

TRANSACTIONS OF THE NIGERIAN ASSOCIATION OF MATHEMATICAL PHYSICS [TNAMP]

New

Guidelines for contributors

Manuscripts should be submitted in triplicate copies along with a non-refundable fee of **₦2,000.00** (Two thousand naira only) in bank draft written in favour of Professor J.O.A. Idiodi, whose address appears below. Manuscripts can also be submitted via e-mail to the Editor-in-chief (see the e-mail address below) **Currently issues of the Transactions appear every year in the months of January, March, May, etc.**

Articles are entertained all the year round but authors wishing their manuscript to be published in any of the journal issues should endeavor to submit their manuscripts at least two months earlier than the month of the Journal issue.

The submission of a paper implies *it has not been* published elsewhere, and it is not under consideration for publication with other journals. Once a paper is accepted, it is assumed that the author has ceded the copyright to the Nigerian Association of Mathematical Physics.

Manuscripts must be in English Language, should be typed in double spacing and should not exceed 20 typed A4 paper in length. Authors are urged to pay careful attention to symbols, which should be typed neatly and unambiguously, *using equation editor (NOT SYMBOLS) and separating equation number from the equation file and each equation statement should NOT BE GROUPEd and should be properly aligned to distinguish subscripts and superscripts. Any paper with mathematical equations, typed without using equation editor would not be accepted and equations should not be grouped as objects. All tables, figures and references must be cited in the body of the paper. Tables, figures and references should be numbered in the order in which they are cited in the text. All graphs and figures should be neatly drawn or plotted and bold enough in case of enlargement.*

The Standard International (SI) system of units should be used in all manuscripts. Unusual symbols, abbreviations or notations should be defined when first mentioned in the text.

Authors should also submit CD (Compact disc, not diskette) containing their manuscripts done in Microsoft word 2003 and NOT in PDF. Authors should be sure that their soft copy is VIRUS-FREE, otherwise the paper would be rejected and any paper not on CD would also be rejected.

Manuscripts should contain the following headings, where appropriate: **Title** (followed by the author's name, address, e-mail and phone number); **Abstract** (that is, a brief summary of the contents and conclusion of the paper, not exceeding 200 words); **Introduction, Theoretical analysis, Experimental work, Results and Discussion, Conclusion, Acknowledgement and References. The numbering of the headings and subheadings and references should be as in the Journal of NAMP.**

All papers will be acknowledged and refereed and papers once received will not be returned to authors. Contributors of an accepted paper will be expected to pay a publication charge. As a result of the highly unstable economic climate, publication charges are subject to frequent review. Contributors of articles are therefore expected to liaise with the Editor-in-chief to obtain the most recent information on the charges they are to pay.

*Professor J.O.A. Idiodi,
Editor-in-chief,
e-mail address: jidioidi@hotmail.com,
Department of Physics,
University of Benin, Benin City,
Nigeria.*

Contents

Seasonal Modelling of Akwa Ibom State Relative Humidity Using Fourier Series Analysis	<i>Udoh Grace Monday</i>	<i>101</i>
Estimation of Some Thermodynamic Meteorological Variables from Measured Meteorological Data	<i>Ukhurebor K.E., Siloko I.U. and Nwankwo W.</i>	<i>107</i>
Analytical Solution of Euler-Bernoulli Beam Subjected to Concentrated Moving Load	<i>Hammed F. A., Usman M. A., Okusaga S.T. and Olanrewaju M. L.</i>	<i>117</i>
An Improved Shopping Agent for the Prediction of Product Preferences in An E-Store Using Artificial Neural Network	<i>Soretire T.O. and Vincent O.R.</i>	<i>123</i>
An Application of Airy Functions to the Solution of One-Dimensional Schrödinger Equation	<i>Edison A. Enaibe and Sharon A. Egboro</i>	<i>133</i>
Analysis Of A Mathematical Model For Pneumonia	<i>MARCUS Ifeanyi Ossaiugbo and NEWTON I. Okposo</i>	<i>141</i>
Analytical Solutions of the Klein-Gordon Equation in the Presence of Coulomb-Eckart Potential	<i>Ebomwonyi O. and Onate C.A.</i>	<i>151</i>
Scattering, Bound and Quasi-Bound States Solution of Dirac Particles with Deformed Hylleraas Plus Woods-Saxon Potential.	<i>M.C. Onyeaju and C.A. Onate</i>	<i>159</i>
Simulation and Visualization of the Generalized Formulation of the Biomechanical Dynamics of Infected Person and Treatment Strategies	<i>Egboro S.A., Imah M.O., Osafire E.O, Enaibe E.A. and Akpojotor G. E.</i>	<i>167</i>

TRANSACTIONS OF THE

NIGERIAN ASSOCIATION OF MATHEMATICAL PHYSICS

Vol. 13

Contents: = = = = =

Heisenberg and Entropic Uncertainty Measures for the Shifted Static Screened Coulomb Potential <i>C. N. Isonguyo, K. J. Oyewumi and O. S. Oyun</i>	1
First Principles Study of Elastic and Thermodynamic Properties of MgXSi (X = Mg, Sr) <i>Olayinka A.S., Nwankwo W. and Olayinka T.C.</i>	9
Multi-Modal Biometric Recognition System <i>Olayinka T.C., Ogunrinola J.D., and Olayinka A.S.</i>	21
Indoor Radiation Monitoring for Consumer Protection in the Developing World <i>Abiola J.A. and Damisa J.</i>	31
Electronic, Mechanical and Thermodynamic Properties of 18-Valence Electron Half-Heusler Alloys LiZnX (X=As,P, and Sb) <i>M. I. Babalola, M.E. Ishaje and B.E. Iyorzor</i>	35
Electronic, Structural, Magnetic and Mechanical Properties of $Mg_{1-x}Sr_xNRocksalt$ from First-Principles <i>O.R. Jolayemi and S.A. Ekong</i>	39
Investigation of Frustration Due to Competing/ Interactions on A Four-Site Square Lattice <i>S. Ehika and E.O. Tuggen</i>	45
Ground State Properties of the One-Dimensional Hubbard Model: A Symmetry Projected Variational Wave Function Approach. <i>Okanigbuan R.O. and Onaiwu K.N.</i>	53
First Principle and Analytical Calculations of the Lattice Dynamics of Mo And Ta <i>Okocha O.G. and Osuhor O.P.</i>	61
The Effect of Varying Cathodic Voltages, Current and Temperature on Optical Properties and Conductivity Type of Electrodeposited Aluminum Selenide (Al_2Se_3) thin films for optoelectronic applications. <i>Olubosedo O, Faremi A.A, Odo E.A, Ajiboye E, Fateye J.O. and Olanibi, E.O.</i>	69
Computation of Positron Annihilation Rates In Deformed Metals <i>O.M. Osiele, O.S. Malumi and O. Olubosedo</i>	79
Lattice Dynamics of Gold (Au) and Nickel (Ni): IFC and DFT Approach <i>Osuhor O.P and Okocha O. G.</i>	83
Fourier Series Models Of Some Meteorological Variables <i>Onoja Abu, Patrick Noah Okolo and Useni Paul F.</i>	89
Statistical Estimation Of Some Meteorological Variables Using the Beta Kernel Function <i>Siloko I.U., Ukhurebor K.E. and Nwankwo W.</i>	93
