

TRANSACTIONS OF THE NIGERIAN ASSOCIATION OF MATHEMATICAL PHYSICS

[TNAMP]

New

Guidelines for contributors

Manuscripts should be submitted in triplicate copies along with a non-refundable fee of **₦2,000.00** (Two thousand naira only) in bank draft written in favour of Professor J.O.A. Idiodi, whose address appears below. Manuscripts can also be submitted via e-mail to the Editor-in-chief (see the e-mail address below) **Currently issues of the Transactions appear every year in the months of January, March, May, etc.**

Articles are entertained all the year round but authors wishing their manuscript to be published in any of the journal issues should endeavor to submit their manuscripts at least two months earlier than the month of the Journal issue.

The submission of a paper implies *it has not been* published elsewhere, and it is not under consideration for publication with other journals. Once a paper is accepted, it is assumed that the author has ceded the copyright to the Nigerian Association of Mathematical Physics.

Manuscripts must be in English Language, should be typed in double spacing and should not exceed 20 typed A4 paper in length. Authors are urged to pay careful attention to symbols, which should be typed neatly and unambiguously, *using equation editor (NOT SYMBOLS) and separating equation number from the equation file and each equation statement should NOT BE GROUPEd and should be properly aligned to distinguish subscripts and superscripts. Any paper with mathematical equations, typed without using equation editor would not be accepted and equations should not be grouped as objects. All tables, figures and references must be cited in the body of the paper. Tables, figures and references should be numbered in the order in which they are cited in the text. All graphs and figures should be neatly drawn or plotted and bold enough in case of enlargement.*

The Standard International (SI) system of units should be used in all manuscripts. Unusual symbols, abbreviations or notations should be defined when first mentioned in the text.

Authors should also submit CD (Compact disc, not diskette) containing their manuscripts done in Microsoft word 2003 and NOT in PDF. Authors should be sure that their soft copy is VIRUS-FREE, otherwise the paper would be rejected and any paper not on CD would also be rejected.

Manuscripts should contain the following headings, where appropriate: **Title** (followed by the author's name, address, e-mail and phone number); **Abstract** (that is, a brief summary of the contents and conclusion of the paper, not exceeding 200 words); **Introduction, Theoretical analysis, Experimental work, Results and Discussion, Conclusion, Acknowledgement and References. The numbering of the headings and subheadings and references should be as in the Journal of NAMP.**

All papers will be acknowledged and refereed and papers once received will not be returned to authors. Contributors of an accepted paper will be expected to pay a publication charge. As a result of the highly unstable economic climate, publication charges are subject to frequent review. Contributors of articles are therefore expected to liaise with the Editor-in-chief to obtain the most recent information on the charges they are to pay.

*Professor J.O.A. Idiodi,
Editor-in-chief,
e-mail address: jidioidi@hotmail.com,
Department of Physics,
University of Benin, Benin City,
Nigeria.*

Contents

The Dynamical Behaviour and Perturbation Effects, The Stability and Catastrophe Of The Response Amplitude And The Interaction Between The Free And Forced Solutions For The Damped Driven Morse Oscillator	<i>Usman A. Marte, Usman A. Umar and Idris A. Adamu</i>	117
Performance Comparison Of Spread And Bernstein Basis In The Solution Of Fractional Differential Equation Via Collocation Method	<i>Olagunju A. S., Joseph F.L. and Atanyi Y. E.</i>	125
Determination of the Characteristics Of Key Components Of A Queuing Model Using The Probability Function Of Its Steady State.	<i>J. O. Emunefe and S. A. Ogumeyo</i>	133
On Inventory Model For Deteriorating Items, Exponential Decreasing Demand And Time Varying Holding Cost Under Partial Backlogging With Shortages	<i>Ibe C.B¹, Osagiede F.E.U., and Omosigho O.</i>	139
Structure And Properties Of Approximate Functions From Collapsing Boundaries And The Analogy Of Human Relationships	<i>Andrew A. Dosomah and Maureen E. Omorogbe</i>	143
Stability Analysis On The Dynamics Of Atmospheric CO ₂ Under The Influence Of Deforestation And Industrial And Non-Industrial Emissions With Natural Absorbents	<i>Christopher Obumneke and Ibrahim Isa Adamu</i>	153
The Use Of Assignment Problem Models To Assign Teachers To Classes: A Case Study Of Ado Bobi Primary School, Mariga, Niger State, Nigeria	<i>S. S. Ahmed, U. N. Mariga, S. Abdulmalik, I. S. Ango and S. Umaru</i>	167
Design And Implementation Of Microcontroller – Based Digital Device For Direct Distance Measurement	<i>Ikechiamaka F. N., Owolabi J.A. and Bello A.</i>	173
Construction Of Solid Reaction Engine For Critical Purpose	<i>Bunonyo T. Y., Ngene I.C. and Saleh S.B.</i>	179
Determining Factors Influencing Students’ Acceptance Of Fields Of Study Different From Their Chosen Career Choices In Nigerian Public Tertiary Institutions	<i>A. Iduseri* and J. E. Osemwenkhae</i>	183
Design Of Bamboo-Made Bicycle Structure	<i>Ebhojiaye R.S. and Eboigbe C.I.</i>	193
The Affinity Between The Event Horizon Derived From Howusu Metric Tensor And That Of The Schwarzschild Metric Tensor	<i>Obaje V. O, Emeje K. O. and Adeyemi, J.O.</i>	199
