</i>	<i>41</i>
Capital Optimization Problem in a Financial Institution	<i>Danjuma T., Onah E. S. and Aboiyar T.</i>	<i>49</i>
A Single Stock Point Inventory Model for Ameliorating Deteriorating Items with Non-Linear Second Order Demand Rate	<i>Yahaya Ahmad and Nasiru Abdullahi</i>	<i>55</i>
Optimal Investment Problem in a Financial Institution under Stochastic Interest Rate and Stochastic Volatility	<i>Danjuma T. and Tyokyaa K.R.</i>	<i>61</i>
Implementing Fries Model For The Fixed Lifetime Inventory System	<i>Izevbizua O. and Igbinosun L.</i>	<i>71</i>
Statistical Analysis of Bread Inventory, Using the Useful Life Time Based Ordering Policy	<i>Izevbizua O. and Emunefe O.J.</i>	<i>81</i>
The Thermal Energy, Pressure and Entropy of Pair-Production in the Late Evolution Of Massive Stars	<i>L. Garba, M.G. Abdullahi, A. U. Farouq and M. A. Ibrahim</i>	<i>85</i>
Study of the Effect of Doped Cadmium on the Electronic and Structural Properties of Zinc Selenide Crystals Using Density Functional Theory	<i>I. Abdulaziz, A. Musa, A.B. Ahmed and Mansur Said</i>	<i>91</i>
