JOURNAL OF THE NIGERIAN ASSOCIATION OF MATHEMATICAL PHYSICS

[JNAMP]

New Guidelines for contributors

Manuscripts should be submitted in triplicate copies along with a non-refundable fee of **N500.00** (Five hundred naira only) in bank draft written in favour of Professor J. O. A. Idiodi, whose address appears below. Two issues of the Journal of NAMP are published each year and they appear in the months of May and November.

Articles are entertained all the year round but authors wishing their manuscript to be published in any of the journal issues should endeavour to submit their manuscripts at least five months earlier (*i.e. December 31 is*

the deadline of submission for the May issue while June 30, is the deadline of the submission for the November issue). The submission of a paper implies it has not been published elsewhere, and it is not under consideration for publication with other journals. Once a paper is accepted, it is assumed that the author has ceded he copyright to the Journal of the Nigerian Association of Mathematical Physics.

Manuscripts must be in English Language, should be typed in double spacing and should not exceed 20 typed A4 in length. Authors are urged to pay careful attention to symbols, which should be typed neatly and unambiguously, using equation editor (NOT SYMBOLS) and separating equation number from the equation file and each equation statement should NOT BE GROUPED and should be properly aligned to distinguish subscripts and upper scripts. Any paper with mathematical equations, typed without using equation editor would not be accepted and equations should not be grouped as objects. All tables, figures and references must be cited in the body of the paper. Tables, figures and references should be numbered in the order in which they are cited in the text. All graphs and figures should be neatly drawn or plotted and bold enough incase of enlargement.

The Standard International (SI) system of units should be used in all manuscripts. Unusual symbols, abbreviations or notations should be defined when first mentioned in the text.

Authors should also submit CD (Compact disc), (not diskette) containing their manuscripts done in Microsoft words. Authors should be sure that their soft copy is VIRUS-FREE, otherwise the paper would be rejected and any paper not on CD would also be rejected.

Manuscripts should contain the following headings, where appropriate: **Title** (followed by the author's name, address, e-mail and phone number); **Abstract** (that is, a brief summary of the contents and conclusions of he paper, not exceeding 200 words). **Introduction, Theoretical analysis, Experimental work, Results and Discussions, Conclusion, Acknowledgement and References**. **The numbering of the headings and subheadings and references should be as in the Journal of NAMP**.

All papers will be acknowledge and referred and papers once received will not be returned to authors. Contributors of an accepted paper will be expected to pay a publication charge. As a result of the highly unstable economic climate, publication charges are subject to frequent review. Contributors of articles are therefore expected to liaise with the Editor-in-chief to obtain the most recent information on the charges they are to pay.

Professor J. O. A. Idiodi, Editor-in-chief, e-mail: <u>idiodi@myway.com</u>, Department of Physics, University of Benin, Benin City, Nigeria.
