6. On A Simple Procedure to Determine the Maximum Beam Deflection: *Abiala I.O. and Bolaji B.O.* Pages 513 – 518, Vol. 22, (2012).

ABIKOYE O.C
1. Development of data encryption and decryption algorithm using 4-row rail fence cipher: *J. O. Omolehin, O. C. Abikoye and R. G. Jimoh.* Pages 411-416, Vol.13,(2008).

ABIOLA O.A
1. Anti-synchronization of the rigid body exhibiting chaotic dynamics: *E. Vincent, R. K. Odunaike, J. A. Laoye and O. A. Abiola*. Pages 5–14 , Vol.11, (2007).

ABOLARIN O.E
1. Application of New Variational Homotopy Perturbation Method For Solving Integro – Differential Equations: *Abolarin O. E. and Taiwo O. A*. Pages 497–504, Vol.20, (2012).
2. Application of New Variational Homotopy Perturbation Method to Painlevé Equation I: *Taiwo O. A. and Abolarin O. E.* Pages 619–622, Vol.19, (2011).

ABORODE M.O
1. On The Effect of Affinity Hemodialysis on HIV/AIDS: *M.O. Aborode and R.O. Ayeni.* Pages 299-302, Vol.18, (2011).

ABUBAKAR ALKASIM
1. Modification of Richardson-Dushmaan Equation for the Figure of Merit of a Thermionic Energy Converter Using Pure Tungsten and Tantalum as the Emitters: *Alkasim Abubakar.* Pages 119 – 128, Vol. 22 (2012).

ACHANYA V. M.
1. A mathematical model of interaction between regulatory proteins in bacterial flagellum: *Olayiwola R. O., Erinle-Ibrahim L. M., Odebiyi O. A., Gbadamosi B., and Achanya V. M*. Pages 503 – 512, Vol. 22, (2012).

ACHEBO JOSEPH I.
1. Stochastic Distribution of Wear of Carbide Tools during Machining Operation of Welded Flank Joints: *Joseph I. Achebo.* Pages 435–438, Vol.18, (2011).
2. Multi-Level Risk Assessment of a Power Plant Gas Turbine Applying the Criticality Index Model: *Joseph I. Achebo.* Pages 471–478, Vol.18, (2011).
3. Numerical Study of Machine Tool Spindle Design with Focus On Blank Dimensional Accuracy: *Joseph I. Achebo.* Pages 399–404, Vol.19, (2011).
4. Determination of the Reliability of Product Quality Loss and Control Model for a Process Plant: *Joseph I. Achebo.* Pages 405–412, Vol.19, (2011).
5. Anti-Thixotropic Analysis of Pipeline Metal Losses in Welded Locations due to Particulate Wear: *Joseph I. Achebo.* Pages 423–428, Vol.20, (2012).
6. The Physics of Weldpool Formation: Phase Transition Process In Gas Metal Arc Welding Of Mild Steel Electrodes: *Joseph I. Achebo*. Pages 429–434, Vol.20, (2012).

ACHI GODSWILL U.
1. A constrained optimal stochastic production planning model: *Alfred C. Okoroafor and Godswill U. Achi.* Pages 479-484, Vol.12, (2008).

ADAGBA O.H
1. Pressure on the Cochlea as a Load on the basilar membrane: Its contribution to the mechanism of   hearing: *G. C. E. Mbah and O. H. Adagba.* Pages 549-556, Vol.11, (2007).
2. Solitons of flexural deformation of the basilar membrane: *O. H. Adagba*. Pages 235-242, Vol.13, (2008).
3. Effect of noise on the level of hearing: *O. H. Adagba*. Pages 243-252, Vol.13, (2008).
4. The transmission properties of the motion of the oval and round windows: *O. H. Adagba.*, Pages 311-316, Vol.15, (2009).
5. Congruent Transformation: *Adagba O. Henry*. Pages 23–26, Vol.20, (2012).
6. Transformation of Groups: *Adagba O. Henry*. Pages 27–30, Vol.20, (2012).

ADEBILE E.A
1. Existence and uniqueness of solution for a system of equations of microwave heating of the biologic tissues: *E. A. Adebile.,* Pages 177-180 , Vol.8, (2004).
2. On the effect of temperature dependent thermal conductivity on temperature rise of biologic tissues during microwave heating: *E. A. Adebile.* Pages 181-186, Vol.8, (2004).
3. A periodic-type dose effect of insulin in the blood glucose level of a diabetes milletus subject: *E. A. Adebile*. Pages 187-194 , Vol.8, (2004).
4. On the steady state temperature profiles of biological tissues during microwave heating: *F. A. Adebile and B. N. Akintewe.* Pages 223-228, Vol.10, (2006).
5. Self-similar solution for coupled thermal electromagnetic model during microwave heating of biological tissues: *E. A. Adebile, B. N. Akintewe, O. K. Olaleye, and V. Idoko.* Pages 229-234, Vol.10, (2006).
6. A coupled mathematical model for a temperature dependant blood perfusion in a homogenous biological tissue during microwave heating: *E. A. Adebile, B. N. Akintewe and K. M. Owolabi*. Pages 183-188, Vol.13,(2008).

ADEBIMPE O
1. On the existence and uniqueness result for a two-step reactive-diffusive equation with variable pre-exponential factor: *P. O. Olanrewaju, R. O. Ayeni, A. O. Ajala, O. Adebimpe, and A. O. Ajayi*. Pages 403-408, Vol.10, (2006).

2. Solving microwave heating model in a slab using shooting technique: *P. O. Olanrewaju, R. O. Ayeni and O. Adebimpe.*, Pages 529-532, Vol.11, (2007).

3. Effect of transmission rate in an SIR epidemic model: *R.O.Ayeni, O.Adebimpe, T.O.Oluyo, S.O.Adewale, A.O.Popoola and A.W.Ogunsola.* Pages 157-164, Vol.17, (2010).

4. Effects of Variable Viscosity on Flow Over A Porous Wedge: *Ajala O. A, Adeyemo O., Adebimpe O. and Araromi A. A.* Pages 255–258, Vol.19, (2011).

ADEBOLA F.B

1. On a Numerical Comparison of the Proposed Randomized Response Technique with Hussain and Shabbir: *Adebola, F.B and Adepetun, A.O.* Pages 379–384, Vol.20, (2012).

2. A Cost Control Policy for Material Requirements Planning and Procurements: *Bassey K.J , Adebola F.B and Okoro C.N.* Pages 515-520, Vol.16, (2010).

3. A new Tripartite Randomized Response Technique: *Adebola, F.B and Adepetun, A.O.* Pages 119–122, Vol.19, (2011).

4. Comparison of some Approximately Unbiased Ratio Estimators using a Monte Carlo Approach under Non Normal Error Regression Model: *F. B. Adebola*. Pages 177 – 188, Vol. 21, (2012).

5. On a New Method of Bias Reduction: Alternative to Approximately Unbiased Ratio Estimators: *F .B. Adebola and I.O. Oshungade,* Pages 189 – 198, Vol.21, (2012).

ADEBOYE K.R

1. Solving Linear and Nonlinear Initial Value Problems by the Adomian Decomposition Method: *Cole A. T. and Adeboye K. R.* pp 349 – 354 Vol. 21 (2012).

2. High Order Quasi - Runge - Kutta Methods By Refinement Process For The Solution Of Initial Value Problems: *Salisu Abdullahi And Adeboye K.R*. Pages 419 – 424, Vol. 22, (2012)

ADEDAYO ADENIYI D.

1. Integrating Security/Privacy and Computer Self-Efficacy with TAM in internet banking adoption: *Evwiekpaefe Abraham E. and Adedayo Adeniyi D.* Pages 363 – 372, Vol. 22, (2012).

ADEDOWOLE A

1. Influence of prestress on the response to moving loads of rectangular plates incorporating rotatory inertia correction factor: *S. T. Oni and A. Adedowole.* Pages 127-140, Vol.13, (2008).

2. Exact Vibration Solution for initially stressed Beams resting on Elastic Foundation and subjected to partially distributed masses: *B. Omolofe, A. Adedowole, S.O. Ajibola and Jimoh Ahmed*. Pages 91-98, Vol.18, (2011).

ADEFOKUN TAYO CHARLES

1. A note on connected simple graph of order n ≥ 4: *Tayo Charles Adefokun and Kingsley Nosa Onaiwu*. Pages 9-12, Vol.15, (2009).

ADEGBIE K.S

1. On delay-type behaviour of thermal explosion in a combustible gas mixture containing fuel droplets with Arrhenius power-law model: *K. S. Adegbie.* Pages 69-82, Vol.13, (2008).

2. On the property of solutions to a system of equations modelling thermal explosion in combustible dusty gas containing fuel droplets with Arrhenius Power-law Model: *K. S. Adegbie.* Pages 135–150, Vol.14, (2009).

ADEGBOLA R.B

1. Some Maps and their Chaoticity: O*lusa T. V., Ometan O. O., Adegbola R. B., Olaoye M. A.* Pages 199–204, Vol.20, (2012).

ADEGBOYE Z.A

1. A New Formulation for Symmetric Implicit Runge-Kutta-Nystrom Method for the Integration of General Second Order ODEs: *Z A. Adegboye and M.M Shaba.* Pages 575–582, Vol.19, (2011).

2. Formulation of a Symmetric Implicit Super Runge-Kutta Nyström Method for the Integration of Third Order ODEs: *Yahaya Y. A. and Adegboye Z A.* Pages 425 – 430, Vol. 22, (2012).

ADEJAYAN C.

1. On the Evolutions of the Ocean wave generated low frequency Seismic noise: *E. O. Okeke, C. Adejayan and V. E. Asor.* Pages 290-298, Vol.3, (1999)**.**

2. On congruence lattices: *Adewale O. Oduwale, Cecil B. Adejayan and Steve D. Oluwaniyi.* Pages 281-286, Vol.15, (2009)

ADEJUMOBI C.A

1. Harmonic Function of Poincare Cone Condition In Solving Dirichlet Problem:*Raji M. T, Adejumobi C. A and Ajibola S. A.* Pages 17-22 , Vol.20, (2012).

ADEKANMBI D.B

1. A simplification of the likelihood ratio test statistic for testing hypothesis about goodness of fit of multinomial probabilities: *K. Ayinde and D. B. Adekanmbi*. Pages 305-310, Vol.8, (2004).

ADEKOLA A.S

1. On the Numerical Solution of the Laminar Boundary Layer Equation: *A. O. Ologunleko and A. S. Adekola.,* Pages 107 - 120, Vol. 2 (1998).

2. On the numerical simulation to Blasius' Equation for Dimensionless Shear Stress: *A. S. Adekola.* Pages 234-248, Vol.3, (1999)

3. Numerical Modeling of Dynamic Response of Water Absorption in Soaked Legume Grains: *A. S. Oyerinde, A. S. Adekola. and O. V. Ayodele.* Pages 233-238. Vol.5, (2001).

ADEKOMAYA O

1. Comparison Between Laminar and Turbulent Flow in a Single Phase Horizontal Pipe Gas Flow: *Okpoye N, Olafuyi O. A., Adekomaya O. and Adewole E. S.* Pages 343–350, Vol.19, (2011).

ADEKUNLE A.

1. N = 1 Supersymmetry with a Tensor Boson: *Oluwole Odundun and Adekunle Adegoke*, Pages 6 - 14, Vol. 2 (1998)

ADEKUNLE I.

1. A Primal-Dual Augmented Lagrangian Method for Optimal Control of Linear-Quadratic Problem with Time Varying Systems: *Adekunle A. I. and Olotu O*. Pages 165–174, Vol.20, (2012)

ADELAKUN A.A

1. Deflection range of water in heterogeneous permeable media: *Alabi O.O., Adelakun A. A. and Taiwo O. A.* Pages 349–352 , Vol.20, (2012)

ADELEKE O. J.

1. Dufour and Soret Effects on Hydromagnetic Free Convection and Mass Transfer Past A Vertical Porous Plate in The Presence of Thermal Radiation: *Olanrewaju P.O., Olabiyisi S.T., Olanrewaju M.A., Ayeni R.O. and Adeleke O. J.* Pages 431 – 442, Vol. 22 (2012).
2. Unsteady Free Convective Flow of Sisko Fluid with Radiative Heat Transfer Past a Flat Plate Moving Through a Binary Mixture Olanrewaju: *P. O., Adeleke O. J., Adigun A.A., Fenwa O.D., Oke A., and Ajala, Funmi.* Pages 443 – 454, Vol. 22 (2012).

ADEMILUYI R.A

1. Numerical Solution of A Reacting Viscous Problem: *F. I. Alao, R. O. Ayeni, and R. A. Ademiluyi*. Pages 187-200, Vol.4,(2004)
2. Maximum Order Second Derivative Hybrid Multi-Step Methods for Integration of Initial Value Problems in Ordinary Differential Equations: *R. A. Ademiluyi and S. J. Kayode.*, Pages 251-262, Vol.5.(2001)
3. Off-grid points exploitation in the development of more accurate collocation method for solving ODEs: *D. O. Awoyemi, R. A Ademiluyi and E. Amuseghan*. Pages 379-386, Vol.12,(2008)
4. A three–step discretization scheme for direct numerical solution of second-order ordinary differential equations: *R. A Ademiluyi and K.M Owolabi.* Pages 265–276 , Vol.16,(2010)
5. Numerical Integration of Stiff System of Ordinary Differential Equations with a New K-step Rational Runge-Kutta Method: *P.O. Babatola, R.A Ademiluyi and E.A Areo.*, Pages 241–248, Vol.18, (2011)
6. Three-Step Hybrid Linear Multistep Method for Solution of First Order Initial Value Problems in Ordinary Differential Equations : *E. A. Areo, R.A. Ademiluyi and P.O. Babatola.*, Pages 261–266, Vol.18 (2011)

ADEMOLA O.

1. Anharmonic Oscilator Model of F-Center absorption in Alkali Halides: *Awele Maduemezia and Ademola Obawole*. Pages 217-224 , Vol.2, (1998)

ADENIJI A.A

1. An Innovative Model to Estimate Fracture Extensions: *A. A. Adeniji and K. I. Idigbe*. Pages 233-242, Vol.17, (2010).
2. Analytical Solutions To Describe Juxtaposed Sands: *A. A. Adeniji and G. K. Falade*. Pages 243-252, Vol.17, (2010).
3. Modeling Economic Planning for Exhaustible Natural Resources: *K. I. Idigbe and A. A. Adenijii*. Pages 319-324, Vol.18, (2011).
4. Analysis of Diffusion Process in an Infinite Core: *Adenij, A. A*. Pages 387–394 , Vol.19, (2011).

ADENIRAN J.O

1. On Some Algebraic Properties of Generalized Groupd: *J.O. Adeniran; J.T. Akinmoyewa, A.R.T. Solarin and T.G. Jaiyeola*. Pages 401-406, Vol.16, (2010)
2. On certain isotopic maps of central loops: *John Olusola Adeniran, Yacub Tunde Oyebo and Daabo Mohammed*. Pages 7-12 , Vol.18, (2011).
3. Nuclear Automorphism of a class of Osborn Loops: *John Olusola Adeniran and Abednego Orobosa Isere*. Pages 5 – 8, Vol. 22 (2012).

ADENIRAN T.

1. Unsteady Magneto-Hydrodynamic (MHD) flow of a uniformly stretched vertical permeable surface I in the presence of heat generation/absorption and a first order chemical: *A. M. Okedoye, T. Adeniran, S. O. Adewale and R. O. Ayeni*. Pages 503-510, Vol.10, (2006).

ADENIYI M.O

1. The Mathematical Analysis of the Within-Host Dynamics of Plasmodium Falciparum: *M.O. Adeniyi, M.K. Kolawole and M.O Olayiwola*. Pages 303-306, Vol.18, (2011).
2. Solution of IVP of Second Order ODE with Oscillatory Solutions using Variational Iterative Method (VIM): *Adeniyi M. O., Kolawole M. K*. Pages 59–60, Vol.20, (2012).
3. Solution of Lie' nard Equations using Modified Initial Guess Variational Iterative Method (MIGVIM): *Adeniyi M. O., Kolawole M. K.*Pages 61–64 , Vol.20 (2012)
4. Mathematical analysis of the global dynamics of a power law model for HIV infection of CD4+ T cells: *Adeniyi M. O., Kolawole M. K*. Pages 125–130, Vol.20 (2012)
5. Likelihood Ratio Test as an Alternative to Chi-Square Test (Large Sample Approximation): *Amalare A.A, Nurudeen T.S, and Adeniyi M.O.* Pages 119-206, Vol.21 (2012).

ADENIYI R.B

1. A Continuous formulation of some classical initial value volvers by non-Perturbed multistep collocation approach using Chebyshev polynomials as basis functions: *R. B. Adeniyi, E. O. Adeyefa and M. O. Alabi*. Pages 261-274, Vol.10, (2006)
2. A Chebyshev-collocation approach for a continuous formulation of hybrid methods for initial value problems in ordinary differential equations: R. B. Adeniyi, *M. O. Alabi and R.O. Folaranmi*. Pages 369-378, Vol.12, (2008)
3. On the Tau method for a Class of non-over determined second order differential equations: *R. B. Adeniyi and A. I. M Aliyu*. Pages 387-398, Vol.12, (2008)
4. On the Tau method for certain over-determined first order differential equations: *R. B Adeniyi and E. O. Edungbola*. Pages 399–408, Vol.12, (2008)

ADENIYI T.

1. Computational analysis of the Van der Pol equation using the Krylov-Bogolobov technique: *Y. M. Aiyesimi and T. Adeniyi*. Pages 35-38, Vol.13, (2008)

ADENODI R.A

1. Comparative study of the Bisection and the Newton Methods in solving for Zeros and Extremes of a single-variable Function: *Iwetan C.N., Fuwape I. A., Olajide M.S., and Adenodi R.A*. Pages 173-176, Vol. 21, (2012).
2. Improvisation of Laboratory Power Supply for Powering Laboratory Electronic Instruments: *Adenodi, R. A., Iwetan, C. N., Akinluyi, F. O. and Oketayo, O. O*. Pages 219-224, Vol. 21, (2012).

ADEPEKO A.A

1. An Engineering Foundation Investigation using the Geoelectric Method. A Case Study: Southwestern Nigeria: *Ozegin K.O., Oseghale A.O. and Adepeko A.A*. Pages 245–248 , Vol.20, (2012).

ADEPETUN O.A

1. A new Tripartite Randomized Response Technique: *Adebola, F.B and Adepetun, A.O*. Pages 119–122 , Vol.19, (2011).
2. On a Numerical Comparison of the Proposed Randomized Response Technique with Hussain and Shabbir: *Adebola, F.B and Adepetun, A.O*. Pages 379–384, Vol.20, (2012).

ADEPOJU A. A.

1. Ranking of Simultaneous Equation Estimators to Outliers From Heavy-Tailed Quasi-Uniform Distribution: *Oseni B.M., Adepoju A. A. and Olubusoye O. E*. Pages 265 – 272, Vol. 22 (November, 2012).

ADEPOJU J.A

1. On the coefficients of holomorphic functions and the identity: *J. A. Adepoju and A. A. Mogbademu*. Pages 17-20, Vol.13, (2008)

ADEPOJU O.A

1. A Variable Thermal Conductivity Flow of A Micropolar Fluid Over A Stretching Surface in A Non-Darcian Porous Medium: *Adepoju O.A And Ayeni R.O*. Pages 115-118 Vol.17, (2010)
2. An Approximate Analytical Solution To Heat And Mass Transfer In The Boundary Layers On An Exponentially Stretching Surface (Weighted Residual Approach): *R.A. Oderinu, O.A. Adepoju*. Pages 101–104 , Vol.20, (2012).

ADERIBIGBE F.M

1. On the control of pure inertia plant using a hybrid of sequential variation of extremals and invariant costate imbedding algorithms: *T. A. Adewale, F. M. Aderibigbe*. Pages 285–296, Vol.12, (2008)
2. On optimal design of low-pass electronic filter using Chebyshev polynomial response: *F. M. Aderibigbe and T. A. Adewale*. Pages 297-306, Vol.12, (2008).

ADERINTO Y.O

1. On a differential subordination of some certain subclass of Univalent function: *Y. O. Aderinto*. Pages 181-184, Vol.10, (2006).

ADESAKIN G.E

1. Effects of Screening on the Thermal Resistivity And Compressibility Ratio of Metals: *Osiele O. M. and Adesakin G. E. and Otobo S. I*. Pages 519–526, Vol. 19, (2011).
2. Computation of the Structure Factor of Some Transition Liquid Metals: *Osiele O. M. and Adesakin G. E*. Pages 527–532, Vol.19, (2011).

ADESANYA O.A

1. Improved continuous method for direct solution of general second order ordinary differential equation: *A. O. Adesanya, T. A. Anake and M. O. Udoh*. Pages 59-62, Vol.13, (2008).
2. Application of homotopy perturbation method for the large angle period of a nonlinear oscillator: *M. O. Olayiwola, A. W. Gbolagade, A.O. Adesanya and F. O. Akinpelu*. Pages 235–238, Vol.14, (2009).
3. Application of modified power series method for the solution of system of differential equations: *M. O Olayiwola, A. W Gbolagade and A. O. Adesanya*. Pages 91-94, Vol.14, (2009).
4. Continuous implicit method for the solution of general second order ordinary differential equations: *A. O. Adesanya, T. A. Anake and G. J. Oghoyon*. Pages 71-78, Vol.15, (2009).
5. Second law analysis of slip velocity on oscillatory MHD flow of stretched surface with radiative heat transfer and variable suction: *A. M. Okedoye and A. O. Adesanya*. Pages 461-468 , Vol.15, (2009).
6. Entropy generation in MHD flow of a uniformly stretched vertical permeable surface under oscillatory suction velocity: *A. M. Okedoye and A. O.Adesanya*. Pages 469-476, Vol.15, (2009).

7. An Efficient Algorithm for Solving the Telegraph Equation: *Olayiwola M. O, Gbolagade A .W & Adesanya A. O*. Pages 199–204, Vol.16, (2010).
8. Solving Variable Coefficient Fourth-Order Parabolic Equation by Modified initial guess Variational Iteration Method: *Olayiwola M. O, Gbolagade A .W & Adesanya A. O*. Pages 205–210, Vol.16, (2010).
9. 3 Steps Continuous Block Predictor Corrector Method for the Solution of General Second Order Ordinary Differential Equation: *Adesanya A. Olaide, Odekunle M. Remilekun and Anake T. Ashibel*. Pages 477 – 482, Vol. 21 (2012).

ADESANYA S.O.
1. Existence of a secondary flow for a temperature dependent viscous couette flow: *S. O. Adesanya, O.J Fenuga, O. O. Otolorin*. Pages 257-260, Vol.10, (2006).
2. Second law analysis of a reacting temperature dependent viscous flow through an inclined channel with isothermal walls: *S. O Adesanya, R. A. Williams and R. O Ayeni*. Pages 549-556, Vol. 11. (2007).
3. Steady flow of reacting temperature-dependent fluid past an impulsively started porous vertical surface with Newtonian heating: *S. O. Adesanya, R. O. Ayeni*. Pages 221-226, Vol.13, (2008).
4. A numerical study of the hemodynamics of stenosed artery: *S. O Adesanya, S. O. Ajala and R. O. Ayeni*. Pages 513-522, Vol.15, (2009).

ADESHAKIN G.E
1. Surface Energy and Surface Stress of Deformed Metals: *Adeshakin G. E. and Osiele O. M*. Pages 421 – 428 Vol. 21 (2012).

ADESOLA ADEBISI W.
1. Uniqueness and asymptotic stability properties of the critical solution of the prey-predator retarded equation model: *Igobi, Dodi k. Egwurube, Mike O. Daniel Eni and Adebisi W. Adesola*. Pages 85–90, Vol.19, (2011).

ADESOLA T. O.
1. Coefficient Inequalities for Certain Classes of Analytic And Univalent Functions: *Oladipo A.T., Olatunji S.O. and Adesola T.O*. Pages 19-24, Vol.18, (2011).

ADETUNMBI A. O.
1. Comparative analysis of Rivest Shamir Adleman (RSA), Rabin and El Gamal public key cryptosystems: *M. S. Olajide, O. S. Adewale, B. K. Alese and A. O. Adetunmbi*. Pages 289-296, Vol.13, (2008).

ADEWALE O. S.
1. Comparative analysis of Rivest Shamir Adleman (RSA), Rabin and El Gamal public key cryptosystems: *M. S. Olajide, O. S. Adewale, B. K. Alese and A. O. Adetunmbi*. Pages 289-296, Vol.13, (2008).

ADEWALE T.A
1. On Optimal Design of a Low- Passage Active Filter Using Bessel Function Response: *T. A. Adewale and D. D. Abajingin*. Pages 295-308, Vol.5, (2001).
2. On the control of pure inertia plant using a hybrid of sequential variation of extremals and invariant costate imbedding algorithms: *T. A. Adewale, F. M. Aderibigbe*. Pages 285–296 , Vol.12, (2008).
3. On optimal design of low-pass electronic filter using Chebyshev polynomial response: *F. M. Aderibigbe and T. A. Adewale*. Pages 297-306, Vol.12, (2008).

ADEWOLE E. S.
1. Effects of Horizontal oil Drainhole Length on Wellbore Pressure in Stratified Reservoirs: *E. S. Adewole, B. M. Rai and T. O. K. Audu*. Pages 257-269, Vol.4, (2000).
2. The use of the Gauss- Legendre Quadrature in Solving Flow Problems in Reservoirs Containing Horizontal Wells: *E. S. Adewole, B. M. Rai and T. O. K. Audu*. Pages 89-100, Vol.5, (2001).
3. Pressure Drop Profile of an inverted Five-Spot Oil Production Pattern with a Horizontal Well Water Injector: *E. S. Adewole and B. M. Rai*. Pages 127-134, Vol.7, (2003).
4. Pressure Distribution in a Layered Reservoir with Lateral Wells: *E. S. Adewole, B. M. Rai and T. O. K. Audu*. Pages 135-146, Vol.7, (2003).
5. Pressure transient analysis of a horizontal well subject to four vertical well injectors: *E. S. Adewole and K .O. Bello*. Pages 75-82, Vol.8, (2004).
6. Pressure gradient and pressure derivative characteristics of a horizontal well subject to bottom water drive mechanism: *E. S. Adewole*. Pages 225–236, Vol. 12, (2008).
7. Instantaneous source functions of a 3D source subject to edge water drive mechanism: *E. S. Adewole*. Pages 423-430, Vol.13, (2008).
8. Well test analysis of horizontal wells in a two-layered reservoir system: Mathematical derivation: *E. S. Adewole*. Pages 181–188, Vol.14, (2009).
9. Weighting factor for instantaneous source functions of a permeable interface: *E. S. Adewole*. Pages 189–196, Vol.14, (2009).
10. Effects of both wellbore and reservoir properties on pressure and pressure derivative distribution of a horizontal well subject to complete external fluid drive: *E. S. Adewole*. Pages 189-196 , Vol.15, (2009).
11. The use of source and Green's functions to model pressure distribution in a bounded layered reservoir with lateral wells, Part II: General solutions: *E. S. Adewole*. Pages 197-204, Vol.15, (2009).
12. Compilation of Instantaneous Source Functions for Varying Architecture of a Layered Reservoir with Mixed Boundaries and Horizontal Well Completion Part I: Normal and Inverted Letter 'e' Architecture: *Adewole E.S. and Olafuyi O.A*. Pages 563-572, Vol.16, (2010).

13. Compilation of Instantaneous Source Functions for Varying Architecture of a Layered Reservoir with Mixed Boundaries and Horizontal Well Completion Part II: Normal and Inverted Letter 'P' Architecture: *Adewole E.S. and Rai B.M*. Pages 573-578, Vol.16, (2010).
14. Compilation of Instantaneous Source Functions for Varying Architecture of a Layered Reservoir with Mixed Boundaries and Horizontal Well Completion Part III: B-Shaped Architecture with Vertical Well in the Upper Layer: *Adewole E.S*. Pages 53-62, Vol.17, (2010).
15. Compilation of Instantaneous Source Functions for Varying Architecture of a Layered Reservoir with Mixed Boundaries and Horizontal Well Completion Part IV: Normal and Inverted Letter 'h' and 'H' Architecture: *Adewole E.S*. Pages 63-68, Vol.17, (2010).
16. Comparison Between Laminar and Turbulent Flow in a Single Phase Horizontal Pipe Gas Flow: *Okpoye N., Olafuyi O. A., Adekomaya O. and Adewole E. S*. Pages 343–350, Vol.19, (2011).
17. Optimization of Gas Flow Network using the Traveling Salesman And the Nearest Neighbors Algorithms: *Onwuachi-Iheagwara P. N. and Adewole E. S*. Pages 433–438, Vol.19, (2011).

ADEWOLE S. O.
1. Unsteady Magneto-Hydrodynamic (MHD) flow of a uniformly stretched vertical permeable surface I in the presence of heat generation/absorption and a first order chemical: *A. M. Okedoye, T. Adeniran, S. O. Adewale and R. O. Ayeni*. Pages 503-510, Vol.10, (2006).
2. Comparative analysis of Rivest Shamir Adleman (RSA), Rabin and El Gamal public key cryptosystems: *M. S. Olajide, O. S. Adewale, B. K. Alese and A. O. Adetunmbi*. Pages 289-296, Vol.13, (2008).
3. Effect of transmission rate in an SIR epidemic model: *R.O.Ayeni, O.Adebimpe, T.O.Oluyo, S.O.Adewale, A.O.Popoola and A.W.Ogunsola*. Pages 157-164, Vol.17, (2010).

ADEYEFA E. O.
1. A Continuous formulation of some classical initial value volvers by non-Perturbed multistep collocation approach using Chebyshev polynomials as basis functions: *R. B. Adeniyi, E. O. Adeyefa and M. O. Alabi*. Pages 261-274, Vol.10, (2006).

ADEYEYE F. J.
1. Simple Algorithm for the Generation of Adomian Polynomial: *Adeyeye F. J., Ibijola E. A. and Skwame. Y*. Pages 393 – 398, Vol. 22, (2012).

ADEYEMO O.
1. Effects of Variable Viscosity on Flow Over A Porous Wedge: *Ajala O. A, Adeyemo O., Adebimpe O. and Araromi A. A*. Pages 255–258, Vol.19, (2011).

ADEYEMO H. PRAISE
1. On the isomorphism of aut ( ), U-group U (n) and permutation group U(n): *H. Praise Adeyemo*. Pages 31-34 , Vol.13, (2008).
2. On the group structure and root system of SLn over a field: *H. Praise Adeyemo*. Pages 1-4, Vol.15, (2009).

ADIGUN A. A.
1. Unsteady Free Convective Flow of Sisko Fluid with Radiative Heat Transfer Past a Flat Plate Moving Through a Binary Mixture Olanrewaju: *P. O., Adeleke O. J., Adigun A.A., Fenwa O.D., Oke A., and Ajala Funmi*. Pages 443 – 454, Vol. 22 (2012).

ADULOJU K. A.
1. Optmizied random phase approximation for the phase diagram of C60 material: *F. Matthew-Ojelabi and K. A. Aduloju*. Pages 21-26, Vol.10, (2006).
2. Pack nitriding of aluminium using cassava waste: *M. B. O. Shitta, A. K. Aladenika, K. A. Aduloju*. Pages 277-280, Vol.15, (2009).

AFERE B. A.
1. On the generalized optimal bandwidth for multivariate higher-order nonsymmetic kernels: *Afere B. A. and Oyegue F. O*. Pages 195 – 198, Vol. 22 (2012).

AGAM S. A.
1. A Perturbed Fourth Order Runge-Kutta Method for First Order Ordinary Differential Equations: *S. A. Agam and P. O. Odion*. Pages 143–148, Vol.19, (2011).
2. A Perturbed Runge-Kutta Method for Solution of Second Order Differential Equations: *S. A. Agam and P. O. Odion*. Pages 323 – 328, Vol. 21, (2012).

AGANWONYI T. E.
1. Design and Construction of Oil Fired Compact Crucible Furnace: *Oyawale F. A., Odior A. O. and Aganwonyi T. E*. Pages 537–548, Vol.18, (2011).

AGBA E. H.
1. A review of 20Ne structure in a full microscopic self-consistent shell–model calculation with tensor correlations: *J. O. Fiase, H. E Agba, A. A. Akombor and Frederick Gboarun*. Pages 63-68, Vol.8 (2004).
2. Assessment of water quality of Ikpoba River, Benin City using D.C. conductivity: *E. O. Aiyohuyin and E. H. Agba*. Pages 435–438 Vol.14, (2009).

AGBI J. I.
1. Analytic functions for calculating binary alloys of FCC metals: *D. D. Abajingin, J. I. Agbi, J. O. A. Idiodi*. Pages 435-444, Vol.11, (2007).

AGBOLUAJE B. A.
1. Depth Estimation of Aeromagnetic Data of Gombe, North Eastern Nigeria, using the Method of Analytic Signal: *V.C. Ozebo, J.A. Olowofela and B.A Agboluaje*. Pages 373 – 380 Vol. 21, (2012).

AGBO JONAS U.
1. Variation in Primary Radioclimatic Variables, And Its Effects on Radio Signal Propagation at the Lower Troposphere: *Agbo Jonas U. and Nweke F. U*. Vol.20, Pages 309–314, (2004).

AGBOLADE O.A.
1. On The Solution of Some Ordinary Differential Equations Using Adomian Decomposition Method: *Abiala I.O. and Agbolade O.A*. Pages 385 – 392, Vol. 22, (2012).

AGBOOLA D.
1. Solutions to Molecular Vibration Potentials in D-dimensions using the Asymptotic Iteration Method: *D. Agboola*. Pages 439-446, Vol.17, (2010).

AGHEMENLOH E.
1. Equivalent–Crystal Theory of FCC Metal Surfaces: *E. Aghemenloh and J. O. A. Idiodi*. Pages. 271-284, Vol.2, (1998).
2. On the Problem of Low Surface Energies within the embedded Atom Method: *J. O. A. Idiodi and E, Aghemenloh*. Pages 285-296, Vol.2, (1998).
3. Implementation of Equivalent Crystal Theory within a generalized embedded-Atom Method: *J. O. A. Idiodi and and E. Aghemenloh*. Pages 167-178, Vol.3, (1999).
4. Application of Equivalent Crystal Theory to BCC Metal Surfaces: *E. Aghemenloh and J. O. A. Idiodi*. Pages 101-114, Vol.5, (2001).
5. Application of Equivalent Crystal Theory to BCC Metal Surfaces: Surface Relaxation Calculation: *E. Aghemenloh and J. O. A. Idiodi*. Pages 253-270, Vol.6, (2002).
6. On strongly correlated N-electron systems: *E. A. Enaibe, J. O. A. Idiodi, G. E. Akpojotor, E. Aghemenloh and J. O. Fiase*. Pages 337-340 , Vol.8, (2004).
7. On Recent Developments on the Embedded Atom Method: *A. A. Oni-Ojo and J. O. A. Idiodi and E. Aghemenloh*. Pages 507-512. Vol.9, (2005).
8. Towards a Self Consistent Embedding Function for Lithium: *E. Aghemenloh and S. O. Azi and J. O. A. Idiodi*. Pages 513-518, Vol.9, (2005).
9. Analytical EAM alloy models for FCC metals: *S. O. Azi1, E. Aghemenloh and J. O. A. Idiodi*. Pages 429-434, Vol.11, (2007).
10. A comparative study of two different embedding functions: *S. O. Azi, E. Aghemenloh, and J. O. A. Idiodi*. Pages 517-524, Vol.12, (2008).
11. Surface energy calculation of fcc metals using the new analytical algorithm for equivalent crystal theory: *S. Yusuf, E Aghemenloh J O A Idiodi*. Pages 57-68, Vol.16, (2010).
12. Magnetic Phase Transition In CeNixCu1-X Alloys A Kondo Model Study: *S. Okunzuwa, E. Aghemenloh, B. E. Iyorzor*. Pages 509 – 516 Vol. 21 (2012).

AGHOGHOPHIA K. D.
1. Heat and mass transfer in the unsteady hydromagnetic free-convection flow in a rotating binary fluid I: *M. A. Alabraba1, Ojo Aghoghophia, K. D. Alagoa*. Pages 533-543, Vol.11, (2007).

AGU M. N.
1. Optimization of the Stability Margin for Nuclear Power Reactor Design Models Using Regression Analyses Techniques: *Oludare A.I., Agu M.N. and Akusu P.O*. Pages 327 – 334, Vol. 22, (2012).

AGUNBIADE D. A.
1. Effective utilization of weighting adjustment for the estimates of means in survey non-response: *O. R. Oniyide and D. A. Agunbiade*. Pages 447-452, Vol.10, (2006).

AGUSTO F. B.
1. On the Existence and Uniqueness of self Similar Diffusion Equations: *R. O. Ayeni and F. B. Agusto*. Pages 183-186 , Vol.4, (2000).

AGWUEGBO S. O. N.
1. Hierarchical Structured Model for Nonlinear Dynamical Processes: *Agwuegbo S.O.N, SolarinS A.R.T, Asiribo, O.E*. Pages 15–20, Vol.19, (2011).

AIGBEKAEN E. E.
1. Investigation of beta dielectric dispersion in Bovine yellow bone marrow tissue: *O. D. Osahon and E. E. Aigbekaen*. Pages 461-466, Vol.11, (2007).
2. A geoelectrical investigation for ground water at Ivorri–Irri in Isoko South Local Government Area of Delta State: *E. Eddy Aigbekaen and Fidelia Ighrakpata*. Pages 261–266, Vol.12, (2008).

AIGBOGUN C. O.
1. An investigation of groundwater condition in Agbede by Geelectrical resistivity method: *Otobo Egwebe and S. O. Ifedili and C. O. Aigbogun*. Pages 71-76, Vol.10, (2006).
2. Geophysical study of the aquifer characteristics along River Niger, Delta State, Nigeria: *Otobo Egwebe and C. O. Aigbogun*. Pages 387-392, Vol.11, (2007).
3. Geoelectrical study for ground water in waste dump sites: A case study of Warri and its environ, Delta State, Nigeria: *Otobo Egwebe, and C.O Aigbogun*. Pages 245–250, Vol.12, (2008).

4. Aquifer Characterization In Ugha And Ehor Environs, Edo State, Nigeria Using Vertical Electrical Soundings: *C.O. Aigbogun, S. O. Azi, J. C. Egbai*. Pages 35–38, Vol.17, (2010).
5. Geoelectric Investigation for the Delineation of the Subsurface in Ologbo and Ajoki, Edo State: *C.O. Aigbogun and B. O. Eromosele*. Pages 329–334, Vol.19, (2011).
6. Geoelectric estimation of aquifer parameters in the Southern part of Edo State, Nigeria: *Aigbogun C.O. and Osarenren U.O*. Pages 355 – 360 Vol. 21 (2012).

AIGBODION D.O
1. Optimal Design of Three Phase Induction Motor Using Geometric Programming Optimisation Approach: *Ubeku, E.U, Orukpe, P.E and Aigbodion D. O*. Pages 47 - 52 Vol. 21 (2012).

AIHIE V.U
1. Generating semi-Gaussian Two-Dimensional Quadrature Rules: *V. U. Aihie and G. A. Evans*. Pages 137-148, Vol.4, (2000).
2. Another Numerical Method for Linear Integral Equation: *V. U. Aihie*. Pages 71-78., Vol.5, (2001).
3. Comment on Computation of Oscillating Integrals: *V. U. Aihie*. Pages 337-342., Vol.9, (2005).
4. A generalised interpolating post–processing method for integral equation: *V. U. Aihie*. Pages 399-402, Vol.10, (2006).
5. Further implications of the quick evaluation of determinants: *V. U. Aihie*. Pages 413–416, Vol.12, (2008).
6. Application of the decomposition method to the solution of integral equation with Cauchy Kernel: *V. U. Aihie*. Pages 41–44, Vol.14, (2009).
7. Series solution of singular integral equations: *V. U. Aihie*. Pages 45–48, Vol.14, (2009).
8. Investigating The Travelling Wave Solution For an SIR Endemic Disease Model With No Disease Related Death (When The Spatial Spread Of The Susceptible Is Not Negligible): *Olowu O.O and Aihie V. U*. Pages 165-170, Vol.17, (2010).

AIYESIMI Y.M
1. The Dynamic Analysis of an Elastic plate with point-moving load: *Y. M. Aiyesimi*. Pages 249-257, Vol.3, (1999).
2. Dynamic analysis of a thermal–induced stress in an elastic circular plate: *Y. M Aiyesimi*. Pages 57-60, Vol.8, (2004).
3. The Mathematical modelling of environmental pollution using the Freundlich non-linear contaminant transport formulation: *Y. M Aiyesimi*. Pages 83-86, Vol.8, (2004).
4. Dynamic analysis of a Bernoulli-Euler beam via the Laplace transformation technique: *M. Jiya, Y. M. Aiyesimi, and A. A. Mohammed*. Pages 203-210, Vol.10, (2006).
5. Mathematical Analysis of the Dynamics of a 3 mass-spring system with connecting dashpot topology having unequal coupled masses: *Aiyesimi Y.M and Makinde Sijuola Oladapo*. Pages 535 – 542, Vol. 22 (2012).
6. Computational Analysis of a one-dimensional nonlinear reactive contaminant flow with an initial continuous point source: *homotopy-perturbation method. Aiyesimi Y. M. and Jimoh O. R*. Pages 543 – 546, Vol. 22 (2012).

AIYOHUYIN E. O.
1. A Hamiltonian for Superconductors: *E.O. Aiyohuyin, A. Maduemezia, G.K. Oyanna*. Pages 29-31, Vol.1, (1992).
2. Anisotropy in Nuclear Relaxation rate of Copper: *E.O. Aiyohuyin*. Pages 267-270, Vol.2, (1998).
3. Spin Density In Cu2O Plane of YBa2Cu3O7 Probed by Cu NMR Measurements: *E.O. Aiyohuyin*. Pages 115-120, Vol.3, (1999).
4. The ground state of the Hubbard model: *E.O. Aiyohuyin, A.A. Oni-Ojo*. Pages 501-504, Vol.11, (2007).
5. Testing Mulliken approximation using hydrogen atom: *E. O. Aiyohuyin and Amen A. Oni-Ojo*. Pages 505-508, Vol.11, (2007).
6. Embedded atom method for materials with a negative Cauchy discrepancy: *A. A. Oni-Ojo, J. O. A. Idiodi and E. O. Aiyohuyin*. Pages 509-515, Vol.11, (2007).
7. Assessment of water quality of Ikpoba River, Benin City using d.c. conductivity: *E. O. Aiyohuyin and E. H. Agba*. Pages 435–438 Vol.14, (2009).
8. Gutzwiller Renormalization Factors for the t-J model: *Aiyohuyin E. O. and Amen Oni-Ojo*. Page 227–230 Vol.20, (2012).
9. Transformation of the Hubbard Hamiltonian to the t-J Hamiltonian using the Raleigh- Schrodinger Perturbation Expansion: *E.O. Aiyohuyin, F.O. Ezomo and Amen Oni-Ojo*. Pages 231–234, Vol.20, (2012).

AJADI D.A
1. Temperature and velocity profile on thermal ignition in a reactive variable viscosity poiseuille flow: *P. O. Olanrewaju, A. Falohun, D. A. Ajadi, and R. O. Ayeni*. Pages 405-410, Vol.13, (2008).

AJALA A.O
1. On the existence and uniqueness result for a two-step reactive-diffusive equation with variable pre-exponential factor: *P. O. Olanrewaju, R. O. Ayeni, A. O. Ajala, O. Adebimpe, and A. O. Ajayi*. Pages 403-408, Vol.10, (2006).
2. Effect of power-law exponent in endothermic reactions: *O. T. Lamidi, A. O. Ajala, A. M. Okedoye and R. O. Ayeni*. Pages 227-230, Vol.13, (2008).
3. MHD free convection flow past an oscillating plate in the presence of heat generation/absorption and chemical reaction: *A. M. Okedoye and A.O. Ajala*. Pages 491-500, Vol.15, (2009).
4. Effects of Variable Viscosity on Flow Over A Porous Wedge: *Ajala O. A, Adeyemo O., Adebimpe O. and Araromi A. A*. Pages 255–258, Vol.19, (2011).

AJALA FUNMI

1. Unsteady Free Convective Flow of Sisko Fluid with Radiative Heat Transfer Past a Flat Plate Moving Through a Binary Mixture: *Olanrewaju P. O., Adeleke O. J., Adigun A.A., Fenwa O.D., Oke A., and Ajala Funmi*. Pages 443 – 454, Vol. 22 (2012).

AJALA S.O

1. Diffeomorphism groups of connected sum of three products of spheres: *Samuel Omoloye Ajala*. Pages 39-46, Vol.11, (2007).
2. Subgroups of Group of homotopy spheres: *Samuel Omoloye Ajala*. Pages 47-50, Vol.11, (2007).
3. A numerical study of the hemodynamics of stenosed artery: *S. O Adesanya, S. O. Ajala and R. O. Ayeni*. Pages 513-522, Vol.15, (2009).
4. Effect of couple stresses on hydromagnetic flow of blood through a stenosed coronary artery: *S. O Adesanya, S. O. Ajala and R. O. Ayeni*. Pages 523-532, Vol.15, (2009).
5. Normalizer of Subloops: *Samuel Omoloye Ajala*. Pages 13-14, Vol.17, (2010).
6. The Derivatives of Moufang loops: *David Joel Mengue Mengue and Samuel Omoloye Ajala*. Pages 33–36, Vol.19, (2011).

AJAYI A.O

1. On the existence and uniqueness result for a two-step reactive-diffusive equation with variable pre-exponential factor: *P. O. Olanrewaju, R. O. Ayeni, A. O. Ajala, O. Adebimpe, and A. O. Ajayi*. Pages 403-408, Vol.10, (2006).

AJAYI D.O

1. On the Application of Lyapunov's Theorem of Stability To the Convergence of the Reduced Gradient Method for Optimization Problems with Equality Constraints: *I. N. Njoseh, P. N. Okonta and D. O. Ajayi*. Pages 273-278, Vol.5, (2001).

AJAYI N.O

1. Theoretical model analysis of molecular orientations in liquid protein dielectrics: *A. A. Laogun and N. O Ajayi*. Pages 15-20, Vol.10, (2006).

AJIBADE B. F.

1. Analysis of Unbalanced Fixed-Effect Non- Interactive Model: An Intra-Factor Approach: *Ochei L.S, Eze F.C. and Ajibade B. F*. Pages 199 – 206, Vol. 22 (2012).

AJIBADE I. I.

1. On the Modified Embedded Atom Method for Strontium: A New Algorithmic Approach: *Matthew-Ojelabi F., Idiodi J. O. A., Ajibade I. I. and Enoch O*. Pages 35 – 42, Vol. 22 (2012).

AJIBOLA S.A

1. Functorial Localization Formula on Mirror Principles: *Raji M. Tayo And Ajibola S. A*. Pages 13-18, Vol.18, (2011).
2. Harmonic Function of Poincare Cone Condition In Solving Dirichlet Problem: *Raji M. T, Adejumobi C. A and Ajibola S. A*. Pages 17-22, Vol.20, (2012).

AJIBOLA S.O

1. On the Transverse Motions Under Heavy Loads of Thin Beams with Variable Prestress: *B. Omolofe, and S. O. Ajibola*. Pages 127-142. Vol. 9, (2005).
2. Viscous dissipative heat effect on radiative magnetic flow of an electrolyte in a vertical channel: *S. O. Ajibola*. Pages 191–200, Vol.12, (2008).
3. Motion of Moving Concentrated Loads on a Simply-Supported Non-Uniform Rayleigh Beam with Non-Classical Boundary Conditions: *S.T. Oni and S.O .Ajibola*. Pages 45-62, Vol.18, (2011).
4. Transverse Displacement of Clamped-Clamped Non-Uniform Rayleigh Beams Under Moving Concentrated Masses Resting on a Constant Elastic Foundation: *S.O.Ajibola*. Pages 63-82, Vol.18, (2011).
5. Exact Vibration Solution for initially stressed Beams resting on Elastic Foundation and subjected to partially distributed masses: *B. Omolofe, A. Adedowole, S.O. Ajibola and Jimoh Ahmed*. Pages 91-98, Vol.18, (2011).

AJISOPE M.O

1. Control derivative to optimal control analysis: *J. O. Omolehin, K. Rauf, M. O. Ajisope, M. A. Mabayoje and L. B. Asaju*. Pages 399-404, Vol.15, (2009).

AKANINYENE ANTIA D.

1. Trajectory Coherent State and Coherent State For The Modified Caldirola-Kanai Oscillator: *Akpan. N. Ikot, Louis E. Akpabio, Edet J.Uwah and Akaninyene D. Antia*. Pages 15–20, Vol.17, (2010).
2. Langmuir Wave Instability And Photoelectron Emission In Irradiated Dusty Plasmas: *Louis E. Akpabio, Akpan N. Ikot and Akaninyene D. Antia*. Pages 99-102, Vol.17, (2010).

AKEREMALE O.C

1. Augmented Lagrangian Method For Discretized Optimal Control Problems: *Olotu, O and Akeremale, O.C*. Pages 185–192, Vol.20, (2012).

AKEWE HUDSON

1. Stability Results for Multistep Iteration Satisfying a General Contractive Condition of Integral Type in a Normed Linear Space: *Hudson Akewe and Godwin Amechi Okeke*. Pages 5–12, Vol.19, (2011).
2. On the equivalence of some iteration schemes for a class of quasi-contractive operators: *Hudson Akewe and Mary Odumosu*. Pages 397-404, Vol.13, (2008).

AKHAZE R. U.
1. Qualitative Study of a Cholera Model: *Oghre E. O. and Akhaze R. U*. Pages 487 – 494, Vol. 22 (2012).

AKHIREVBULU O.E
1. Petroleum Potentials and Well Log Evaluation from Niger Delta Basin: *Eshimokhai S., Osueni L. and Akhirevbulu O.E*. Pages 157–164, Vol.18, (2011).

AKINFENWA O.A
1. On an improved convergence rate estimate obtained by Liwei Liu: *A. A Mogbademu and O. A. Akinfenwa*. Pages 13–16, Vol.12, (2008).

AKINLUYI F.O
1. Improvisation of Laboratory Power Supply for Powering Laboratory Electronic Instruments: *Adenodi, R. A., Iwetan, C. N., Akinluyi, F. O. and Oketayo, O. O*. Pages 219-224, Vol. 21, (2012).

AKINMOYEWA J.T
1. On Some Algebraic Properties of Generalized Groupd: *J.O. Adeniran; J.T. Akinmoyewa, A.R.T. Solarin and T.G. Jaiyeola*. Pages 401-406, Vol.16, (2010).

AKIN-OJO R.
1. On Quantum Chaos: *R. Akin-Ojo*. Pages 33-38, Vol. 1, (1992).
2. Modelling chaotic Hamiltonian systems as a Markov Chain: *Oyebola Olubusoye Popoola and R. Akin-Ojo*. Pages 199-202, Vol.8, (2004).

AKINPELU F.O
1. The Frequency Equation to Determine the Eigenvalue of a Clamped-clamped Uniform Timoshenko Beam: *F. O. Akinpelu*. Pages 473-478, Vol.9, (2005).
2. Application of homotopy perturbation method for the large angle period of a nonlinear oscillator: *M. O. Olayiwola, A. W. Gbolagade, A.O. Adesanya and F. O. Akinpelu*. Pages 235–238, Vol.14, (2009).
3. Numerical Solutions of Generalized Burger's-Huxley Equation by Modified Variational Iteration Method: *Olayiwola M.O, Gbolagade A .W & Akinpelu F. O*. Pages 433-438, Vol.17, (2010).
4. Response under a Moving Load of an Elastically Supported Euler- Bernoulli Beam on Pre-Stressed and Variable Elastic Foundation: *F.O Akinpelu, I. A. Idowu, and R.A Mustapha*. Pages 519 – 534, Vol. 22 (2012).

AKINRELERE E.A
1. One Dimensional Viscoelastic Model of Arterial Blood Flow: *Emmanuel O. Oghre and E. A. Akinrelere*. Pages 95 - 106, Vol. 2, (1998).

AKINRIMISI J.
1. A Simple Correction to Absorption Theory in the Region of Quasi-Transverse Propagation of Radio Waves Through the Ionosphere: *O. S. Oyekola, E. E. Iheonu, and J. Akinrimisi*. Pages 233-238, Vol.6, (2002).

AKINTEWE B.N
1. On the steady state temperature profiles of biological tissues during microwave heating: *F. A. Adebile and B. N. Akintewe*. Pages 223-228, Vol.10, (2006).
2. Self-similar solution for coupled thermal electromagnetic model during microwave heating of biological tissues: *E. A. Adebile, B. N. Akintewe, O. K. Olaleye, and V. Idoko*. Pages 229-234, Vol.10, (2006).
3. A coupled mathematical model for a temperature dependant blood perfusion in a homogenous biological tissue during microwave heating: *E. A. Adebile, B. N. Akintewe. and K. M. Owolabi*. Pages 183-188, Vol.13, (2008).

AKOMBOR A.A
1. A review of 20Ne structure in a full microscopic self-consistent shell–model calculation with tensor correlations: *J. O. Fiase, H. E Agba, A. A. Akombor and Frederick Gboarun*. Pages 63-68 Vol.8, (2004).
2. A Mass-Dependent Effective Interaction for Shell-Model Calculations Derived for the fp Shell: *J.O. Fiase, and K. Ibikunle, and A. A. Akombor*. Pages 53-62, Vol.7, (2003).

AKPABIO G.T
1. Relative deviation between a uniformly weighted propagator and windowed propagator of a simple Harmonic Oscillator–2: *E. E. Ituen, G. T Akpabio and A. A. Okon*. Pages 13-18, Vol.8, (2004).

AKPABIO L.E
1. Lifetimes of Precipitating Ionospheric Electron Beams: *B. Chike-Obi, S. Salihu Duwa and L. E. Akpabio*. Pages 67-72, Vol.4, (2000).
2. Excitation of low-frequency electrostatic instability on the auroral field lines due to precipitation electron beam: *L. E. Akpabio and E. J. Uwah*. Pages 607-610, Vol.10, (2006).
3. Trajectory Coherent State and Coherent State For The Modified Caldirola-Kanai Oscillator: *Akpan. N. Ikot, Louis E. Akpabio, Edet J.Uwah and Akaninyene D. Antia*. Pages 15–20, Vol.17, (2010).
4. A Comparative Study on Lognormal and Gamma Distributions for Life and Reliability of Kamag Machine: *Louis E. Akpabio, Akpan N. Ikot, Akpan B. Udoimuk And Sunday E. Etuk*. Pages 87-94, Vol.17, (2010).
5. Collisional Effect On Magnetosonic Solitons In A Dusty Plasma Slab: *Louis E. Akpabio, Akpan N. Ikot, Akpan B. Udoimuk And Sunday E. Etuk*. Pages 95-98, Vol.17, (2010).
6. Langmuir Wave Instability And Photoelectron Emission In Irradiated Dusty Plasmas: *Louis E. Akpabio, Akpan N. Ikot and Akaninyene D. Antia*. Pages 99-102, Vol.17, (2010).

AKPAN B.UDOIMOK

1. A Comparative Study on Lognormal and Gamma Distributions for Life and Reliability of Kamag Machine: *Louis E. Akpabio, Akpan N. Ikot, Akpan B. Udoimuk And Sunday E. Etuk*. Pages 87-94, Vol.17, (2010).
2. Collisional Effect On Magnetosonic Solitons In A Dusty Plasma Slab: *Louis E. Akpabio, Akpan N. Ikot, Akpan B. Udoimuk And Sunday E. Etuk*. Pages 95-98, Vol.17, (2010).

AKPAN IKOT N.

1. Trajectory Coherent State and Coherent State For The Modified Caldirola-Kanai Oscillator: *Akpan. N. Ikot, Louis E. Akpabio, Edet J.Uwah and Akaninyene D. Antia*. Pages 15–20, Vol.17, (2010).
2. A Comparative Study on Lognormal and Gamma Distributions for Life and Reliability of Kamag Machine: *Louis E. Akpabio, Akpan N. Ikot, Akpan B. Udoimuk And Sunday E. Etuk*. Pages 87-94, Vol.17, (2010).
3. Collisional Effect On Magnetosonic Solitons In A Dusty Plasma Slab: *Louis E. Akpabio, Akpan N. Ikot, Akpan B. Udoimuk And Sunday E. Etuk*. Pages 95-98, Vol.17, (2010).
4. Langmuir Wave Instability And Photoelectron Emission In Irradiated Dusty Plasmas: *Louis E. Akpabio, Akpan N. Ikot and Akaninyene D. Antia*. Pages 99-102, Vol.17, (2010).

AKPAN U.D

[1] Mathematical model for flow around two-dimensional aerofoils at small angles of attack: *U. D. Akpan and A. E. Eyo*. Pages 179-182, Vol.13, (2008).

AKPOBI J.A

1. A 2-dimensional finite element simulation of cooling in castings: *John A. Akpobi and Imafidon A. Lawani*. Pages 47-58, Vol.10, (2006).
2. Fairing NURBS curve by dual parameter optimization: *John A. Akpobi and Ufuoma D. Egbedi*. Pages 275-292, Vol.10, (2006).
3. A Genetic algorithm for evaluating the zeros (roots) of polynomial functions, optimizing and solving n-dimensional systems of equations: *J. A. Akpobi and E. D. Akpobi*. Pages 213-222, Vol.11, (2007).
4. Finite element solution of the Boussinesq wave equation: *J A. Akpobi and E. D. Akpobi*. Pages 223-238, Vol.11, (2007).
5. Radial flow of slightly compressible fluids: A finite element-finite difference approach: *J. A. Akpobi and E. D. Akpobi*. Pages 179–190, Vol.12, (2008).
6. Application of finite element-eigenvalue method in the determination of transient temperature field in functionally graded materials: *J. A. Akpobi and C. O. Edobor*. Pages 207–224, Vol.12, (2008).
7. Analysis of temperature distribution in a heat conducting fiber with convection losses using finite element method: *M. H. Oladeinde and J. A. Akpobi*. Pages 311–324, Vol.14, (2009).
8. Neuro - Fuzzy Analysis for Silicon Carbide Abrasive Grain Production: *A.O. Odior F. A. Oyawale J. A. Akpobi and E.S. Orsharh*. Pages 591-596, Vol.16, (2010).
9. Numerical Modeling of a Rayleigh Step and Multi Step Slider Bearings using Finite Difference Method: *Oladeinde M.H and Akpobi J.A*. Pages 103-108, Vol.17, (2010).
10. Hydrodynamic Lubrication Analysis Of Slider Bearings Lubricated With Micropolar Fluids: *Oladeinde M.H and Akpobi J.A*. Pages 109-114, Vol.17, (2010).
11. Analysis of Tube Drawing Process – A Finite Element Approach: *Oladeinde, M.H and Akpobi. J.A*. Pages 549–554, Vol.18, (2011).
12. Robust Stabilization of Jet Engine Compressor In The Presence of Noise and Unmeasured States: *Mobolaji H. Oladeinde, Aloagbaye I. Momodu, and John A. Akpobi*. Pages 575–588, Vol.18, (2011).

AKPOBI E.D

1. A Genetic algorithm for evaluating the zeros (roots) of polynomial functions, optimizing and solving n-dimensional systems of equations: *J. A. Akpobi and E. D. Akpobi*. Pages 213-222, Vol.11, (2007).
2. Finite element solution of the Boussinesq wave equation: *J A. Akpobi and E. D. Akpobi*. Pages 223-238, Vol.11, (2007).
3. Radial flow of slightly compressible fluids: A finite element-finite difference approach: *J. A. Akpobi and E. D. Akpobi*. Pages 179–190, Vol.12, (2008).

AKPOCHAFO W.P

1. Authorship Characteristics of The Journal of The Nigerian Association of Mathematical Physics (JNAMP): *Evelyn A. Omoluabi Idiodi And W. P. Akpochafo*. Pages 485–490, Vol.20, (2012).

AKPOJOTOR F.A

1. The Ising Model on the Bethe Lattice: *Akpojotor F.A., Babalola M.I. and Idiodi J.O.A.* Pages 43 – 48, Vol. 22 (2012).

AKPOJOTOR GODFREY E.

1. On strongly correlated N-electron systems: *E. A. Enaibe, J. O. A. Idiodi, G. E. Akpojotor, E. Aghemenloh and J. O. Fiase*. Pages 337-340, Vol.8, (2004).
2. Effective valence as the control parameter of the superconducting iron pnictide Tc: *Godfrey E. Akpojotor*. Pages 297-304, Vol.15, (2009).
3. A Pedagogical Study of the Oyibo's Grand Unification Theorem With Realization of Some Standard Equations: *Godfrey E. Akpojotor and Myron W. Echenim*. Pages 447-456, Vol.17, (2010).
4. 100 Years of Superconductivity: The Past, The Present And The Future Quest for a Generalized Theory: *Godfrey E. Akpojotor*. Pages 623–630, Vol.19, (2011).

AKPOMEDAYE E.E

1. Model for structural defect characterization of metals based on positron beam technique: *O. M. Osiele and E. E. Akpomedaye*. Pages 217–222, Vol.14, (2009).

AKU M.O

1. Mathematical Model for Computation of Gravity Adjusted Observations: *M. O. Aku*. Pages 409-414, Vol.9, (2005).

AKUJIEZE C.N

1. Geophysical determination of buried structural features at Ovbiogie village, Edo State, Nigeria: *F. O. Ezomo and C. N. Akujieze*. Pages 177–180, Vol.14, (2009).
2. Geophysical Investigation of Ground-Water in Agbor Area of Delta State, Nigeria: *F. O. Ezomo and C. N. Akujieze*. Pages 597-602, Vol.16, (2010).
3. Geophysical Study of Lithologies Attributes At Isihor Village, Edo State, Nigeria: *Ezomo, F.O. And Akujieze C.N*. Pages 131-136, Vol.18, (2011).
4. Geophysical Study of Aquifer Properties at Isihor Village of Edo State, Nigeria: *Ezomo, F.O. And Akujieze C.N*. Pages 137–142, Vol.18, (2011).
5. Geophysical Exploration of Gravel Deposits in Abudu Area of Edo State, Nigeria: *F. O. Ezomo And C. N. Akujieze*. Pages 513–518, Vol.19, (2011).

AKUSU P.O

1. A Class of (2m+1) Degree Polynomials Derived Via the Generalized Optimization of the Binding Energy per Nucleon, B: *P.O. Akusu*. Pages 63-70, Vol.17, (2010).
2. A Study Of The Internal Energy And Magnetic Spin Susceptibility Of The 2-D Hubbard Model Representation Of High Temperature Superconductors Via An Exact-Approach: *P. O. Akusu*. Pages 7-16, Vol.16, (2010).
3. Optimization of the Stability Margin for Nuclear Power Reactor Design Models Using Regression Analyses Techniques: *Oludare A.I., Agu M.N. and Akusu P.O*. Pages 327 – 334, Vol. 22 (November, 2012)

AKWU ABOLAPE D.

1. On Certain Sufficient Conditions For A Function To Be Close-To-Convex Function: *Abolape D. Akwu, Monsurat A. Ganiyu, and Jimoh M*. Pages 505–510, Vol.20, (2012).

AKWUKWUMA V.V.N

1. An application of the maximal independent set algorithm to course allocation: *V. V. N. Akwukwuma and K. C. Ukaoha*. Pages 97-106, Vol.10, (2006).
2. Metric for Measuring Software Power: *Veronica V.N. Akwukwuma and Emmanuel E. Onibere*. Pages 353-358, Vol.17, (2010).
3. Software Power Metric Model: An Implementation: *Veronica V.N. Akwukwuma and Emmanuel A. Onibere*. Pages 429–434, Vol.18, (2011).

ALABA BUKOLA F

1. The Accuracy and Effectiveness of Search Method for Optimizing A Multivariable Unimodal Function: *Famutimi Alaba Bukola*. Pages 151–164, Vol.20, (2012).

ALABI O.O

1. The Bayesian perspective of some sample survey design in survey non-response: *O. R. Oniyide and O. O. Alabi*. Pages 455-460, Vol.12, (2008).
2. Modelling the Flow of Water in Stratified Layers of Sand: *O.I. Popoola, J.A. Adegoke and Alabi, O.O*. Pages 119-130, Vol.18, (2011).
3. Deflection range of water in heterogeneous permeable media: *Alabi O.O., Adelakun A. A. and Taiwo O. A*. Pages 349–352, Vol.20, (2012).

ALABI M.O

1. A Continuous formulation of some classical initial value solvers by non-Perturbed multistep collocation approach using Chebyshev polynomials as basis functions: *R. B. Adeniyi, E. O. Adeyefa and M. O. Alabi*. Pages 261-274, Vol.10, (2006).
2. A Chebyshev-collocation approach for a continuous formulation of hybrid methods for initial value problems in ordinary differential equations: *R. B. Adeniyi, M. O. Alabi and R.O. Folaranmi*. Pages 369-378, Vol.12, (2008).

ALABI O.M

1. Evaluation and Analysis of Frequency of Transformer Failures: *Igbinovia S.O, Alabi O.M and Igbinovia .N*. Pages 505-526, Vol.18, (2011).

ALABRABA M.A

1. Heat and mass transfer in the unsteady hydromagnetic free-convection flow in a rotating binary fluid I: *M. A. Alabraba1, Ojo Aghoghophia, K. D. Alagoa*. Pages 533-543, Vol.11, (2007).
2. Heat and mass transfer in the unsteady hydromagnetic free-convection flow in a rotating binary fluid II: *M. A. Alabraba, A. G. Warmate and C. Israel-Cookey*. Pages 169–178, Vol.12, (2008).

ALADENIKA A. K.

1. Pack nitriding of aluminium using cassava waste: *M. B. O. Shitta, A. K. Aladenika, K. A Aduloju*. Pages 277-280, Vol.15, (2009).

ALADESELU V.A

1. A family of block methods for special second order initial value problems [I.V.Ps]: *V. A. Aladeselu*. Pages 379-384, Vol.10, (2006).

2. Numerical integrators for Stiff and Stiff oscillatory First Order initial value problems: *V. A. Aladeselu*. Pages 385-390, Vol.10, (2006).
3. Improved family of block methods for special second order initial value problems [I.V.Ps]: *V. A. Aladeselu*. Pages 153-158, Vol.11, (2007).

ALAMINOKUMA G.I
1. Effects of noise-induced hearing loss within Port Harcourt metropolis, Nigeria: *V. B. Omubo-Pepple, C. Israel-Cookey, G. I. Alaminokuma*. Pages 439–448, Vol.14, (2009).

ALAO F.I
1. Sensitivity and error analysis of Blaney-Morin-Nigeria evapotranspiration model: *P. G. Oguntunde, by; F. I. Alao and A. A. Olufayo*. Pages 350-359, Vol.3, (1999).
2. Numerical Solution of a Reacting Viscous Problem: *F. I. Alao, R. O. Ayeni, and R. A. Ademiluyi*. Pages 187-200, Vol.4, (2000).
3. Existence and uniqueness for Self-similar Solutions for a Viscous Reacting Flow: *F. I. Alao and R. O. Ayeni*. Pages 177-184, Vol.5, (2001).
4. A new poof of multiple solutions of combustions problems: *R. O. Ayeni, A. M. Okedoye, F. O. Balogun, and F. I. Alao*. Pages 497-498, Vol.10, (2006).

ALESE B.K
1. Comparative analysis of Rivest Shamir Adleman (RSA), Rabin and El Gamal public key cryptosystems: *M. S. Olajide, O. S. Adewale, B. K. Alese and A. O. Adetunmbi*. Pages 289-296, Vol.13, (2008).

ALLENOTOR D
1. A Financial Option Model for Pricing Cloud Compute Resources: *D. Allenotor, I.O.Oseghale and R. K. Thulasiram*. Pages 237-252, Vol. 21, (2012).
2. A fuzzified user constraints framework for minning sequential patterns: *D. Allentor and C. Kai-Sang Leung*. Pages 319-326, Vol. 22, (2012).

ALILE O.M
1. Application of Dar Zarrouk parameters to evaluate aquifer transmissivity in Ekpoma, Edo State, Nigeria: *O. M. Alile and O. Ujuanbi*. Pages 239–248, Vol.14, (2009).
2. Effect of the variation of hollow core diameter in rectangular plain concrete beams: *O. M. Alile*. Pages 79–86, Vol.12, (2008).
3. Subsurface Geoelectrical Investigation of Groundwater Potential in Igieduma, South – Southern Nigeria: *Alile .M. Owens*. Pages 365 – 372 Vol. 21, (July, 2012).

ALOAGBAYE MOMODU I.
1. Robust Stabilization of Jet Engine Compressor In The Presence of Noise and Unmeasured States: *Mobolaji H. Oladeinde, Aloagbaye I. Momodu, and John A. Akpobi*. Pages 575–588, Vol.18, (2011).

ALUFOHAI I.C
1. The Construction of an automorphism with a continuous spectrum and no square root: *O. Izevbizua and I. C. Alufohai*. Pages 1-4, Vol.8, (2004).

AMADASUN C.V.O
1. An investigation of groundwater by geoelectrical resistivity method: A case study in Ugbogui, Ovia South West Local Government Area, Edo State: *A. G. Usifo, F. Esekhaigbe, C. V. O. Amadasun*. Pages 317–328, Vol.15, (2009).

AMADIN I.F
1. An empirical comparison of html, php, coldfusion, perl, asp.net, javascript, vbscript, pyton and jsp: *Amadin I.F. and Nwelih E*. Pages 381–388, Vol.18, (2011).

AMAH A.N
1. Simulation of Hamiltonian Function for Contaminant Fluid Flow: *I.M. Echi, A. N. Amah, and E. Anthony*. Pages 121 – 134 Vol. 21 (July, 2012).

AMALARE A.A
1. Likelihood Ratio Test as an Alternative to Chi-Square Test (Large Sample Approximation): *Amalare A.A, Nurudeen T.S, and Adeniyi M.O*. Pages 199-206, Vol. 21 (2012).

AMAR NATH SINGH
1. Ab initio and DFT study of Octanitrocubane: *Geh Wilson Ejuh, Ndjaka Jean Marie and Amar Nath Singh*. Pages 29-38, Vol.16, (2010).

AMEEN O.A
1. Effect of matrix transformation on minimization of quadratic functional: *J. O. Omolehin, M. K. A. Abdulrahman, K. Rauf and A. O. Ameen*. Pages 417-422, Vol.13, (2008).
2. Embedded confusion matrix in Fuzzy logic for system appraisal: *J.O. Omolehin, L. B. Asaju, M. Olagunju, A. O. Ameen and K. Rauf*. Pages 355-362, Vol.15, (2009).

AMINU ABDULHADI
1. Max-Linear Programming: Transformation From R⁻ To R: *A. Aminu*. Pages 215-222, Vol.17, (2010).
2. An Alternative to the Basket Weaving Method of Finding The Determinant of a Matrix: *Abdulhadi Aminu1, Abdulkadir Datti*. Pages 617–620, Vol.18, (2011).
3. A bi-diagonal method for finding the determinant of a matrix: *Abdulhadi Aminu, Abdulkadir Datti*. Pages 139–142, Vol.19, (2011).

4. Cayley-Hamilton theorem in rhotrix: *Abdulhadi Aminu*. Pages 43–48, Vol.20, (2012).
5. A determinant method for solving rhotrix system of equations: *Abdulhadi Aminu*. Pages 281 – 288 Vol. 21, (2012).
6. A note on the rhotrix system of equations: *Abdulhadi Aminu*. Pages 289 – 296 Vol. 21 (2012).
7. Erratum: Max-Linear Programming: Transformation From $\bar{R}$ To R [J. Nig. Assoc. Math. Phys. Vol. 17, 215 – 222 (2010)]: *A. Aminu*. Pages 579 - 586, Vol. 22, (2012).

AMINU L.
1. A Control Approach to the Existence and Uniqueness of Solution of Nuclear Reactor Safety Characterization: *Aminu L., Omolehin J. O. and Rauf K*. Pages 407 – 410, Vol. 22, (2012).
2. On the Model for Nuclear Safety Characterization from the Dynamical Structure of Reaction Diffusion Equation: *Omolehin J. O., Aminu L., Ejieji C. N., Enikuomehin A. O. and Fabiyi F. A. S*. Pages 411 – 418, Vol. 22, (2012).

AMURE A.O
1. Effect of Heat From Buried Metallic Object On Different Soil Textures: *V.C. Ozebo, J.A. Olowofela, R. Bello and A.O. Amure*. Pages 321–328, Vol.19, (2011).

AMUSEGHAN E.
1. Off-grid points exploitation in the development of more accurate collocation method for solving ODEs: *D. O. Awoyemi, R. A Ademiluyi and E. Amuseghan*. Pages 379-386, Vol.12, (2008).

ANAGBOGU I.U
1. Mathematical modelling of mortality rate of broiler chickens: *E. E. Joshua and I. U. Anagbogu*. Pages 439-442, Vol.12, (2008).

ANAKE T.A
1. Improved continuous method for direct solution of general second order ordinary differential equation: *A. O. Adesanya, T. A. Anake and M. O. Udoh*. Pages 59-62, Vol.13, (2008).
2. Continuous implicit method for the solution of general second order ordinary differential equations: *A. O. Adesanya, T. A. Anake and G. J. Oghoyon*. Pages 71-78, Vol.15, (2009).

ANAZIA C.O
1. Photovoltaics Application in Benin City: *Apeh S.T. and Anazia C.O*. Pages 413–422, Vol.19, (2011).
2. Solar Power System Source Versus Generator/PHCN Energy Supply Source for a 152-Unit Housing Estate in Warri, Nigeria: *Apeh S.T. and Anazia C.O*. Pages 423–432, Vol.19, (2011).

ANEKE J.S
1. Iterative methods involving composed operators of the accretive type: *S. J. Aneke*. Pages 29–32, Vol.12, (2008).
2. Some results on the generalized projection and asymptotic operators: *S. J. Aneke*. Pages 27-30, Vol.13, (2008).
3. A mathematical model for malaria treating both sensitive and resistant strains in a multigroup population: *Sylvanus Aneke*. Pages 493–500, Vol.14, (2009).

ANIAKU STEPHEN E
1. Relationships Between Controllable and Observable Matrices Which Ensure Controllable System to be Observable: *Stephen. E. Aniaku*. Pages 55–60, Vol.19, (2011).
2. Stabilizability For Nonlinear Systems That Admit Some Lyapunov-Like Functions: *S.E. Aniaku and P.C. Jackreece*. Pages 309 – 314 Vol. 21 (2012)

ANIMALU A.O.E
1. Non-Local Theory of Cooper pairing in High-Tc Superconductors: *A. O. E. Animalu, C. M. I Okoye and G. C. Asomba*. Pages, 297-311, Vol.2, (1998).
2. Unified Hamiltonian Model for Magnetism and Superconductivity in High-Tc Cuprate Systems: *G. C. Asomba and A. O. E Animalu*. Pages 121-135, Vol.3, (1999).
3. Analogy between the Standard Gauge Model of the Basic Forces and Hadronic Mechanics: *A. O. E. Animalu*. Pages 1-30, Vol.9, (2005).

ANIMALU C.N
1. An Exact Solution Of The Hubbard Hamiltonian Model For High Temperature Superconductors: *C.N. Animalu*. Pages 23-28, Vol.1, (1992).

ANJORIN A
1. Derivative of biconfluent Heun's equation from some properties of hypergeometric function: *A. Anjorin*. Pages 39-40, Vol.13, (2008).
2. Derivative of general Heun's equation from some properties of hypergometric functions via polynomial transformations of degrees 2,3,4,5 and 6: *A. Anjorin*. Pages 289–292, Vol.14, (2009).
3. Integral Solutions to Heun's Differential Equation via Some Rational Polynomial of Degree 2, 3,4,5,6 Transformation: *A. Anjorin*. Pages 391-394, Vol.16, (2010).
4. SUSY QM Factorization of General and Confluent Heun's Differential Operators: *A. Anjorin*. Pages 7-12, Vol.17, (2010).

ANOMOHANRAN C
1. The use of third degree polynomial for accurate conversion of seismic time to depth and vice versa: *Ochuko Anomohanran*. Pages 241-246, Vol.8, (2004).
2. Using the Linear Least Square Method in Determining the Relationship between Salinity, Electrical Conductivity, Density and pH for Water in Some Parts of Nigeria: *Ochuko Anomohanran*. Pages 415-424, Vol.9, (2005).

ANTHONY E

1. Simulation of Hamiltonian Function for Contaminant Fluid Flow: *I.M. Echi, A. N. Amah, and E. Anthony*. Pages 121 – 134 Vol. 21 (2012).

ANUKWU E.N

1. A Deterministic Approach to Noise Attenuation in Oil and Gas Seismic Data Acquisition: *Obinabo E. C. and Anukwu E. N*. Pages 563–568, Vol.18, (2011).

ANYAEJI C.A

1. Measurement of radio frequency radiation (RFR) power levels from some GSM base stations and phones: *O. D. Nworgu, C.A. Anyaeji, O.D. Osahon and E. Sekegor*. Pages 469–474, Vol.17, (2010).

ANYATA B.U

1. Predictions of Total Deformations in Jebba Main Dam by Finite Element Analysis Technique: *B. U. Anyata and. S. O. Osuji*. Pages 479-492, Vol.9, (2005).
2. Extended period simulation (EPS) modelling of urban water distribution network: *O. C. Izinyon and B. U. Anyata*. Pages 423–434, Vol.14, (2009).
3. Stochastic Analysis of Differential GPS Surveys for Earth Dam Deformation Monitoring: *J. O. Ehiorobo and B. U. Anyata*. Pages 311-320, Vol.17, (2010).
4. A Differential Equation for Downhill Compressible Flow in Pipes and Its Solution: *Ohirhian, P.U.and Anyata, B. U*. Pages 485–496, Vol.17, (2010).

APANAPUDOR J.S

1. On the Convergence of the Extended Conjugate Gradient Method for Discrete Optimal Control Problems (DOCP): *J. S. Apanapudor and F. O. Otunta*. Pages 493-500, Vol.9, (2005).
2. On the application of Discrete Time Optimal Control Concepts to Economic Problems: *J. S. Apanapudor*. Pages 493-502, Vol.16, (2010).

APEH S.T

1. Photovoltaics Application in Benin City: *Apeh S.T. and Anazia C.O*. Pages 413–422, Vol.19, (2011).
2. Solar Power System Source Versus Generator/PHCN Energy Supply Source for a 152-Unit Housing Estate in Warri, Nigeria: *Apeh S.T. and Anazia C.O*. Pages 423–432, Vol.19, (2011).
3. Development of an Automatic Outdoor Lighting Switch: *Ike, S. A and Apeh, S. T*. Pages 433 – 438 Vol. 21 (July, 2012).

ARAROMI A.A

1. Effects of Variable Viscosity on Flow Over A Porous Wedge: *Ajala O. A, Adeyemo O., Adebimpe O. and Araromi A. A*. Pages 255–258, Vol.19, (2011).

AREO E.A

1. Numerical Integration of Stiff System of Ordinary Differential Equations with a New K-step Rational Runge-Kutta Method: *P.O. Babatola, R.A Ademiluyi and E.A Areo*. Pages 241–248, Vol.18, (2011).
2. Three-Step Hybrid Linear Multistep Method for Solution of First Order Initial Value Problems in Ordinary Differential Equations: *E. A. Areo, R.A. Ademiluyi and P.O. Babatola*. Pages 261–266, Vol.18, (2011).

ARIAVIE G.O

1. A Statistical Approach to the Modified Impress Current Cathodic Protection (ICCP) for Pipeline Systems: *Ariavie G.O, Ariavie S.S and Olagbegi P.O*. Pages 321-334, Vol.17, (2010).
2. Fuzzy Failure Probability of Transmission Pipelines in the Niger Delta Region of Nigeria: The case of Third Party Activities: *Ariavie G.O, Ovuworie G.C and Ariavie S.S*. Pages 445–450, Vol.18, (2011).
3. Clark and Reza-Latif-Shabgahi Algorithm for the Determination of the Minimal Cut-Sets of the Fault Tree of Pipeline Failure in the Niger Delta Region of Nigeria: *Ariavie G.O, Ovuworie G.C and Ariavie S.S*. Pages 451–458, Vol.18, (2011).

ARIAVIE S.S

1. A Statistical Approach to the Modified Impress Current Cathodic Protection (ICCP) for Pipeline Systems: *Ariavie G.O, Ariavie S.S and Olagbegi P.O*. Pages 321-334, Vol.17, (2010).
2. Fuzzy Failure Probability of Transmission Pipelines in the Niger Delta Region of Nigeria: The case of Third Party Activities: *Ariavie G.O, Ovuworie G.C and Ariavie S.S*. Pages 445–450, Vol.18, (2011).
3. Clark and Reza-Latif-Shabgahi Algorithm for the Determination of the Minimal Cut-Sets of the Fault Tree of Pipeline Failure in the Niger Delta Region of Nigeria: *Ariavie G.O, Ovuworie G.C and Ariavie S.S*. Pages 451–458, Vol.18, (2011).

AROGUNJO M.A

1. Evaluation of the contributions of 232Th and its progenies to the ingestion dose coefficients: *A. M. Arogunjo*. Pages 179-188, Vol.15, (2009).
2. Calculation of Dose Gamma Ray Build up Factor in Some Homogenous Material: *M. A. Arogunjo and J. B. Hamzat*. Pages 473-482, Vol.16, (2010).
3. Estimation of Intestinal Absorption Rate Using Convolution Integral Technique with Matlab and Simulink: *Adeseye M. Arogunjo and Samson O. Eweje*. Pages 483-492, Vol.16, (2010).

ARULOGUN O.T

1. Temperature profile of two steps Arrhenius, Bimolecular and Sensitized exothermic chemical reactions in a slab: *P. O. Olanrewaju, A.S. Bishop and O.T. Arulogun*. Pages 119-122, Vol.17, (2010).

2. Polynomial approximation approach to transient heat conduction with internal heat generation: *P. O. Olanrewaju, O.T. Arulogun and M.E. Ojewumi*. Pages 123-128, Vol.17, (2010).

ARUNAYE I.F
1. On the Compatibility of Approximate Solution of Linear Equations with Given Error Bounds for Coefficients and Right Sides: *L. A. Fakande, and I. F. Arunaye*. Pages 265-268, Vol.9, (2005).
2. Three classes of Ermakov systems and nonlocal symmetries: *F. I. Arunaye*. Pages 291-296, Vol.15, (2009).

ASAJU L.B
1. Embedded confusion matrix in Fuzzy logic for system appraisal: *J.O. Omolehin, L. B. Asaju, M. Olagunju, A. O. Ameen and K. Rauf*. Pages 355-362, Vol.15, (2009).
2. Control derivative to optimal control analysis: *J. O. Omolehin, K. Rauf, M. O. Ajisope, M. A. Mabayoje and L. B. Asaju*. Pages 399-404, Vol.15, (2009).

ASIBOR R. E.
1. Free Convective Flow between Vertical Porous Plates with Variable Suction and Periodic Heating Input: *Asibor, R. E., Otolorin, O., Adesanya, S. O. and Hassan, A. R*. Pages 259–272, Vol.19, (2011).

ASHIEDU F:
1. Modelling to Determine Fit between Work Tasks and the Bending Capabilities of Subjects: *A. C. Igboanugo, F. Ashiedu and M. K. Onifade*. Pages 253 – 260 Vol. 21 (2012).
2. Modelling to Support Using Crouch Technique to Lift Low-Lying Objects: *A. C. Igboanugo, F. Ashiedu and M. K. Onifade*. Pages 261 - 270 Vol. 21 (2012).

ASHIBEL A.F
1. 3 Steps Continuous Block Predictor Corrector Method for the Solution of General Second Order Ordinary Differential Equation: *Adesanya A. Olaide, Odekunle M. Remilekun and Anake T. Ashibel*. Pages 477 – 482, Vol. 21 (July, 2012).

ASIKHIA O.K
1. The Determination of Stresses in Wire-Drawing Operation Using the Finite Element Model: *Oviawe C.I. and Asikhia, O.K*. Pages 589–596, Vol.18, (2011).

ASIRIBO O.E
1. Hierarchical Structured Model for Nonlinear Dynamical Processes: *Agwuegbo S.O.N, Solarin, A.R.T, Asiribo, O. E.* Pages 15–20, Vol.19, (2011).

ASOGWA C.C
1. Mathematical Model for The Estimation Of Onchocerca Volvulus Worm Load/Burden in The Body of The Host: *G.C.E Mbah and C.C.Asogwa*. Pages 293-298, Vol.18, (2011).

ASOKHIA M.B.
1. A Magnetotelluric Method For Determining Aquifer Depths: *M.B. Asokhia*. Pages 81 - 85, Vol. 1, (1992).
2. Computation of impedance tensor elements from Magneto-Telluric Data: *M. B. Asokhia*. Pages 135 - 148, Vol. 2, (1998).
3. Modulation Of Infra-Red Laser Beam Using Gallium Arsenide Crystal: *M. B. Asokhia*. Pages 149 - 162, Vol. 2, (1998).
4. Correlation between Resistivity Survey and Well Logging in Delta State: *J. C. Egbai and M. B. Asokhia*. Pages 163 - 175, Vol. 2, (1998).
5. Computation of the Kernel Function by inversion of resistivity field data from Schlumberger Configuration: *M. B. Asokhia*. Pages 193-207, Vol. 3, (1999).
6. A Simplified Computer Iteration Technique for the Interpretation of Vertical Electrical Sounding: *M. B. Asokhia, S. O. Azi, and O. Ujuanbi*. Pages 269-280, Vol.4, (2000).
7. Estimation of Magneto-Telluric noise by Method of Polarisation Analysis: *M. B. Asokhia*. Pages 281-288, Vol.4, (2000).
8. Interpretation of Vertical electric Soundings at Afuze and Eme-Ora using Resistivity Transform Functions: *O. Ujuanbi and M. B. Asokhia*. Pages 289-300, Vol.4, (2000).
9. The Vertical Electrical Sounding: A Viable tool for the investigation of Clay Deposits: *O.Ujuanbi and M. B. Asokhia*. Pages 79-88, Vol.5, (2001).
10. In Search of Clay Deposit in a Dual Geological Environment in the South-Southern Part of Nigeria: *O. Ujuanbi.and M. B. Asokhia*. Pages 443-456, Vol.9, (2005).

ASOMBA G.C
1. Unified Hamiltonian Model for Magnetism and Superconductivity in High-Tc Cuprate Systems: *G. C. Asomba and A. O. E Animalu*. Pages 121-135, Vol.3, (1999).
2. Non-Local Theory of Cooper pairing in High-Tc Superconductors: *A. O. E. Animalu, C. M. I Okoye and G. C. Asomba*. Pages, 297-311, Vol.2, (1998).
3. Possible Electronic Energy Structure of High-Tc Cuprates: *G. C. Asomba*. Pages 136-150, Vol.3, (1999).
4. Frequency Dependence of electronic density of states in Super-conducting (…) CUm On-x Systems: *G. C. Asomba*. Pages 9-16, Vol.4, (2000).
5. Bardeen-Cooper-Schrieffer Model reveals possible non-Fermi Liquid Features: *G. C. Asomba*. Pages 17-30, Vol.4, (2000).
6. Some thermodynamic non-Fermi liquid properties of correlated electron systems: *G. C. Asomba and D. U. Ugwoke*. Pages 149-156, Vol.10, (2006).

ASOR V.E
1. Further On The Damping Of Low Frequency Seismic Waves In a Semi-Infinite Elastic Medium: *Okeke E.O and Asor V.E*. Pages 48 – 55, Vol. 2, (1998).

AWOBODE A.M

1. Potential distribution and focusing properties of an equidiameter co-axial cylindrical electrostatic lens: *A. M. Awobode and O. M. Oni*. Pages 379-392, Vol.3, (1999).
2. Precision measurement of the electron/muon gyromagnetic factors: *A. M. Awobode*. Pages 9-16, Vol.13, (2008).

AWODOLA T.O

1. Vibration under a moving load of a non-uniform Rayleigh beam on variable elastic foundation: *S. T. Oni and T. O. Awodola*. Pages 191-206, Vol.7, (2003).
2. Dynamic Response to Moving Concentrated Masses of Uniform Rayleigh Beams Resting on Variable Winkler Elastic Foundation: *S.T. Oni and T. O. Awodola*. Pages 151-164, Vol.9, (2005).
3. Influence of Foundation and Axial Force on the Vibration of Thin Beam Under Variable Harmonic Moving Load: *T. O. Awodola*. Pages 143-150, Vol.9, (2005).

AWOJOYOGBE B.O

1. Analytical solutions of the Bloch equations for MRI flow dependent magnetization and signals with spatially varying Magnetic field: *O. B. Awojoyogbe*. Pages 360-369, Vol.3, (1999).
2. Generalized time Dependent Analytical Solution of Bloch Equations for Magnetic resonance Imaging with Time Varying rF B1(t) Magnetic Field: *O. B. Awojoyogbe*. Pages 73-86, Vol.4, (2000).

AWOYEMI D.O

1. An Algorithmic Collocation Approach for Direct Solution of Special and General Fourth-Order Initial Value Problems of Ordinary Differential Equations: *D O. Awoyemi*. Pages 271-284, Vol.6, (2002).
2. An Optimal Order Continuous Multistep Algorithm For Initial Value Problems of Special Second Order Differential Equations: *D. O. Awoyemi and S. J. Kayode*. Pages 285-292, Vol.6, (2002).
3. A 5-step Maximal order Method for Direct Solution of Second Order Ordinary Differential Equations: *S. J. Kayode and D. O. Awoyemi*. Pages 279-284, Vol.9, (2005).
4. Off-grid points exploitation in the development of more accurate collocation method for solving ODEs: *D. O. Awoyemi, R. A. Ademiluyi and E. Amuseghan*. Pages 379-386, Vol.12, (2008).

AYANDOKUN O.O

1. Projectile Motion in a Resistant Medium under the Influence of an Electric Field: *R. O. Ayeni and O. O. Ayandokun*. Pages 169-172, Vol.7, (2003).
2. Mathematical analysis of the global dynamics of a model for HIV infection of CD4 + T cells: *T. O Oluyo, R. O Ayeni and O. O Ayandokun*. Pages 103-110, Vol.11, (2007).
3. Further Remarks on Vaccination for Non-Fatal Susceptible-Invective-Susceptible (SIS) Disease: *O.O. Ayandokun, R.O. Ayeni, T.O. Oluyo and B. Gbadamosi*. Pages 187–190, Vol.18, (2011).

AYEDUN F

1. Recursive backstepping design for controlling chaos of three nonlinear Bloch equations: *F. Ayedun and O. Sowole*. Pages 49-54, Vol.13, (2008).
2. UV – radiation absorption by ozone in a model atmosphere using data of ibadano: *O. Sowole and F. Ayedun*. Pages 371-374, Vol.16, (2010).

AYENI R.O

1. Heat Transfer To A Liquid Film On An Unsteady Stretching Surface: *R.O. Ayeni & J.O. Oladele*. Pages 55-59, Vol. 1, (1992).
2. Variable Viscosity Reacting flows with conserved Energy: *R. O. Ayeni*. Pages 89 - 94, Vol. 2, (1993).
3. Phase plane analysis of liquid front moving through a hot porous rock: *R. O. Ayeni*. Pages 286-289, Vol.3, (1999).
4. On the Existence and Uniqueness of self Similar Diffusion Equations: *R. O. Ayeni and F. B. Agusto*. Pages 183-186, Vol.4, (2000).
5. Numerical Solution of A Reacting Viscous Problem: *F. I. Alao, R. O. Ayeni, and R. A. Ademiluyi*. Pages 187-200, Vol.4, (2000).
6. Existence and uniqueness for Self-similar Solutions for a Viscous Reacting Flow: *F. I. Alao and R. O. Ayeni*. Pages 177-184, Vol.5, (2001).
7. Unsteady Backward Power-Law flow Near a Moving Wall: *R. O. Ayeni and B. I. Olajuwon*. Pages 263-266, Vol.5, (2001).
8. Effect of Frank-Kamenetskii Parameter on Strong Detonations in a Converging Vessel: *P. O. Olanrewaju and R. O. Ayeni*. Pages 267-272, Vol.5, (2001).
9. On the Existence and Uniqueness of a Power-Law Fluid Flowing in a Cylinder: *B. I. Olajuwon and R. O. Ayeni*. Pages 187-190, Vol.6, (2002).
10. Effects of the Geometry of Vessel on Detonations: *P. O. Olanrewaju and R. O. Ayeni*. Pages 191-196, Vol.6, (2002).
11. Projectile Motion in a Resistant Medium under the Influence of an Electric Field: *R. O. Ayeni and O. O. Ayandokun*. Pages 169-172, Vol.7, (2003).
12. Flow of a power-law fluid with memory past an infinite plate: *B. I. Olajuwon and R. O. Ayeni*. Pages 161-162, Vol.8, (2004).
13. Higher order MHD flow of a uniformly stretched vertical permeable surface in the presence of heat generation/absorption and chemical reaction: *R.O. Ayeni, A.M. Okedoye, F.O. Balogun and T.O. Ayodele*. Pages 163-166, Vol.8, (2004).

14. Mathematical Model of Temperature Rise in Three-layer Skin during Microwave Hyperthermia: *L. M. Erinle and R. O. Ayeni*. Pages 215-216, Vol.9, (2005).

15. Effect of Radiation on the Critical Frank – Kamenetskii Parameter of Thermal Ignition in a Combustible Gas Containing Fuel Droplets: *R.O. Ayeni, A.M. Okedoye, A.O. Popoola and T.O. Ayodele*. Pages 217-220, Vol.9, (2005).

16. Remarks on thermal explosions in the early evolution of the earth: *R. O. Ayeni, A. O. Popoola and O. J. Fenuga*. Pages 69-70, Vol.10, (2006).

17. Impact of electric and magnetic fields in a resistant medium on the velocity of a particle subject to varying path angles: *O. J. Fenuga and R. O. Ayeni*. Pages 235-238, Vol.10, (2006).

18. On the existence and uniqueness result for a two-step reactive-diffusive equation with variable pre-exponential factor: *P. O. Olanrewaju, R. O. Ayeni, A. O. Ajala, O. Adebimpe, and A. O. Ajayi*. Pages 403-408, Vol.10, (2006).

19. A new poof of multiple solutions of combustions problems: *R. O. Ayeni, A. M. Okedoye, F. O. Balogun, and F. I. Alao*. Pages 497-498, Vol.10, (2006).

20. On the possibility of multiplicity of temperature fields in a microwave heating cancer therapy: *R. O. Ayeni, A. M. Okedoye*. Pages 499-502, Vol.10, (2006).

21. Unsteady Magneto-Hydrodynamic (MHD) flow of a uniformly stretched vertical permeable surface I in the presence of heat generation/absorption and a first order chemical: *A. M. Okedoye, T. Adeniran, S. O. Adewale and R. O. Ayeni*. Pages 503-510, Vol.10, (2006).

22. Biomechanics of the brain; some remarks on Biot's equations of consolidation theory with deformation-dependent permeability: *R. O. Ayeni, A. W. Ogunsola and A. O. Popoola*. Pages 511-516, Vol.10, (2006).

23. A free-boundary value problem related to auto ignition of combustible fluid in insulation materials: *A. O. Popoola and r. O. Ayeni*. Pages 95-102, Vol.11, (2007).

24. Mathematical analysis of the global dynamics of a model for HIV infection of CD4 + T cells: *T. O Oluyo, R. O Ayeni and O. O Ayandokun*. Pages 103-110, Vol.11, (2007).

25. Numerical solution of heat and mass transfer in MHD flow in the presence of chemical reaction and Arrhenius heat generation of a stretched vertical permeable membrane: *A. M. Okedoye and R. O. Ayeni*. Pages 111-118, Vol.11, (2007).

26. MHD flow of a uniformly stretched vertical permeable membrane in the presence of zero order reaction and quadratic heat generation: *A. M. Okedoye O. T. Lamidi. and R. O. Ayeni*. Pages 119-128, Vol.11, (2007).

27. Magnetic and velocity fields MHD flow of a stretched vertical permeable surface with buoyancy in the presence of heat generation and a first order chemical reaction: *A. M. Okedoye, O. T. Lamidi and R. O. Ayeni*. Pages 129-136, Vol.11, (2007).

28. Solving microwave heating model in a slab using shooting technique: *P. O. Olanrewaju, R. O. Ayeni, and O. Adebimpe*. Pages 529-532, Vol.11, (2007).

29. Influence of power-law index on an unsteady exothermic reaction: *O. T. Lamidi and R. O. Ayeni*. Pages 545-548, Vol.11, (2007).

30. Second law analysis of a reacting temperature dependent viscous flow through an inclined channel with isothermal walls: *S. O Adesanya, R. A Williams and R. O Ayeni*. Pages 549-556, Vol.11, (2007).

31. Stability of critical points in a resistant medium under the influence of electric and magnetic fields: *O. J. Fenuga and R. O. Ayeni*. Pages 157–160, Vol.12, (2008).

32. Steady flow of reacting temperature-dependent fluid past an impulsively started porous vertical surface with Newtonian heating: *S. O. Adesanya, R. O. Ayeni*. Pages 221-226, Vol.13, (2008).

33. Effect of power-law exponent in endothermic reactions by *O. T. Lamidi, A. O. Ajala, A. M. Okedoye and R. O. Ayeni*. Pages 227-230, Vol.13, (2008).

34. I–electrophoresis of deoxyhemoglobin S: Theoretical study of the deformation induced by the applied field and the mechanical stresses: *L. O. Olatunji and R. O Ayeni*. Pages 367-372, Vol.13, (2008).

35. II–electrophoresis of deoxyhemoglobin S Theoretical study of the Vol. variation and electrocalorific effect: *L. O. Olatunji and R. O Ayeni*. Pages 373-376, Vol.13, (2008).

36. Temperature and velocity profile on thermal ignition in a reactive variable viscosity poiseuille flow: *P. O. Olanrewaju, A. Falohun, D. A. Ajadi, and R. O. Ayeni*. Pages 405-410 Vol.13, (2008).

37. Effect of a magnetic field on a rotating fluid flow: *O. J. Fenuga and R. O Ayeni*. Pages 261–266, Vol.14, (2009).

38. Mathematical modelling of the calcination process: *R. O. Olayiwola, A.T. Cole, D. Hakimi and R.O. Ayeni*. Pages 381–388, Vol.14, (2009).

39. Modelling atmospheric temperature rise due to pollutants and its implications on agriculture: *R. O. Ayeni and F. R. Sodique*. Pages 431-436, Vol.15, (2009).

40. On the Arrhenius reacting flow over a stretching sheet in the presence of magnetic field: *O. B. Ayeni and A. W. Gbolagade*. Pages 437-442, Vol.15, (2009).

41. A note on the effect of affinity hemodialysis on T-cell depletion: *R. O. Ayeni, T. O. Oluyo and A. M. Okedoye*. Pages 443-446, Vol.15, (2009).

42. Influence of power-law exponent on an unsteady endothermic reaction: *O. T. Lamidi, A. M. Okedoye and R. O. Ayeni*. Pages 447-452, Vol.15, (2009).

43. Unsteady MHD free convection flow and heat transfer along an infinite vertical porous plate under Arrhenius kinetics: *A. J. Omowaye and R. O. Ayeni*. Pages 477-484, Vol.15, (2009).

44. MHD flow and heat transfer of a viscous reacting fluid over a stretching sheet: *R. O Ayeni, A. O. Popoola, A. J. Omowaye and O. B. Ayeni*. Pages 485-490, Vol.15, (2009).

45. A numerical study of the hemodynamics of stenosed artery: *S. O Adesanya, S. O. Ajala and R. O. Ayeni*. Pages 513-522, Vol.15, (2009).

46. Effect of couple stresses on hydromagnetic flow of blood through a stenosed coronary artery: *S. O Adesanya, S. O. Ajala and R. O. Ayeni*. Pages 523-532, Vol.15, (2009).

47. Properties of steady solutions of a reacting non-Newtonian viscous MHD poiseuille flow: *R. O Ayeni, S. O. Adesanya and S. C Osuala*. Pages 533-536, Vol.15, (2009).

48. On the stability criteria for prey-predator generalized model: *E.A Bakare and R.O Ayeni*. Pages 241–252, Vol.16, (2010).

49. On The Theory Of Filtration At A Decreasing Rate: *Audu O. Celestina And R. O. Ayeni,* Pages 305–316, Vol.16,, (2010)

50. A Variable Thermal Conductivity Flow of A Micropolar Fluid Over A Stretching Surface in A Non-Darcian Porous Medium: *Adepoju O.A And Ayeni R.O.* Pages 115-118, *Vol*.17, (2010)

51. On The Flow of Maxwell Fluid Between Two Walls Induced By A Constantly Accelerating Plate: *Hassan A.R, and Ayeni R.O.* Pages 129-132, Vol.17,(2010)

52. Effect of transmission rate in an SIR epidemic model: *R.O.Ayeni, O.Adebimpe, T.O.Oluyo, S.O.Adewale, A.O.Popoola and A.W.Ogunsola.* Pages 157-164, Vol.17, (2010)

53. A Note on Unsteady Temperature Equation For Gravity Flow of A Power-Law Fluid Through A Porous Medium: *B. A. Peter and R. O. Ayeni.* Pages 181–186, Vol.18, (2011)

54. Further Remarks on Vaccination for Non-Fatal Susceptible-Invective-Susceptible (SIS) Disease: *O.O. Ayandokun, R.O. Ayeni, T.O. Oluyo and B. Gbadamosi.* Pages 187–190, Vol.18, (2011)

55. Free Convective Flow of a Reacting Fluid between Vertical Porous Plates: *R.O. Ayeni, A.O. Popoola and O.T. Lamidi.* Pages 191–200, Vol.18, (2011)

56. On The Effect of Affinity Hemodialysis on HIV/AIDS: *M.O. Aborode and R.O. Ayeni.* Pages 299-302, Vol.18, (2011)

57. Modeling Hiv Epidemic Under Contact Tracing - A Remark: *Oluyo T.O and Ayeni R.O.* Pages 307-312, Vol.18, (2011)

58. A Numerical Study of Reaction Kinetics Model of Polymerization In The Presence Of Material Diffusion Using the Finite Difference Scheme: *Durojaye M.O. and Ayeni R.O. Durojaye M.O. and Ayeni R.O. Durojaye M.O. and Ayeni R.O.* Pages 193–198, Vol.19, (2011)

59. Reaction Kinetics Model of Polymerization in the Absence of Material Diffusion: *Durojaye M.O. and Ayeni R.O*. Pages 199–204 Vol.19, (2011)

60. Analytical Solution of Unsteady Gravity Flows of A Power-Law Fluid through A Porous Medium: *Peter B. A. and Ayeni R. O.* Pages 223–228, Vol.19, (2011)

61. Asymptotic expansion of unsteady gravity flow of a power-law fluid through a porous medium: *B. A. Peter and R. O. Ayeni*. Pages 105–110, Vol.20, (2012).

62. A Stability analysis for a mathematical model for the determination of optimum drug for chemotherapy of HIV: *R.O. Ayeni, B. Gbadamosi, S. Olaniyi and M.L. Erinle-Ibrahim*. Pages 115–118, Vol.20, (2012)

63. Existence and Uniqueness Solution of the Dual-Phase-Lag Bio-Heat Transfer during Magnetic Hyperthermia Treatment: *Ayeni R.O, Erinle-Ibrahim L.M. and Gbadamosi Babatunde*. Pages 465 – 470 Vol. 21 (2012)

64. A Mathematical Model and Simulation of In-Situ Combustion in Porous Media: *R.O. Olayiwola and R.O. Ayeni*. Pages 545 – 554 Vol. 21 (2012).

65. Dufour and Soret Effects on Hydromagnetic Free Convection and Mass Transfer Past A Vertical Porous Plate in The Presence of Thermal Radiation: *Olanrewaju P.O., Olabiyisi S.T., Olanrewaju M.A., Ayeni R.O. and Adeleke O. J.* Pages 431 – 442, Vol. 22 (2012).

66. Temperature distribution over a stretching surface with viscous dissipation: *Oghre E. O. and Ayeni R. O*. Pages 455 – 460, Vol. 22 (2012).

67. A mathematical model and simulation of HIV infection of CD4+T cells with past and current history: *Odebiyi O. A. and Ayeni R. O*. Pages 495 – 502, Vol. 22 (2012).

AYINDE K.
1. A simplification of the likelihood ratio test statistic for testing hypothesis about goodness of fit of multinomial probabilities: *K. Ayinde and D. B. Adekanmbi*. Pages 305-310, Vol.8, (2004).

AYO M.V
1. Successive Substitution One-leg hybrid P-stable LMM for Initial Value Problems in Second Order Ordinary Differential Equations: *M. N. O Ikhile and M. V. Ayo*. Pages 269-278, Vol.9, (2005).

AYODELE B.V
1. Predicting the Biodegradation of Polycyclic Aromatic Hydrocarbons (PAHs) in Continuous Stirred Tank Reactor by Artificial Neural Network: *Owabor, C.N.and Ayodele, B.V*. Pages 395–398, Vol.19, (2011).

AYODELE O.V
1. Numerical Modeling of Dynamic Response of Water Absorption in Soaked Legume Grains: *A. S. Oyerinde, A. S. Adekola and O. V. Ayodele*. Pages 233-238, Vol.5, (2001).

AYODELE T.O
1. Higher order MHD flow of a uniformly stretched vertical permeable surface in the presence of heat generation/absorption and chemical reaction: *R.O. Ayeni, A.M. Okedoye, F.O. Balogun and T.O. Ayodele*. Pages 163-166, Vol.8, (2004).

2. Effect of Radiation on the Critical Frank – Kamenetskii Parameter of Thermal Ignition in a Combustible Gas Containing Fuel Droplets: *R.O. Ayeni, A.M. Okedoye, A.O. Popoola and T.O. Ayodele*. Pages 217-220, Vol.9, (2005).

AYOOLA E.O

1. Error Estimation in the Gauss and Newton-Cotes Quadrature Schemes for Weak Solutions of Quantum Stochastic Differential Equation: *E. O Ayoola*. Pages 12-35, Vol.3, (1999).
2. On the existence of weak solutions of quantum stochastic differential equations: *E. O. Ayoola and A. W. Gbolagade*. Pages 5-8, Vol.8, (2004).
3. On the existence of continuous selections of solution and reachable sets of quantum stochastic differential inclusions: *E. O. Ayoola*. Pages 71-82, Vol.11, (2007).
4. Oscillation in solutions of stochastic delay differential equations with real coefficients and several constant time lags: *A. O. Atonuje and E.O Ayoola*. Pages 87-94, Vol. 13, (2008).

AZI S.O

1. A Simplified Computer Iteration Technique for the Interpretation of Vertical Electrical Sounding: *M. B. Asokhia, S. O. Azi, and O. Ujuanbi*. Pages 269-280, Vol. 4, (2000).
2. A Method of Domain Decomposition for Solution of the Helmholtz Equation: *Felix Okoro and Samuel Azi*. Pages 33-38, Vol. 7, (2003).
3. Towards a Self Consistent Embedding Function for Lithium: *E. Aghemenloh and S. O. Azi and J. O. A. Idiodi*. Pages 513-518, Vol. 9, (2005).
4. Groundwater potential investigation using combined VLF and VES: *K.O. Ozegin, D.O. Isiwele and S.O. Azi*. Pages 403-410, Vol.11, (2007).
5. Geophysical investigation of Oke-Agbe-Oyin Road failure using VLF and double dipole: *K. O. Ozegin, S. O. Azi and D. O. Isiwele*. Pages 411-414, Vol.11, (2007).
6. Determination of the optical constants of a thin film supported on a thick transparent substrate: *Samuel Ogo Azi1 and Felix Okoro*. Pages 423-428, Vol.11, (2007).
7. Analytical EAM alloy models for FCC metals: *S. O. Azi1, E. Aghemenloh and J. O. A. Idiodi*. Pages 429-434, Vol.11, (2007).
8. A comparative study of two different embedding functions: *S. O. Azi, E. Aghemenloh, and J. O. A. Idiodi*. Pages 517-524, Vol.12, (2008).
9. Aquifer Characterization In Ugha And Ehor Environs, Edo State, Nigeria Using Vertical Electrical Soundings: *C.O. Aigbogun, S. O. Azi, J. C. Egbai*. Pages 35–38, Vol.17, (2010).
10. The Electronic Band Structure of Platinum Oxide (PtO): *Omehe N. N. and Azi S. O*. Pages 301–308, Vol.20, (2012).
11. Analysis of Drop Call Probability in Well Established Cellular Networks In Asaba, Delta State, Nigeria: *Atuba S.O, and Azi S.O*. Pages 447–450, Vol.20, (2012).
12. Path Loss Measurement and Model Analysis of 1.8GHz Wireless Network in Benin City, Nigeria: *Atuba S.O, Azi S.O, Omasheye R.O, and Ojo K.O*. Pages 155 – 160, Vol. 22 (2012).

BABAJI G.

1. Dynamics of a Perturbed Linear Chain of Atoms: *Tanimu A. and Babaji G*. Pages 267–272, Vol.20, (2012).
2. Simulation of the diffraction pattern of one dimensional quasicrystal: *Sa'id M. and Babaji G*. Pages 285–292, Vol.20, (2012).
3. Calculations of total energy in the density functional theory using FHI98MD code: *L. S. Taura and Babaji Garba*. Pages 357-362, Vol.13, (2008).
4. The effect of the parameter ecuti on the total energy convergence of bulk crystal using FHI98MD code: *L. S. Taura and Babaji Garba*. Pages 205–210, Vol.14, (2009).
5. First-principle calculation of SP3 hybridization and bonding in diamond-structure semiconductor crystals: *Garba Babaji*. Pages 155-162, Vol.15, (2009).
6. The structure of white dwarf stars: *Garba Babaji*. Pages 237-246, Vol.15, (2009).
7. Madelung Constants of Nacl and Cscl Structures Using Screened Coloumb Potential: *H Abdulsalam and G Babaji*. Pages 99-102, Vol.18, (2011).
8. Lattice Energies and Bulk Moduli of Ionic Crystals: *H Abdulsalam and G Babaji*. Pages 103-106, Vol.18, (2011).
9. The Effect of Electron Incident Energy on Total Cross Section Calculations for the Noble Gases: *Babaji G., Abdu S. G. and Taura L.S*. Pages 143 - 150 Vol. 21 (2012)

BABALOLA K.O

1. Some remarks on certain Bazilevic functions: *K. O. Babalola*. Pages 171-176, Vol.10, (2006).
2. On the successive coefficients of certain Univalent functions: *K. O. Babalola*. Pages 177-180, Vol.10, (2006).
3. On some functional associated with certain coefficient problems: *K. O. Babalola*. Pages 63-66, Vol.11, (2007).
4. Quasi-Partial sums of the generalized Bernard integral of certain analytic functions: *K. O. Babalola*. Pages 67-70, Vol.11, (2007).

BABALOLA M. I.

1. The Effect of Phonon Relaxation Process on Absorption Spectra: *Babalola M. I., Iyorzor, B. E., Idiodi, J.O. A*. Vol.18, Pages 107-110, Vol.18, (2011).
2. Tomonaga-Luttinger Liquid for Collective Motion of Fermions a Basic Theory of One-Dimensional Correlated Electrons: *Nenuwe, O. N., Babalola, M. I., and Idiodi, J. O. A*. Pages 405 – 412 Vol. 21 (2012).
3. Effect of Coupling Constant on Spectral Function: Green's Function ANSATZ: *Babalola M. I. Bakare A. Iyorzor B. E., and Idiodi J.O.A*. Pages 401 - 404 Vol. 21 (2012).

4. Tomonaga-Luttinger Liquid for Collective Motion of Fermions: a Basic Theory of One-Dimensional Correlated Electrons: *Nenuwe, O. N., Babalola, M. I., and Idiodi, J. O. A*. Pages 405 – 412 Vol. 21 (2012).
5. The Ising Model on the Bethe Lattice: *Akpojotor F.A., Babalola M.I. and Idiodi J.O.A*. Pages 43 – 48, Vol. 22 (2012).
6. The Tomonaga Model: *Nenuwe O. N, Babalola M. I., and Idiodi J.O.A*. Pages 205-212, Vol. 20, (2012).

BABATOLA P. O.
1. A New Inverse Runge–Kutta Scheme for Stiff Ordinary Differential Equation: *P.O. Babatola*. Pages 229–240, Vol.16, (2010).
2. A Class of Convergent Rational Runge-Kutta Schemes for solution of Ordinary Differential Equations (ODEs): *P.O. Babatola*. Pages 231–240, Vol.18, (2011).
3. Numerical Integration of Stiff System of Ordinary Differential Equations with a New K-step Rational Runge-Kutta Method: *P.O. Babatola, R.A Ademiluyi and E.A Areo*. Pages 241–248, Vol.18, (2011).
4. Three-Step Hybrid Linear Multistep Method for Solution of First Order Initial Value Problems in Ordinary Differential Equations: *E. A. Areo, R.A. Ademiluyi and P.O. Babatola*. Pages 261–266, Vol.18, (2011).

BADEGGI A.Y
1. The Concept of Convexity in Fuzzy Set Theory: *Rauf K., Omolehin J. O. , Ma'ali A. I., Badeggi A. Y. and Lukuman A*. Pages 13–16, Vol.20, (2012).
2. Convergence Estimate of ECGM Algorithm for Reaction Diffusion Control Problem: *Omolehin J. O., Rauf K. , Badeggi A. Y. and Aliyu A.I. Ma'ali*. Pages 49–54, Vol.20, (2012).

BADMUS A.M
1. Uniform Order Zero- Stable K-Step Block Methods for Initial Value Problems Of Ordinary Differential Equations: *A. M. Badmus and D. W. Mshelia*. Pages 65–74, Vol.20, (2012).
2. Some Uniform Order Block Methods for the Solution of First Order Ordinary Differential Equations: *A. M. Badmus and D. W. Mishelia*. Pages 149-154, Vol.19, (2011).

BAKARE E.A
1. On the stability criteria for prey-predator generalized model: *E.A Bakare and R.O Ayeni*. Pages 241–252, Vol.16, (2010).
2. On A Two-Stage Supply Chain Model In The Manufacturing Industry: *Bakare Emmanuel Afolabi, Ogban Gabriel Iyam and Chima R. Nwozo*. Pages 253 – 264, Vol.16, (2010).
3. Effect of Coupling Constant on Spectral Function: Green's Function ANSATZ: *Babalola M. I., Bakare A., Iyorzor B. E., and Idiodi J. O. A*. Pages 401 - 404 Vol. 21 (2012)

BAKWA D.D
1. Complete Schwarzschild's planetary equation: *S. X. K. Howusu and D.D Bakwa*. Pages 265-268, Vol.8, (2004).
2. Einstein's equations of motion in the gravitational field of an oblate spheroidal body: *S. X. K. Howusu and D.D Bakwa*. Pages 269-272, Vol.8, (2004).
3. Newton's equation of motion in the gravitational field of an oblate earth: *D. D. Bakwa and Y. Y Jabil*. Pages 279-286, Vol.11, (2007).
4. Differences between general relativity and dynamical theory of gravitation in the resolution of radar sounding phenomenon to the order of C-5: *Y. Y. Jabil and D. D. Bakwa*. Pages 49–54, Vol.12, (2008).
5. General Relativistic Theory Of Radar Sounding In The Gravitational Field Of An Oblate Spheriodal Sun To The Order Of C^-3: *Jabil Y. Y. and Bakwa D. D*. Pages 53 – 58, Vol. 22 (2012).
6. Theoretical Verification of General Relativistic Theory of Radar Sounding To The Order Of C^-3: *Jabil Y. Y. and Bakwa D. D*. Pages 59 – 62, Vol. 22 (2012).

BALOGUN AYOMIDE O
1. Thermal neutron counts and derivated charts: *Olusogo O. Odusote and Ayomide O. Balogun*. Pages 489-492, Vol.10, (2006).

BALOGUN F.O
1. A new poof of multiple solutions of combustions problems: *R. O. Ayeni, A. M. Okedoye, F. O. Balogun, and F. I. Alao*. Pages 497-498, Vol.10, (2006).
2. Higher order MHD flow of a uniformly stretched vertical permeable surface in the presence of heat generation/absorption and chemical reaction: *R.O. Ayeni, A.M. Okedoye, F.O. Balogun and T.O. Ayodele*. Pages 163-166, Vol.8, (2004).

BAMIDELE L.
1. The effect of extreme-low-frequency electromagnetic field on air borne particles concentration: *L. Bamidele*. Pages 159–164, Vol.14, (2009).

BAMIDELE S
1. Analytic derivation of the wave profile and phase speed of sixth order Stokes waves in deep water: *Oyetunde, Bamidele Sunday*. Pages 21–34, Vol.17, (2010).

BANGUDU E.A
1. Discrete Eigenvalues of a Modified Pöschl-Teller Potential Hole using Semi-Classical Approximation: *K. J. Oyewumi and E. A. Bangudu*. Pages 179-192, Vol.3, (1999).
2. WKBJ Approach to Quantum- Mechanical Tunneling Through a non-Rectangular Potential Barrier: *Kayode J. Oyewumi and Ezekiel A. Bangudu*. Pages 41-52, Vol.4, (2000).
3. Determination of the Phase Shifts for the Scattering Potential Ar using the WKBJ Approximation: *K. J. Oyewumi, and E. A. Bangudu*. Pages 285-294, Vol.5, (2001).

CHIKEZIE DAVID C
1. Initial and final estimates of the Bilinear seasonal time series model: *David C. Chikezie*. Pages 615-620, Vol.11, (2007).

CHIKE-OBI B.
1. A Basic Code for Plotting Dispersion Curves In A Cold Plasma: *S.D. Salihu, B. Chike-Obi*. Pages 71 - 75, Vol. 1, (1992).
2. The Onset and Saturation Of The Ionospheric Lower Hybrid Mode: *B. Chike-Obi*. Pages 81 - 85, Vol. 1, (1992).
3. The saturation of beam-excited ionospheric lower hybrid resonance through ion acceleration: *Salihu S. Duwa and B. Chike-Obi*. Pages 323-329, Vol. 3, (1999).
4. Lifetimes of Precipitating Ionospheric Electron Beams: *B. Chike-Obi, S. Salihu Duwa and L. E. Akpabio*. Pages 67-72, Vol. 4, (2000).

CHINEBU T. I.
1. Mathematical Model on the Viral Load/Burden of HIV/AIDS in the Body of a Host: *G.C.E. Mbah and T.I. Chinebu*. Pages 299-310, Vol. 17, (2010).

CHINEKE T. C.
1. Measurement of air aerosol size during the 2001/2002 harmattan season at Uturu, Nigeria: *I. U. Chiemeka, M. O. Oleka, T. C. Chineke*. Pages 635-640, Vol. 11, (2007).

CHRISTOPHER GODWIN UDOMBOSO
1. On R^2 Contribution and Statistical Inference of the Change in the Hidden and Input Units Of The Statistical Neural Networks: *Christopher Godwin Udomboso, Tolulope Olayemi James and Mba Obasi Odim*. Pages 335 – 340, Vol. 22 (2012).

COLE A.T.
1. Mathematical modelling of the calcination process: *R. O. Olayiwola, A.T. Cole, D. Hakimi and R.O. Ayeni*. Pages 381–388, Vol. 14, (2009).
2. Solving Linear and Nonlinear Initial Value Problems by the Adomian Decomposition Method: *Cole A. T. and Adeboye K. R*. Pages 349 – 354 Vol. 21 (2012)

COLLINS O.C
1. A mathematical model for predicting earthquake occurrence: *M. O Oyesanya and O. C Collins*. Pages 1-8, Vol. 14, (2009).

DAABO MOHAMMED
1. On certain isotopic maps of central loops: *John Olusola Adeniran, Yacub Tunde Oyebo and Daabo Mohammed*. Pages 7-12, Vol. 18, (2011).

DADA A.C
1. Quantum computer gate simulations: *Adetunmise C. Dada*. Pages 433-446, Vol. 10, (2006).

DADA M.S
1. The Dynamic Response of Plates on Pasternak Foundation to Distributed Moving Load: *G. A. Gbadeyan and M. S. Dada. E. O. Okeke and V. E. Asor. E. O. Okeke and V. E. Asor*. Pages 185-200, Vol. 5, (2001).
2. Transverse Vibration of Euler-Bernoulli Beams on Elastic Foundation under Mobile Distributed Masses: *M. S. Dada*. Pages 225-234, Vol. 7, (2003).

DANIEL T.
1. Determination of Coefficients of Thermal Conductivity (CTC) of Plastics Using Lee's Disc Method (LDM): *Daniel T. and Gbaorun F*. Pages 235–238, Vol. 20, (2012).

DARBYSHIRE JACK
1. Microseisms of 28-29 December 1998: *Jack Darbyshire*. Pages 295-314, Vol. 7, (2003).
2. Theoretical estimation of global solar radiation and its derivatives in Katsina – Nigeria using temperature and relative humidity: *Taura L. S., Darma T.H. and Sani Saleh*. Pages 135-142, Vol. 21, (2012).
3. Surface Characterisation of Copper Oxide Thin Films Prepared By RF Magnetron Sputtering: *Darma T.H. and Taura L.S*. Pages 111 – 118. Vol. 22 (2012).

DATTI ABDULKADIR
1. An Alternative to the Basket Weaving Method of Finding The Determinant of a Matrix: *Abdulhadi Aminu1, Abdulkadir Datti*. Pages 617–620, Vol. 18, (2011).
2. A bi-diagonal method for finding the determinant of a matrix: *Abdulhadi Aminu, Abdulkadir Datti*. Pages 139–142, Vol. 19, (2011).

DAUDU FRANCIS
1. Geophysical investigation for ground water in Orifite, Anambra State, Nigeria: *Otobo Egwebe and Francis Daudu*. Pages 379-386, Vol. 11, (2007).

DAVID D.S.Y
1. On Some Generalization of the Eigenvectors Properties: *Fatigun, A.T. and David, D.S.Y*. Pages 457-468, Vol.17, (2010).

DAVID E.E
1. The direct product of right zero semigroups and certain groupoids: *E. E. David and Adewale Oladipo Oduwale*. Pages 575-578, Vol.10, (2006).

DAVID JOEL M.M
1. The Derivatives of Moufang loops: *David Joel Mengue Mengue and Samuel Omoloye Ajala*. Pages 33–36, Vol.19, (2011).

DAVID T.W
1. Physical model of income distribution: *T. W. David, O. O. Odusote, and S. O. Kareem*. Pages 315-320, Vol.13, (2008).

DENG S
1. Adaptive GFPS of a new four-dimensional hyperchaotic system with uncertain parameters: *Luo Runzi, Deng Shucheng and Wei Zhengmin*. Pages 111-118, Vol.16, (2010).

DUROJAYE MO
1. A Numerical Study of Reaction Kinetics Model of Polymerization In The Presence Of Material Diffusion Using the Finite Difference Scheme: *Durojaye M.O. and Ayeni R.O*. Pages 193–198, Vol.19, (2011).
2. Reaction Kinetics Model of Polymerization in the Absence of Material Diffusion: *Durojaye M.O. and Ayeni R.O*. Pages 199–204, Vol.19, (2011).

EBOIGBE M.
1. The use of material balanced equation to determine the oil water contact of an oil reservoir: *O. M. Ehigiator, R. Ehigiator and M. Eboigbe*. Pages 213-222, Vol.15, (2009).

EBUNILO P.O.B.
1. Economic Analysis, Design and fabrication of a Solar Powered Barbing Salon: *Ebunilo P.O.B, Kwasi-Effah C.C. and Sadjere E.G*. Pages 553 – 560, Vol. 22 (2012).
2. A Solar Power Design for Primary and Secondary Schools in Nigeria: *Ebunilo P.O.B., Izah L. A. and Sadjere E.G*. Pages 561 – 570, Vol. 22 (2012).

ECHENIM MYRON W
1. A Pedagogical Study of the Oyibo's Grand Unification Theorem With Realization of Some Standard Equations: *Godfrey E. Akpojotor and Myron W. Echenim*. Pages 447-456, Vol.17, (2010).

ECHI I.M
1. Two Dimensional Simulation of Ion Beam-plasm Interaction: *I. M. Echi and R. Akin-Ojo*. Pages 561-572, Vol.9, (2005).
2. Plasma heating by non-linear wave-Plasma interaction: *I. M. Echi and A. Ojo*. Pages 157-166, Vol.10, (2006).
3. Simulation of Hamiltonian Function for Contaminant Fluid Flow: *I.M. Echi, A. N. Amah, and E. Anthony*. Pages 121 – 134 Vol. 21 (2012).

EDEMA O.G
1. Bulk modulus of metals according to structureless pseudopotential model: *O. M. Osiele and O. G. Edema*. Pages 197–204, Vol.14, (2009).

EDGAL U.F
1. Equilibrium Statistical Mechanics Of Hard Particle Fluids: *U.F. Edgal*. Pages 47-53, Vol. 1, (1992).

EDOBOR C.O
1. Application of finite element-eigenvalue method in the determination of transient temperature field in functionally graded materials: *J. A. Akpobi and C. O. Edobor*. Pages 207–224, Vol.12, (2008).

EDOBOR S.O
1. Premium adjustment: actuarial analysis on epidemiological models: *Dickson E. A. Omorogbe and Stanley O. Edobor*. Pages 407–416, Vol.14, (2009).

EDOKPA I.W
1. Statistical Analysis of Gender Equality in Students' Enrolment in Ambrose Alli University, Ekpoma: *Ikpotokin O., Erimafa J.T. and Edokpa I.W*. Pages 455 – 460 Vol. 21 (2012).
2. Modelling and Forecasting Prevalence of Malaria Parasite Infection among Pregnant Women in Benin City, South-South Nigeria (The ARIMA Approach): *Osabuohien-Irabor Osarumwense and Edokpa Idemudia W*. Pages 355 – 362, Vol. 22 (2012).

EDUNGBOLA E.O
1. On the Tau method for certain over-determined first order differential equations: *R. B Adeniyi and E. O. Edungbola*. Pages 399–408, Vol.12, (2008).

EEGUNJOBI A.S
1. Application Of Adomian's Decomposition Method In Solving Nonlinear Partial Differential Equations: *Olanrewaju, P. O. and Eegunjobi, A. S. and Oke O. A*. Pages 301–304, Vol.16, (2010).

EFUWAPE B.T
1. Mark-resighting survey method for the estimation of population size in a closed animal population: *O. R. Oniyide, and B. T. Efuwape*. Pages 461- 466, Vol.12, (2008).

EGBAI J.C
1. Correlation between Resistivity Survey and Well Logging in Delta State: *J. C. Egbai and M. B. Asokhia*. Pages 163 - 175, Vol. 2, (1998).
2. Noise reduction and cancelling stationary sinusoidal noise in Seismic data acquisition in Atala prospect of River State: *J. C. Egbai*. Pages 208-221, Vol.3, (1999).
3. Estimation of Formation Temperature from Borehole Measurements in Agbor Delta State, Nigeria: *J. C. Egbai*. Pages 243-256, Vol.4, (2000).

4. Computation of Resistivity Transform Derivatives in Geophysical Sounding: *J. C. Egbai*. Pages 207-222, Vol.6, (2006).
5. Aquifer Characterization In Ugha And Ehor Environs, Edo State, Nigeria Using Vertical Electrical Soundings: *C.O. Aigbogun, S. O. Azi, J. C. Egbai*. Pages 35–38, Vol.17, (2010).
6. Migration Velocity Analysis by Fourier Transform in Seismic Data Processing: *J.C. Egbai and Arthur Ekpekpo*. Pages 147-154, Vol.7, (2003).
7. Resistivity Inversion – A Computer Iteration Technique for the Interpretation of Vertical Electrical Sounding: *J.C. Egbai and Arthur Ekpekpo*. Pages 155-168, Vol.7, (2003).

EGBETADE S.A
1. Stability Analysis of Equilibrium States of an SEIR Tuberculosis Model: *S.A. Egbetade and M.O. Ibrahim*. Pages 119–124, Vol.20, (2012).

EGBOKHARE FRANCISCA
1. Software Process Improvement Using Force Field Analysis: *Francisca Egbokhare and Francis Imouokhome*. Pages 389–394, Vol.18, (2011).

EGEDI-IDU S.O
1. The Choice of a Swing Bus in a Power System Network A Case Study of the Nigerian National Grid: *Ike S. A and Egedi-Idu, S.O*. Pages 439 – 448, Vol. 21, (2012).

EGHERHA DENNIS I.
1. Disease dynamics in predator-prey population with disease in the prey: *Emmanuel O. Oghre and Dennis I. Egherha*. Pages 211–214, Vol.19, (2011).
2. Stability analysis of a predator prey system with disease in the prey: *Emmanuel O. Oghre and Dennis I. Egherha*. Pages 215–222, Vol.19, (2011).

EGWALI ANNIE O
1. Enhancing Authentication Models Characteristic Metrics via Probability Modeling: *Onibere Emmanuel A. and Egwali Annie. O*. Pages 395–400, Vol.18, (2011).
2. Evaluating the Security Risks of System Using Hidden Markov Models: *Onibere Emmanuel A. and Egwali Annie. O*. Pages 401–406, Vol.18, (2011).
3. Appraising the Strength of Users Passwords in Computing Systems in Nigeria: *Annie. O. Egwali*. Pages 483–486, Vol.19, (2011).
4. A Key Generation Model for Improving the Security of Cryptographic Keys: *Annie. O. Egwali*. Pages 487–492, Vol.19, (2011).

EGWEBE OTOBO
1. The effect of seasonal variation on the consistency of resistivity data: *Otobo Egwebe and S. O. Ifedili*. Pages 253-258, Vol.8, (2004).
2. Non-uniqueness in the interpretation of resistivity sounding –I: *Otobo Egwebe and S.O.Ifedili*. Pages 259-264, Vol.8, (2004).
3. Non-uniqueness in the Interpretation of Resistivity Sounding – II: *Otobo Egwebe and S.O. Ifedili*. Pages 431-436, Vol.9, (2005).
4. The Vertical Electrical Sounding: A Viable Tool for the Investigation of Fresh Ground-water in the Saline Water Environment with Particular Reference to the Communities along Warri River: *Otobo Egwebe and S.O. Ifedili*. Pages 437-442, Vol.9, (2005).
5. An investigation of groundwater condition in Agbede by Geelectrical resistivity method: *Otobo Egwebe and S. O. Ifedili and C. O. Aigbogun*. Pages 71-76, Vol.10, (2006).
6. The application of geophysics in environmental impact assessment: A case study in Jeddo, Delta State, Nigeria: *Otobo Egwebe*. Pages 77-82, Vol.10, (2006).
7. Geophysical investigation for ground water in Orifite, Anambra State, Nigeria: *Otobo Egwebe and Francis Daudu*. Pages 379-386, Vol.11, (2007).
8. Geophysical study of the aquifer characteristics along River Niger, Delta State, Nigeria: *Otobo Egwebe and C. O. Aigbogun*. Pages 387-392, Vol.11, (2007).
9. Geophysical study of the aquifer characteristics and its environmental implications along River Ethiope, Delta State, Nigeria: *Otobo Egwebe and U. Okezie*. Pages 237–244, Vol.12, (2008).
10. Geoelectrical study for ground water in waste dump sites: A case study of Warri and its environment, Delta State, Nigeria: *Otobo Egwebe, and C.O Aigbogun*. Pages 245–250, Vol.12, (2008).

EGWURUBE M.O
1. A Cauchy Problem for a Quasi-Linear Hyperbolic First Order Partial Differential Equation: *Michael O.Egwurube and Emmanuel J.D.Garba*. Pages 29-32, Vol.7, (2003).
2. Non-well Posed Evolution Equations and Fredholm Operators: *Michael O. Egwurube and Emmanuel J. D. Garba*. Pages 43-48, Vol.9, (2005).
3. A step-by-step approximation and analysis of asymptotic stability properties of solution of retarded system: *Dodi Kanu Igobi and Mike O. Egwurube*. Pages 359–366, Vol.14, (2009).

EHIGIATOR M.O
1. The use of material balanced equation to determine the oil water contact of an oil reservoir: *O. M. Ehigiator, R. Ehigiator and M. Eboigbe*. Pages 213-222, Vol.15, (2009).

2. Development of Methods For Determining The Lateral Surface of Tank: *R. Ehigiator – Irughe, M. O. Ehigiator*. Pages 165 – 174, Vol.18, (2011).
3. Hydrocarbon Investigation Using Petrophysical Parameters And Core Analysis (A Case Study of Umoro Field): *R. Ehigiator–Irughe, and M. O. Ehigiator*. Pages 175–180, Vol.18, (2011).
4. Verification of Positional Accuracy of ZVS3003 Geodetic Control Using CSSPS – PPP Model: *R. Ehigiator – Irughe and M. O. Ehigiator*. Pages 499–512, Vol.19, (2011).
5. Deformation Prediction Using Linear Polynomial Functions: *Ehigiator-Irughe R, Ehigiator M.O. and Uzoekwe S. A*. Pages 353–358, Vol.20, (2012).
6. Determination of Velocity And Acceleration of Structural Deformation Using Kalman Filter Technique: *Ehigiator-Irughe R, Ehigiator M.O. and Uzoekwe S. A*. Pages 359–368, Vol.20, (2012).
7. Determining the Deformation Values using Structural Data Error Analysis: *S. Vladimira, R. Ehigiator-Irughe B, M. O. Ehigiator and H. Oriakhi*. Pages 389 – 394, Vol. 21, (2012).
8. Deformation Prediction using Quadratic Polynomial Functions: *M. O. Ehigiator and R. Ehigiator-Irughe*. Pages 395 – 400 Vol. 21 (2012).

EHIGIATOR-IRUGHE R.
1. The use of material balanced equation to determine the oil water contact of an oil reservoir: *O. M. Ehigiator, R. Ehigiator and M. Eboigbe*. Pages 213-222, Vol.15, (2009).
2. Development of Methods for Determining The Lateral Surface of Tank: *R. Ehigiator – Irughe, M. O. Ehigiator*. Pages 165 – 174, Vol.18, (2011).
3. Hydrocarbon Investigation Using Petrophysical Parameters and Core Analysis (A Case Study of Umoro Field): *R. Ehigiator–Irughe, and M. O. Ehigiator*. Pages 175–180, Vol.18, (2011).
4. 3-D Spatial Analysis of Deformation at Ikpoba Dam From GPS Data: *J. O. Ehiorobo and R. Ehigiator-Irughe*. Pages 493–498, Vol.19, (2011).
5. Verification of Positional Accuracy of ZVS3003 Geodetic Control Using CSSPS – PPP Model: *R. Ehigiator – Irughe and M. O. Ehigiator*. Pages 499–512, Vol.19, (2011).
6. Deformation Prediction Using Linear Polynomial Functions: *Ehigiator-Irughe R, Ehigiator M.O. and Uzoekwe S. A*. Pages 353–358, Vol.20, (2012).
7. Determination of Velocity And Acceleration of Structural Deformation Using Kalman Filter Technique: *Ehigiator-Irughe R, Ehigiator M.O. and Uzoekwe S. A*. Pages 359–368, Vol.20, (2012).
8. Determining the Deformation Values using Structural Data Error Analysis: *S. Vladimir, R. Ehigiator-Irughe, M. O. Ehigiator and H. Oriakhi*. Pages 389 – 394 Vol. 21 (2012).
9. Deformation Prediction using Quadratic Polynomial Functions: *M. O. Ehigiator and R. Ehigiator-Irughe*. Pages 395 – 400 Vol. 21 (2012).

EHIGIE J.O
1. A new derivation of continuous collocation multistep methods using power series as basis function: *S. A. Okunuga and. J. Ehigie*. Pages 105–116, Vol.14, (2009).
2. Treatment of Stiff Initial Value Problems using Block Backward Differentiation formula: *A. B. Sofoluwe, S. A. Okunuga, and J. O. Ehigie*. Pages 75–82, Vol.20, (2012).

EHIKA S
1. Strongly Correlated Electron Systems in The Half Filled Band of The Hubbard Model: *Osafile O. E., Ehika, S., Idiodi J. O. A., Fiase J.O*. Pages 213–226, Vol.20, (2012).
2. The Electronic Band Structure and Linear Optical Properties of Bilayer MoS2 and MoSe2: *Omehe N. N. and Ehika S*. Pages 293–300, Vol.20, (2012).
3. The Dynamics of a Hole in Two Dimensional Mott Insulators: *S. Ehika and J.O.A. Idiod I*. Pages 1 – 10, Vol. 21, (2012).
4. Quantum phase transition in the Heisenberg model A case study of a two-spin system: *S. Ehika and J.O.A. Idiodi*. Pages 11 – 20, Vol. 21, (2012).
5. Symmetry Considerations in the Exact Diagonalization of Heisenberg Spin Chains: *Ehika S., Ataman O. J. and Idiodi J.O.A*. Pages 9 – 20, Vol. 22, (2012).
6. Correlation Functions of the Antiferromagnetic Heisenberg Chains Using a New Version of Modified Lanczos Method: *Ehika S., and Idiodi J.O.A*. Pages 21 – 34, Vol. 22, (2012).

EHIOROBO J.O
1. Parameter Estimation And Hypothesis Testing In A Two Epoch Dam Deformation Measurement: *J. O. Ehiorobo And G. C. Ovuworie*. Pages 273-284, Vol.17, (2010).
2. Stochastic Analysis of Differential GPS Surveys for Earth Dam Deformation Monitoring: *J. O. Ehiorobo and B. U. Anyata*. Pages 311-320, Vol.17, (2010).
3. 3-D Spatial Analysis of Deformation at Ikpoba Dam From GPS Data: *J. O. Ehiorobo and R. Ehigiator-Irughe*. Pages 493–498, Vol.19, (2011).

EHIWARIO J.C
1. Queuing Models: A Tool For Assessing The Profitability Of Barbing Salon Business In Agbor Town Of Delta State, Nigeria: *Ehiwario, J.C. And Okafor P.N*. Pages 477–484, Vol.20, (2012).
2. Assessing the Validity of Normality Assumption Using Probability Plots and Letter Value Diagnostics: *Osemeke Reuben F. and Ehiwario J. C*. Pages 241 – 248, Vol. 22 (2012).

3. Assessing the Detection and Correction of Model Violations Using Residuals in a Linear Regression Diagnostics: *Osemeke Reuben. F. and Ehiwario J.C.* Pages 249 – 256, Vol. 22 (2012).

EJERE I.I.A
1. Spherically Bounded States of a Spherical Quantum Dot: *Ejere I. I. A., Osarenren U. O. and Okedayo T. G.* Pages 49 – 52, Vol. 22 (2012).

EJIEJI C. N.
1. On the Model for Nuclear Safety Characterization from the Dynamical Structure of Reaction Diffusion Equation: *Omolehin J. O., Aminu L., Ejieji C. N., Enikuomehin A. O. and Fabiyi F. A. S.* Pages 411 – 418, Vol. 22 (2012).

EJIKEME C. L.
1. Energy Generation in the Human Body by the Human Cells: *Ejikeme C. L., Mbah G. C. E. and Oyesanya M. O.* Pages 99–106, Vol.19, (2011).

EJINKONYE IFEOMA O.
1. On the statistical properties of the non-linear water waves: *Ifeoma O. Ejinkonye.* Pages 67–72, Vol.14, (2009).
2. On the non-linear wave in an undisturbed wave field: *Ifeoma O. Ejinkonye.* Pages 73–76, Vol.14, (2009).
3. The effect of non-linear wave in front of vertical wall using bi-parametric approach: *Ifeoma O. Ejinkonye.* Pages 77–80, Vol.14, (2009).

EJUH G. W.
1. Ab inito and DFT study of octanitro cubane: *Ejuh G.W., N.J. Marie and A.N. Singh.* Pages 29 – 38, Vol. 16, (2010).
2. Global optimization of self Avoiding Random Walks using simulated Annealing method. Pages 95 – 110, Vol. 16, (2010).
3. Linearity and Non-linearity of photorefractive effect in materials using the band transport model: *G.W. Ejuh and L.S. Taura.* Pages 249 – 256, Vol. 20, (2012).

EKAIKO S.
1. Non Darcy flow effect on the Pressure response of Retrograde Gas Reservoir: *Ohirhian, P.U. and Ekaiko S.* Pages 381 – 388 Vol. 21 (2012).

EKE A. N.
1. Asymptotic null controllability of nonlinear neutral volterra integrodifferential system with delays in control: *A. N. Eke, and P. C. Jackreece.* Pages 267-272, Vol.13, (2008).
2. Optimal control of neutral systems with nonlinear base (The maximum principle perspective): *Celestin A. Nse and Anthony N. Eke.* Pages 269-274, Vol.11, (2007).

EKE P.O
1. Computational model for speed of efflux in liquids: *Eghuanoye Ikata, Peter O. Eke and Alalibo T. Ngiangia.* Pages 137-144, Vol.11, (2007).
2. Horizontal and vertical projectile motion in a resistant medium subject to varying path angles and speed: *Frimabo Life-George, Alalibo Ngiangia, Peter Eke and Mercy .O. Orukari.* Pages 257 – 260, Vol.14, (2009).

EKHOSUEHI FRANCA
1. Viability of the contributory pension scheme in Nigeria: an elasticity theoretic approach: *Virtue U. Ekhosuehi and Franca Ekhosuehi.* Pages 257 – 264, Vol. 22 (2012).

EKHOSUEHI N.
1. Time Series Analysis of Malaria Data: *N. Ekhosuehi and S. E. Omosigho.* Pages 63-70, Vol.5, (2001).
2. Effect Of Box-Cox Transformation Parameter On Forecast From ARIMA (P,1,0) models: *N. Ekhosuehi and S. E. Omosigho.* Pages 105-110, Vol.7, (2003).
3. Another Look at Some Information Order Selection Criteria in Autoregressive Processes: *N. Ekhosuehi.* Pages 357–362, Vol.18, (2011).
4. A note on Markovian manpower models: *Augustine A. Osagiede, Virtue U. Ekhosuehi, N. Ekhosuehi and Francis O. Oyegue.* Pages 369–378, Vol.20, (2012).
5. An Interval forecast for stationary Autoregressive process using Bootstrap method: *Ekhosuehi N. and Omosigho S. E.* Pages 219 – 224, Vol. 22, (2012).

EKHOSUEHI V.U
1. Manpower Planning Model for Less Developed Countries: *Augustine A. Osagiede and Virtue U. Ekhosuehi.* Pages 485-490, Vol.11, (2007).
2. A measure of confidence for examination process: *Virtue U. Ekhosuehi and Augustine A. Osagiede.* Pages 337-342, Vol.13, (2008).
3. Application of mathematical models to educational planning: A review: *Virtue U. Ekhosuehi and Augustine A. Osagiede.* Pages 343-350, Vol.13, (2008).
4. A panacea to the asymptotic effect of examination malpractice in a malpractice-stamp-out scenario: *Virtue U. Ekhosuehi and Augustine A. Osagiede.* Pages 193–198, Vol.20, (2012).
5. Viability of the contributory pension scheme in Nigeria: an elasticity theoretic approach: Virtue *U. Ekhosuehi and Franca Ekhosuehi.* Pages 257 – 264, Vol. 22 (2012).

EKPE J.E
1. Determination of the Spatial Variation of the Hole Current Injected into N-Type Material, in ID: *D.U. Onah, B.N. Osonwa and J.E Ekpe.* Pages 399-402, Vol.17, (2010).

EKPEKPO ARTHUR

1. Migration Velocity Analysis by Fourier Transform in Seismic Data Processing: *J.C. Egbai and Arthur Ekpekpo*. Pages 147-154, Vol.7, (2003).
2. Resistivity Inversion – A Computer Iteration Technique for the Interpretation of Vertical Electrical Sounding: *J.C. Egbai and Arthur Ekpekpo*. Pages 155-168, Vol.7, (2003).

EKPENYONG M.E

1. Towards Securing the Home Computer: A modification of the USB Port: *Evwiekpaefe A. E., Irhebhude M. E. and Ekpenyong F. E*. Pages 461–466, Vol.20, (2012).
2. Capacity and coverage of power controlled CDMA cellular systems: *Joseph Isabona, Bede Asuquo and Moses Ekpenyong*. Pages 605-614, Vol.11, (2007).
3. Throughput capacity computation model for hybrid wireless networks: *Joseph Isabona and Moses Ekpenyong*. Pages 249–256, Vol.14, (2009).
4. Modelling Mobility in Mobile AD-HOC Network Environments: *Moses Ekpenyong and Joseph Isabona*. Pages 407–412, Vol.18, (2011).

EKONG V.E

1. Intelligent Decision Support System for Depression Diagnosis based on Neuro-Fuzzy-CBR Hybrid: *V.E. Ekong, U. G. Inyang and E. A. Onibere*. Pages 517 – 526 Vol. 21 (2012).

EKUMA CHINEDU E

1. The study of the optical properties of copper based chalcopyrite semiconductors: *Emmanuel. I. Ugwu; Chinedu E. Ekuma and Hillary U. Igwe*. Pages 345-348, Vol.15, (2009).

ELAKHE A.O

1. A Moderate Order Numerical Integrator for Stiff Differential Systems: *U.S.U. Aashikpelokhai and A.O. Elakhe*. Pages 425-432, Vol.17, (2010).
2. On The Analysis of The Stability Functions Of Order Three And Four Numerical Integrator for Initial Value Problems: *Elakhe A.O*. Pages 267-272, Vol.18, (2011).
3. Efficient Order Seven and Eight Rational Integrators: *Elakhe A.O. and Aashikpelokhai U.S.U*. Pages 273-280, Vol.18, (2011).

ELETTA B.E

1. Viscous dissipation effect on the flow through a very porous media: *O. T Gideon and B. E. Eletta*. Pages 197-200, Vol.13, (2008).
2. Viscous dissipation effect on the hydro-magnetic flow through a very porous horizontal plate: *G. T. Okedayo and B. E. Eletta*. Pages 197-200, Vol.13, (2008).
3. Viscous dissipation effect on the flow through a horizontal porous channel with temperature dependent viscosity: *O. T. Gideon and B. E. Eletta*. Pages 133–136, Vol.15, (2009).

EMAGBETERE J.U

1. Determination of Water Table using Electrical Sounding Technique: A Case Study of Afuze Edo State, Nigeria: *O. C. Molua and J .U. Emagbetere*. Pages 457-464, Vol.9, (2005).

EMAGBETERE J.O

1. A Study Of EMR And SAR Distribution In Human Head Phantom Exposed To RF Energy: A Simulation Approach: *Emagbetere J.O and Odigie O.E*. Pages 413–422, Vol.18, (2011).

EMUMEJAYE K

1. On coefficients in the partial fractions of some trigonometric and exponential functions: *O. Ogbereyivwe, K. Emumejaye, and K. I. Ekeh*. Pages 41-48, Vol.13, (2008).
2. Coefficients and constants in the partial fractions of some trigonometric inverse functions: *O. Ogbereyivwe, J. O. Emunefe, and K. Emumejaye*. Pages 469–478, Vol.14, (2009).

EMUNEFE J.O

1. Coefficients and constants in the partial fractions of some trigonometric inverse functions: *O. Ogbereyivwe, J. O. Emunefe, and K. Emumejaye*. Pages 469–478, Vol.14, (2009).

ENAIBE E.A

1. A Variational Approach to the Study of Strongly Correlated Electron Systems: *Edison A. Enaibe and John O. A. Idiodi*. Pages 63-74, Vol.6, (2002).
2. The two-electron Interaction in the ground state of the Hubbard-Hirsch Hamiltonian: *Edison A. Enaibe and John O. A. Idiodi*. Pages 275-280, Vol.7, (2003).
3. On strongly correlated N-electron systems: *E. A. Enaibe, J. O. A. Idiodi, G. E. Akpojotor, E. Aghemenloh and J. O. Fiase*. Pages 337-340, Vol.8, (2004).

ENAROSEHA OMAMOKE O.E

1. Mott Transition of Cerium Compound CeCu2Si2 in the Anderson Model: *omamoke o. E. Enaroseha, benjamin e. Iyorzor, and john o. A. Idiodi*. Pages 565–570, Vol.19, (2011).

ENIKUOMEHIN A. O.

1. On the Model for Nuclear Safety Characterization from the Dynamical Structure of Reaction Diffusion Equation: *Omolehin J. O., Aminu L., Ejieji C. N., Enikuomehin A. O. and Fabiyi F. A. S*. Pages 411 – 418, Vol. 22 (2012).

ENI DANIEL
1. Asymptotic Stability Results of Solutions of Neutral Delay Systems: *Igobi, Dodi Kanu, Daniel Eni, Ernest Eteng and Jerry Atsu*. Pages 77–84, Vol.19, (2011).
2. Uniqueness and asymptotic stability properties of the critical solution of the prey-predator retarded equation model: *Igobi, Dodi k. Egwurube, Mike O.Daniel Eni and Adebisi W. Adesola*. Pages 85–90, Vol.19, (2011).

ENIOLUWAFE M.
1. On the number of cyclic quotients of some Abelian p-Groups: *Michael Enioluwafe*. Pages 33-38, Vol.11, (2007).
2. On the precise order of unit groups of Burnside rings of some finite Abelian groups: *Michael EniOluwafe*. Pages 23–28, Vol.12, (2008).

ENOCH O.O.A
1. A New Method for obtaining the nth Derivative of a Function of the Form y=l_1 (x)l_2 (x)l_3 (x): *Enoch O. O. A. and Ewumi T. O*. Pages 55–58, Vol.20, (2012).
2. A New Method for the Evaluation of Higher Order Derivatives of Three Continuous / Differentiable Functions: *Olorunsola S. A. and Enoch O. O. A*. Pages 155–158, Vol.19, (2011).
3. On the Modified Embedded Atom Method for Strontium: A New Algorithmic Approach: *Matthew-Ojelabi F., Idiodi J. O. A., Ajibade I. I. and Enoch O*. Pages 35 – 42, Vol. 22 (2012).

ERIMAFA J.T
1. Enhancing refraction statics correction from first break interpretation - the Niger Delta example: *O. Ujuanbi, S. I. Jegede, E. C. Okolie and J. T.Erimafa*. Pages 391-396, Vol.13, (2008).
2. Statistical Analysis of Gender Equality in Students' Enrolment in Ambrose Alli University, Ekpoma: *Ikpotokin O., Erimafa J.T. and Edokpa I.W*. Pages 455 – 460, Vol. 21, (2012).

ERINLE L.M
1. Mathematical Model of Temperature Rise in Three-layer Skin during Microwave Hyperthermia: *L. M. Erinle and R. O. Ayeni*. Pages 215-216, Vol.9, (2005).
2. A Stability analysis for a mathematical model for the determination of optimum drug for chemotherapy of HIV: *R.O. Ayeni, B. Gbadamosi, S. Olaniyi and M.L. Erinle-Ibrahim*. Pages 115–118, Vol.20, (2012).
3. Existence and Uniqueness Solution of the Dual-Phase-Lag Bio-Heat Transfer during Magnetic Hyperthermia Treatment: *Ayeni R.O, Erinle-Ibrahim L.M. and Gbadamosi Babatunde*. Pages 465 – 470 Vol. 21 (2012).
4. A mathematical model of interaction between regulatory proteins in bacterial flagellum: *Olayiwola R. O., Erinle-Ibrahim L. M., Odebiyi O. A., Gbadamosi B., and Achanya V. M*. Pages 503 – 512, Vol. 22 (2012).

EROMOSELE B.O
1. Geoelectric Investigation for the Delineation of the Subsurface in Ologbo and Ajoki, Edo State: *C.O. Aigbogun and B. O. Eromosele*. Pages 329–334, Vol.19, (2011).

ERUMAKA E.N
1. The Reissner – Sagoci Problem for Ogden Solid: *E. N. Erumaka*. Pages 429 – 432 Vol. 21 (2012).

ESEKHAIGBE A.C
1. Comparison of second and third orders Runge-Kutta methods for solving initial-value problems in ordinary differential equations: *L. A. Ukpebor, A. C. Esekhaigbe and E. Okodugha*. Pages 349–358, Vol.14, (2009).

ESEKHAIGBE F.
1. An investigation of groundwater by geoelectrical resistivity method: A case study in Ugbogui, Ovia South West Local Government Area, Edo State: *A. G. Usifo, F. Esekhaigbe, C. V. O. Amadasun*. Pages 317–328, Vol.15, (2009).

ESEOGHENE A.E
1. Symmetric Quantum Markovian Semigroups: *Ibrahim, Yusuf and Evwiekpaefe, Abraham Eseoghene*. Pages 21 – 26 Vol. 21 (2012).

ESHIMOKHAI S.
1. Petroleum Potentials and Well Log Evaluation from Niger Delta Basin: *Eshimokhai S., Osueni L. and Akhirevbulu O.E*. Pages 157–164, Vol.18, (2011).

ETENG ERNEST
1. Asymptotic Stability Results of Solutions of Neutral Delay Systems: *Igobi Dodi Kanu, Daniel Eni, Ernest Eteng and Jerry Atsu*. Pages 77–84, Vol.19, (2011).

ETTE A.M
1. On the dynamic buckling of stochastically imperfect finite cylindrical shells under step loading: *A. M. Ette* Department of Mathematics and Computer Science. Pages 35-46, Vol.8, (2004).
2. Dynamic stability of a lightly damped column trapped by a harmonically slowly varying explicitly time dependent load: *A. M Ette*. Pages 149-156, Vol.8, (2004).
3. On the Dynamic Buckling of a Weakly Damped Nonlinear Elastic Model System Under a Slowly Varying Explicitly Time Dependent Load: *A. M. Ette*. Pages 165-174, Vol.9, (2005).
4. On the Dynamic Buckling Load of Spherical Shells Trapped by a Harmonically Slowly Varying Load: *A. M. Ette*. Pages 175-186, Vol.9, (2005).
5. On the Dynamic Buckling of a Lightly Damped Elastic Cubic Model Structure Modulated by Sinusoidally Slowly Varying Load: *A. M. Ette*. Pages 187-198, Vol.9, (2005).
6. Initial Post Dynamic Buckling of a Quadratic-cubic Column Pressurized by a Sinusoidally Slowly Varying Dynamic Load: *A. M Ette*. Pages 199-214, Vol.9, (2005).

7. On the dynamic Stability of a quadratic-cubic elastic model structure pressurized by a slowly varying load: *A. M. Ette*. Pages 185-196, Vol.10, (2006).
8. Asymptotic solution on the dynamic buckling of a column stressed by a dynamically slowly varying load: *A. M. Ette*. Pages 197-202, Vol.10, (2006).
9. Perturbation analysis on the dynamic buckling of a lightly damped spherical cap modulated by a slowly varying sinusoidal load: *A. M. Ette*. Pages 315-326, Vol.10, (2006).
10. On the dynamic buckling of lightly damped cylindrical shells modulated by a periodic load: *A. M. Ette*. Pages 327-344, Vol.10, (2006).
11. Probabilistic dynamic stability of a damped spherical shell pressurized by a random load: *A. M. Ette*. Pages 311-322, Vol.11, (2007).
12. On the static buckling of an externally pressurized finite circular cylindrical shell: *A. M. Ette and Joy U. Onwuchekwa*. Pages 323-332, Vol.11, (2007).
13. On a two–small–parameter dynamic stability of a lightly damped spherical shell pressurized by a harmonic excitation: *A. M. Ette*. Pages 333-362, Vol.11, (2007).
14. Perturbation technique on the dynamic stability of a lightly damped cylindrical shell axially stressed by an impulse: *A. M. Ette*. Pages 103–120, Vol.12, (2008).
15. Initial post buckling of toroidal shell segments pressurized by external load: *A. M. Ette*. Pages 121–132, Vol.12, (2008).
16. On a stochastically imperfect quadratic-cubic column pressurized by a random dynamic load: *A. M. Ette*. Pages 95-104, Vol.13, (2008).
17. Time-dependent random forcing and buckling of a damped finite column on non-linear elastic foundations: *A.M. Ette*. Pages 105-118, Vol.13, (2008).
18. On a randomly imperfect spherical cap pressurized by a random dynamic load: *A. M. Ette*. Pages 9-20, Vol.14, (2009).
19. On a lightly damped elastic quadratic model structure modulated by a dynamic periodic load: *A. M. Ette*. Pages 21–40, Vol.14, (2009).
20. Effects of static pre-loading on the dynamic stability of a column on nonlinear foundations stressed by a step load: *A. M. Ette and W. I. Osuji*. Pages 37-46, Vol.15, (2009).
21. Perturbation appraisal of the dynamic buckling of an elastic model structure pressurized by a slowly varying load: *A. M. Ette*. Pages 47-54, Vol.15, (2009).

ETTE HARRISON ETUK
1. The performance of FPE for the maximum entropy estimation method: *Ette Harrison Etuk*. Pages 305-308, Vol.13, (2008).
2. On full order autoregressive model fitting: *Ette Harrison Etuk*. Pages 117–122, Vol.15, (2009).

ETUK SUNDAY E
1. A Comparative Study on Lognormal and Gamma Distributions for Life and Reliability of Kamag Machine: *Louis E. Akpabio, Akpan N. Ikot, Akpan B. Udoimuk And Sunday E. Etuk*. Pages 87-94, Vol.17, (2010).
2. Collisional Effect On Magnetosonic Solitons In A Dusty Plasma Slab: *Louis E. Akpabio, Akpan N. Ikot, Akpan B. Udoimuk And Sunday E. Etuk*. Pages 95-98, Vol.17, (2010).

EVANS G.A
1. Generating semi-Gaussian Two-Dimensional Quadrature Rules: *V. U. Aihie and G. A. Evans*. Pages 137-148, Vol.4, (2000).

EVANS O.
1. Application of Migration Velocity Using Fourier Transform Approach to Process 3-D Seismic Data: *Okan, Evans Onojasun*. Pages 39–44, Vol.17, (2010).
2. Geoelectrical Sounding Survey For Aquifer Determination In Some Northern Parts of Edo State-Nigeria: *Okan, Evans Onojasun*. Pages 45-52, Vol.17, (2010).

EVBOUMWAN A.I
1. Vertical electrical resistivity soundings to locate ground water resourc-es in Sabongida-Ora: A feasibility study: *Abraham Iyoha, Robinson Okanigbuan, and Anita Iziegbe Evboumwan*. Pages 251–260, Vol.12, (2008).

EVWIEKPAEFE A.E
1. A Prototype Security Mechanism For Xml Documents And Soap Messages: *Evwiekpaefe A. E., Irhebhude M. E., and Adedayo D. A*. Pages 423–428, Vol.18, (2011).
2. Symmetric Quantum Markovian Semigroups: *Ibrahim, Yusuf and Evwiekpaefe, Abraham Eseoghene*. Pages 21 – 26, Vol. 21 (2012).
3. Integrating Security/Privacy and Computer Self-Efficacy with TAM in internet banking adoption: *Evwiekpaefe Abraham E. and Adedayo Adeniyi D*. Pages 363 – 372, Vol. 22 (2012).
4. Towards Securing the Home Computer: A modification of the USB Port: *Evwiekpaefe A. E., Irhebhude M. E. and Ekpenyong F. E*. Pages 461–466, Vol.20, (2012).
5. Integrating Security/Privacy and Computer Self-Efficacy with TAM in internet banking adoption: *Evwiekpaefe Abraham E. and Adedayo Adeniyi D*. Pages 363 – 372, Vol. 22 (2012).

EWA I.O.B
1. Numerical calculations of ground state energy of H2 molecule using quantum Monte Carlo methods: *A. B. Suleiman and I. O. B. Ewa*. Pages 39-50, Vol.16, (2010).

FAKOLUJO O.A
1. Mathematical Modelling of a Two – Link Planar Manipulator Arm Using The Denavit – Hartenberg Matrices: *Olusola O. I. and Fakolujo O.A*. Pages 139–150, Vol.20, (2012).

FAKUNLE M.A
1. Geophysical Investigation of Effect of Aba-Eku Public Refuse Dump Site in Ibadan (South-West Nigeria) on Groundwater Quality: *O.I Popoola, J.A Adegoke and M.A Fakunle*. Pages 111-118, Vol.18, (2011).

FAKUNLE I
1. Optional Stopping Theorem as an Indispensable Tool in the Determination of Ruin Probability and Expected Duration of a Game: *Ugbebor O.O., Ganiyu A.A., and Fakunle I*. Pages 85 – 94 Vol. 21 (2012).

FALADE G.K
1. Analytical Solutions To Describe Juxtaposed Sands: *A. A. Adeniji and G. K. Falade*. Pages 243-252, Vol.17, (2010).

FALOHUN A.
1. Temperature and velocity profile on thermal ignition in a reactive variable viscosity poiseuille flow: *P. O. Olanrewaju, A. Falohun, D. A. Ajadi, and R. O. Ayeni*. Pages 405-410, Vol.13, (2008).

FAMILUA A. B.
1. A Three Step Explicit Method for Direct Solution of Third Order Differential Equations: *Familua A.B*. Pages 621–624, Vol.18, (2011).

FARAYOLA P.I
1. Effects of variable viscosity on MHD boundary layer flow on a continuously moving vertical plate in the presence of radiation and a chemical reaction of order 1: *A. M. Okedoye and P. I. Farayola*. Pages 201-210, Vol.13, (2008).

FASASI M.K
1. A new analytical solution to the diffusion problem: Fourier series method: *K. M. Fasasi*. Pages 21–26, Vol.11, (2007).

FASORANBAKU O.A
1. Behavioural Pattern of Causality Parameter of Autoregressive Moving Average Model: *Olusoga Akin Fasoranbaku And Olusola Samuel Makinde*. Pages 583–590, Vol.19, (2011).
2. Erratum: Behavioural Pattern of Causality Parameter of Autoregressive Moving Average Model: *Olusoga Akin Fasoranbaku and Olusola Samuel Makinde*. Pages 555 – 556 Vol. 21 (2012).

FATIGUN A.T
1. On Some Generalization of the Eigenvectors Properties: *Fatigun, A.T. and David, D.S.Y.* Pages 457-468, Vol.17, (2010).

FENUGA O.J
1. Remarks on thermal explosions in the early evolution of the earth: *R. O. Ayeni, A. O. Popoola and O. J. Fenuga*. Pages 69-70, Vol.10, (2006).
2. Impact of electric and magnetic fields in a resistant medium on the velocity of a particle subject to varying path angles: *O. J. Fenuga and R. O. Ayeni*. Pages 235-238, Vol.10, (2006).
3. Existence of a secondary flow for a temperature dependent viscous couette flow: *S. O. Adesanya, O.J Fenuga, O. O. Otolorin*. Pages 257-260, Vol.10, (2006).
4. Stability of critical points in a resistant medium under the influence of electric and magnetic fields: *O. J. Fenuga and R. O. Ayeni*. Pages 157–160, Vol.12, (2008).
5. Effect of a magnetic field on a rotating fluid flow: *O. J. Fenuga and R. O Ayeni*. Pages 261–266, Vol.14, (2009).
6. Flow of a Maxwell Fluid Through a Porous Medium Induced By a Constantly Accelerating Plate: *Hassan A. R. and Fenuga O. J*. Pages 249–254, Vol.19, (2011).

FENWA O.D.
1. Unsteady Free Convective Flow of Sisko Fluid with Radiative Heat Transfer Past a Flat Plate Moving Through a Binary Mixture: *Olanrewaju P. O., Adeleke O. J., Adigun A.A., Fenwa O.D., Oke A., and Ajala Funmi*. Pages 443 – 454, Vol. 22 (2012).

FIASE J.O
1. A comparative analysis of the effective interactions obtained from perturbation and variation methods for the SD-Shell: *J. O. Fiase*. Pages 198-216, Vol.2, (1998).
2. A Least Squares Fit of Meson Spectra in the Dirac Equation with a Power–Law Potential Model: *J. O. Fiase and L. K. Sharma*. Pages 81-92, Vol.6, (2002).
3. Missing ideas: Self-Consistency Problem in the Derivation of the One-and Two-Body Effective Interactions for SD Shell-Model Calculations: *J. O. Fiase and L. K. Sharma*. Pages 93-104, Vol.6, (2002).
4. A Mass-Dependent Effective Interaction for Shell-Model Calculations Derived for the fp Shell: *J.O. Fiase, and K. Ibikunle, and A. A. Akombor*. Pages 53-62, Vol.7, (2003).
5. A review of 20Ne structure in a full microscopic self-consistent shell–model calculation with tensor correlations: *J. O. Fiase, H. E Agba, A. A. Akombor and Frederick Gboarun*. Pages 63-68, Vol.8, (2004).
6. On strongly correlated N-electron systems: *E. A. Enaibe, J. O. A. Idiodi, G. E. Akpojotor, E. Aghemenloh and J. O. Fiase*. Pages 337-340, Vol.8, (2004).
7. Binding Energy and Single–Particle Energies in the 160 regions: *J.O. Fiase, and F. Gbaorun and L.K. Sharma*. Pages 65-68, Vol.9, (2005).
8. New One-Boson-Exchange Potential functions: *J. O. Fiase and F. Gbaorun and L. K. Sharma*. Pages 5-10, Vol.10, (2006).

9. Mass Dependence Of The Landau-Migdal Parameter Estimated With Effective Interactions: *J.O. Fiase and John O. A. Idiodi*. Pages 69–76, Vol.16, (2010).
10. Binding Energy and Compression Modulus of Infinite Nuclear Matter Derived from Variational Calculation: *J.O. Fiase and Frederick Gbaorun*. Pages 615–618, Vol.19, (2011).
11. Strongly Correlated Electron Systems in The Half Filled Band of The Hubbard Model: *Osafile O. E., Ehika, S., Idiodi J. O. A., Fiase J.O*. Pages 213–226, Vol.20, (2012).

FLEMING GEORGE
1. Computations Of Critical Depth In Rivers With Flood Plains: *Okoli C. S MICE, and George Fleming, FICE*. Pages 347-362, Vol.16, (2010).

FOLARANMI R.O
1. A Chebyshev-collocation approach for a continuous formulation of hybrid methods for initial value problems in ordinary differential equations: *R. B. Adeniyi, M. O. Alabi and R.O. Folaranmi*. Pages 369-378, Vol.12, (2008).

FUWAPE I. A
1. Some Models of a Dynamical System by Ibiyinka A. Fuwape. Pages 181-194, Vol.2, (1998).
2. Dynamics of the Driven-Damped Pendulum: *Ibiyinka A. Fuwape and Oluyomi Akinyemi.* Pages 195-197, Vol.2, (1998).
3. Delay Differential Equations and Finite-Dimensional Iterated Mapping: *Ibiyinka A. Fuwape.* Pages 43-47, Vol.3, (1999).
4. Synchronization of Chaotic Systems: *Ibiyinka A. Fuwape.* Pages 48-54, Vol.3, (1999).
5. Phase Transition in Globally Coupled Maps: *Ibiyinka A. Fuwape and Hilda A. Cerdeira,* Vol.5, Pages 147-160, Vol.5, (2001).
6. Magnetisation of Some Ferrometals: *Ibiyinka .A. Fuwape.* Pages 279-284, Vol.5, (2001).
7. Phase Synchronization of Coupled Oscillators: *Ibiyinka .A. Fuwape.* Pages 131-136, Vol.6, (2002).
8. Comparative study of the Bisection and the Newton Methods in solving for Zeros and Extremes of a single-variable Function: *Iwetan C.N., Fuwape I. A., Olajide M.S., and Adenodi R.A.* Pages 173-176, Vol.21(2012).

GANA U.M
1. Composite Targets and compositional inhomogeneities in sputter deposited thin films: *Usman M. Gana*. Pages 261-266, Vol.7, (2003).
2. An Application of Nucleation Theory to Thin-Film Annealing: *Gana U. M*. Pages 511–516, Vol.20, (2012).

GANIYU MOSURAT A.
1. On Certain Sufficient Conditions For A Function To Be Close-To-Convex Function: *Abolape D. Akwu, Monsurat A. Ganiyu, and Jimoh M*. Pages 505–510, Vol.20, (2012).

GANIYU A.A
1. Optional Stopping Theorem as an Indispensable Tool in the Determination of Ruin Probability and Expected Duration of a Game: *Ugbebor O. O, Ganiyu A.A., and Fakunle I*. Pages 85 – 94, Vol. 21, (2012).

GARBA E.J.D
1. A Cauchy Problem for a Quasi-Linear Hyperbolic First Order Partial Differential Equation: *Michael O.Egwurube and Emmanuel J.D.Garba*. Pages 29-32, Vol.7, (2003).
2. Non-well Posed Evolution Equations and Fredholm Operators: *Michael O. Egwurube and Emmanuel J. D. Garba*. Pages 43-48, Vol.9, (2005).

GBADAMOSI B.
1. A Stability analysis for a mathematical model for the determination of optimum drug for chemotherapy of HIV: *R.O. Ayeni, B. Gbadamosi, S. Olaniyi and M.L. Erinle-Ibrahim*. Pages 115–118, Vol.20, (2012).
2. Further Remarks on Vaccination for Non-Fatal Susceptible-Invective-Susceptible (SIS) Disease: *O.O. Ayandokun, R.O. Ayeni, T.O. Oluyo and B. Gbadamosi*. Pages 187–190, Vol.18, (2011).
3. Existence and Uniqueness Solution of the Dual-Phase-Lag Bio-Heat Transfer during Magnetic Hyperthermia Treatment: *Ayeni R.O, Erinle-Ibrahim L.M. and Gbadamosi Babatunde*. Pages 465 – 470 Vol. 21 (2012).
4. A mathematical model of interaction between regulatory proteins in bacterial flagellum: *Olayiwola R. O., Erinle-Ibrahim L. M., Odebiyi O. A., Gbadamosi B., and Achanya V. M*. Pages 503 – 512, Vol. 22, (2012).

GBADEYAN J.A
1. The Dynamic Response of Plates on Pasternak Foundation to Distributed Moving Load: *G. A. Gbadeyan and M. S. Dada. E. O. Okeke and V. E. Asor. E. O. Okeke and V. E. Asor*. Pages 185-200, Vol.5, (2001).
2. On the convergence of the dynamic series solution of a constrained elastic column subjected to wind gust: *J. A. Gbadeyan and E. O. Titiloye*. Pages 157-160, Vol.8, (2004).
3. Viscous dissipation effects on the flow of a radiating gas between concentric elliptic cylinders: *R. O. Oladele, J. A. Gbadeyan and O. A.Taiwo*. Pages 299-304, Vol.10, (2006).
4. Radiation effect of magnetohydrodynamic flow of gas between concentric spheres: *J. A Gbadeyan and A. S. Idowu*. Pages 305-314, Vol.10, (2006).
5. On The Dynamic Analysis of Non-Uniform Beams With Non-Linear Winkler Foundation: *I.O. Abiala and J.A. Gbadeyan*. Pages 175–182, Vol.19, (2011).

GBOLAGADE A.W
1. On the existence of weak solutions of quantum stochastic differential equations: *E. O. Ayoola and A. W. Gbolagade*. Pages 5-8, Vol.8, (2004).
2. On the application of Dijkstra's algorithms in solving the GSM Network problem: *A.W. Gbolagade Z. O., Ogunwobi, A. U. Rufai, and K.A. Gbolagade, and R.K. Odunaike*. Pages 319-322, Vol.8, (2004).

3. Thermal Ignition in a Reactive Variable Viscosity Poiseuille Flow: *W. Gbolagade and O. D. Makinde*. Pages 573-578, Vol.9, (2005).
4. Effect of Biot Number on Thermal Criticality in a Couette Flow: *W. A. Gbolagade and O. D. Makinde*. Pages 579-584, Vol.9, (2005).
5. Application of homotopy perturbation method for the large angle period of a nonlinear oscillator: *M. O. Olayiwola, A. W. Gbolagade, A.O. Adesanya and F. O. Akinpelu*. Pages 235–238, Vol.14, (2009).
6. Application of modified power series method for the solution of system of differential equations: *M. O Olayiwola, A. W Gbolagade and A. O Adesanya*. Pages 91-94, Vol.14, (2009).
7. On the Arrhenius reacting flow over a stretching sheet in the presence of magnetic field: *O. B. Ayeni and A. W. Gbolagade*. Pages 437-442, Vol.15, (2009).
8. An Efficient Algorithm for Solving the Telegraph Equation: *Olayiwola, M. O, Gbolagade, A .W & Adesanya , A. O*. Pages 199–204, Vol.16, (2010).
9. Solving Variable Coefficient Fourth-Order Parabolic Equation by Modified initial guess Variational Iteration Method: *Olayiwola, M. O, Gbolagade, A .W & Adesanya, A. O*. Pages 205–210, Vol.16, (2010).
10. Numerical Solutions of Generalized Burger's-Huxley Equation by Modified Variational Iteration Method: *Olayiwola M.O, Gbolagade A .W & Akinpelu F. O*. Pages 433-438, Vol.17, (2010).

GIDEON O.T
1. Finite Element Analysis of One–dimensional Hydrodynamic Dispersion of a Reactive Solute in Electroosmotic Flow: *O. T. Gideon and Y. M Aiyesimi*. Pages 465-472, Vol.9, (2005).
2. Hydrodynamic dispersion of a reactive solute in Electro-Osmotic flow using quadratic polynomials: *O. T. Gideon*. Pages 249-256, Vol.10, (2006).
3. Effect of viscous damping on the response of a finite beam resting on a tensionless Pasternak Foundation subjected to a harmonic load: *O. T. Gideon and Y. M. Aiyesimi*. Pages 375-378, Vol.11, (2007).
4. Viscous dissipation effect on the flow through a very porous media: *O. T Gideon and B. E. Eletta*. Pages 197-200, Vol.13, (2008).
5. Viscous dissipation effect on the flow through a horizontal porous channel with temperature dependent viscosity: *O. T. Gideon and B. E. Eletta*. Pages 133–136, Vol.15, (2009).
6. Flow Through A Horizontal Porous Channel With A Harmonic Pressure Gradient: *O. T. Gideon*. Pages 133-136, Vol.17, (2010).
7. Viscous dissipation effect on the hydro-magnetic flow through a very porous horizontal plate: *G. T. Okedayo and B. E. Eletta.* Pages 197-200, Vol.13, (2008).
8. Spherically Bounded States of a Spherical Quantum Dot: *Ejere I. I. A. Osarenren U. O. and Okedayo T. G.* Pages 49 – 52, Vol. 22, (2012).

GIEGBEFUMWEN PETER
1. Application of the theory of revealed preference to a special Problem in the maritime transport market: *Ogbeide Paul Osaze and Giegbefumwen Peter*. Pages 341 – 344, Vol. 22, (2012).

GORE JANE
1. On Quasi Linear Kinematics Waves: *Vincent E. Asor and Jane Gore*. Pages 143-170, Vol.6, (2002).

HAKIMI D
1. Mathematical modelling of the calcination process: *R. O. Olayiwola, A.T. Cole, D. Hakimi and R.O. Ayeni.* Pages 381–388, Vol.14, (2009).

HARHIARAN N.
1. Calculation of Phonon Dispersion curves and Density of States: Use of Simple Program with Personal Computers: *Salihu S. Duwa, & Lawan S. Taura and N. Harhiaran.* Pages 53-66, Vol.4, (2000).

HASSAN A.R
1. On The Flow of Maxwell Fluid Between Two Walls Induced By A Constantly Accelerating Plate: *Hassan A. R, and Ayeni R.O.* Pages 129-132, Vol.17, (2010).
2. Flow of a Maxwell Fluid through a Porous Medium Induced By a Constantly Accelerating Plate: *Hassan A. R. and Fenuga O. J.* Pages 249–254, Vol.19, (2011).
3. Free Convective Flow between Vertical Porous Plates with Variable Suction and Periodic Heating Input: *Asibor, R. E., Otolorin, O., Adesanya, S. O. and Hassan, A. R.* Pages 259–272, Vol.19, (2011).

HASSAN MOHAMMED
1. Evaluation of Fractured Basement Complex Rock Porosity by Azimuthal Cross-Square Vertical Electrical Soundings: *Saleh M., Likkason O. K. & Mohammed Hassan.* Pages 315–320, Vol.20, (2012).

HOUNSOUNOU O.K
1. Non linear dynamic equation for deoxyhemoglobins aggregation: A phenomenological approach: *L. O. Olatunji, A. S. Moussiliou and O. K.Hounsounou.* Pages 377-386, Vol.13, (2008).

HOWUSU S.X.K
1. Exact Eigenenergies and Eigenfunctions of the KP Anharmonic Oscillator: *S. X. K. Howusu.* Pages 45-62, Vol.6, (2002).
2. Einstein's Gravitational Field Equations Exterior and Interior to an Oblate Spheroidal Body: *S. X. K. Howusu and P.C. Uduh.* Pages 251-260, Vol.7, (2003).
3. Gravitational fields of prolate spheroidal bodies extension of gravitational fields of spherical bodies: *E. F. Musongong and S. X. K. Howusu.* Pages 93-96, Vol.8, (2004).

4. Gravitational time dilation and spectral shift in the field of a massive oblate spheroidal body: *E. F. Musongong and S. X. K. Howusu.* Pages 97-100, Vol.8, (2004).
5. Complete Schwarzschild's planetary equation: *S. X. K. Howusu and D.D Bakwa.* Pages 265-268, Vol.8, (2004).
6. Einstein's equations of motion in the gravitational field of an oblate spheroidal body: *S. X. K. Howusu and D.D Bakwa.* Pages 269-272, Vol.8, (2004).
7. Contribution of oblateness of the sun to radar sounding according to Newtonian mechanics: *Y. Y. Jabil and S. X. K. Howusu.* Pages 11-14, Vol.10, (2006).
8. Einstein's equation of motion for a photon in fields exterior to astrophysically real or imaginary spherical mass distributions whose tensor field varies with azimuthal angle only: *E. N. Chifu and S. X. K. Howusu.* Pages 363 - 366, Vol.13, (2008).

HUSSAINI NAFIU
1. Simulation Modeling for the Stochastic Analysis and Performance
2. Evaluation of a Repairable Series-Parallel System: *Ibrahim Yusuf and Nafiu Hussaini.* Pages 53 – 60, Vol. 21, (2012).

IBE C.B
1. An Order Level Inventory Replenishment Model with Time Dependent Demand, Finite Production Rate and Partially Backlogged Shortage: *Ibe C.B. and Osagiede F.E.U.* Pages 487 – 494, Vol. 21, (2012).
2. An Inventory Model for Deteriorating Items with Time Decreasing Demand and Partial Backlogging: *Ibe C.B. and Osagiede F.E.U.* Pages 495 – 500, Vol. 21, (2012).

IBIEJUGBA M.A
1. An Optimization Technique for the Retarded Differential Delay Equation: *F. M. Okoro and M A. Ibiejugba.* Pages 55-74, Vol.3, (1999).
2. On the Existence of a Solution to the Optimal Economic Growth in an Aggregative Closed Economy: *E.O. Oyatoye and M.A. Ibiejugba.* Pages 313-318, Vol.18, (2011).

IBIJOLA E. A.
1. Simple Algorithm for the Generation of Adomian Polynomial: *Adeyeye F.J., Ibijola E. A. and Skwame. Y.* Pages 393 – 398, Vol. 22, (2012).
2. On the Derivation of the Stability Function of a New Numerical Scheme for the Solution of Initial Value Problems in Ordinary Differential Equations: *Ogunrinde R. B., and Ibijola E.A.* Pages 483 – 486, Vol. 22, (2012).

IBIKUNLE K.
1. A Mass-Dependent Effective Interaction for Shell-Model Calculations Derived for the fp Shell: *J.O. Fiase, and K. Ibikunle, and A. A. Akombor.* Pages 53-62, Vol.7, (2003).

IBIYEMI A.I
1. A geophysical study of structural foundations in Omolayo area, Ibadan, Nigeria: *V. C. Ozebo, O. O. Odusote, G. Omisore and A. I. Ibiyemi.* Pages 267–278, Vol.12, (2008).

IBRAHIM M.O
1. Stability Analysis of Equilibrium States of an SEIR Tuberculosis Model: *S.A. Egbetade and M.O. Ibrahim.* Pages 119–124, Vol.20, (2012).

IBRAHIM YUSUF
1. On non-commutative l_p spaces over a quasilocal Von Neumann Algebra: *Y. Ibrahim and A.A. Tijjani.* Pages 1 – 6, Vol. 12, (2008).
2. On the existence of the infinite volume Quantum stochastic Dynamics: *Y. Ibrahim, A.A. Tijjani and A.I. Onyeozili.* Pages 85 – 94, Vol. 16, (2010).
3. Martingales of the Generalized Conditional Expectations on the Generalized Positive Operators of a Von Neumann Algebra: *Y. Ibrahim and Auwalu Yusuf Bichi.* Pages 1 – 6, Vol. 17, (2010).
4. Exponential Stability of Quantum Stochastic Dynamics: *Y. Ibrahim.* Pages 1 – 6, Vol. 19, (2011).
5. Symmetric Quantum Markovian Semigroups: *Ibrahim Yusuf and Evwiekpaefe Abraham Eseoghene.* Pages 21 – 26, Vol. 21, (2012).

IBRAHIM Y. S.
1. Effects of Perturbations on the Location of Collinear Points In The Restricted Three-Body Problem with Triaxial Primaries: *Jagadish Singh and Ibrahim Y. Sa'adatu.* Pages 415-420, Vol.17, (2010).

IDENYI S. M.
1. Study of Optical, Solid State and Structural Properties of Nickel Sulphide (NiS) Thin Films Deposited using Solution Growth Technique: *D.U. Onah, E.I. Ugwu and S.M. Idenyi.* Pages 393-398, Vol.17, (2010).

IDIGBE K.I
1. Eigenvalues define conditions of stability in liquid-liquid miscible displacement process: *K. I. Idigbe and B. H. Caudle.* Vol.8, Pages 167-172, Vol.8, (2004).
2. The modelling of instabilities in liquid-liquid miscible displacement processes: *the Galerkin-based finite element method by K. I. Idigbe.* Pages 173-176, Vol.8, (2004).
3. An Innovative Model to Estimate Fracture Extensions: *A. A. Adeniji and K. I. Idigbe.* Pages 233-242, Vol.17, (2010).
4. Modeling Economic Planning for Exhaustible Natural Resources: *K. I. Idigbe and A. A. Adenijii.* Pages 319-324, Vol.18, (2011).

IDIODI EVELYN A.O

1. Authorship Characteristics of The Journal of The Nigerian Association of Mathematical Physics (JNAMP): *Evelyn A. Omoluabi Idiodi And W. P. Akpochafo.* Pages 485–490, Vol.20, (2012).

IDIODI J.O.A

1. Equivalent–Crystal Theory of FCC Metal Surfaces: *E. Aghemenloh and J. O. A. Idiodi.* Pages 271-284, Vol.2, (1998).
2. On the Problem of Low Surface Energies within the embedded Atom Method: *J. O. A. Idiodi and E, Aghemenloh.* Pages 285-296, Vol.2, (1998).
3. An EAM Study Of The Single- Atom Impurity Problem: *D. O. Nworgu and J. O. A. Idiodi.* Pages 325-334, Vol.2, (1998).
4. Implementation of Equivalent Crystal Theory within a generalized embedded-Atom Method: *J. O. A. Idiodi and and E. Aghemenloh.* Pages 167-178, Vol.3, (1999).
5. Tight- Binding Potentials for Fcc Metals: *John O.A. Idiodi.* Pages 31-40, Vol.4, (2000).
6. Application of Equivalent Crystal Theory to BCC Metal Surfaces: *E. Aghemenloh and J. O. A. Idiodi.* Pages 101-114, Vol.5, (2001).
7. Electronic Band Structure of Solid C60: *F. Mathew-Ojelabi and J. O. A. Idiodi.* Pages 201-220, Vol.5, (2001).
8. Non-Local Theory of Superconducting Tc For Doped Fullerenes: *F. Matthew-Ojelabi and J. O. A. Idiodi.* Pages 221-232, Vol.5, (2001).
9. A Variational Approach to the Study of Strongly Correlated Electron Systems: *Edison A. Enaibe and John O. A. Idiodi.* Pages 63-74, Vol.6, (2002).
10. Application of Equivalent Crystal Theory to BCC Metal Surfaces: Surface Relaxation Calculation: *E. Aghemenloh and J. O. A. Idiodi.* Pages 253-270, Vol.6, (2002).
11. The two-electron Interaction in the ground state of the Hubbard-Hirsch Hamiltonian: *Edison A. Enaibe and John O. A. Idiodi.* Pages 275-280, Vol.7, (2003).
12. On strongly correlated N-electron systems: *E. A. Enaibe, J. O. A. Idiodi, G. E. Akpojotor, E. Aghemenloh and J. O. Fiase.* Pages 337-340, Vol.8, (2004).
13. On Recent Developments on the Embedded Atom Method: *A. A. Oni-Ojo and J. O. A. Idiodi and E. Aghemenloh.* Pages 507-512, Vol.9, (2005).
14. Towards a Self Consistent Embedding Function for Lithium: *E. Aghemenloh and S. O. Azi and J. O. A. Idiodi.* Pages 513-518, Vol.9, (2005).
15. The derivation of the analytic expressions of the dynamical susceptibility based on the Hubbard-Hirsch Hamiltonian: *Ben E. Iyorzor, Robinson Okanigbuan and John O.A. Idiodi.* Pages 579-582, Vol.10, (2006).
16. Analytical EAM alloy models for FCC metals: *S. O. Azi, E. Aghemenloh and J. O. A. Idiodi.* Pages 429-434, Vol.11, (2007).
17. Analytic functions for calculating binary alloys of FCC metals: *D. D. Abajingin, J. I. Agbi, J. O. A. Idiodi.* Pages 435-444, Vol.11, (2007).
18. Embedded atom method for materials with a negative Cauchy discrepancy: *A. A. Oni-Ojo, J. O. A. Idiodi and E. O. Aiyohuyin.* Pages 509-515, Vol.11, (2007).
19. Ground state energy of the Hubbard Hamiltonian: Perturbative results: *O. R. Okanigbuan and J. O. A. Idiodi.* Pages 37–40, Vol.12, (2008).
20. A comparative study of two different embedding functions: *S. O. Azi, E. Aghemenloh, and J. O. A. Idiodi.* Pages 517-524, Vol.12, (2008).
21. Instability of Nagaoka's Theorem within The Hubbard Model: *Ben. E. Iyorzor and John O. A. Idiodi.* Pages 1-6, Vol.16, (2010).
22. Variational Study of Bound States of two electrons Described: *the t-U-J model by Onaiwu N. Kingsley and John O. A. Idiodi.* Pages 17-28, Vol.16, (2010).
23. Surface energy calculation of fcc metals using the new analytical algorithm for equivalent crystal theory: *S Yusuf E Aghemenloh J O A Idiodi.* Pages 57-68, Vol.16, (2010).
24. Mass Dependence Of The Landau-Migdal Parameter Estimated With Effective Interactions: *J.O. Fiase and John O. A. Idiodi.* Pages 69–76, Vol.16, (2010).
25. The Effect of Phonon Relaxation Process on Absorption Spectra: *Babalola M. I., Iyorzor, B. E., Idiodi, J.O. A.* Pages 107-110, Vol.18, (2011).
26. Mott Transition of Cerium Compound CeCu2Si2 in the Anderson Model: *Omamoke O. E. ENAROSEHA, Benjamin E. IYORZOR, and John O. A. IDIODI.* Pages 565–570, Vol.19, (2011)
27. Superconductivity in Correlated Fermions System: *Babalola M. I., Iyorzor B. E., and Idiodi, J.O.A.* Pages 571–574, Vol.19, (2011).
28. The Tomonaga Model: *Nenuwe O. N., Babalola M. E., and Idiodi J. O. A.* Pages 205–212, Vol.20, (2012).
29. Strongly Correlated Electron Systems in The Half Filled Band of The Hubbard Model: *Osafile O. E., Ehika, S., Idiodi J. O. A., Fiase J.O.* Pages 213–226, Vol.20, (2012).
30. The Dynamics of a Hole in Two Dimensional Mott Insulators: *S. Ehika and J.O.A. Idiodi.* Pages 1 – 10, Vol. 21, (2012).
31. Quantum phase transition in the Heisenberg model A case study of a two-spin system: *S. Ehika and J.O.A. Idiodi.* Pages 11 – 20, Vol. 21, (2012).
32. Tomonaga-Luttinger Liquid for Collective Motion of Fermions a Basic Theory of One-Dimensional Correlated Electrons: *Nenuwe, O. N., Babalola, M. I., and Idiodi, J. O. A.* Pages 405 – 412, Vol. 21, (2012).

33. Effect of Coupling Constant on Spectral Function: Green's Function ANSATZ: *Babalola M. I. Bakare A. Iyorzor B. E., and Idiodi J.O.A.* Pages 401 – 404, Vol. 21, (2012).
34. First Principles studies of band structure and electronic properties of Group III – Nitrides Semiconductors: *Ojuh O. D. and Idiodi J. O. A.* Pages 501 – 508, Vol.21, (2012).
35. On the Modified Embedded Atom Method for Strontium: A New Algorithmic Approach: *Matthew-Ojelabi F., Idiodi J. O. A., Ajibade I. I. and Enoch O.* Pages 35 – 42, Vol. 22, (2012).
36. The Ising Model on the Bethe Lattice: *Akpojotor F.A., Babalola M.I. and Idiodi J.O.A.* Pages 43 – 48, Vol. 22, (2012).

IDOKO V
1. Self-similar solution for coupled thermal electromagnetic model during microwave heating of biological tissues: *E. A. Adebile, B. N. Akintewe, O. K. Olaleye, and V. Idoko.* Pages 229-234, Vol.10, (2006).

IDOWU B.A
1. Anti-synchronization of two new different chaotic systems via active control: *B. A. Idowu, U. E. Vincent, and O. A. Obawole.* Pages 15–20 Vol.11, (2007).
2. Chaos Control and Synchronization in Generalized Lorenz Systems With fully Uncertain Parameters: *Olusola O. I., Njah A.N., Vincent U. E., Idowu B. A. and Ahmed A.* Pages 7–14, Vol.19, (2011).

IDOWU I.A
1. Response under a Moving Load of an Elastically Supported Euler- Bernoulli Beam on Pre-Stressed and Variable Elastic Foundation: *F.O Akinpelu I.A Idowu, and R.A Mustapha.* Pages 519 – 534, Vol. 22, (2012).

IDOWU S.B
1. Entropy Rate in Solar Wind Flow: *O.D. Makinde & S. Idowu.* Pages 77 - 80, Vol.1, (1992).
2. Radiation effect of magnetohydrodynamic flow of gas between concentric spheres: *J. A Gbadeyan and A. S. Idowu.* Pages 305-314, Vol.10, (2006).

IDRIS M.C
1. Analysis of Anthropogenic Contribution to Natural Concentration of Trace Element in Zaria Soil: *Idris M.C, Okunade I.O, Ogunleye P.O. and Mohammed L.* Pages 105 – 110, Vol. 22, (2012).

IDUSERI A
1. Efficient Data-Driven Rule for Obtaining an Optimal Predictive Function of a Discriminant Analysis: *Osemwenkhae J. E. and Iduseri A.* Pages 373–380 Vol.18, (2011).

IFEANYI M.M
1. Application of Variational Iteration Decomposition Method for Solving Linear Differential Equation of Tenth-Order with Boundary conditions: *Oke Isaac. S and Modebei Mark Ifeanyi.* Pages 337 – 344, Vol. 21, (2012).

IFEDILI S.O
1. Application of Schlumberger array of vertical electric sounding to detection of water bearing formations: *F. O Ezomo and S. O Ifedili.* Pages 247-252, Vol.8, (2004).
2. The effect of seasonal variation on the consistency of resistivity data: *Otobo Egwebe and S. O. Ifedili.* Pages 253-258, Vol.8, (2004).
3. Non-uniqueness in the interpretation of resistivity sounding –I: *Otobo Egwebe and S.O.Ifedili.* Pages 259-264, Vol.8, (2004).
4. Non-uniqueness in the Interpretation of Resistivity Sounding – II: *Otobo Egwebe and S.O. Ifedili.* Pages 431-436, Vol.9, (2005).
5. The Vertical Electrical Sounding: A Viable Tool for the Investigation of Fresh Ground-water in the Saline Water Environment with Particular Reference to the Communities along Warri River: *Otobo Egwebe and S.O. Ifedili.* Pages 437-442, Vol.9, (2005).
6. An investigation of groundwater condition in Agbede by Geelectrical resistivity method: *Otobo Egwebe and S. O. Ifedili and C. O. Aigbogun.* Pages 71-76, Vol.10, (2006).
7. Vertical electric sounding investigation of aquifers in the Ekpoma area of Nigeria: *F. O. Ezomo and S. O. Ifedili.* Pages 597-604, Vol.11, (2007).

IFIDON E.O
1. Generalized Solutions to nonlinear parabolic equations: *E. O. Ifidon and E. O. Oghre.* Pages 222-233, Vol.3, (1999).
2. Pulsating Flow in Viscoeloastic Tubes: *Emmanuel O. Oghre and Edward O. Ifidon.* Pages 201-212, Vol.4, (2000).
3. A Note on the Generalized Rotations of State Vectors in Complex Hilbert Spaces: *E. O Ifidon.* Pages 1-10, Vol.7, (2003).
4. SUSY QM Factorization of General and Confluent Heun's Differential Operators: *O.C. Izinyon and G.E. Igbinoba*, Pages 7-12, Vol.17, (2010).
5. A non-uniform Spherical Stuart vortex: *B.O Ikhimwin and E.O Ifidon.* Pages 361 – 364, Vol.21, (2012).

IGABARI J.N
1. On a differential and integral characterization of real-valued convex functions of several variables: *P. E. Ezimadu and J. N. Igabari.* Pages 83-86, Vol.13, (2008).
2. A derivative and integral characterization of real-valued convex functions of single variable through the geometric chord property: *P. E. Ezimadu and J. N. Igabari.* Pages 283–288, Vol.14, (2009).
3. On The Left Tail-End Probabilities and the Probability Generating Function: *J. N. Igabari and E. C. Nduka.* Pages 345-348, Vol.18, (2011).

7. A Mathematical Model for the Interception of a Moving Target by V.A. Iheagwam, C.A. Nse, D.E. Mbonu. Pages 35-44, Vol.18, (2011).
8. On The Relative Controllability Perturbation of Nonlinear Functional Differential Systems with Implicit Derivative by Iheagwam V.A. Pages 491–496, Vol.20, (2012).

IHEDIOHA S.A
1. Uncertainty Claim Pricing using Weibull Distortion Operator: *Bright O.Osu, Obiageri E.Ogwo and Silas A. Ihedioha.* Pages 73 – 78, Vol. 21, (2012).

IHEONU E.E
1. On the Attenuation of Solar Radiation by Absorbing Gases In The Atmosphere: *E. E. Iheonu.* Pages 139-146, Vol.5, (2001).
2. Ionospheric Investigation using Analog Bottom Side Sounder Ionograms: *O. S. Oyekola and E. E. Iheonu.* Pages 223-232, Vol.6, (2002).
3. A Simple Correction to Absorption Theory in the Region of Quasi-Transverse Propagation of Radio Waves Through the Ionosphere: *O. S. Oyekola, E. E. Iheonu, and J. Akinrimisi.* Pages 233-238, Vol.6, (2002).
4. Heat Transfer Modelling of Roofing Elements of Buildings in the Tropics: *E. E. Iheonu and A. P. Opoko.* Pages 235-244, Vol.7, (2003)
5. The F-Region Equatorial Ionospheric Electrodynamics Drifts: *Oyedemi S. Oyekola and Emeagi E. Iheonu.* Pages 27- 34, Vol.10, (2006).
6. On temperature control of buildings by adobe wall design: Duffin and Knowles' exponential transmission line model revisited: *E. E. Iheonu.* Pages 35-40, Vol.10, (2006).
7. Determination of utilizable wind energy for indoor ventilation in buildings across selected locations in Nigeria: *Ocholi M. and Iheonu E.E.* Pages 543–550, Vol.19, (2011).
8. A Review of Some Features of Radiowave Absorption: *Iheonu E. E.* Pages 551–558, Vol.19, (2011).
9. Erratum: Determination of utilizable wind energy for indoor ventilation in buildings across selected locations in Nigeria. [J. Nig. Assoc. Math. Phys. Vol. 19, 543 – 550 (2011)]: *Ocholi M. and Iheonu E.E.* Pages 587, Vol. 22, (2012).

IHIMEKPEN N
1. An EVI Model for Daily Rainfall Occurrence at Benin City, Nigeria: *O.C. Izinyon and N. Ihimekpen.* Pages 483–494, Vol.18, (2011).

IKATA EGHUANOYE
1. FDTD Model of Acoustic Wave Interaction with Soft Targets: *Eghuanoye Ikata.* Pages 545-560, Vol.9, (2005).
2. Computational model for speed of efflux in liquids: *Eghuanoye Ikata, Peter O. Eke and Alalibo T. Ngiangia.* Pages 137-144, Vol.11, (2007).
3. Acoustic wave in viscous fluid: *Eghuanoye Ikata.* Pages 161-166, Vol.13, (2008).
4. Alternating Direction Implicit Finite Difference Time Domain Acoustic Wave Algorithm: *Eghuanoye Ikata.* Pages 197-206, Vol.17, (2010).

IKE S.A
1. Development of an Automatic Outdoor Lighting Switch: *Ike S. A and Apeh S. T.* Pages 433 – 438, Vol. 21, (2012).
2. The Choice of a Swing Bus in a Power System Network A Case Study of the Nigerian National Grid: *Ike, S. A and Egedi-Idu, S.O.* Pages 439 – 448, Vol. 21, (2012).

IKHILE M.N.O
1. Mutipoint Iteration Methods For Sparse System of Linear Equations: *M.N.O Ikhile.* Pages 89-105 Vol.3, (1999).
2. Parallel Iteration Methods for Linear System of Equations: *M. N. O. Ikhile.* Pages 149-174, Vol.4, (2000).
3. An Iterative Method For Simultaneous Inclusion of Polynomial Zeros: *Monday Ndidi Oziegbe Ikhile.* Pages 17-36, Vol.5, (2001).
4. Interval Methods for Simultaneous Inclusion of all Zeros of a Polynomial: *M. N. O. Ikhile and F. O. Otunta.* Pages 293-302, Vol.6, (2002).
5. Combination methods for numerical inclusion of the zeros of a polynomial: *M. N. O. Ikhile.* Pages 105-120, Vol.8, (2004).
6. Successive Substitution One-leg hybrid P-stable LMM for Initial Value Problems in Second Order Ordinary Differential Equations: *M. N. O Ikhile and M. V. Ayo.* Pages 269-278, Vol.9, (2005).
7. Second derivative continuous linear multistep methods for the numerical integration of Stiff system of ordinary differential equations: *F. O. Otunta, M. N. O. Ikhile and R. I. Okuonghae.* Pages 159-174, Vol.11, (2007).
8. Stiffly stable continuous extension of second derivative linear multi-step methods with an off-step point for initial value problems in ordinary differential equations: *M. N. O. Ikhile and 2R. I. Okuonghae.* Pages 175-190 , Vol.11, (2007).
9. Class of stiffly stable hybrid second derivative continuous linear multistep methods for stiff IVPs in ODEs: *R. I. Okuonghae and M. N. O. Ikhile.* Pages 313–336, Vol.12, (2008).
10. Strategies for deriving multi-derivative GMLM for the numerical solution of IVPs in ODEs: *M. N. O. Ikhile.* Pages 337–352, Vol.12, (2008).
11. Second derivative parallel block backward differentiation type formulas for Stiff ODEs: *K. O. Muka and M. N. O. Ikhile.* Pages 117–124, Vol.14, (2009).
12. Generalized Enright block methods for Stiff ODEs: *K. O. Muka and M. N. O. Ikhile.* Pages 125–134, Vol.14, (2009).
13. R-Stable Embedded DIRKN Method of Orders 4(3) for Solving Special Second Order IVPs: *Imoni S.O. and Ikhile M.N.O.* Pages 169-180, Vol.16, (2010).

14. Second Derivative Parallel Multi-Block Methods for Stiff ODEs: *Muka K.O. and Ikhile M.N.O.* Pages 297 – 308, Vol. 21, (2012).
15. On Stability of Chartier's Block Formulae: *K.O. Muka and M.N.O. Ikhile.* Pages 537 – 544, Vol. 21, (2012).

IKHIMWIN B.O
1. A non-uniform Spherical Stuart vortex: *B.O Ikhimwin and E.O Ifidon.* Pages 361 – 364, Vol.21, (2012).

IKPOKU O.O
1. On Some Problems of the Variable end-Point Theorem: *Oghogho Omane Ikpoku and E. O. Okeke.* Pages 317-326, Vol.4, (2000).

IKPOTOKIN O
1. Statistical Analysis of Gender Equality in Students' Enrolment in Ambrose Alli University, Ekpoma: *Ikpotokin O., Erimafa J.T. and Edokpa I.W.* Pages 455 – 460, Vol. 21, (2012).
2. Estimation of P-Value: Bootstrap a Viable Alternative to Permutation Approach: *Ikpotokin O. and Oyegue F.O.* Pages 179 – 184, Vol. 22, (2012).

IKYO BARNABAS
1. A heat model for temperature distribution in a laptop computer: *Frederic K. Gbaorun, Barnabas Ikyo.* Pages 201–206, Vol.12, (2008).

ILENIKHENA P.A
1. Comparative Studies of Cobalt Oxide (CoO) and Copper Oxide (CuO) Thin Films Deposited by Improved Electroless Chemical Bath Technique at 320K: *P. A. Ilenikhena and C. E. Okeke.* Pages 519-528, Vol.9, (2005).
2. Analysis of Zinc Sulphide (ZnS) and Cadmium Sulphide (CdS) Thin Films Deposited by Improved Solution Growth Method at 300K: *P. A. Ilenikhena and C. E. Okeke.* Pages 529-540, Vol.9, (2005).
3. Fabrication and optical characterization of improved electroless chemically deposited strontium fluoride (SrF2) thin films at 320K : *P. A. Ilenikhena.* Pages 415-422, Vol.11, (2007).

IMONI S.O
1. R-Stable Embedded DIRKN Method of Orders 4(3) for Solving Special Second Order IVPs: *Imoni S.O. and Ikhile M.N.O.* Pages 169-180, Vol.16, (2010).

IMUOUKHOME FRANCIS
1. Software Process Improvement Using Force Field Analysis: *Francisca Egbokhare and Francis Imouokhome.* Pages 389–394, Vol.18, (2011)

INYAMA S.C
1. The effect of stochastic migration on an HIV/AIDS transmission model: *Simeon Chioma Inyama.* Pages 471-476, Vol.10, (2006).
2. Qualitative study of Kermack and Mckendrick's epidemic model: *Simeon Chioma Inyama.* Pages 477-480, Vol.10, (2006).
3. Mathematical model of the bacteria-nutrient dynamics: *Simeon Chioma Inyama.* Pages 145-148, Vol.11, (2007).
4. Mathematical model of epidemics with intermediate classes: *Simeon Chioma Inyama.* Pages 149-152, Vol.11, (2007).
5. Mathematical model of human genetics with overlapping generations: *Simeon Chioma Inyama.* Pages 431-434, Vol.12, (2008).
6. Predator-prey mathematical model using Van Der Pol's equation: *Simeon Chioma Inyama.* Pages 435–438, Vol.12, (2008).

INYANG U.G
1. Intelligent Decision Support System for Depression Diagnosis based on Neuro-Fuzzy-CBR Hybrid: *V.E. Ekong, U. G. Inyang and E. A. Onibere,* pp 517 – 526 Vol. 21 (July, 2012)

IRHEBHUDE M.E
1. A Prototype Security Mechanism For Xml Documents And Soap Messages: *Evwiekpaefe A. E., Irhebhude M. E., and Adedayo, D. A.* Pages 423–428, Vol.8, (2004).
2. Towards Securing the Home Computer: A modification of the USB Port: *Evwiekpaefe, A. E., Irhebhude, M. E. and Ekpenyong, F. E.* Pages 461–466, Vol.20, (2012).

IRUEGBUKPE D.O
1. On The Choice of a Completely Randomized Design with Emphasis On The D-Optimality Criterion: *Iruegbukpe, D. O. and Mbegbu, J. I.* Pages 367–372, Vol.18, (2011).

ISA NASIR F
1. Evaluation of n + 16Fe reaction cross section at 14MeV incident energy: *Emmanuel F. Oyidi, Nasir F. Isa and Salihu S. Duwa.* Pages 171-178, Vol.15, (2009).

ISABONA JOSEPH
1. Capacity and coverage of power controlled CDMA cellular systems: *Joseph Isabona, Bede Asuquo and Moses Ekpenyong.* Pages 605-614, Vol.11, (2007).
2. Throughput capacity computation model for hybrid wireless networks: *Joseph Isabona and Moses Ekpenyong.* Pages 249–256, Vol.14, (2009).
3. Modelling Mobility in Mobile AD-HOC Network Environments: *Moses Ekpenyong and Joseph Isabona.* Pages 407–412, Vol.18, (2011).

ISERE A.O

1. Constructing an automorphism with discrete spectrum: *A. O. Isere and 2J. E. Osemwenkhae.* Pages 491-496, Vol.11, (2007).
2. Generalized biases in nonsymmetric univariate kernels: *J. E. Osemwenkhae and 2A. O. Isere.* Pages 497-500, Vol.11, (2007).
3. Endemicity of cholera in Nigeria: A mathematical model to investigate its nature: *J. E Osemwenkhae, A. O. Isere and D. U. Okuonghae.* Pages 165-170, Vol.14, (2009).
4. Detection of cholera outbreaks: A statistical scheme for its detection: *A. O. Isere, J. E Osemwenkhae and I. W. Edokpa.* Pages 171–176, Vol.14, (2009).
5. Nuclear Automorphism of a class of Osborn Loops: *John Olusola Adeniran and Abednego Orobosa Isere.* Pages 5 – 8, Vol. 22, (2012).

ISHIEKWENE C.C

1. Choice of smoothing parameters in boosting kernel density estimates: *C. C.Ishiekwene, S. M. Ogbonmwan and F.O. Oyegue.* Pages 443-454, Vol.12, (2008).
2. Adaptive Kernel In The Bootstrap Boosting Algorithm In KDE: *Ishiekwene C. C and Nwelih E.* Pages 363–366, Vol.18, (2011).

ISIWELE D.O

1. Groundwater potential investigation using combined VLF and VES: *K.O. Ozegin, D.O. Isiwele and S.O. Azi.* Pages 403-410, Vol.11, (2007).
2. Geophysical investigation of Oke-Agbe-Oyin Road failure using VLF and double dipole: *K. O. Ozegin, S. O. Azi and D. O. Isiwele.* Pages 411-414, Vol.11, (2007).

ISRAEL-COOKEY C.

1. Heat and mass transfer in the unsteady hydromagnetic free-convection flow in a rotating binary fluid II: *M. A. Alabraba , A. G. Warmate and C. Israel-Cookey.* Pages 169–178, Vol.12, (2008).
2. Effects of noise-induced hearing loss within Port Harcourt metropolis, Nigeria: *V. B. Omubo-Pepple, C. Israel-Cookey, G. I. Alaminokuma.* Pages 439–448, Vol.14, (2009).
3. Onset of thermal instability in a low Prandtl number fluid with internal heat source in a porous medium: *C. Israel-Cookey, V. B. Omubo-Pepple.* Pages 283-292, Vol.16, (2010).
4. Computational procedures for implementing the optimal control problem of higher-order nondispersive wave using the extended conjugate gradient algorithm: *Ifeanyi S. Ukwosa, Sunday A. Reju and C. Isreal-Cookey.* Pages 85-90, Vol.15, (2009).

ISSA A.A.

1. Modeling the effect of operating variables on sorption of PAHs from aqueous streams onto orange peels using artificial neural network pattern recognition: *Owabor, C.N. and Issa A.A.* Pages 131–138, Vol.20, (2012).

ITUEN E.E

1. Feynman Paths in the Quantum Mechanics of a Simple Harmonic Oscillator: *Etim Eno Ituen.* Pages 31-44, Vol.6, (2002).
2. Relative Deviation between a Uniformly Weighted Propagator and a Windowed Propagator of a Simple Harmonic Oscillator: *Eno Etim Ituen.* Pages 285-294, Vol.7, (2003).
3. Relative deviation between a uniformly weighted propagator and windowed propagator of a simple Harmonic Oscillator–2: *E. E. Ituen, G. T Akpabio and A. A. Okon.* Pages 13-18, Vol.8, (2004) .

IWETAN C.N

1. Comparative study of the Bisection and the Newton Methods in solving for Zeros and Extremes of a single-variable Function: *Iwetan C.N., Fuwape I. A., Olajide M.S., and Adenodi R.A.* Pages 173 – 176, Vol. 21, (2012).
2. Improvisation of Laboratory Power Supply for Powering Laboratory Electronic Instruments: *Adenodi, R. A., Iwetan, C. N., Akinluyi F. O. and Oketayo O. O.* Pages 219 – 224, Vol. 21, (2012).

IWU H.C

1. Arima Model of Crude Oil Exports In Nigeria: *E. C. Nwogu and H. C. Iwu.* Pages 285-292, Vol.17, (2010).

IWUEZE I.S

1. On the purely seasonal ARIMA Process: *Eleazar C. Nwogu, Michael Okpara and Iheanyi S. Iwueze.* Pages 115-126, Vol.7, (2003).
2. Some example of modelling with super-diagonal bilinear moving average time series: *Iheanyi S. Iwueze.* Pages 125-130, Vol.8, (2004).
3. Buys-Ballot estimates when stochastic trend is quadratic: *Iheanyi S. Iwueze and Johnson Ohakwe.* Pages 311-318, Vol.8, (2004).
4. Buys-Ballot Estimates for Exponential and s-shaped Growth Curves: *I. S. Iwueze and E. C. Nwogu.* Pages 357-366, Vol.9, (2005).
5. Differencing When Growth Curve Is Exponential: *Iheanyi S. Iwueze.* Pages 211 – 218, Vol. 22, (2012).
6. Modeling Nigeria External Reserves for National Transformation: *Iwueze I. S., Nwogu E. C. and Nlebedim V. U.* Pages 295 – 306, Vol. 22, (2012)

IYAI DAVIES

1. Relative Controllability of Nonlinear Systems with Delays in State and Control: *Davies Iyai.* Pages 239-246, Vol.9, (2005).

2. Euclidean null controllability of linear systems with delays in state and control: *Davies Iyai.* Pages 553-558, Vol.10, (2006).
3. Euclidean null controllability of perturbed infinite delay systems with limited control: *Davies Iyai.* Pages 571-576, Vol.11, (2007).
4. Approximate controllability of neutral volterra integrodifferential equations in abstract spaces: *Davies Iyai.* Pages 49–58, Vol.14, (2009).
5. Complete controllability of perturbed infinite delay systems: *Davies Iyai and Reuben A. Umana.* Pages 59–66, Vol.14, (2009).

IYAM OGBAN GABRIEL
1. On A Two-Stage Supply Chain Model In The Manufacturing Industry: *Bakare Emmanuel Afolabi, Ogban Gabriel Iyam and Chima R. Nwozo.* Pages 253 – 264, Vol.16, (2010).

IYEKE S.D
1. Modelling of California Bearing Ratio with Unconfined Compressive Strength for Cement Stabilized Laterite Soil: *Iyeke S.D And Osuji S.O.* Pages 605–610, Vol.18, (2011).

IYOHA IBRAHIM
1. Vertical electrical resistivity soundings to locate ground water resourc-es in Sabongida-Ora: A feasibility study: *Abraham Iyoha, Robinson Okanigbuan, and Anita Iziegbe Evboumwan.* Pages 251–260, Vol.12, (2008).

IYORZOR B.E
1. The derivation of the analytic expressions of the dynamical susceptibility based on the Hubbard-Hirsch Hamiltonian: *Ben E. Iyorzor, Robinson Okanigbuan and John O.A. Idiodi.* Pages 579-582, Vol.10, (2006).
2. Instability of Nagaoka's Theorem within The Hubbard Model: *Ben. E. Iyorzor and John O. A. Idiodi.* Pages 1-6, Vol.16, (2010).
3. Mott Transition of Cerium Compound CeCu2Si2 in the Anderson Model: *Omamoke O. E. ENAROSEHA, Benjamin E. IYORZOR, and John O. A. Idiodi.* Pages 565–570, Vol.19, (2011).
4. Effect of Coupling Constant on Spectral Function: Green's Function ANSATZ: *Babalola M. I. Bakare A. Iyorzor B. E., and Idiodi J.O.A.* Pages 401 – 404, Vol. 21 (2012).
5. Magnetic Phase Transition In CeNixCu1-X Alloys A Kondo Model Study: *S. Okunzuwa, E. Aghemenloh, B. E. Iyorzor.* Pages 509 – 516 Vol. 21 (2012).
6. The Effect of Phonon Relaxation Process on Absorption Spectra: *Babalola M. I., Iyorzor, B. E., Idiodi, J.O. A.* Pages 107-110, Vol.18, (2011).
7. Superconductivity in Correlated Fermions System: *Babalola M. I., Iyorzor B. E., and Idiodi, J.O.A.* Pages 571–574, Vol.19, (2011).

IZAH L. A.
1. A Solar Power Design for Primary and Secondary Schools in Nigeria: *Ebunilo P.O.B., Izah L. A. and Sadjere E.G.* Pages 561 – 570, Vol. 22, (2012).

IZEVBIZUA O
1. The Construction of an automorphism with a continuous spectrum and no square root: *O. Izevbizua and I. C. Alufohai.* Pages 1-4, Vol.8, (2004).
2. Improved Yokota Algorithm for Egyptian Fractions: *O. Izevbizua and O. Ogbereyivwe.* Pages 331-336, Vol.9, (2005).
3. Three algorithms for Egyptian fractions: *Orobosa Izevbizua and Joseph Osemwenkhae.* Pages 121-126, Vol.10, (2006).
4. Sylvester's series and Egyptian fractions: *Orobosa Izevbizua.* Pages 33–36, Vol.12, (2008).
5. Egyptian fractions and practical numbers: *O. Izevbizua and A. Okormi.* Pages 387-390, Vol.13, (2008).

IZINYON O.C
1. Extended period simulation (EPS) modelling of urban water distribution network : *O. C. Izinyon and B. U. Anyata.* Pages 423–434, Vol.14, (2009).
2. Flood Frequency Analysis of Ikpoba River Catchment at Benin City, Edo State Nigeria: *O.C. Izinyon and G.E. Igbinoba.* Pages 253-260, Vol.17, (2010).
3. Comparison of Log-Pearson Type III and Gumbel Probability Distributions for Flood Frequency Analysis of Ikpoba River Catchment at Benin City: *Izinyon, O.C. And Igbinoba, G.E.* Pages 261–272, Vol.17, (2010).
4. An EVI Model for Daily Rainfall Occurrence at Benin City, Nigeria: *O.C. Izinyon and N. Ihimekpen.* Vol.18, Pages 483–494, Vol.18, (2011).

JABIL Y. Y.
1. Contribution of oblateness of the sun to radar sounding according to Newtonian mechanics: *Y. Y. Jabil and S. X. K. Howusu.* Pages 11-14, Vol.10, (2006).
2. Newton's equation of motion in the gravitational field of an oblate earth: *D. D. Bakwa and Y. Y Jabil.* Pages 279-286, Vol.11, (2007).
3. Differences between general relativity and dynamical theory of gravitation in the resolution of radar sounding phenomenon to the order of C^5: *Y. Y. Jabil and D. D. Bakwa.* Pages 49–54, Vol.12, (2008).
4. General Relativistic Theory Of Radar Sounding In The Gravitational Field Of An Oblate Spheriodal Sun To The Order Of C^3: *Jabil Y. Y. and Bakwa D. D.* Pages 53 – 58, Vol. 22, (2012).
5. Theoretical Verification of General Relativistic Theory of Radar Sounding To The Order Of C^-3: *Jabil Y. Y. and Bakwa D. D.* Pages 59 – 62, Vol. 22, (2012).

JACKREECE P.C

1. Relative controllability of nonlinear neutral Volterra Integrodiferential systems with delays in control: *P. C. Jackreece.* Pages 543-546, Vol.10, (2006).
2. Asymptotic null controllability of nonlinear neutral volterra integrodifferential system with delays in control: *A. N. Eke, and P. C. Jackreece.* Pages 267-272, Vol.13, (2008).
3. Stabilizability For Nonlinear Systems That Admit Some Lyapunov-Like Functions: *S.E. Aniaku and P.C. Jackreece.* Pages 309 – 314, Vol. 21, (2012).

JAGADISH SINGH

1. Combined effects of perturbations, radiation and oblateness on the location of equilibrium points in the restricted three-body problem: *AbdulRazaq AbdulRaheem and Jagadish Singh.* Pages 19-24, Vol.8, (2004).
2. Stability of Collinear Equilibrium Points in the Generalized Photo-gravitational Restricted Three-body Problem: *Jagadish Singh.* Vol.9, (2005), Vol.9, (2005).
3. First order normalization in the perturbed restricted three–body problem with variable mass: *Jagadish Singh.* Pages 41-46, Vol.10, (2006).
4. Stability of triangular points in the generalised photogravitational restricted three-body problem with variable mass: *Jagadish Singh.* Pages 287-294, Vol.11, (2007).
5. On The Stability Of Equilibrium Points In The Perturbed Restricted Three- Body Problem With Variable Masses: *Oni Leke, Umar Aishetu and Jagadish Singh.* Pages 413-426, Vol.16, (2010).
6. Stability of Triangular Equilibrium Points in the Photogravitational Elliptic RTBP with Oblateness: *Jagadish Singh and Aishetu Umar.* Pages 145-150, Vol.17, (2010).
7. On The Stability of Collinear Points In The Photogravitational Elliptic Restricted Three-Body Problem: *Jagadish Singh and Aishetu Umar.* Pages 151-156, Vol.17, (2010).
8. Effects of Perturbations on the Location of Collinear Points In The Restricted Three-Body Problem with Triaxial Primaries: *Jagadish Singh and Ibrahim Y. Sa'adatu.* Pages 415-420, Vol.17, (2010).

JAIYEOLA T.G

1. On Some Algebraic Properties of Generalized Groupd: *J.O. Adeniran; J.T. Akinmoyewa, A.R.T. Solarin and T.G. Jaiyeola.* Pages 401-406, Vol.16, (2010).

JATAU R.N

1. Gravitational Metric Tensor Exterior to Rotating Homogeneous Spherical Masses: *Chifu E. Ndikilar, R.N. Jatau and L. W. Lumbi.* Pages 49–54, Vol.19, (2011).

JAYEOLA D

1. Effects of Diversification of Assets on Mean and Variance: *D. Jayeola.* Pages 131–134, Vol.19, (2011).

JEGEDE S.I

1. Poisson impedance as an enhanced litho-fluid discriminator using crossplot analysis: *O. Ujuanbi, S. I. Jegede, F. Osayande and C. O. Molua.* Pages 279–284, Vol.12, (2008).
2. Enhancing refraction statics correction from first break interpretation - the Niger Delta example : *O. Ujuanbi, S. I. Jegede, E. C. Okolie and J. T. Erimafa.* Pages 391-396, Vol.13, (2008).

JHA B. K.

1. Time dependent two phase flows in Magnetohydrodynamics: A Greens function approach: *Basant K. Jha and Haruna M. Jibril.* Vol.11, Pages 295-300, Vol.11, (2007).
2. Temperature field in a flow over a stretching sheet with internal heat generation and uniform heat flux: *Basant K. Jha and Haruna M. Jibril.* Pages 165-168, Vol. 12, (2008).
3. Time-Dependent Natural Convection Couette Flow of Heat Generating/Absorbing Fluid between Vertical Parallel Plates Filled With Porous Material: *Basant K. Jha and Muhammad K. Musa.* Pages 233–248, Vol.19, (2011).
4. Free-Convective Flow Composite Channel With Wall Suction and Injection: *Basant K. Jha, J. O. Odengle, and M. L. Kaurangini*. Pages 527 – 536 Vol. 21 (2012)**.**
5. An Approximate Analytical Investigation of Couette Flow In Composite Channel: *Basant K. Jha and M.L. Kaurangini.* Pages 461 – 464, Vol. 22 (2012).

JIBRIL H. M.

1. Time dependent two phase flows in Magnetohydrodynamics: A Greens function approach: *Basant K. Jha and Haruna M. Jibril.* Pages 295-300, Vol.11, (2007).
2. Temperature field in a flow over a stretching sheet with internal heat generation and uniform heat flux: *Basant K. Jha and Haruna M. Jibril.* Pages 165-168, Vol. 12, (2008).

JIM-GEORGE F.

1. Horizontal and vertical projectile motion in a resistant medium under the influence of transverse magnetic field: *A. T Ngiangia, N. Wonu and F. Jim-George.* Pages 83-86, Vol.11, (2007).

JIMOH AHMED

1. Exact Vibration Solution for initially stressed Beams resting on Elastic Foundation and subjected to partially distributed masses: *B. Omolofe, A. Adedowole, S.O. Ajibola and Jimoh Ahmed.* Pages 91-98, Vol.18, (2011).

JIMOH M.

1. On Certain Sufficient Conditions For A Function To Be Close-To-Convex Function: *Abolape D. Akwu, Monsurat A. Ganiyu, and Jimoh M.* Pages 505–510, Vol.20, (2012).

JIMOH O. R.
1. Computational Analysis of a one-dimensional nonlinear reactive contaminant flow with an initial continuous point source: *homotopy-perturbation method. Aiyesimi Y. M. and Jimoh O. R.* Pages 543 – 546, Vol. 22, (2012).

JIMOH R. G.
1. Development of data encryption and decryption algorithm using 4-row rail fence cipher: *J. O. Omolehin, O. C. Abikoye and R. G. Jimoh.* Pages 411-416, Vol.13, (2008).

JIYA M.
1. Dynamic analysis of a Bernoulli-Euler beam via the Laplace transformation technique: *M. Jiya, Y. M. Aiyesimi, and A. A. Mohammed.* Pages 203-210, Vol.10, (2006).
2. Dynamic Analysis of a non-linear vibrating circular cylindrical shell using the regular perturbation technique: *M. Jiya, and Y. M. Aiyesimi.* Pages 301-310, Vol.11, (2007).
3. Application of thermo-acoustic engines to heat transfer in microcircuits: An analytical approach: *R. O. Olayiwola, M. Jiya and Y. M. Aiyesimi.* Pages 221-226, Vol.13, (2008).
4. A mathematical model of combustion kinetics of municipal solid waste (MSW): *R. O. Olayiwola, M. Jiya and Y. M. Aiyesimi.* Vol.14, Pages 389–394, Vol.14, (2009).

JOSHUA E.E
1. The period of relaxation oscillations of a nonlinear system using singular perturbation methods: *E. E. Joshua.* Pages 211-222, Vol.10, (2006).
2. Mathematical modelling of mortality rate of broiler chickens: *E. E. Joshua and I. U. Anagbogu.* Pages 439-442, Vol.12, (2008).

KAREEM S.O
1. On the numerical solution of the Gross-Pitaevskii equation for an isolated vortex in trapped gas: *J. A. Laoye and S. O. Kareem.* Pages 55-58, Vol.13, (2008).
2. Physical model of income distribution: *T. W. David, O. O. Odusote, and S. O. Kareem.* Pages 315-320, Vol.13, (2008).

KASHIMBILA M. M
1. Scattering Phase Functions of Constituents of Mineral Dust Aerosols: *Sa'id R. S. and Kashimbila M. M.* Pages 331–342, Vol.20, (2012).

KAURANGINI M.L
1. Free-Convective Flow Composite Channel With Wall Suction and Injection: *Basant K. Jha , J. O. Odengle, and M. L. Kaurangini.* Pages 527 – 536, Vol. 21, (2012).
2. An Approximate Analytical Investigation of Couette Flow In Composite Channel Basant: *K. Jha and M.L. Kaurangini.* Pages 461 – 464, Vol. 22, (2012).

KAYODE S.J
1. Maximum Order Second Derivative Hybrid Multi-Step Methods for Integration of Initial Value Problems in Ordinary Differential Equations: *R. A. Ademiluyi and S. J. Kayode.* Pages 251-262, Vol.5, (2001).
2. An Optimal Order Continuous Multistep Algorithm For Initial Value Problems of Special Second Order Differential Equations: *D. O. Awoyemi and S. J. Kayode.* Pages 285-292, Vol.6, (2002).
3. A 5-step Maximal order Method for Direct Solution of Second Order Ordinary Differential Equations: *S. J. Kayode and D. O. Awoyemi.* Pages 279-284, Vol.9, (2005).

KINGSLEY U
1. Application of Multivariate Analysis in Geographic Information System (GIS) For Spatial Distribution of Primary Health Care Centers In Warri South Local Government Area, Delta State: *Agaja Silas and Unueroh Kingsley,* Pages 483 – 486, Vol. 21, (2012).

KOKI FATIMA S.
1. Computation of the Skyrme–Hartree–Fock equations in the Cartesian deformed harmonic-oscillator basis: *Fatima S. Koki and Salihu S. Duwa.* Pages 163-170, Vol.15, (2009).
2. Numerical calculation of the ground state of Helium atom using Hyllerass algorithm: *Fatima Salmanu Koki.* Pages 305-310, Vol.15, (2009).

KOLAWOLE M.K
1. Solution of IVP of Second Order ODE with Oscillatory Solutions using Variational Iterative Method (VIM): *Adeniyi M. O., Kolawole M. K.* Pages 59–60, Vol.20, (2012).
2. Solution of Lie' nard Equations using Modified Initial Guess Variational Iterative Method (MIGVIM): *Adeniyi M. O., Kolawole M. K.* Pages 61–64, Vol.20, (2012).
3. Mathematical analysis of the global dynamics of a power law model for HIV infection of CD4+ T cells: *Adeniyi M. O., Kolawole M. K.* Pages 125–130, Vol.20, (2012).
4. The Mathematical Analysis of the Within-Host Dynamics of Plasmodium Falciparum: *M.O. Adeniyi, M.K. Kolawole and M.O Olayiwola.* Vol.18, Pages 303-306, Vol.18, (2011).

KORIKO K.O
1. Criteria for unique solution of a radial porous medium combustion: *O.K. Koriko.* Pages 299-312, Vol.3, (1999).
2. Oscillatory and Asymptotic Properties of Odd Order Difference Equations: *O. K. Koriko.* Pages 123-136, Vol.4, (2000).
3. Existence of Solution of a Time-Dependent Radial Porous Medium Combustion: *O. K. Koriko.* Pages 177-180, Vol.7, (2003).

3. Magnetic and Porosity Effect on MHD Flow of a Dusty Viscoelastic Fluid through Horizontal Plates with Heat Transfer: *Lawal O. W. and Loyinmi A. C.* Pages 95 – 104, Vol. 21, (2012).

LUKUMAN A
1. The Concept of Convexity in Fuzzy Set Theory: *Rauf K., Omolehin J. O. , Ma'ali A. I., Badeggi A. Y. and Lukuman A.* Pages 13–16, Vol.20, (2012).

LUMBI L.W
1. Gravitational Metric Tensor Exterior to Rotating Homogeneous Spherical Masses: *Chifu E. Ndikilar, R.N. Jatau and L. W. Lumbi.* Pages 49–54, Vol.19, (2011).

LUO RUNZI
1. Adaptive GFPS of a new four-dimensional hyperchaotic system with uncertain parameters: *Luo Runzi, Deng Shucheng and Wei Zhengmin.* Pages 111-118, Vol.16, (2010).

MA'ALI A. I
1. The Concept of Convexity in Fuzzy Set Theory: *Rauf K., Omolehin J. O. , Ma'ali A. I., Badeggi A. Y. and Lukuman A.* Pages 13–16, Vol.20, (2012).

MABAYOJE M.O
1. Control derivative to optimal control analysis: *J. O. Omolehin, K. Rauf, M. O. Ajisope, M. A. Mabayoje and L. B. Asaju.* Pages 399-404, Vol.15, (2012).

MADAKI A.A
1. Selecting The Best Initial Method For A Transportation Problem: *Madaki A.A. & Sani B.* Pages 333-344, Vol.20, (2012).

MADU C.A
1. Electronic properties of Sodium clusters in spherical Jellium model: *C. A. Madu and B. N. Onwuagba.* Pages 267-274, Vol.7, (2003).
2. First-principles study of structural and electronic properties of GaP and InP: *C. A. Madu.* Vol.13, Pages 351-356, Vol.13, (2008)
3. Energy Band Structure Studies Of Zinc-Blende GaAs and In As: *Madu C A2 and Onwuagba B N.* Pages 51-56, Vol.16, (2010).

MADUEKWE A.A.L
1. Solar Radiation Models In Nigeria: A Case For Validation Of Results: *A.A.L. Maduekwe.* Pages 61 - 69, Vol. 1, (1992).
2. Comparison of the thermal responses of brick and concrete houses to outside air temperature and solar radiation in Kano: A case study of a NBRRI model house: *A. A. L Maduekwe and A.P. Okpoko.* Pages 121 - 134, Vol.2, (1998).

MADUEMEZIA A.
1. A Hamiltonian For Superconductors: *E.O. Aiyohuyin, A. Maduemezia, G.K. Oyanna.* Pages 29-31, Vol. 1, (1992).
2. Anharmonic Oscilator Model of F-Center absorption in Alkali Halides: *Awele Maduemezia and Ademola Obawole.* Pages 217-224, Vol. 2, (1998).
3. De-Sitter group approach to the Theory of Gravitation: *Awele Maduemezia.* Pages 1-11, Vol. 3, (1999).
4. Critical Field/Critical Temperature Correlation in Conventional Superconductors: *Awele Maduemezia.* Pages 75-80, Vol. 6, (2002).
5. Analytic curves for plume model of dispersion of air pollutants: *Awele Maduemezia.* Pages 173-176, Vol. 7, (2003).

MAKANJUOLA S.O
1. Certain Quadratic Extensions: *S. M. Tudunkaya and S. O. Makanjuola.* Pages 271 – 280, Vol. 21, (2012).
2. Kronecker Product of Non-Reduced Burau Representation of The Braid Group, B3: *Fadipe-Joseph, Olubunmi A., Tele, Fwangshak M. and Makanjuola Samuel O.* Pages 1 – 4, Vol. 22, (2012).
3. Certain Construction of Finite Fields: *S. M. Tudunkaya and S. O. Makanjuola.* Pages 95 – 104, Vol. 21, (2012).

MAKINDE O. D
1. Entropy Rate In Solar Wind Flow: *O.D. Makinde & S. Idowu.* Pages 77 - 80, Vol. 1, (1992).
2. Thermal Ignition in a Reactive Variable Viscosity Poiseuille Flow: *W. Gbolagade and O. D. Makinde.* Pages 573-578, Vol.9, (2005).
3. Effect of Biot Number on Thermal Criticality in a Couette Flow: *W. A. Gbolagade and O. D. Makinde.* Pages 579-584, Vol.9, (2005).

MAKINDE SIJUOLA OLADAPO
1. Mathematical Analysis of the Dynamics of a 3 mass-spring system with connecting dashpot topology having unequal coupled masses: *Aiyesimi Y.M and Makinde Sijuola Oladapo.* Pages 535 – 542, Vol. 22, (2012).

MAKINDE OLUSOLA SAMUEL
1. Behavioural Pattern of Causality Parameter of Autoregressive Moving Average Model: *Olusoga Akin Fasoranbaku and Olusola Samuel Makinde.* Pages 583–590, Vol.19, (2011).
2. Behavioural Pattern of Invertibility Parameter of Arima Model: *Olusola Samuel Makinde.* Pages 591–606, Vol.19, (2011).
3. Erratum: Behavioural Pattern of Causality Parameter of Autoregressive Moving Average Model: *Olusoga Akin Fasoranbaku and Olusola Samuel Makinde.* Pages 555 – 556, Vol. 21, (2012).

MATTHEW-OJELABI F.
1. Electronic Band Structure of Solid C60: *F. Mathew-Ojelabi and J. O. A. Idiodi.*, Pages 201-220, Vol.5, (2001).

2. Non-Local Theory of Superconducting Tc For Doped Fullerenes: *F. Matthew-Ojelabi and J. O. A. Idiodi.* Pages 221-232, Vol.5, (2001).

3. Optmizied random phase approximation for the phase diagram of C60 material: *F. Matthew-Ojelabi and K. A. Aduloju.* Pages 21-26, Vol.10, (2006).

4. The effect of ammonia intercalation on the superconducting properties of the alkali-metal doped fulleride: *F. Matthew-Ojelabi.* Pages 455-460, Vol.11, (2007).

5. Empirical formula for the parameters of metallic monovalent halides: *F. Matthew-Ojelabi.* Pages 211–216, Vol.14, (2009).

6. The role of Coulomb interaction in the structural formation of molten Ytterium chloride: *F. Matthew-Ojelabi.* Pages 147-154, Vol.15, (2009).

7. On the Modified Embedded Atom Method for Strontium: A New Algorithmic Approach: *Matthew-Ojelabi F., Idiodi J. O. A., Ajibade I. I. and Enoch O.* pp 35 – 42, Vol. 22 (November, 2012).

MBA OBASI ODIM

1. On R^2 Contribution and Statistical Inference of the Change in the Hidden and Input Units Of The Statistical Neural Networks: *Christopher Godwin Udomboso, Tolulope Olayemi James and Mba Obasi Odim.* Pages 335 – 340, Vol. 22, (2012).

MBAH G.C.E

1. Pressure on the Cochlea as a Load on the basilar membrane: Its contribution to the mechanism of hearing: *G. C. E. Mbah and O. H. Adagba.* Pages 549-556, Vol.11, (2007).

2. On the wave equations of shallow water with rough bottom topography: *G. C. E. Mbah.* Pages 143–150, Vol.12, (2008).

3. Energy generation in a plant due to variable sunlight intensity: *G. C. E. Mbah.* Vol.13. Pages 151–158, Vol.13, (2008).

4. Glucose level in the body of a fasting non-diabetic person: *G. C. E. Mbah.* Pages 463–468, Vol.14, (2009).

5. The Onchorcerciasis Disease: Population Dynamics of Its Host And The Vector: *G.C.E. Mbah and G. C. Okpala.* Pages 441-450, Vol.16, (2010).

6. Chemotherapy and Imunotherapy Effect on the Population Dynamics of Cancer Cells: *G.C.E. Mbah and G. C. Okpala.* Pages 451-462, Vol.16, (2010).

7. A Mathematical Model Of Ageing In Man Due To Gene Loss: Mbah G.C.E and Ngwu, B.A. Pages 293-298, Vol.17, (2010).

8. Mathematical Model on the Viral Load/Burden of HIV/AIDS in the Body of a Host: *G.C.E. Mbah and T.I. Chinebu.* Pages 299-310, Vol.17, (2010).

9. Mathematical Model for The Estimation Of Onchocerca Volvulus Worm Load/Burden in The Body of The Host: *G.C.E Mbah and C.C.Asogwa.* Pages 293-298, Vol.18, (2011).

10. Energy Generation in the Human Body by the Human Cells: *Ejikeme C. L., Mbah G. C. E. and Oyesanya M. O.* Pages 99–106, Vol.19, (2011).

MBAMARA U.S

1. Auger Broadening Correction to the Low-energy tail of the Lithium X-ray K-emission spectrum: *U. S. Mbamara and E. N. Mgbenu.* Pages 281-284, Vol.7, (2003)

MBEGBU J.I

1. On the Derivation of Explicit Runge-Kutta Methods by Matrix Approach: *J. I. Mbegbu.* Pages 20 - 35, Vol.2, (1998).

2. On Derivation of New Numerical Integrator for Solving Linear Stiff First Order Initial Value Problem with Constant Matrix of Order 2: *Julian Ibezimako Mbegbu.* Pages 106-114, Vol.3, (1999).

3. Convergent Embedded Explicit: Runge-Kutta (CEEK) Method of Order 4: *Julian Ibezimako Mbegbu.* Pages 37-44, Vol.5, (2001).

4. Software package for analysis of completely randomized block design: *Onyinye Ifeyinwa Ojukwu and Julian Ibezimako Mbegbu.* Pages 115-120, Vol.10, (2006)

5. Some Designs from Symmetric Balanced Incomplete Block Design: *J. I. Mbegbu.* Pages 363-366, Vol.17, (2010).

6. On The Choice of a Completely Randomized Design with Emphasis On The D-Optimality Criterion: *Iruegbukpe, D. O. and Mbegbu, J. I.* Vol.18, Pages 367–372, Vol.18, (2011)

7. 7 by ≤ Optimal 3-Point Symmetric Quadratic Regression Designs for the Number of Trials: *N Mbegbu J. I.* Pages 611–616, Vol.18, (2011)

8. Investigating the Validity of the Estimate, of -Values for Supersaturated Design (SSD) Using Mean Square Error (MSE): *Mbegbu, J. I. and Todo, C. O.* Pages 115–118, Vol.19, (2011)

9. Alternative Approach for Estimating E(S2) Values For Supersaturated Designs: *Mbegbu J. I. and Todo C. O.* Pages 461 – 464 Vol. 21, (2012).

MBONU D.E

1. A Mathematical Model for the Interception of a Moving Target: *V.A. Iheagwam, C.A. Nse, D.E. Mbonu.* Pages 35-44, Vol.18, (2011)

MEBINE P.

1. Thermosolutal MHD flow and radiative heat transfer with viscous work and heat source over a vertical porous plate: *P. Mebine.* Pages 325–334, Vol.14, (2009).

2. Thermally radiating fluid: Approximations of integral solutions: *P. Mebine.* Pages 335–340, Vol.14, (2009).

MEJEHA I.M
1. $4f6 \rightarrow 4f5(6fH)$5d Optical Transitions of Sm2+ Ions in Potassium and Rubidium Halides: *I. M Mejeha and and M. J. A Smith.* Pages 225-239, Vol.2, (1998).
2. $4f14 \rightarrow 4f13\ 5d$ Electronic Transitions Of Yb2+ ions in Rubidium Halide Crystals: *I. M .Mejeha and and M. J. A. Smith.* Pages 240-266, Vol.2, (1998).
3. Electrostatic energy matrices for 4f5 (6PFH) 5d Sub-configuration of Sm2+ Ions in Octahedral Crystal Field: *I. M. Mejeha.* Pages 393-405, Vol.3, (1999).

MELUDU OSITA C.
1. Gravitational time dilation and length contraction in fields exterior to static oblate spheroidal mass distributions: *Chifu Ebenezer Ndikilar, Adam Usman and Osita C. Meludu.* Pages 247-252, Vol.15, (2009).
2. Epiboron Neutron Activation Analysis with Nigeria Research Reactor -1: *Hankouraou Seydou, Osita Meludu and Adam Usman.* Pages 463-472, Vol.16, (2010).

MGBENU E.N
1. Auger Broadening Correction to the Low-energy tail of the Lithium X-ray K-emission spectrum: *U. S. Mbamara and E. N. Mgbenu.* Pages 281-284, Vol.7, (2003).

MISHELIA E.D
1. Electric Nusselt Number in a Closed Cylindrical Container Filled With two immiscible fluids: *M. F. Hague, O. W. Olasoji and E. D. Mishelia.* Pages 213-242, Vol.4, (2000).

MOGBADEMU A.A
1. Mann iteration with errors for strictly pseudo-contractive mappings: *J. O. Olaleru and A. A. Mogbademu.* Pages 57-62, Vol.11, (2007).
2. On an improved convergence rate estimate obtained by Liwei Liu: *A. A Mogbademu and O. A. Akinfenwa.* Pages 13–16, Vol.12, (2008).
3. On the coefficients of holomorphic functions and the identity: *J. A. Adepoju and A. A. Mogbademu.* Pages 17-20, Vol.13, (2008).

MOHAMMED A.A
1. Dynamic analysis of a Bernoulli-Euler beam via the Laplace transformation technique: *M. Jiya, Y. M. Aiyesimi, and A. A. Mohammed.* Pages 203-210, Vol.10, (2006).

MOHAMMED DAABO
1. On certain isotopic maps of central loops: *John Olusola Adeniran, Yacub Tunde Oyebo and Daabo Mohammed.* Pages 7-12, Vol.18, (2011).

MOHAMMED HASSAN
1. Evaluation of Fractured Basement Complex Rock Porosity by Azimuthal Cross-Square Vertical Electrical Soundings: *Saleh M., Likkason O. K. & Mohammed Hassan.* Pages 315–320, Vol.20, (2012).

MOHAMMED L
1. Analysis of Anthropogenic Contribution to Natural Concentration of Trace Element in Zaria Soil: *Idris M.C, Okunade I.O, Ogunleye P.O. and Mohammed L.* Pages 105 – 110, Vol. 22, (2012).

MOHAMMED UMARU
1. A Linear Multistep Method with Continuous coefficients for Solving First Order Ordinary Differential Equation (ODE): *Umaru Mohammed.* Pages 159–166, Vol.19, (2011).
2. A Fifth Order Hybrid Linear Multistep method For the Direct Solution of yiii = f (x, y): *Umaru Mohammed.* Pages 167-174, Vol.19, (2011).

MOLUA C.O
1. Determination of Water Table using Electrical Sounding Technique: A Case Study of Afuze Edo State, Nigeria: *O. C. Molua and J .U. Emagbetere.* Pages 456-464, Vol.9, (2005).
2. Poisson impedance as an enhanced litho-fluid discriminator using crossplot analysis: *O. Ujuanbi, S. I. Jegede, F. Osayande and C. O. Molua.* Pages 279–284, Vol.12, (2008).

MOORE C.
1. Iterative Solution Of Certain Nonlinear Operator Equations Arising In Mathematical Physics: *C. Moore.* Page 1-8, Vol.1, (1992)
2. Iterative Solution Of The Dirichlet Problem For The Semilinear Wave Equation: *C. Moore.* Pages 15-21, Vol. 1, (1992).

MOUSSILIOU A.S
1. Non linear dynamic equation for deoxyhemoglobins aggregation: A phenomenological approach: *L. O. Olatunji, A. S. Moussiliou and O. K. Hounsounou.* Pages 377-386, Vol.13, (2008).

MUHAMMAD MUSA K.
1. Time-Dependent Natural Convection Couette Flow of Heat Generating/Absorbing Fluid between Vertical Parallel Plates Filled With Porous Material: *Basant K. Jha and Muhammad K. Musa.* Pages 233–248 Vol.19, (2011)

MUKA K.O
1. Second derivative parallel block backward differentiation type formulas for Stiff ODEs: *K. O. Muka and M. N. O. Ikhile.* Pages 117–124, Vol.14, (2009).
2. Generalized Enright block methods for Stiff ODEs: *K. O. Muka and M. N. O. Ikhile.,* Pages 125–134, Vol.14, (2009).

3. Second Derivative Parallel Multi-Block Methods for Stiff ODEs: *Muka K.O. and Ikhile M.N.O.* Pages 297 – 308, Vol. 21, (2012).
4. On Stability of Chartier's Block Formulae: *K.O. Muka and M.N.O. Ikhile,* Pages 537 – 544, Vol. 21, (2012).

MUSONGONG E.F
1. Gravitational fields of prolate spheroidal bodies extension of gravitational fields of spherical bodies: *E. F. Musongong and S. X. K. Howusu.* Pages 93-96, Vol.8, (2004).
2. Gravitational time dilation and spectral shift in the field of a massive oblate spheroidal body: *E. F. Musongong and S. X. K. Howusu.* Pages 97-100, Vol.8, (2004).
3. An algorithm for numerical solution of Anisimov coupled differential equation of heat transfer from electron to lattice: *Eugene F. Musongong.* Pages 239-252, Vol.11, (2007).

MUSTAPHA R.A
1. Response under a Moving Load of an Elastically Supported Euler- Bernoulli Beam on Pre-Stressed and Variable Elastic Foundation: *F.O Akinpelu, I.A Idowu, and R.A Mustapha.* Pages 519 – 534, Vol. 22, (2012).

NDEFRU G.Y
1. Logarithmic perturbation theory: Applications and limitations: *G. Y. Ndefru and S. Duwa.* Pages 595-600, Vol.10, (2006).

NDIKILAR CHIFU E.
1. Gravitational time dilation and length contraction in fields exterior to static oblate spheroidal mass distributions: *Chifu Ebenezer Ndikilar, Adam Usman and Osita C. Meludu.* Pages 247-252, Vol.15, (2009).
2. Gravitational Metric Tensor Exterior to Rotating Homogeneous Spherical Masses: *Chifu E. Ndikilar, R.N. Jatau and L. W. Lumbi.* Pages 49–54, Vol.19, (2011).

NDJAKAH JEAN MARIE
1. Ab initio and DFT study of Octanitrocubane: *Geh Wilson Ejuh, Ndjaka Jean Marie and Amar Nath Singh.* Pages 29-38, Vol.16, (2010).
2. Global Optimization of Self Avoiding Random Walks using Simulated Annealing Method: *Geh Wilson Ejuh, Ndjaka Jean Marie.* Pages 95-110, Vol.16, (2010).

NDUKA A.
1. Is The General Theory Of Relativity A Physical Theory? : *A. Nduka.* Pages 1- 5, Vol. 2, (1998).
2. Neutrino mass: *Amagh Nduka.* Pages 1-4, Vol.10, (2006).
3. Quantum geometrodynamics: *Amagh Nduka.* Pages 1-8, Vol.13, (2008).

NDUKA E.C
1. On The Left Tail-End Probabilities and the Probability Generating Function: *J. N. Igabari and E. C. Nduka.* Pages 345-348, Vol.18, (2011).

NDUKA U.C
1. Optimal Orthogonal Second-order Designs: *Uchenna C. Nduka.* Pages 359-362, Vol. 17, (2010).

NENUWE O.N
1. Tomonaga-Luttinger Liquid for Collective Motion of Fermions: a Basic Theory of One-Dimensional Correlated Electrons: *Nenuwe, O. N., Babalola, M. I., and Idiodi, J. O. A.* Pages 405 – 412, Vol. 21, (2012).

NGADDA Y.H
1. Application of Penelope Code in The Investigation of The Major Types of Gamma Ray Interaction in Lead And Aluminum Slabs: *Ngadda Y. H. and Ewa, I. O. B.* Pages 63 – 72, Vol. 22, (2012).

NGIANGIA A.T
1. Horizontal and vertical projectile motion in a resistant medium under the influence of transverse magnetic field: *A. T Ngiangia, N. Wonu and F. Jim-George.* Pages 83-86, Vol.11, (2007).
2. The effects of permeability and radiation on the stability of plane Couette-Poiseuille flow in a porous medium: *A. T. Ngiangia.* Pages 87-94, Vol.11, (2007).
3. Computational model for speed of efflux in liquids: *Eghuanoye Ikata, Peter O. Eke and Alalibo T. Ngiangia.* Pages 137-144, Vol.11, (2007).
4. Linear stability analysis of a radiating fluid layer with temperature-dependent viscosity heated from below: *F. Life-George andA. Ngiangia.* Pages 167-172, Vol.13, (2008).
5. Horizontal and vertical projectile motion in a resistant medium subject to varying path angles and speed: *Frimabo Life-George, Alalibo Ngiangia, Peter Eke and Mercy .O. Orukari.* Pages 257 – 260, Vol.14, (2009).

NJAH A.N
1. Classicalization of the Non-linear Schrodinger Equation: *A. N. Njah and R. Akin-Ojo.* Pages 19-30, Vol.6, (2002).
2. Analysis of the nonlinear Schrodinger Equation in an infinite potential well: *A. N. Njah, and R. Akin-Ojo.* Pages 39-46, Vol.7, (2003)
3. Analysis of the nonlinear Diffusion Equation Associated with the Nonlinear Schrodinger Equation: *A. N. Njah, and R. Akin-Ojo.* Pages 47-52, Vol.7, (2003)
4. Measure synchronization in a coupled Hamiltonian associated with the motion of particles in a periodic potential: *U. E. Vincent A. N. Njah, and A. O. Obawole and M. T. Azeez.* Pages 127-136, Vol.10, (2006)
5. Active control versus recursive backstepping control of a chaotic system: *A. N. Njah.* Pages 137-142, Vol.10, (2006)
6. Synchronization of Forced damped Pendulum via Active Control: *A. N. Njah.* Pages 143-148, Vol.10, (2006)

7. Chaos Control and Synchronization in Generalized Lorenz Systems With fully Uncertain Parameters: *Olusola O. I., Njah A.N., Vincent U. E., Idowu B. A. and Ahmed A.* Pages 7–14, Vol.19, (2011).

NJOSEH N.I

1. On the Application of Lyapunov's Theorem of Stability To the Convergence of the Reduced Gradient Method for Optimization Problems with Equality Constraints: *I. N. Njoseh, P. N. Okonta and D. O. Ajayi.* Pages 273-278, Vol.5, (2001).
2. On the Cooley-Turkey Fast Fourier algorithm for arbitrary factors: *A.O. Atonuje and I. N. Njoseh.* Pages 121-124, Vol.8, (2004).
3. L2 norm error estimates for Crank-Nicolson-Galerkin procedure for stochastic wave equation: *Ignatius N. Njoseh.* Pages 211-214, Vol.16, (2010)
4. Convergence of Crank-Nicolson-Galerkin discrete scheme for Stochastic hyperbolic equation in the Maximum-norm: *Ignatius N. Njoseh.* Pages 215–220, Vol.16, (2010)

NKEKI IWEBUKE CHARLES

1. The construction of optimal hedging portfolio strategies of an investor: *Iwebuke Charles Nkeki and Chukwuma Raphael Nwozo.* 395-406 Vol.14, (2009)
2. On a dynamic costs optimality for a production company: *Iwebuke Charles Nkeki and Chukwuma Raphael Nwozo.* Pages 253-264 Vol.15, (2009)
3. The dynamics of stock price and determination of investor's cash flows valuation: *Iwebuke Charles Nkeki and Chukwuma Raphael Nwozo.* Pages 265-276 Vol.15, (2009)

NLEBEDIM V. U.

1. Modeling Nigeria External Reserves for National Transformation: *Iwueze I. S., Nwogu E. C. and Nlebedim V. U.* Pages 295 – 306, Vol. 22, (2012).

NNADI J.N

1. Stress Analysis for Aq Cracked Cylinder Under Longitudinal Shear Loading: *James N. Nnadi.* Pages 95-104, Vol.4, (2000).
2. Bonded Elastic Cylindrical Solid Under Anti- Plane Shear: *James N. Nnadi.* Pages 239-250, Vol.5, (2001).
3. Longitudinal Shear Deformation of a Composite Cylinder Sectionally Loaded Across Interface Edges: *James N. Nnadi.* Pages 171-186, Vol.6, (2002).
4. Antiplane Shear Analysis for a Non-homogeneous Semi-infinite Layer: *James N. Nnadi.* Pages 215-224, Vol.7, (2003).
5. Deformation fields due to sheared semicircular edge notch in a non-homogeneous elastic material; *James N. Nnadi.* Pages 47-56, Vol.8, (2004).
6. Sheared Semi-Infinite Crack Originating at the Boundary of a Circular Hole in a Non-homogeneous Infinite Solid: *Nnadi James Nwawuike.* Pages 69-78, Vol.9, (2005).
7. Shear fields in a material weakened by cracks at the boundary of a hole: *James N. Nnadi.* Pages 173-178, Vol.13, (2008).
8. An elastic bimaterial cylinder under anti-plane shear: *James N. Nnadi.* Pages 293–298, Vol.14, (2009)
9. Longitudinal fields due to a rigid line inhomogeneity in a nonhomogeneous cylinder: *James N. Nnadi.* Pages 299–304, Vol.14, (2009)

NSE C.A

1. Compactness of cores of targets for nonlinear delay systems: *V. A. Iheagwam and C. A. Nse.* Pages 101 -104, Vol.8, (2004).
2. Total Controllability for Nonlinear Perturbed Discrete Systems: *Celestin A. Nse.* Pages 255-258, Vol.9, (2005).
3. Null Controllability Criterion for Discrete Nonlinear Systems with Distributed Delays in the Control: A Fixed Point Approach: *Celestin A. Nse.* Pages 247-254, Vol.9, (2005).
4. Stability of discrete control systems: *Celestin. A. Nse,* Pages 547-548, Vol.10, (2006)
5. Necessity and sufficiency conditions for the absolute null controllability for Linear delay perturbations: *Celestin. A. Nse and R. A. Umana.* Pages 549-552, Vol.10, (2006).
6. Optimal control of neutral systems with nonlinear base (The maximum principle perspective): *Celestin A. Nse and Anthony N. Eke.* Pages 269-274, Vol.11, (2007).
7. Constrained relative controllability of semilinear dynamical neutral systems with multiple delays in state and control: *Celestin A. Nse.* Pages 275-278 Vol.11, (2007)
8. A Mathematical Model for the Interception of a Moving Target: *V.A. Iheagwam, C.A. Nse, D.E. Mbonu.* Pages 35-44, Vol.18, (2011).

NURUDEEN T.S

1. Likelihood Ratio Test as an Alternative to Chi-Square Test (Large Sample Approximation): *Amalare A.A, Nurudeen T.S, and Adeniyi M.O.* Pages 199 – 206, Vol. 21, (2012).

NWACHUKWU G.C

1. R [2, 4; 2: 6] Rational One-step numerical Integrator for Initial Value Problems in Ordinary Differential Equations: *F. O. Otunta and G. C. Nwachukwu.* Pages 285-294, Vol.9, (2005).
2. Variable order one-step methods for initial value problems I: *G. C. Nwachukwu and F. O. Otunta.* Pages 91-96, Vol.10, (2006).
3. The Numerical Integration of Stiff Systems of ODEs using Stiffly Stable Continuous Second Derivative Hybrid Methods: *G. C. Nwachukwu.* Pages 223–232, Vol.17, (2010).
4. A Special Family of LMM with Two Hybrid Points for Stiff ODEs: *G. C. Nwachukwu.* Pages 281-292, Vol.18, (2011).

NWACHUKWU J.C

1. Manufacture of Power Hacksaw Blades From Locally Available Medium Carbon Steel: *Osarenmwinda J. O. and Nwachukwu J. C.* Pages 443–446, Vol.20, (2012)

NWANZE E.D

1. On Distance Between Nodes in Partitioned Networks: *E. D. Nwanze, and G. O. Abada.* Pages 313-322, Vol.6, (2002).
2. Heuristic framework for parallel sorting computations: *E. D. Nwanze and E. E. Obasohan.* Pages 413-422, Vol.10, (2006)

NWAWUIKE N.J

1. Sheared Semi-Infinite Crack Originating at the Boundary of a Circular Hole in a Non-homogeneous Infinite Solid: *Nnadi James Nwawuike.* Pages 69-78, Vol.9, (2005).

NWELIH E

1. Prioritization of Programmer's Productivity Using Analytic Hierarchy Process (AHP) Model: *Nwelih, E.and Chiemeke, S.C.* Pages 451–460, Vol.20, (2012).
2. Adaptive Kernel In The Bootstrap Boosting Algorithm In KDE: *Ishiekwene, C. C and Nwelih E .* Pages 363–366, Vol.18, (2011).
3. An empirical comparison of html, php, coldfusion, perl, asp.net , javascript, vbscript, pyton and jsp: *Amadin I. F. and Nwelih E.* Pages 381–388, Vol.18, (2011).

NWOBI-OKOYE C.C

1. Optimisation of Transfer Function Models using Genetic Algorithms: *A.C. Igboanugo and C. C. Nwobi-Okoye.* Pages 439–452, Vol.19, (2011)
2. Production Process Capability Measurement and Quality Control Using Transfer Functions: *A.C. Igboanugo and C. C. Nwobi-Okoye.* Pages 439–452, Vol.19, (2011)

NWOGU E.C

1. On the purely seasonal ARIMA Process: *Eleazar C. Nwogu, Michael Okpara and Iheanyi S. Iwueze.* Pages 115-126, Vol.7, (2003)
2. Fertility Levels and Trend Among Women in Nigeria: *Eleazar C. Nwogu,* Pages 367-378, Vol.9,(2005).
3. Buys-Ballot Estimates for Exponential and s-shaped Growth Curves: *I. S. Iwueze and E. C. Nwogu.* Pages 357-366, Vol.9, (2005).
4. Age-pattern of blindness in Nigeria: *E. C. Nwogu.* Pages 641-656, Vol.11, (2007)
5. Arima Model of Crude Oil Exports In Nigeria: *E. C. Nwogu and H. C. Iwu.* Pages 285-292, Vol.17, (2003)
6. Modeling Nigeria External Reserves for National Transformation: *Iwueze I. S., Nwogu E. C. and Nlebedim V. U.* Pages 295 – 306, Vol. 22, (2012).

NWORGU D.O

1. An EAM Study Of The Single- Atom Impurity Problem: *D. O. Nworgu and J. O. A. Idiodi.* Pages 325-334, Vol.2, (1998)
2. Measurement of radio frequency radiation (RFR) power levels from some GSM base stations and phones: *O.D. Nworgu, C.A. Anyaeji, O.D. Osahon and E. Sekegor.* Pages 469–474, Vol.17, (2010)

NWOZO CHIMA R

1. On A Two-Stage Supply Chain Model In The Manufacturing Industry: *Bakare Emmanuel Afolabi, Ogban Gabriel Iyam and Chima R. Nwozo.* Pages 253 – 264 Vol.16, (2010)

NWOZO RAPHEAL C

1. The construction of optimal hedging portfolio strategies of an investor: *Iwebuke Charles Nkeki and Chukwuma Raphael Nwozo.* Pages 395-406, Vol.14, (2009).
2. On a dynamic costs optimality for a production company: *Iwebuke Charles Nkeki and Chukwuma Raphael Nwozo.* Pages 253-264, Vol.15, (2009).
3. The dynamics of stock price and determination of investor's cash flows valuation: *Iwebuke Charles Nkeki and Chukwuma Raphael Nwozo.* Pages 265-276, Vol.15, (2009).
4. On The Existence and Uniqueness of Wealth Dynamics and Derivation of Optimal Portfolio-Consumption Strategies For an Investor: *Iwebuke Charles Nkeki and Chukwuma Raphael Nwozo.* Pages 503-514, Vol.16, (2010).
5. On the Payoff Valuations of Investment Strategies: A Case of Multiple Investment Companies: *Iwebuke Charles Nkeki and Chukwuma Raphael Nwozo.* Pages 531-542, Vol.16, (2010).

OAHIMIRE J.I.

1. Heat and Mass Transfer in a Micropolar Fluid in the Presence of Thermal Radiation and Chemical Reaction: *Olajuwon B. I, Oahimire J.I., and Abiala I. O.* Pages 465 – 482, Vol. 22, (2012).

OBASOHAN E.E

1. Heuristic framework for parallel sorting computations: *E. D. Nwanze and E. E. Obasohan,* Pages 413-422. Vol.10, (2006)
2. A software for the RSA Encription: *E. E. Obasohan.* Pages 423-432 Vol.10, (2006)

OBAWOLE A.O

1. Anharmonic Oscilator Model of F-Center absorption in Alkali Halides: *Awele Maduemezia and Ademola Obawole.* Pages 217-224, Vol.2, (1998).
2. Measure synchronization in a coupled Hamiltonian associated with the motion of particles in a periodic potential: *U. E. Vincent A. N. Njah, and A. O. Obawole and M. T. Azeez.* Pages 127-136, Vol.10, (2006).

3. Anti-synchronization of two new different chaotic systems via active control: *B. A. Idowu, U. E. Vincent, and O. A. Obawole.* Pages 15–20, Vol.11, (2007).

OBIAGERI E.O
1. Uncertainty Claim Pricing using Weibull Distortion Operator: *Bright O.Osu, Obiageri E.Ogwo and Silas A. Ihedioha.* Pages 73 – 78, Vol. 21 (2012).
2. Comparability of CTE and VAR on Normal,Two and Three Parameter Weibull Distribution On a Portfolio Market Close: *Osu, Bright O and Ogwo Obiageri E.* Pages 79 – 84, Vol. 21, (2012).

OBERAFO A.A
1. Numerical simulation of hole injection in high barrier metal-semiconductor short diodes: *M. G. Zebaze Kana , R. K. Odunaike and A. A. Oberafo.* Pages 69-74, Vol.8, (2004).

OBIANYI J.K
1. Linearized Comparative Analysis of Steel and Aluminum Solar Flat Plate Collector in Solid Absorption Refrigerator: *C. U. Okujagu, T. M. Abbey and J. K. Obianyi.* Pages 127-138, Vol.5, (2001).

OBINABO E.C
1. On The Structure of The Inverse of a Linear Constant Multivariable System: *E. C. Obinabo, D. E. Okene.* Pages 77-80, Vol.17, (2010).
2. Performance Assessment of a Class of Industrial Fans With Substantial Process Variability for On-Condition Monitoring and Contol System Design: *C. U. OCHONOGOR and E. C. Obinabo.* Pages 459–464, Vol.18, (2011).
3. A Phase Plane Realization of a Class of Nonlinear Liquid Level Control Systems: *E. J. Ogbebor and E. C. Obinabo,* Pages 465–470, Vol.18, (2011).
4. A Deterministic Approach to Noise Attenuation in Oil and Gas Seismic Data Acquisition: *Obinabo E. C. and Anukwu E. N.* Pages 563–568, Vol.18, (2011).

OBODI G.N
1. New Group Symmetries of the Burger's Equation: *G. O. Obodi and J. A. Olofinsao.* Pages 15 - 19 Vol. 2, (1998)
2. An expression for Ez component of spatial non-uniform Electromagnetic source fields in low latitude: *D. D. Abajingin and G. N. Obodi.* Pages 370-378 Vol.3, (1999).

OCHEI L.S
1. Analysis of Unbalanced Fixed-Effect Non- Interactive Model: An Intra-Factor Approach: *Ochei L.S, Eze F.C. and Ajibade B.F.* Pages 199 – 206, Vol. 22, (2012).

OCHOLI M
1. Determination of utilizable wind energy for indoor ventilation in buildings across selected locations in Nigeria: *Ocholi M. and Iheonu E.E.* Pages 543–550 Vol.19, (2011).
2. Erratum: Determination of utilizable wind energy for indoor ventilation in buildings across selected locations in Nigeria. [J. Nig. Assoc. Math. Phys. Vol. 19, 543 – 550 (2011)]: *Ocholi M. and Iheonu E.E.* Pages 587, Vol. 22, (2012).

OCHONOGOR C.U
1. Performance Assessment of a Class of Industrial Fans With Substantial Process Variability for On-Condition Monitoring and Contol System Design: *C. U. OCHONOGOR and E. C. Obinabo.* Pages 459–464 Vol.18, (2011).

ODEBIYI O. A.
1. A mathematical model and simulation of HIV infection of CD4+T cells with past and current history: *Odebiyi O. A. and Ayeni R. O.* Pages 495 – 502, Vol. 22, (2012).
2. A mathematical model of interaction between regulatory proteins in bacterial flagellum: *Olayiwola R. O., Erinle-Ibrahim L. M., Odebiyi O. A., Gbadamosi B., and Achanya V. M.* Pages 503 – 512, Vol. 22, (2012).

ODEKUNLE M.R
1. 3 Steps Continuous Block Predictor Corrector Method for the Solution of General Second Order Ordinary Differential Equation: *Adesanya A. Olaide, Odekunle M. Remilekun and Anake T. Ashibel.* Pages 477 – 482, Vol. 21, (2012).
2. Steady State Solution of Optimal Production Control of a Dynamic Six-Product Manufacturing System with Setup Costs and Setup Time: *Onanaye A. S., and Odekunle M. R.* Pages 285 – 294, Vol. 22, (2012).

ODENGLE J.O
1. Free-Convective Flow Composite Channel With Wall Suction and Injection: *Basant K. Jha, J. O. Odengle, and M. L. Kaurangini.* Pages 527 – 536, Vol. 21 (2012).

ODERINU R.A
1. An Approximate Analytical Solution To Heat And Mass Transfer In The Boundary Layers On An Exponentially Stretching Surface (Weighted Residual Approach): *R.A. Oderinu, O.A. Adepoju.* Pages 101–104, Vol.20, (2012).

ODIASE J.I
1. Exact (Permutation) Distribution For The Wn Statistic: *S.M.Ogbonmwan and J.I. Odiase.* Pages 45-62. Vol.5, (2001)
2. Higher Order Values of MISE in Kernel Density Estimation: *F. O. Oyegue and J. I. Odiase.* Pages 343-350. Vol.9, (2005)
3. Higher Dimensional Kernel Methods: *E. J. Osemwenkhae, S. M. Ogbonmwan and J. I. Odiase.* Pages 351-356 Vol.9, (2005)

ODIGIE O.E
1. A Study Of EMR And SAR Distribution In Human Head Phantom Exposed To RF Energy: A Simulation Approach: *Emagbetere J.O and Odigie O.E.* Pages 413–422 Vol.18, (2011)

ODIO A. O.

1. Lax convergence principle of a linear multi-step scheme for solving parabolic equation: *Odio Augustine Onyejuwa.* Pages 315 – 318, Vol. 21, (2012).
2. Stability of multi-level scheme for the solution of wave equation: *Augustine O. Odio,* pp 319 – 322 Vol. 21 (July, 2012).
3. Stabilization of product of eigen-values from difference scheme for the solution of hyperbolic equation: *Odio Augustine Onyejuwa.* Pages 373 – 376, Vol. 22, (2012).
4. Stability of Numerical Solution for Wave Equation: *Augustine O. Odio.* Pages 377 – 380, Vol. 22 (2012).
5. Convergence of Numerical Solution for Heat Equation: *Augustine O. Odior.* Pages 381 – 384, Vol. 22, (2012).

ODION P.O

1. A Perturbed Fourth Order Runge-Kutta Method for First Order Ordinary Differential Equations: *S. A. Agam and P. O. Odion.* Pages 143–148 Vol.19, (2011)
2. A Perturbed Runge-Kutta Method for Solution of Second Order Differential Equations: *S. A. Agam and P. O. Odion.* Pages 323 – 328, Vol. 21, (2012).
3. The Usefulness of Function Point Analysis in Estimating Projects Cost, Managing change of Scope and defining functional requirements of a Software: *P. O. Odion and E. A. Onibere.* Pages 281 – 284, Vol. 22, (2012).

ODIOR A.O

1. Mathematical application of time study model in a glass company: *A. O. Odior.* Pages 331-336, Vol.13, (2008).
2. An approach for solving linear fractional programming problems: *A. O. Odior and F. A. Oyawale.* Pages 93–96 Vol.14, (2009).
3. Application of Neuro-Fuzzy to palm oil production process: *A. O. Odior and D. A. Fadare.* Pages 363-370, Vol.15, (2009).
4. A rational second order difference equation with convergence solutions: *A .O. Odior and O. E. Charles-Owaba.* Pages 371-378, Vol.15, (2009).
5. Neuro - Fuzzy Analysis for Silicon Carbide Abrasive Grain Production: *A.O. Odior F. A. Oyawale J. A. Akpobi and E.S. Orsharh.* Pages 591-596, Vol.16, (2010).
6. An Assignment Problem for n Machines and m Operators: *A .O. Odior and F.A. Oyawale.* Pages 371-376, Vol. 17, (2010).
7. Design and Construction of Oil Fired Compact Crucible Furnace: *Oyawale F. A., Odior, A. O. and Aganwonyi, T. E.* Pages 537–548, Vol.18, (2011).
8. Development of a Livestock Feed Cubing Machine from Locally Sourced Materials: *Oyawale, F. A., Odior, A. O, Oyetunji O. R., and Saliu L.* Pages 555–562 Vol.18, (2011).

ODODO J.C

1. Fourth Order Nonlinear Intensity and the corresponding Refractive Index in Uniaxial Crystals: *Timtere Pascal, Adam Usman, and Ododo J. C.* Pages 533–542 Vol.19, (2011).
2. Evaluation of Some Nonlinear Optical Parameters for Terahertz (THz) Radiating Uniaxial Crystals. Timtere Pascal: *Usman Adam and Ododo J. C.* Pages 129 – 142, Vol. 22, (2012).

ODULE TOLA JOHN

1. Incremental cryptography and security of public hash functions: *Tola John Odule.* Pages 467-474, Vol.11, (2007).
2. Improving access, reliability and efficiency of a distributed operating system using replicated distributed object abstraction: *Tola John Odule.* Pages 475-484, Vol.11, (2007).
3. Universal hash proof system and the subset membership problem: *Tola John Odule.* Pages 485-494, Vol.12, (2008).
4. Universal hash proof systems: A construction for a provably-secure public-key encryption scheme: *Tola John Odule.* Pages 495-504, Vol.12, (2008).
5. Design of provably secure cryptographic hash functions: *Tola John Odule,* Pages 273-280, Vol.13, (2008).
6. Dynamic hashing algorithm for searching time-series databases: *Tola John Odule.* Pages 281-288, Vol.13, (2008).

ODUMOSU MARY

1. On the equivalence of some iteration schemes for a class of quasi-contractive operators: *Hudson Akewe and Mary Odumosu.* Pages 397-404, Vol.13, (2008).

ODUNAIKE R.K

1. Numerical simulation of hole injection in high barrier metal-semiconductor short diodes: *M. G. Zebaze Kana , R. K. Odunaike and A. A. Oberafo.* Pages 69-74, Vol.8, (2004)
2. On the application of Dijkstra's algorithms in solving the GSM Network problem: *A.W. Gbolagade Z. O. , Ogunwobi, A. U. Rufai, and K.A. Gbolagade, and R.K. Odunaike.* Pages 319-322, Vol.8, (2004)
3. On the numerical solution of the Gross–Pitaevskii equation: *J.A. Laoye, M. A. Liadi and R. K. Odunaike.* Pages 9-12, Vol. 8, (2004).
4. Anti-synchronization of the rigid body exhibiting chaotic dynamics: *E. Vincent, R. K. Odunaike, J. A. Laoye and O. A. Abiola.* Pages 5–14 Vol.11, (2007)

ODUNDUN O.A

1. Perturbative Quantum Chromodynamics by O.A. Odundun. Pages 39-46, Vol. 1, (1992).
2. N = 1 Supersymmetry with a Tensor Boson: *Oluwole Odundun and Adekunle Adegoke.* Pages 6 - 14, Vol. 2, (1998).
3. Some Identities in Spinor Calculus: *Oluwole Odundun.* Pages 4-8, Vol.4, (2000).
4. Comments on Superspace and Superfields: *O. Adetunji Odundun.* Pages 1-4, Vol.5, (2001).
5. Erratum: Some Identities in Spinor Calculus (section 2): *Oluwole Odundun.* Pages 309-313, Vol.5, (2001).

6. Transformation Properties of Pseudoscalar and Pseudovector Bilinear Forms: *O. Adetunji Odundun.* Pages 1-10, Vol.6, (2002).
7. A Tensor Identity in Quantum Field Theory: *O. Adetunji Odundun.* Pages 11-18, Vol.6, (2002).
8. Rho-Supermanifolds And The Clifford Bundle: *O. Adetunji Odundun.* Pages 31-36, Vol.9, (2005).

ODUSOTE O.O
1. Thermal neutron counts and derivated charts: *Olusogo O. Odusote and Ayomide O. Balogun.* Pages 489-492, Vol.10, (2006).
2. On the fluctuating filtrate: *Olusogo O. Odusote.* Pages 493-496, Vol.10, (2006).
3. Momentum distributions and compton profiles of copper and aluminium: *Olusogo O. Odusote.* Pages 195-198 Vol.8, (2004).
4. Electromagnetic fields and biotissue interactions: *O. O. Odusote and V.C. Ozebo.* Pages 161-164, Vol.12, (2008).
5. A geophysical study of structural foundations in Omolayo area, Ibadan, Nigeria: *V. C. Ozebo, O. O. Odusote, G. Omisore and A. I. Ibiyemi.* Pages 267–278, Vol.12, (2008).
6. Physical model of income distribution: *T. W. David, O. O. Odusote, and S. O. Kareem.* Pages 315-320, Vol.13, (2008).

ODUWALE A.O
1. On the theory of pre-p-nil-rings: *Adewale Oladipo Oduwale.* Pages 273-276, Vol.8, (2004).
2. The direct product of right zero semigroups and certain groupoids: *E. E. David and Adewale Oladipo Oduwale.* Pages 575-578, Vol.10, (2006).
3. On regular algebraic monoids: *Adewale Oladipọ Oduwale,* Pages 27-32, Vol.11, (2007).
4. On congruence lattices: *Adewale O. Oduwale, Cecil B. Adejayan and Steve D. Oluwaniyi.* Pages 281-286, Vol.15, (2009).
5. Finitely generated commutative Noetherian semigroups: *Adewale O. Oduwale.* Pages 287-290, Vol.15, (2009).
6. Regular algebraic monoids: *Adewale Oladipọ Oduwale.* Pages 37–40, Vol.19, (2011).
7. Permutative semigroup whose congruences form a chain: *Adewale Oladipo Oduwale.* Pages 41–48, Vol.19, (2011).

OFOMANA BENSON E
1. Generation of Modified Sinusoidal Waves Using Operational Integrators: *Ofomana Emmanuel Benson.* Pages 207-214, Vol.17, (2010)
2. Erratum: Generation of Modified Sinusoidal Waves Using Operational Integrators [J. Nig. Assoc. Math. Phys. Vol. 17, 207 – 214 (2010)]: *Ofomana Emmanuel Benson.* Pages 571 - 578, Vol. 22, (2012).

OGABI C.O
1. Computational Analysis of Electronic Polarizabilities in Thomas-Fermi Theory of Atoms: *C. O. Ogabi.* Pages 501-506, Vol.9, (2005).

OGAGARUE D.O
1. In-situ Thermal Conductivity Estimates in the Western Niger Delta Sediments Derived from Geophysical logs: *D. O. Ogagarue, and Vincent E. Asor.* Pages 425-430, Vol.9, (2005).

OGBEBOR E.J
1. A Phase Plane Realization of a Class of Nonlinear Liquid Level Control Systems: *E. J. Ogbebor and E. C. Obinabo.* Pages 465–470, Vol.18, (2011).

OGBEIDE E.M
1. A Modified Kernel Nearest Neighbour Estimate Bandwidth Approach To Density Estimation: *Ogbeide E. M. and Osemwenkhae J. E.* Pages 185 – 194, Vol. 22, (2012).

OGBEIDE O.K
1. Optimal Safety Earthing – Earth Electrode Sizing Using A Deterministic Approach: *Ubeku E, U and Ogbeide, O.K.* Pages 439–444 Vol.18, (2011)

OGBEIDE PAUL OSAZE
1. Application of the theory of revealed preference to a special Problem in the maritime transport market: *Ogbeide Paul Osaze and Giegbefumwen Peter.* Pages 341 – 344, Vol. 22, (2012).

OGBEIDE S.E
1. Estimation of transport and degradation parameters for naphthalene and anthracene: Influence of mass transfer on kinetics: *C. N. Owabor, S. E. Ogbeide and A. A. Susu.* Pages 223-236 Vol.15, (2009)

OGBEREYIVWE O.
1. Improved Yokota Algorithm for Egyptian Fractions: *O. Izevbizua and O. Ogbereyivwe.* Pages 331-336, Vol.9, (2005).
2. On iterative solution of non-linear equation: *O. Ogbereyivwe.* Pages 611-615, Vol.10, (2006)
3. On coefficients in the partial fractions of some trigonometric and exponential functions: *O. Ogbereyivwe, K. Emumejaye and K. I. Ekeh.* Pages 41-48, Vol.13, (2008)
4. Coefficients and constants in the partial fractions of some trigonometric inverse functions: *O. Ogbereyivwe, J. O. Emunefe, and K. Emumejaye.* Pages 469–478, Vol.14, (2009)

OGBOGBO PEACE C
1. Use of Actual Dimension in the Percolation Model for the Calculation of Breakthrough Time in Oil Recovery: Case of Some Niger Delta Reservoirs: *Chisara Peace Ogbogbo.* Pages 325-336, Vol.16, (2010)

OGBOMWAN S.M
1. Higher Order Forms for Optimal Widow Width in Multivariate Kernel Density Estimation: *S. M. Ogbonmwan and E. J. Osemwenkhae.* Pages 327-334, Vol.4, (2000)

577

2. Exact (Permutation) Distribution For The Wn Statistic: *S.M.Ogbonmwan and J.I. Odiase.* Pages 45-62, Vol.5, (2001).
3. Generalized efficiencies for higher order symmetric univariate kernels: *J. E. Osemwenkhaae and S. M. Ogbonmwan.* Pages 89-96, Vol.7, (2003)
4. Empirical Bootstrap Likelihood for Contrasts of Parameters: *S. M. Ogbonmwan.* Pages 97-104, Vol.7, (2003)
5. Higher Order Bootstrap likelihood: *S. M. Ogbonmwan.* Pages 87-92, Vol.8, (2004)
6. Higher Dimensional Kernel Methods: *E. J. Osemwenkhae, S. M. Ogbonmwan and J. I. Odiase.* Pages 351-356, Vol.9, (2005)
7. Choice of smoothing parameters in boosting kernel density estimates: *C. C. Ishiekwene, S. M. Ogbonmwan and F.O. Oyegue.* Pages 443-454, Vol.12, (2008)
8. A method for generating permutation distribution of ranks in a k-sample experiment: *F. Ewere and S.M. Ogbonmwan.* Pages 579-584, Vol.16, (2010)
9. A Fast Algorithm for Generating Permutation Distribution of Ranks in a K-Sample Experiment: *F. Ewere and S.M. Ogbonmwan.* Pages 585-590, Vol.16, (2010)
10. The Permutation Likelihood: *Ogbonmwan S. M.* Pages 175 – 178, Vol. 22, (2012).

OGBU HILARY M
1. Periodic solutions of a certain nonlinear boundary value problem (BVP) of a fourth order differential equation: *H. M. Ogbu and A. E. Umahi.* Pages 479–484, Vol.14, (2009)
2. Periodic solutions for a boundary value problem of a third order ordinary differential equation: *H. M. Ogbu.* Pages 485–492, Vol.14, (2009)
3. A Further Result on Oscillations in a Non-Linear Boundary Value Problem of a Fourth Order Ordinary Differential Equation: *Hilary Mbadiwe Ogbu.* Pages 221–228, Vol.16, (2010)

OGHOYON G.J
1. Continuous implicit method for the solution of general second order ordinary differential equations: *A. O. Adesanya, T. A. Anake and G. J. Oghoyon.* Pages 71-78, Vol.15, (2009)

OGHRE E.O
1. One Dimensional Viscoelastic Model of Arterial Blood Flow: *Emmanuel O. Oghre and E. A. Akinrelere.* Pages 95 - 106, Vol. 2, (1998)
2. Generalized Solutions to nonlinear parabolic equations: *E. O. Ifidon and E. O. Oghre.* Pages 222-233, Vol.3, (1999)
3. Pulsating Flow in Viscoeloastic Tubes: *Emmanuel O. Oghre and Edward O. Ifidon.* Pages 201-212, Vol.4, (2000)
4. Tidal flow in the Escravos Bar, Warri, Nigeria: *E. O. Oghre and E. O. Okeke.* Pages 331-336, Vol.8, (2004)
5. Disease dynamics in predator-prey population with disease in the prey: *Emmanuel O. Oghre and Dennis I. Egherha.* Pages 211–214, Vol.19, (2011)
6. Stability analysis of a predator prey system with disease in the prey: *Emmanuel O. Oghre and Dennis I. Egherha.* Pages 215–222, Vol.19, (2011).
7. Temperature distribution over a stretching surface with viscous dissipation: *Oghre E. O. and Ayeni R. O.* pp 455 – 460, Vol. 22, (2012).
8. Qualitative Study of a Cholera Model: *Oghre E. O. and Akhaze R. U.* Pages 487 – 494, Vol. 22, (2012).
9. 3 Dimensional Flow of Water in Plant Tissues: *E.O. Oghre and Davies Ewhrudjakpor.* Pages 471 – 476, Vol. 21, (2012).

OGUNBAMIKE O.K
1. Transverse vibration under a moving load of a highly prestressed isotropic rectangular plate on a bi-parametric subgrade: *S. T Oni and O. K Ogunbamike.* Pages 141-160, Vol.13, (2008)
2. Convergence of Closed Form Solutions of The Initial-Boundary Value Moving Mass Problem of Rectangular Plates Resting On Pasternak Foundations: *S.T. Oni and O.K. Ogunbamike.* Pages 83-90, Vol.18, (2011)

OGUNDIRAN M.O
1. Certain inequalities and convolution properties for multivalent and meromorphically multivalent functions: *Abiodun Tinuoye Oladipo and M.O. Ogundiran.* Pages 519-524, Vol.11, (2007)
2. Hamilton-Jacobi-Bellman equations for quantum control: *M. O. Ogundiran and P. O. Olanrewaju.* Pages 525-528, Vol.11, (2007)

OGUNRINDE R. B.
1. On the Derivation of the Stability Function of a New Numerical Scheme for the Solution of Initial Value Problems in Ordinary Differential Equations: *Ogunrinde R. B., and Ibijola E.A.* Pages 483 – 486, Vol. 22, (2012).

OGUNLEYE P.O
1. Analysis of Anthropogenic Contribution to Natural Concentration of Trace Element in Zaria Soil: *Idris M.C, Okunade I.O, Ogunleye P.O. and Mohammed L.* Pages 105 – 110, Vol. 22, (2012).

OGUNSOLA A.W
1. Biomechanics of the brain; some remarks on Biot's equations of consolidation theory with deformation-dependent permeability: *R. O. Ayeni, A. W. Ogunsola and A. O. Popoola.* Pages 511-516, Vol.10, (2006)
2. Effect of transmission rate in an SIR epidemic model: *R.O.Ayeni, O.Adebimpe, T.O.Oluyo, S.O.Adewale, A.O.Popoola and A.W.Ogunsola.* Pages 157-164, Vol.17, (2010).

OGUNTUNDE P.G
1. Remotely sensed crop canopy temperature, ambient relative humidity and air Temperature: Theoretical Analysis and Experimental verification: *A. A. Olufayo and Oguntunde P.G.* Pages 341-350, Vol.3, (1999).

2. Sensitivity and error analysis of Blaney-Morin-Nigeria evapotranspiration model: *P. G. Oguntunde, F. I. Alao and A. A. Olufayo.* Pages 350-359, Vol.3, (1999).

OGUNYEBI S.N
1. Dynamical analysis of a prestressed elastic beam with general boundary conditions under the action of uniform distributed masses: *S. T. Oni and S. N Ogunyebi.* Pages 87–102, Vol.12, (2008).

OGUNJO S.T
1. Synchronization of 4d Rabinovich Hyperchaotic Systems for Secure Communication: *K. S. Ojo and S.T. Ogunjo.* Pages 35 – 40, Vol. 21, (2012).

OHAKWE JOHNSON
1. Buys-Ballot estimates when stochastic trend is quadratic: *Iheanyi S. Iwueze and Johnson Ohakwe.* Pages 311-318, Vol.8, (2004).

OHIRHIAN P.U
1. A Cubic Interpolation Algorithm for Solving Non-linear Equations: *P. U. Ohirhian.* Pages 317-324, Vol.9, (2005).
2. Explicit Presentation of the Colebrook's Friction Factor Equation: *P. U. Ohirhian.* Pages 325-330, Vol.9, (2005).
3. Empirical Equations For The Surface Gas Gravity of Nigerian Associated Gas: *Ohirhian, P.U and Olafuyi, O.A.* Pages 69-72, Vol.17, (2010)
4. A Differential Equation for Downhill Compressible Flow in Pipes and Its Solution: *Ohirhian, P.U.and Anyata, B.U.* Pages 485–496, Vol.17, (2010)
5. A Formula for the Coefficient of Thermal Expansion of Crude Oils: *P.U. Ohirhian.* Pages 143–146, Vol.18, (2011)
6. An equation for the dimensionless friction factor of consolidated sandstone: *P.U. Ohirhian.* Pages 147–156, Vol.18, (2011)
7. General Equations for the Bubble Point Formation Vol. Factor of Crude Oils: *Peter Ohirhian.* Pages 359–368, Vol.19, (2011).
8. A theoretical parametric study of Water Flooding: *Peter Ohirhian.* Pages 369–386, Vol.19, (2011)
9. Non Darcy flow effect on the Pressure response of Retrograde Gas Reservoir: *Ohirhian, P.U. and Ekaiko, S.* pp 381 – 388, Vol. 21, (2012).

OJARIKRE H.I
1. Simulated queues in dynamic situations: *H. I. Ojarikre.* Pages 425-430, Vol.15, (2009).
2. Dynamic Programming for Production Planning; an application of Dijkstra's Model: *Ojarikre H.I and Ighedo .O.* Pages 383-386, Vol.17, (2010).

OJEWUMI M.E
1. Polynomial approximation approach to transient heat conduction with internal heat generation: *P. O. Olanrewaju, O.T. Arulogun and M.E. Ojewumi.* Pages 123-128, Vol.17, (2010).

OJO A.
1. Plasma heating by non-linear wave-Plasma interaction: *I. M. Echi and A. Ojo.* Pages 157-166, Vol.10, (2006).

OJO K.O
1. Electrical Earthing: Overcoming Grid Resistance in Restricted and Highly Resistive Soil Environments: *Attah J. E., Ojo K. O. And Ubeku E. U.* Pages 143 – 148, Vol. 22, (2012).
2. Multi-objective optimal design of a three phase induction motor using geometric programming: *Ubeku E. U., Ojo K. O., Attah J. E. and Atuba S. O.* Pages 149 – 154, Vol. 22, (2012).
3. Path Loss Measurement and Model Analysis of 1.8GHz Wireless Network in Benin City, Nigeria: *Atuba S.O, Azi S.O, Omasheye R.O, and Ojo K.O.* Pages 155 – 160, Vol. 22, (2012).

OJO K. S
1. Synchronization of 4d Rabinovich Hyperchaotic Systems for Secure Communication: *K. S. Ojo and S.T. Ogunjo.* Pages 35 – 40, Vol. 21, (2012)

OJOBOR S.A
1. Effect of queue discipline on the performance of a queueing system: *S. A. Ojobor and S. E. Omosigho.* Pages 453-456, Vol.10, (2006).
2. Batch arrival discrete time queue with server vacation: *S. A. Ojobor and S. E. Omosigho.* Pages 325-330, Vol.13, (2008).
3. Batch arrival discrete time queue with gated vacation system: *S. A. Ojobor and S. E. Omosigho.* Pages 415-424, Vol.15, (2009).
4. Numerical Solution for M/G/1 Queueing System Using ETAQA: *S.A. Ojobor.* Pages 367-37, Vol.17, (2010).

OJUH O.D
1. Electronic and Structural Properties of Zincblende BxIn1−xN: *Ojuh O. D., Omehe N. N. and Idiodi J. O. A.* Pages 413 – 420, Vol. 21, (2012).
2. First Principles studies of band structure and electronic properties of Group III – Nitrides Semiconductors: *Ojuh O. D. and Idiodi J. O. A.* Pages 501 – 508, Vol.21, (2012).

OKAFOR F.C
1. Adaptive Cluster Sampling – A Review: *Okafor F. C.* Pages 225 – 232, Vol. 22, (2012)

OKAFOR L.U
1. Modelling the Nigerian Defence Academy cadets' monthly sick-parade using time series classical decomposition method: *M. O. Oladejo and L. U.Okafor.* Pages 449–462 Vol.14, (2009)

2. Time Series Forecasting by Fourier Series Analysis (FSA) Constant Level Versus Trend Line Seasonal – Effects Models: *Okafor U. L. and Oladejo M. O.* Pages 207 – 218, Vol. 21, (2012).

OKAFOR P.N

1. Queuing Models: A Tool For Assessing The Profitability Of Barbing Salon Business In Agbor Town Of Delta State, Nigeria: *Ehiwario, J.C. And Okafor P.N.* Pages 477–484, Vol.20, (2012).

OKANIGBUAN O.R

1. The derivation of the analytic expressions of the dynamical susceptibility based on the Hubbard-Hirsch Hamiltonian: *Ben E. Iyorzor, Robinson Okanigbuan and John O.A. Idiodi.* Pages 579-582, Vol.10, (2006).
2. Correlation between perturbation and variation methods in the study of strongly correlated electron systems: *Robinson O. Okanigbuan.* Pages 583-594, Vol.10, (2006).
3. Ground state energy of the Hubbard Hamiltonian: Perturbative results: *O. R. Okanigbuan and J. O. A. Idiodi.* Pages 37–40, Vol.12, (2008).
4. Vertical electrical resistivity soundings to locate ground water resourc-es in Sabongida-Ora: A feasibility study: *Abraham Iyoha, Robinson Okanigbuan, and Anita Iziegbe Evboumwan.* Pages 251–260, Vol.12, (2008).

OKE O.A

1. Application Of Adomian's Decomposition Method In Solving Nonlinear Partial Differential Equations: *Olanrewaju, P. O. and Eegunjobi, A. S. and Oke O. A.* Pages 301–304, Vol.16, (2010).
2. Unsteady Free Convective Flow of Sisko Fluid with Radiative Heat Transfer Past a Flat Plate Moving Through a Binary Mixture: *Olanrewaju P. O., Adeleke O. J., Adigun A.A., Fenwa O.D., Oke A., and Ajala Funmi.* Pages 443 – 454, Vol. 22, (2012).

OKE I.S

1. Application of Variational Iteration Decomposition Method For Solving Linear Differential Equation of Tenth-Order with Boundary conditions: *Oke Isaac. S and Modebei Mark Ifeanyi.* Pages 337 – 344, Vol. 21, (2012).

OKE M.O

1. Path Loss Prediction Model for a Radio Station in Nigeria: *Oke M. O.* Pages 161 – 168, Vol. 22, (2012).

OKEDOYE A.M

1. Higher order MHD flow of a uniformly stretched vertical permeable surface in the presence of heat generation/absorption and chemical reaction: *R.O. Ayeni, A.M. Okedoye, F.O. Balogun and T.O. Ayodele.* Pages 163-166, Vol.8, (2004).
2. Effect of Radiation on the Critical Frank – Kamenetskii Parameter of Thermal Ignition in a Combustible Gas Containing Fuel Droplets: *R.O. Ayeni, A.M. Okedoye, A.O. Popoola and T.O. Ayodele.* Pages 217-220, Vol.9, (2005).
3. A new poof of multiple solutions of combustions problems: *R. O. Ayeni, A. M. Okedoye, F. O. Balogun, and F. I. Alao.* Pages 497-498, Vol.10, (2006).
4. On the possibility of multiplicity of temperature fields in a microwave heating cancer therapy: *R. O. Ayeni, A. M. Okedoye.* Pages 499-502, Vol.10, (2006).
5. Unsteady Magneto-Hydrodynamic (MHD) flow of a uniformly stretched vertical permeable surface I in the presence of heat generation/absorption and a first order chemical: *A. M. Okedoye, T. Adeniran, S. O. Adewale and R. O. Ayeni.* Pages 503-510, Vol.10, (2006).
6. Numerical solution of heat and mass transfer in MHD flow in the presence of chemical reaction and Arrhenius heat generation of a stretched vertical permeable membrane: *A. M. Okedoye and R. O. Ayeni.* Pages 111-118, Vol.11, (2007).
7. MHD flow of a uniformly stretched vertical permeable membrane in the presence of zero order reaction and quadratic heat generation: *A. M. Okedoye O. T. Lamidi and R. O. Ayeni.* Pages 119-128, Vol.11, (2007).
8. Magnetic and velocity fields MHD flow of a stretched vertical permeable surface with buoyancy in the presence of heat generation and a first order chemical reaction: *A. M. Okedoye, O. T. Lamidi and R. O. Ayeni.* Pages 129-136, Vol.11, (2007).
9. Effects of variable viscosity on MHD boundary layer flow on a continuously moving vertical plate in the presence of radiation and a chemical reaction of order 1: *A. M. Okedoye and P. I. Farayola.* Pages 201-210, Vol.13, (2008).
10. MHD flow of a uniformly stretched vertical permeable surface under oscillatory suction velocity: *A. M. Okedoye and O. A. Bello.* Pages 211-220, Vol.13, (2008).
11. Effect of power-law exponent in endothermic reactions: *O. T. Lamidi, A. O. Ajala, A. M. Okedoye and R. O. Ayeni.* Pages 227-230, Vol.13, (2008).
12. A note on the effect of affinity hemodialysis on T-cell depletion: *R. O. Ayeni, T. O. Oluyo and A. M. Okedoye,* Pages 443-446, Vol.15, (2009).
13. Influence of power-law exponent on an unsteady endothermic reaction: *O. T. Lamidi, A. M. Okedoye and R. O. Ayeni.* Pages 447-452, Vol.15, (2009).
14. Effect of slip velocity on oscillatory MHD flow of stretched surface with radiative heat transfer and variable suction: *A. M. Okedoye.* Pages 453-460, Vol.15, (2009).
15. Second law analysis of slip velocity on oscillatory MHD flow of stretched surface with radiative heat transfer and variable suction: *A. M. Okedoye and A. O. Adesanya.* Pages 461-468, Vol.15, (2009).
16. Entropy generation in MHD flow of a uniformly stretched vertical permeable surface under oscillatory suction velocity: *A. M. Okedoye and A. O. Adesanya.* Pages 469-476, Vol.15, (2009).
17. MHD free convection flow past an oscillating plate in the presence of heat generation/absorption and chemical reaction: *A. M. Okedoye and A.O. Ajala.* Pages 491-500, Vol.15, (2009).

18. Analytical solution of mass transfer effects on unsteady flow past an accelerated vertical porous plate with suction: *A. M. Okedoye and O. T. Lamidi.* Pages 501-512, Vol.15, (2009).

OKEKE E.O

1. Further On The Damping Of Low Frequency Seismic Waves In a Semi-Infinite Elastic Medium: *Okeke E.O and Asor V.E.* Pages 48 – 55, Vol. 2, (1998).
2. The Comments On The Spectrum Of Micro-Seismic Frequencies: *Asor V.E and Okeke E.O.* Pages 56 – 61, Vol 2, (1998).
3. On the Evolutions of the Ocean wave generated low frequency Seismic noise: *E. O. Okeke, C. Adejayan and V. E. Asor.* Pages 290-298, Vol.3, (1999).
4. On the Superposition Theory of the Near Earth's Surface Longitudinal and Transverse Elastic Waves: *Vincent E. Asor and Ezekiel O. Okeke.* Pages 105-113, Vol.4, (2000).
5. On Some Problems of the Variable end-Point Theorem: *Oghogho Omane Ikpoku and E. O. Okeke.* Pages 317-326, Vol.4, (2000).
6. On Some Observable Wave Forms on Ocean Beaches: *E. O. Okeke and V. E. Asor.* Pages 161-176, Vol.5, (2001).
7. The Dynamic Response of Plates on Pasternak Foundation to Distributed Moving Load: *G. A. Gbadeyan and M. S. Dada. E. O. Okeke and V. E. Asor. E. O. Okeke and V. E. Asor.* Pages 185-200, Vol.5, (2001).
8. On the Progressive Oscillations in a Solid with Internal Friction: *E. O. Okeke.* Pages 137-142, Vol. 6, (2002).
9. The critical role associated with beach slope and its width in evolution of swell near the shoreline: *Vincent E. Asor and Ezekiel O. Okeke.* Pages 139-144, Vol.8, (2004).
10. Tidal flow in the Escravos Bar, Warri, Nigeria: *E. O. Oghre and E. O. Okeke.* Pages 331-336, Vol.8, (2004).
11. On the impact of wave-current on Stokes waves: *B.S. Oyetunde1 and E.O. Okeke.* Pages 363-368, Vol.11, (2007).
12. Analysis of Stokes waves theory as a diffusion problem: *E. O. Okeke and B. S. Oyetunde.* Pages 59-68, Vol.10, (2006).

OKEKE G.A

1. Stability Results for Multistep Iteration Satisfying a General Contractive Condition of Integral Type in a Normed Linear Space: *Hudson Akewe and Godwin Amechi Okeke.* Pages 5–12, Vol.19, (2011).

OKEKE J.E

1. A Generalised Mixed Boundary Value Problem For A Cylinder Under Anti- Plane Strain: *M.O. Oyesanya and J.E.Okeke.* Pages 153-162, Vol.16, (2010).

OKENE D.E

1. On The Structure of The Inverse of a Linear Constant Multivariable System: *E. C. Obinabo, D. E. Okene.* Pages 77-80, Vol.17, (2010).

OKEREKE E.E

1. An Optimal Stochastic Investment and Consumption Strategy with Log Utility: *Alfred Chukwuemeka Okoroafor and Enyinnaya E-Okereke.* Pages 387-392, Vol.17, (2010).

OKETAYO O.O

1. Improvisation of Laboratory Power Supply for Powering Laboratory Electronic Instruments: *Adenodi R. A., Iwetan C. N., Akinluyi F. O. and Oketayo O. O*. Pages 219 – 224, Vol. 21, (2012).

OKEZIE U

1. Geophysical study of the aquifer characteristics and its environmental implications along River Ethiope, Delta State, Nigeria: *Otobo Egwebe and U. Okezie.* Pages 237–244, Vol.12, (2008).

OKODUGHA E.

1. Comparison of second and third orders Runge-Kutta methods for solving initial-value problems in ordinary differential equations: *L. A. Ukpebor, A. C. Esekhaigbe and E. Okodugha.* Pages 349–358, Vol.14, (2009).

OKOLI C.S

1. A Flow Formula For Submerged Rectangular Weirs: *C. S. Okoli.* Pages 337-346, Vol.16, (2010).
2. Computations Of Critical Depth In Rivers With Flood Plains: *Okoli C. S and George Fleming.* Pages 347-362, Vol.16, (2010).
3. Analysis of Turbulent Boundary Layers and Friction in Smooth Tubes at High Prandtl and Schmidt Numbers: *Chuks Okoli.* Pages 285–290, Vol.19, (2011).
4. Mathematical Flow Determination in Open Channel: *Method of Characteristics by Chuks Okoli.* Pages 291–300, Vol.19, (2011).
5. Turbulence Flow Characteristics of Suspended Sediments and its Transport Rate in Open Channel: *Chuks Okoli.* Pages 301–314, Vol.19, (2011).

OKOLIE E.C

1. Characterization of formations and groundwater potential of Amai and Obiaruku in Delta State using resistivity and seismic refraction measurements: *E C Okolie and F. C Ugbe and J. E. A, Osemeikhian.* Pages 83-90, Vol.10, (2010).
2. Analytical determination of low velocity layer in 4-D hydrocarbon prospecting in parts of Imo State: *E. C. Okolie, F. C. Ugbe, B. O. Uyouyou.* Pages 393-402, Vol.11, (2007).
3. Enhancing refraction statics correction from first break interpretation - the Niger Delta example: *O. Ujuanbi, S. I. Jegede, E. C. Okolie and J. T. Erimafa.* Pages 391-396, Vol. 13, (2008).
4. Velocity profile and subsurface stratification in oil and gas exploration in parts of Niger Delta Nigeria: *E. C. Okolie.* Pages 329-336, Vol.15, (2009).

OKON A.A

1. Relative deviation between a uniformly weighted propagator and windowed propagator of a simple Harmonic Oscillator–2: *E. E. Ituen,G. T Akpabio and A. A. Okon.* Pages 13-18, Vol.8, (2011).

OKONTA P.N

1. On the Application of Lyapunov's Theorem of Stability To the Convergence of the Reduced Gradient Method for Optimization Problems with Equality Constraints: *I. N. Njoseh, P. N. Okonta and D. O. Ajayi.* Pages 273-278, Vol.5, (2001).
2. On the Discrete Fourier Transform: The Colley-Tukey Fast Fourier Transform Algorithm: *A. O. Atonuje and P. N. Okonta.* Pages 303-312, Vol.6, (2002).

OKORIE A.

1. Reliability of low pressure Steam Turbine for Electricity Power Generation: *Osarenmwinda J.O. and Okorie .A.* Pages 479–482, Vol.18, (2011).

OKORIE SUNDAY

1. The effect of ZnS thin film's electrical conductivity on electromagnetic wave propagated through it: *Emmanuel I. Ugwu, Sunday Okorie, and Edmond A. Umahi.* Pages 337-344, Vol.15, (2009).

OKORMI A.

1. Egyptian fractions and practical numbers: *O. Izevbizua and A. Okormi.* Pages 387-390, Vol.13, (2008).

OKORO C.I

1. Potentially Induced Artificial Heat Reservior: *Onimisi M. Y. and Okoro C. I.* Pages 205–210, Vol.19, (2011).

OKORO C.N

1. A Cost Control Policy for Material Requirements Planning and Procurements: *Bassey K. J, Adebola F.B and Okoro C.N.* Pages 515-520, Vol.16, (2010).

OKORO F.M

1. An Optimization Technique for the Retarded Differential Delay Equation: *F. M. Okoro and M A. Ibiejugba.* Pages 55-74, Vol.3, (1999).
2. Toeplitz-Circulant Preconditioner for Solutions of Large Systems of Linear Equations: *Felix Okoro.* Pages 175-182, Vol.4, (2000).
3. Solution of Large Systems of Linear Equations using the Method of Alternating Direction Implicit (ADI) as Preconditioner: *Felix Okoro.* Pages 5-16, Vol.5, (2001).
4. A Method of Domain Decomposition for Solution of the Helmholtz Equation: *Felix Okoro and Samuel Azi.* Pages 33-38, Vol.7, (2003).
5. Determination of the optical constants of a thin film supported on a thick transparent substrate: *Samuel Ogo Azi1 and Felix Okoro.* Pages 423-428, Vol.11, (2007).

OKOROAFOR C.A

1. On the Fractal Measure and the Sojourn Time for the Path Of a Levy Process in n- Space: *Chukwuemeka A. Okoroafor.* Pages 116-130, Vol.6, (2002).
2. A stochastic iteration method for the solution of finite dimensional variational inequalities: *A. C. Okoroafor and B. O. Osu.* Pages 301-304, Vol.8, (2004).
3. Some Topolocial Properties of a Random Subset of Lebesgue Measure Zero: *A. C. Okoroafor.* Pages 57-60, Vol.9, (2005).
4. A constrained optimal stochastic production planning model: *Alfred C. Okoroafor and Godswill U. Achi.* Pages 479-484, Vol.12, (2008).
5. An Optimal Stochastic Investment and Consumption Strategy with Log Utility:*Alfred Chukwuemeka Okoroafor and Enyinnaya E-Okereke.* Pages 387-392, Vol.17, (2010).

OKOSUN K.O

1. Mathematical model for bird flu disease transmission: *T. T. Yusuf and K. O. Okosun.* Pages 465-470, Vol.10, (2006).

OKOYE C.M.I

1. Non-Local Theory of Cooper pairing in High-Tc Superconductors: *A. O. E. Animalu, C. M. I Okoye and G. C. Asomba.* Pages 297-311, Vol.2, (1998).

OKPALA G.C

1. The Onchorcerciasis Disease: Population Dynamics of Its Host And The Vector: *G.C.E. Mbah and G. C. Okpala.* Pages 441-450, Vol.16, (2010).
2. Chemotherapy and Imunotherapy Effect on the Population Dynamics of Cancer Cells: *G.C.E. Mbah and G. C. Okpala.* Pages 451-462, Vol.16, (2010).

OKPARA MICHAEL

1. On the purely seasonal ARIMA Process: *Eleazar C. Nwogu, Michael Okpara and Iheanyi S. Iwueze.* Pages 115-126, Vol.7, (2003).

OKPOKO A.P

1. Comparison of the thermal responses of brick and concrete houses to outside air temperature and solar radiation in Kano: A case study of a NBRRI model house: *A. A. L Maduekwe and A.P. Okpoko.* Pages 121 - 134, Vol. 2, (1998).

OKPOYE N.

1. Comparison Between Laminar and Turbulent Flow in a Single Phase Horizontal Pipe Gas Flow: *Okpoye N, Olafuyi O. A., Adekomaya O. and Adewole E. S.* Pages 343–350, Vol.19, (2011).

OKUJAGU C.U

1. Linearized Comparative Analysis of Steel and Aluminum Solar Flat Plate Collector in Solid Absorption Refrigerator: *C. U. Okujagu, T. M. Abbey and J. K. Obianyi.* Pages 127-138, Vol.5, (2001).

OKUNADE I.O

1. Analysis of Anthropogenic Contribution to Natural Concentration of Trace Element in Zaria Soil: *Idris M.C, Okunade I.O, Ogunleye P.O. and Mohammed L.* Pages 105 – 110, Vol. 22, (2012).

OKUNSEBOR M.I.U

1. A continuous-time control model on production planning network: *Dickson E. A. Omorogbe and M. I. U Okunsebor.* Pages 417–422, Vol.14, (2009).

OKUNUGA S.A

1. One-leg multistep methods for the numerical integration of periodic second order initial value problems: *Solomon A. Okunuga.* Pages 63-68, Vol.13, (2008).
2. A new derivation of continuous collocation multistep methods using power series as basis function: *S. A. Okunuga and. J. Ehigie.* Pages 105–116, Vol.14, (2009).
3. Treatment of Stiff Initial Value Problems using Block Backward Differentiation formula: *A. B. Sofoluwe, S. A. Okunuga, and J. O. Ehigie.* Pages 75–82, Vol.20, (2012).

OKUONGHAE D

1. Simple Mathematical Models for Housing Allocation to a Homeless Population; *Daniel Okuonghae.* Pages 399-408, Vol.9, (2005).
2. A mathematical model for Lassa fever; *Daniel Okuonghae and Robert Okuonghae.* Pages 457-464, Vol.10, (2006).
3. Mathematical models to simulate the East African trypanosomiasis population dynamics: *Daniel Okuonghae and Joseph Osemwenkhae.* Pages 481-488, Vol.10, (2006).
4. Modelling the dynamics of tuberculosis in Nigeria: *Daniel Okuonghae.* Pages 417-430, Vol. 12, (2008).
5. Endemicity of cholera in Nigeria: A mathematical model to investigate its nature: *J. E Osemwenkhae, A. O. Isere and D. U. Okuonghae.* Pages 165-170, Vol.14, (2009).

OKUONGHAE R.I

1. Second derivative continuous linear multistep methods for the numerical integration of Stiff system of ordinary differential equations: *F. O. Otunta, M. N. O. Ikhile and R. I. Okuonghae.* Pages 159-174, Vol.11, (2007).
2. Stiffly stable continuous extension of second derivative linear multi-step methods with an off-step point for initial value problems in ordinary differential equations: *M. N. O. Ikhile and 2R. I. Okuonghae.* Pages 175-190, Vol.11, (2007).
3. Class of stiffly stable hybrid second derivative continuous linear multistep methods for stiff IVPs in ODEs: *R. I. Okuonghae and M. N. O. Ikhile.* Pages 313–336, Vol.12, (2008).
4. Modelling the dynamics of tuberculosis in Nigeria: *Daniel Okuonghae.* Pages 417-430, Vol. 12, (2008).

OKUNZUWA S

1. Magnetic Phase Transition In CeNixCu1-X Alloys A Kondo Model Study: *S. Okunzuwa, E. Aghemenloh, B. E. Iyorzor.* Pages 509 – 516, Vol. 21, (2012)

OLABIYISI S.T.

1. Dufour and Soret Effects on Hydromagnetic Free Convection and Mass Transfer Past A Vertical Porous Plate in The Presence of Thermal Radiation: *Olanrewaju P.O., Olabiyisi S.T., Olanrewaju M.A., Ayeni R.O. and Adeleke O. J.* Pages 431 – 442, Vol. 22, (20).

OLABODE B.T

1. An accurate scheme by block method for third order ordinary differential equations: *B. T. Olabode.* Pages 97–104, Vol.14, (2009).
2. On the direct block multistep method for the solution of fourth order ordinary differential equations: *B.T. Olabode.* Pages 329 – 336, Vol. 21, (2012).

OLADEINDE M.H

1. Analysis of temperature distribution in a heat conducting fiber with convection losses using finite element method: *M. H. Oladeinde and J. A. Akpobi.* Pages 311–324, Vol.14, (2009).
2. Numerical Modeling of a Rayleigh Step and Multi Step Slider Bearings using Finite Difference Method: *Oladeinde M.H and Akpobi J.A.* Pages 103-108, Vol.17, (2010).
3. Hydrodynamic Lubrication Analysis Of Slider Bearings Lubricated With Micropolar Fluids: *Oladeinde M.H and Akpobi J.A.* Pages 109-114, Vol.17, (2010).
4. A Numerical Simulation of Temperature Distribution and Power Loss of Slider Bearings Lubricated With Fluids Having Constant Viscosity: *Oladeinde, M. H, And Unuigbe, A. I.* Pages 531–536, Vol.18, (2011).
5. Analysis of Tube Drawing Process – A Finite Element Approach: *Oladeinde, M.H and Akpobi. J.A.* Pages 549–554, Vol.18, (2011).

OLADEJO M.O

1. Modelling the Nigerian Defence Academy cadets' monthly sick-parade using time series classical decomposition method: *M. O. Oladejo and L. U. Okafor.* Pages 449–462, Vol.14, (2009).
2. Time Series Forecasting by Fourier Series Analysis (FSA) Constant Level Versus Trend Line Seasonal – Effects Models: *Okafor U. L. and Oladejo M. O.* Pages 207 – 218, Vol. 21, (2012).

OLADELE J.O

1. Heat Transfer To A Liquid Film On An Unsteady Stretching Surface: *R.O. Ayeni & J.O. Oladele.* Pages 55-59, Vol. 1, (1992).

OLADELE R.O

1. Viscous dissipation effects on the flow of a radiating gas between concentric elliptic cylinders: *R. O. Oladele, J. A. Gbadeyan and O. A.Taiwo.* Pages 299-304, Vol.10, (2006).

OLADIPO A.O

1. The direct product of right zero semigroups and certain groupoids: *E. E. David and Adewale Oladipo Oduwale.* Pages 575-578, Vol.10, (2006).

OLADIPO A.T

1. Coefficient Inequalities and Some Convolution Properties of a Subclass of Analytic Functions: *Abiodun Tinuoye Oladipo.* Pages 49-56, Vol.9, (2005).
2. On a Subclass of analytic functions: *Abiodun Tinuoye Oladipo.* Pages 409-412, Vol.10, (2006).

OLAFUYI O.A

1. Compilation of Instantaneous Source Functions for Varying Architecture of a Layered Reservoir with Mixed Boundaries and Horizontal Well Completion Part I: Normal and Inverted Letter 'e' Architecture: *Adewole, E.S. and Olafuyi O.A.* Pages 563-572, Vol.16, (2010).
2. Empirical Equations For The Surface Gas Gravity of Nigerian Associated Gas: *Ohirhian P.U and Olafuyi O.A.* Pages 69-72, Vol.17, (2010).
3. Comparison Between Laminar and Turbulent Flow in a Single Phase Horizontal Pipe Gas Flow: *Okpoye N, Olafuyi O. A., Adekomaya O. and Adewole E. S.* Pages 343–350, Vol.19, (2011).
4. Prediction of Multiphase Flow Properties from Network Models: *David Omamuzo Otiede, Kejian Wu and Olalekan Olafuyi.* Pages 351–358, Vol.19, (2011).

OLAGBEGI P.O

1. A Statistical Approach to the Modified Impress Current Cathodic Protection (ICCP) for Pipeline Systems: *Ariavie G.O, Ariavie S.S and Olagbegi P.O.* Pages 321-334, Vol.17, (2010).

OLAGUNJU A.S

1. Perturbed segmented domain collocation Tau-method for the numerical solution of Second Order Boundary Value problems: *O. A. Taiwo and A. S. Olagunju.* Pages 293-298, Vol.10, (2006).

OLAGUNJU M.

1. Embedded confusion matrix in Fuzzy logic for system appraisal: *J.O. Omolehin, L. B. Asaju, M. Olagunju, A. O. Ameen and K. Rauf.* Pages 355-362, Vol.15, (2009).

OLAJIDE M.S

1. Comparative analysis of Rivest Shamir Adleman (RSA), Rabin and El Gamal public key cryptosystems: *M. S. Olajide,. O. S. Adewale, B. K. Alese and A. O. Adetunmbi.* Pages 289-296, Vol.13, (2008).
2. Comparative study of the Bisection and the Newton Methods in solving for Zeros and Extremes of a single-variable Function: *Iwetan C.N., Fuwape I. A., Olajide M.S., and Adenodi R.A.* Pages 173 – 176, Vol. 21, (2012).

OLAJUWON B.I

1. Unsteady Backward Power-Law flow Near a Moving Wall: *R. O. Ayeni and B. I. Olajuwon.* Pages 263-266, Vol.5, (2001).
2. On the Existence and Uniqueness of a Power-Law Fluid Flowing in a Cylinder: *B. I. Olajuwon and R. O. Ayeni.* Pages 187-190, Vol.6, (2002).
3. Flow of a power-law fluid with memory past an infinite plate: *B. I. Olajuwon and R. O. Ayeni.* Pages 161-162, Vol.8, (2004).
4. Heat and Mass Transfer in a Micropolar Fluid in the Presence of Thermal Radiation and Chemical Reaction: *Olajuwon B. I, Oahimire J.I., and Abiala I. O.* Pages 465 – 482, Vol. 22, (2012).

OLALERU J.O

1. On finitely many fixed points: *J. O. Olaleru.* Pages 167-170, Vol.10, (2006).
2. On the equivalence of Picard, Mann and Ishikawa iterations for a class of quasi-contractive operators: *Johnson. O. Olaleru.* Pages 51-56, Vol.11, (2007).
3. Mann iteration with errors for strictly pseudo-contractive mappings: *J. O. Olaleru and 2A. A. Mogbademu.* Pages 57-62, Vol.11, (2007).

OLALEYE O.K

1. Self-similar solution for coupled thermal electromagnetic model during microwave heating of biological tissues: *E. A. Adebile, B. N. Akintewe, O. K. Olaleye, and V. Idoko.* Pages 229-234, Vol.10, (2006).

OLANREWAJU M.A.

1. Dufour and Soret Effects on Hydromagnetic Free Convection and Mass Transfer Past A Vertical Porous Plate in The Presence of Thermal Radiation: *Olanrewaju P.O., Olabiyisi S.T., Olanrewaju M.A., Ayeni R.O. and Adeleke O. J.* Pages 431 – 442, Vol. 22, (2012).

OLANREWAJU P.O

1. Effect of Frank-Kamenetskii Parameter on Strong Detonations in a Converging Vessel: *P. O. Olanrewaju and R. O. Ayeni.* Pages 267-272, Vol.5, (2001).
2. Effects of the Geometry of Vessel on Detonations: *P. O. Olanrewaju and R. O. Ayeni.* Pages 191-196, Vol.6, (2002).

3. On the existence and uniqueness result for a two-step reactive-diffusive equation with variable pre-exponential factor: *P. O. Olanrewaju, R. O. Ayeni, A. O. Ajala,O. Adebimpe, and A. O. Ajayi.* Pages 403-408, Vol.10, (2006).
4. Hamilton-Jacobi-Bellman equations for quantum control: *M. O. Ogundiran and 2P. O. Olanrewaju.* Pages 525-528, Vol.11, (2007).
5. Solving microwave heating model in a slab using shooting technique: *P. O. Olanrewaju, 2R. O. Ayeni,. and 3O. Adebimpe.* Pages 529-532, Vol.11, (2007).
6. Temperature and velocity profile on thermal ignition in a reactive variable viscosity poiseuille flow: *P. O. Olanrewaju, A. Falohun, D. A. Ajadi, and R. O. Ayeni.* Pages 405-410, Vol.13, (2008).
7. A Note on Transient Convection With Chemical Reaction And Radiative Heat Transfer Past a Flat Porous Plate Moving Through a Binary Mixture: *P. O. Olanrewaju, O. S. Bolaji and E. A. Owoloko.* Pages 189–198, Vol.16, (2010).
8. On the influence of buoyancy and suction/injection In Heat and Mass transfer problems: *P. O. Olanrewaju, and O. T. Lamidi.* Pages 293–300, Vol.16, (2010).
9. Application Of Adomian's Decomposition Method In Solving Nonlinear Partial Differential Equations: *Olanrewaju, P. O. and Eegunjobi, A. S. and Oke O. A.* Pages 301–304, Vol.16, (2010).
10. Temperature profile of two steps Arrhenius, Bimolecular and Sensitized exothermic chemical reactions in a slab: *P. O. Olanrewaju, A.S. Bishop and O.T. Arulogun,* Pages 119-122, Vol.17, (2010).
11. Polynomial approximation approach to transient heat conduction with internal heat generation: *P. O. Olanrewaju, O.T. Arulogun and M.E. Ojewumi.* Pages 123-128, Vol.17, (2010).
12. Dufour and Soret Effects on Hydromagnetic Free Convection and Mass Transfer Past A Vertical Porous Plate in The Presence of Thermal Radiation: *Olanrewaju P.O., Olabiyisi S.T., Olanrewaju M.A., Ayeni R.O. and Adeleke O. J.* Pages 431 – 442, Vol. 22, (2012).
13. Unsteady Free Convective Flow of Sisko Fluid with Radiative Heat Transfer Past a Flat Plate Moving Through a Binary Mixture: *Olanrewaju P. O., Adeleke O. J., Adigun A.A., Fenwa O.D., Oke A., and Ajala Funmi.* Pages 443 – 454, Vol. 22, (2012).

OLAOYE M.A
1. Some Maps and their Chaoticity: *Olusa T. V., Ometan O. O., Adegbola R. B., Olaoye M. A.* Pages 199–204, Vol.20, (2012).

OLASOJI O.W
1. Electric Nusselt Number in a Closed Cylindrical Container Filled With two immiscible fluids: *M. F. Hague, O. W. Olasoji and E. D. Mishelia.* Pages 213-242, Vol.4, (2000).

OLAYINKA A.S
1. Study Of The Structural Properties Of Some Liquid Metals And Their Alloys; *O.M. Osiele and A. S. Olayinka,* Pages 81-88, Vol.17, (2010).

OLAYIWOLA M.O
1. Application of homotopy perturbation method for the large angle period of a nonlinear oscillator: *M. O. Olayiwola, A. W. Gbolagade, A.O. Adesanya and F. O. Akinpelu.* Pages 235–238, Vol.14, (2009).
2. Application of modified power series method for the solution of system of differential equations: *M. O Olayiwola, A. W Gbolagade and A. O Adesanya.* Pages 91-94, Vol.14, (2009).
3. An Efficient Algorithm for Solving the Telegraph Equation: *Olayiwola, M. O, Gbolagade, A .W & Adesanya , A. O.* Pages 199–204, Vol.16, (2010).
4. Solving Variable Coefficient Fourth-Order Parabolic Equation by Modified initial guess Variational Iteration Method: *Olayiwola , M. O, Gbolagade, A .W & Adesanya , A. O.* Pages 205–210, Vol.16, (2010).
5. Numerical Solutions of Generalized Burger's-Huxley Equation: *Modified Variational Iteration Method by Olayiwola M.O, Gbolagade A .W & Akinpelu F. O.* Pages 433-438, Vol. 17, (2010).
6. The Mathematical Analysis of the Within-Host Dynamics of Plasmodium Falciparum: *M.O. Adeniyi, M.K. Kolawole and M.O Olayiwola.* Pages 303-306, Vol.18, (2011).

OLAYIWOLA R.O
1. Application of thermo-acoustic engines to heat transfer in microcircuits: An analytical approach: *R. O. Olayiwola, M. Jiya and Y. M. Aiyesimi.* Pages 221-226, Vol.13, (2008).
2. Mathematical modelling of the calcination process: *R. O. Olayiwola, A.T. Cole, D. Hakimi and R.O. Ayeni.* Pages 381–388, Vol.14, (2009).
3. A mathematical model of combustion kinetics of municipal solid waste (MSW): *R. O. Olayiwola, M. Jiya and Y. M. Aiyesimi.* Pages 389–394, Vol.14, (2009).
4. A Mathematical Model and Simulation of Lime Shaft Kilns: *R.O. Olayiwola.* Pages 91–98, Vol. 19, (2011).
5. A Mathematical Model and Simulation of Lime Shaft Kilns: *R.O. Olayiwola.* Pages 277–284, Vol.19, (2011).
6. Fixed-bed Solid Fuel Arrhenius Combustion: Modelling and Simulation: *R.O. Olayiwola.* Pages 111 – 120, Vol. 21, (2012).
7. A Mathematical Model and Simulation of In-Situ Combustion in Porous Media: *R.O. Olayiwola and R.O. Ayeni.* Pages 545 – 554, Vol. 21, (2012).
8. A mathematical model of interaction between regulatory proteins in bacterial flagellum : *Olayiwola R. O., Erinle-Ibrahim L. M., Odebiyi O. A., Gbadamosi B., and Achanya V. M.* Pages 503 – 512, Vol. 22, (2012).

OLEKA M.O

1. Measurement of air aerosol size during the 2001/2002 harmattan season at Uturu, Nigeria. : *I. U. Chiemeka, M. O. Oleka, T. C. Chineke.* Pages 635-640, Vol.11, (2007).

OLEWUEZI N.P

1. Identification of the time series interrelationships with reference to dynamic regression models: *N. P. Olewuezi.* Pages 621-626, Vol.11, (2007).
2. Contributions of influence function using the inverse autocorrelation function in the detection of outliers: *N. P. Olewuezi.* Pages 627-634, Vol.11, (2007).
3. The performance of inverse autocorrelation function in model order determination especially with outliers: *N. P. Olewuezi.* Pages 309-314, Vol.13, (2008).
4. Some basic tests on time series outliers: *N. P. Olewuezi.* Pages 101-106, Vol.15, (2009).

OLOFINSAO J.A

1. New Group Symmetries of the Burger's Equation: *G. O. Obodi and J. A. Olofinsao.* Pages 15 - 19, Vol. 2, (1998).

OLOGUNLEKO A.O

1. On the Numerical Solution of the Laminar Boundary Layer Equation: *A. O. Ologunleko and A. S. Adekola.* Pages 107 - 120, Vol. 2, (1998).

OLORUNSOLA S.A

1. A discretized algorithm for the solution of a constrained, continuous quadratic control problem: *S. A. Olorunsola and O. Olotu.* Pages 295-300, Vol.8, (2004).
2. On the convergence profile of a discretized scheme for a two-dimensional constrained optimal control problem : *O. Olotu and S. A. Olorunsola.* Pages 537-542, Vol.10, (2006).
3. Convergence profile of a discretized scheme for constrained problem via the penalty-multiplier method: *O. Olotu and S. A. Olorunsola.* Pages 341–348, Vol.14, (2009).
4. A New Method for the Evaluation of Higher Order Derivatives of Three Continuous/Differentiable Functions: *Olorunsola S. A. and Enoch O. O. A.* Pages 155–158, Vol.19, (2011).
5. On The Algorithm for Dynamic Restoring Control Problems with Matrix Coefficients: *Olotu, O. and Olorunsola, S.A.* Pages 175–184, Vol.20, (2012).

OLOTU O.

1. A discretized algorithm for the solution of a constrained, continuous quadratic control problem: *S. A. Olorunsola and O. Olotu.* Pages 295-300, Vol.8, (2004).
2. On the convergence profile of a discretized scheme for a two-dimensional constrained optimal control problem: *O. Olotu and S. A. Olorunsola.* Pages 537-542, Vol.10, (2006).
3. Convergence profile of a discretized scheme for constrained problem via the penalty-multiplier method: *O. Olotu and S. A. Olorunsola.* Pages 341–348, Vol.14, (2009).
4. A Primal-Dual Augmented Lagrangian Method for Optimal Control of Linear-Quadratic Problem with Time Varying Systems: *Adekunle A. I. and Olotu O.* Pages 165–174, Vol.20, (2012).
5. On The Algorithm for Dynamic Restoring Control Problems with Matrix Coefficients: *Olotu, O. and Olorunsola, S.A.* Pages 175–184, Vol.20, (2012).
6. Augmented Lagrangian Method For Discretized Optimal Control Problems: *Olotu, O and Akeremale, O.C.* Pages 185–192, Vol.20, (2012).

OLOWOFELA J.A

1. The Radio And Very Low Frequency (VLF) Electromagnetic Response Of A Layered Earth Media With Variable Dielectric Permittivity: *V. C. Ozebo and J. A. Olowofela.* Pages 375-390, Vol.16, (2010).
2. Effect of Heat From Buried Metallic Object On Different Soil Textures: *V.C. Ozebo, J.A. Olowofela, R. Bello and A.O. Amure.* Pages 321–328, Vol.19, (2011).
3. Depth Estimation of Aeromagnetic Data of Gombe, North Eastern Nigeria, using the Method of Analytic Signal: *V.C. Ozebo, J.A. Olowofela and B.A Agboluaje.* Pages 373 – 380, Vol. 21, (2012).

OLOWU O.O

1. Investigating The Travelling Wave Solution For an SIR Endemic Disease Model With No Disease Related Death (When The Spatial Spread Of The Susceptible Is Not Negligible): *Olowu O.O and Aihie V.U.* Pages 165-170, Vol.17, (2010).
2. On The Travelling Wave Solution For An SEIR Epidemic Disease Model: *Olowu O.O and Okounghae D.U.* Pages 171-176, Vol.17, (2010).

OLUDARE A. I.

1. Optimization of the Stability Margin for Nuclear Power Reactor Design Models Using Regression Analyses Techniques: *Oludare A.I., Agu M.N. and Akusu P.O.* Pages 327 – 334, Vol. 22, (2012).

OLUBOSEDE O

1. Work function of elemental metals and its face dependence: Stabilized Jellium approach: *O. M. Osiele1 and O. Olubosede.* Pages 445-454, Vol.11, (2007)

OLUBUSOYE O. E.

1. Ranking of Simultaneous Equation Estimators to Outliers From Heavy-Tailed Quasi-Uniform Distribution: *Oseni B.M., Adepoju A. A. and Olubusoye O. E.* Pages 265 – 272, Vol. 22, (2012).

586

OLUFAYO A.A
1. Theoretical significance of field measurements of radioactive leaf and canopy temperatures: *A. A. Olufayo.* Pages 330-340, Vol.3, (1999).
2. Remotely sensed crop canopy temperature, ambient relative humidity and air Temperature: Theoretical Analysis and Experimental verification: *A. A. Olufayo and Oguntunde P.G.* Pages 341-350, Vol.3, (1999).
3. Sensitivity and error analysis of Blaney-Morin-Nigeria evapotranspiration model: *P. G. Oguntunde, by; F. I. Alao and A. A. Olufayo.* Pages 350-359, Vol.3, (1999).

OLUSA T.V
1. Some Maps and their Chaoticity : *Olusa T. V., Ometan O. O., Adegbola R. B., Olaoye M. A.* Pages 199–204, Vol.20, (2012)

OLUSOLA O.I
1. Chaos Control and Synchronization in Generalized Lorenz Systems With fully Uncertain Parameters : *Olusola O. I., Njah A.N., Vincent U. E., Idowu B. A. and Ahmed A.* Pages 7–14, Vol.19, (2011).
2. Mathematical Modelling of a Two – Link Planar Manipulator Arm Using The Denavit – Hartenberg Matrices: *Olusola O. I. and Fakolujo O.A.* Pages 139–150, Vol.20, (2012).

OLUWADE DELE
1. Asymptotic time complexity of an algorithm for generating the coefficients of the Chebyshev polynomials for the Tau numerical method: *Dele Oluwade and O.A. Taiwo.* Pages 409 – 412, Vol. 13, (2008).

OLUWANIYI STEVE D.
1. On congruence lattices: *Adewale O. Oduwale, Cecil B. Adejayan and Steve D. Oluwaniyi.* Pages 281-286, Vol.15, (2009).

OLUYO T.O
1. Mathematical analysis of the global dynamics of a model for HIV infection of CD4 + T cells: *T. O Oluyo, R. O Ayeni and O. O Ayandokun.* Pages 103-110, Vol.11, (2007).
2. A note on the effect of affinity hemodialysis on T-cell depletion: *R. O. Ayeni, T. O. Oluyo and A. M. Okedoye,* Pages 443-446, Vol.15, (2009).
3. Effect of transmission rate in an SIR epidemic model: *R.O.Ayeni, O.Adebimpe, T.O.Oluyo, S.O.Adewale, A.O.Popoola and A.W.Ogunsola.* Pages 157-164, Vol.17, (2010).
4. Further Remarks on Vaccination for Non-Fatal Susceptible-Invective-Susceptible (SIS) Disease: *O.O. Ayandokun, R.O. Ayeni, T.O. Oluyo and B. Gbadamosi.* Pages 187–190, Vol.18, (2011).
5. Modeling Hiv Epidemic Under Contact Tracing - A Remark: *Oluyo T.O and Ayeni R.O.* Pages 307-312, Vol.18, (2011).

OLUYOMI A
1. Dynamics of the Driven-Damped Pendulum: *Ibiyinka A. Fuwape and Oluyomi Akinyemi.* Pages 195-197, Vol.2, (1998).

OMASHEYE R.O
1. Path Loss Measurement and Model Analysis of 1.8GHz Wireless Network in Benin City, Nigeria: *Atuba S.O, Azi S.O, Omasheye R.O. and Ojo K.O.* Pages 155 – 160, Vol. 22, (2012).

OMEHE N.N
1. The Electronic Band Structure and Linear Optical Properties of Bilayer MoS2 and MoSe2: *Omehe N. N. and Ehika S.* Pages 293–300, Vol.20, (2012).
2. The Electronic Band Structure of Platinum Oxide (PtO): *Omehe N. N. and Azi S. O.* Pages 301–308, Vol.20, (2012).
3. Electronic and Structural Properties of Zincblende BxIn1−xN : *Ojuh O. D., Omehe N. N. and Idiodi J. O. A.* Pages 413 – 420, Vol. 21, (2012)

OMETAN O.O
1. Some Maps and their Chaoticity : *Olusa T. V., Ometan O. O., Adegbola R. B., Olaoye M. A.* Pages 199–204, Vol.20, (2012).

OMISORE G.
1. A geophysical study of structural foundations in Omolayo area, Ibadan, Nigeria: *V. C. Ozebo, O. O. Odusote, G. Omisore and A. I. Ibiyemi.* Pages 267–278, Vol.12, (2008).

OMODAMWEN S.
1. Automated street lighting control: *S. O. Igbinovia, R. O. Osayande, and S.Omodamwen.* Pages 467–478, Vol.12, (2008).

OMOKARO H.O
1. On the Lie Algebra of an Algebraic Group: *Henry O. Omokaro.* Pages 23-26, Vol.7, (2003).
2. A Generalisation of the RSA Congruence: *Henry O. Omokaro.* Pages 27-28, Vol.7, (2003).
3. An application of the extended RSA congruence: *Henry Osaretin Omokaro.* Pages 341-343, Vol.8, (2004).
4. On Actions of Algebraic Groups: *Henry Osaretin Omokaro.* Pages 541-544, Vol.9, (2005).
5. On compactoid and limited sets in non-Archimedean locally convex spaces: *Henry O. Omokaro.* Pages 571-574, Vol.10, (2006).

OMOLEHIN J.O
1. Hessian Spectrum to perturbation factor for gradient method algorithm: *J. O. Omolehin.* Pages 355-362, Vol.10, (2006).
2. Jacobian approach to optimal determination of perturbation parameter for gradient method: *J. O. Omolehin, K. Rauf, B. Opawoye, and W. B. Yahya.* Pages 363-370, Vol.10, (2006).
3. Control approach to Queue Theory: *J. O. Omolehin.* Pages 371-378, Vol.10, (2006)

4. Development of data encryption and decryption algorithm using 4-row rail fence cipher: *J. O. Omolehin, O. C. Abikoye and R. G. Jimoh.* Pages 411-416, Vol.13, (2008).
5. Effect of matrix transformation on minimization of quadratic functional: *J. O. Omolehin, M. K. A. Abdulrahman, K. Rauf and A. O. Ameen.* Pages 417-422, Vol.13, (2008).
6. Embedded confusion matrix in Fuzzy logic for system appraisal: *J.O. Omolehin, L. B. Asaju, M. Olagunju, A. O. Ameen and K. Rauf.* Pages 355-362, Vol.15, (2009).
7. Control derivative to optimal control analysis: *J. O. Omolehin, K. Rauf, M. O. Ajisope, M. A. Mabayoje and L. B. Asaju,* Pages 399-404, Vol.15, (2009).
8. The Concept of Convexity in Fuzzy Set Theory : *Rauf K., Omolehin J. O. , Ma'ali A. I., Badeggi A. Y. and Lukuman A.* Pages 13–16, Vol.20, (2012).
9. Convergence Estimate of ECGM Algorithm for Reaction Diffusion Control Problem: *Omolehin J. O., Rauf K. , Badeggi A. Y. and Aliyu A.I. Ma'ali.* Pages 49–54, Vol.20, (2012).
10. A Control Approach to the Existence and Uniqueness of Solution of Nuclear Reactor Safety Characterization: *Aminu L., Omolehin J. O. and Rauf K.* Pages 407 – 410, Vol. 22, (2012).
11. On the Model for Nuclear Safety Characterization from the Dynamical Structure of Reaction Diffusion Equation: *Omolehin J. O., Aminu L., Ejieji C. N., Enikuomehin A. O. and Fabiyi F. A. S.* Pages 411 – 418, Vol. 22, (2012).

OMOLOFE B.
1. Dynamic Behaviour of Non-uniform Bernoulli-Euler Beams Subjected to Concentrated Loads Travelling at Varying Velocities: *S. T. Oni and B. Omolofe.* Pages 79-102, Vol.9, (2005).
2. On the Transverse Motions Under Heavy Loads of Thin Beams with Variable Prestress: *B. Omolofe, and S. O. Ajibola.* Pages 127-142, Vol. 9, (2005).
3. Effects of damping and exponentially decaying foundation on the motions of finite thin beam subjected to travelling loads: *B. Omolofe and B. M. Oseni.* Pages 119-126, Vol.13, (2008).
4. Influence of Elastic Foundations On The Motion And Critical Velocity of Timoshenko Beam Subjected To Fast Traveling Load: *B. Omolofe.* Pages 119-132, Vol.16, (2010).
5. Exact Vibration Solution for initially stressed Beams resting on Elastic Foundation and subjected to partially distributed masses: *B. Omolofe, A. Adedowole, S.O. Ajibola and Jimoh Ahmed.* Pages 91-98, Vol.18, (2011).

OMOREGIE NOSA E.A
1. A Robust Mathematical Model On Infectious Diseases: *Omorogbe Dickson E.A. and Omoregie Nosa E.A.* Pages 177-182, Vol.17, (2010).

OMORODION I.I
1. Analysis of Direct Extrusion Operation Using The Bubnov-Galerkin Finite Element Model: *Oviawe C. I, Osifo G. E. and Omorodion I. I.* Pages 435–442, Vol20, (2012).

OMOROGBE D.E. ATIVIE
1. General convergence analysis of a modified steepest descent method: *Dickson E. Ativie Omorogbe and A.A Osagiede.* Pages 353-358, Vol.12, (2008).

OMOSIGHO S. E
1. On Estimation of Entropy Value for an Organization: *S. E. Omosigho and A. O. Osagiede.* Pages 36-42, Vol.3, (1999).
2. Inventory Replenishment Policy when Demand is Quadratic: Direct and Inverse Methods: *F. E. U. Osagiede and S. E. Omosigho.* Pages 301-308, Vol.4, (2000).
3. Time Series Analysis of Malaria Data: *N. Ekhosuehi and S. E. Omosigho.* Pages 63-70, Vol.5, (2001).
4. An Application of Homogeneous and Non-Homogeneous Markov Chains: *A. A. Osagiede and S. E. Omosigho.* Pages 323-332, Vol.6, (2002).
5. Work Force Stability and Suitability: *S. E. Omosigho and A. A. Osagiede.* Pages 333-340, Vol.6, (2002).
6. A simple algoraithm for the inventory problem with a linear incasing demand: *F. E. U. Osagiede and S. E. Omosigho.* Pages 83-88, Vol.7, (2003).
7. Effect Of Box-Cox Transformation Parameter On Forecast From ARIMA (p,1,0) models : *N. Ekhosuehi and S. E. Omosigho.* Pages 105-110, Vol.7, (2003).
8. Effect of queue discipline on the performance of a queueing system: *S. A. Ojobor and S. E. Omosigho.* Pages 453-456, Vol.10, (2006).
9. Batch arrival discrete time queue with server vacation: *S. A. Ojobor and S. E. Omosigho,* Pages 325-330, Vol.13, (2008)
10. Batch arrival discrete time queue with gated vacation system: *S. A. Ojobor and S. E. Omosigho.* Pages 415-424, Vol.15, (2009).
11. Discrete Time Queueing Model for Queues at Fixed Control Signalized Intersection: *Omosigho S. E.* Pages 169 – 174, Vol. 22, (2012).
12. An Interval forecast for stationary Autoregressive process using Bootstrap method: *Ekhosuehi N. and Omosigho S. E.* pp 219 – 224, Vol. 22, (2012).

OMOWAYE A.J
1. Approximate solution to laminar falling liquid film with variable viscosity along an inclined heated plate: *O. K. Koriko and A. J. Omowaye.* Pages 189-192, Vol.13, (2008).
2. Unsteady MHD free convection flow and heat transfer along an infinite vertical porous plate under Arrhenius kinetics : *A. J. Omowaye and R. O. Ayeni.* Pages 477-484, Vol.15, (2009).

ONIMISI M.Y
1. Potentially Induced Artificial Heat Reservior : *Onimisi M. Y. and Okoro C. I.* Pages 205–210, Vol.19, (2011)

ONI-OJO AMEN
1. On Recent Developments on the Embedded Atom Method: *A. A. Oni-Ojo and J. O. A. Idiodi and E. Aghemenloh.* Pages 507-512, Vol.9, (2005).
2. The ground state of the Hubbard model: *E.O. Aiyohuyin, A.A. Oni-Ojo.* Pages 501-504, Vol.11, (2007).
3. Testing Mulliken approximation using hydrogen atom: *E. O. Aiyohuyin and Amen A. Oni-Ojo.* Pages 505-508, Vol.11, (2007).
4. Embedded atom method for materials with a negative Cauchy discrepancy: *A. A. Oni-Ojo, J. O. A. Idiodi and E. O. Aiyohuyin.* Pages 509-515, Vol.11, (2007).
5. Gutzwiller Renormalization Factors for the t-J model: *Aiyohuyin E. O. and Amen Oni-Ojo.* Page 227–230, Vol. 20, (2012).
6. Transformation of the Hubbard Hamiltonian to the t-J Hamiltonian using the Raleigh- Schrodinger Perturbation Expansion: *E.O. Aiyohuyin, F.O. Ezomo and Amen Oni-Ojo.* Pages 231–234, Vol. 20, (2012).

ONIYIDE O.R
1. Effective utilization of weighting adjustment for the estimates of means in survey non-response: *O. R. Oniyide and D. A. Agunbiade.* Pages 447-452, Vol.10, (2006).
2. The Bayesian perspective of some sample survey design in survey non-response: *O. R. Oniyide and O. O. Alabi.* Pages 455-460, Vol.12, (2008).
3. Mark-resighting survey method for the estimation of population size in a closed animal population: *O. R. Oniyide, and B. T. Efuwape.* Pages 461- 466, Vol.12, (2008).

ONOJASUN EVANS
1. Application of Migration Velocity Using Fourier Transform Approach to Process 3-D Seismic Data: *Okan Evans Onojasun.* Pages 39–44, Vol.17, (2010).
2. Geoelectrical Sounding Survey For Aquifer Determination In Some Northern Parts of Edo State-Nigeria: *Okan Evans Onojasun.* Pages 45-52, Vol.17, (2010).

ONONIWU J.S
1. Total Energies In Lithium Cluster: *J. S. Ononiwu.* Pages 312-324, Vol.2, (1998).
2. Estimating the Stability of Some Alkalimetal Clusters Li, Li and Nana using Local Spin Density Functional Formalism: *J. S. Ononiwu,* Pages 151-166, Vol.3, (1999).
3. Calculation of Hyperfine Fields of 3d and 4d Impurities in Nickel: *J. O. Ononiwu.* Pages 239-252, Vol.6, (2002).

ONWUAGBA B.N
1. Ionic and Electronic Properties of Sodium Clusters: *B. N. Onwuagba.* Pages 115-126, Vol.5, (2001).
2. Electronic properties of Sodium clusters in spherical Jellium model: *C. A. Madu and B. N. Onwuagba.* Pages 267-274, Vol.7, (2003).
3. Energy Band Structure Studies Of Zinc-Blende GaAs and In As : *Madu C A and Onwuagba B N.* Pages 51-56, Vol.16, (2010).

ONWUATU J.U
1. Relative Controllability and Null Controllability of Linear Delay Systems with Distributed Delays in the State and Control: *Vincent A. Iheagwam and Jerry U. Onwuatu.* Pages 221-238, Vol.9, (2005).

ONWUCHEKWA J.U
1. On the static buckling of an externally pressurized finite circular cylindrical shell: *A. M. Ette and Joy U. Onwuchekwa.* Pages 323-332, Vol.11, (2007).

OPAWOYE B.
1. Jacobian approach to optimal determination of perturbation parameter for gradient method: *J. O. Omolehin, K. Rauf, B. Opawoye, and W. B. Yahya.* Pages 363-370, Vol.10, (2006).

OPOKO A.P
1. Heat Transfer Modelling of Roofing Elements of Buildings in the Tropics: *E. E. Iheonu and A. P. Opoko.* Pages 235-244, Vol.7, (2003).

OPOOLA T.O
1. On Coefficient Bounds of A Subclass of Univalent Functions: *Oladipo A.T. and Opoola T.O.* Pages 395-400, Vol.16, (2010).

OREDEIN A.I
1. The Unsteady Variable – Viscosity Free Convection Flow on a Porous Plate: *Loyinmi, A. C. and Oredein, A. I.* Pages 229–232, Vol.19, (2011).

ORIAKHI H
1. Determining the Deformation Values using Structural Data Error Analysis: *S. Vladimir, R. Ehigiator-Irughe, M. O. Ehigiator and H. Oriakhi.* Pages 389 – 394, Vol. 21, (2012).

ORIE O.U
1. Optimization of the compressive strength of five-component-concrete mix using Scheffe's theory –a case study of mound soil concrete: *O. U. Orie and N. N. Osadebe.* Pages 81–92, Vol.14, (2009).
2. The Determination of Some Mechanical Properties of Scheffe's Optimized Mound Soil Concrete: *O. U. Orie and N. N. Osadebe.* Pages 475–484, Vol.17, (2010).

ORUKARI M .A

1. Horizontal and vertical projectile motion in a resistant medium subject to varying path angles and speed: *Frimabo Life-George, Alalibo Ngiangia, Peter Eke and Mercy .O. Orukari.* Pages 257 – 260, Vol.14, (2009).
2. Influence of viscous dissipation and radiation on MHD Couette flow in a porous Medium: *Orukari M. A., Ngiangia A.T. and Frimabo L. J. G.* Pages 201–208, Vol.18, (2011).
3. The Effects of Viscosity and Radiation Absorption on Double-Diffusive Convection in a Porous Medium: *Orukari M. A.* Pages 219–224, Vol.18, (2011).

ORUKPE P.E

1. Investigation of Semidefinite Relaxation in Model Predictive Control Formulation: *P.E. Orukpe.* Pages 41 – 46, Vol. 21, (2012).
2. Optimal Design of Three Phase Induction Motor Using Geometric Programming Optimisation Approach: *Ubeku, E.U, Orukpe, P.E and Aigbodion D. O.* Pages 47 – 52, Vol. 21, (2012).

OSABUOHIEN-IRABOR OSARUMWENSE

1. Modelling and Forecasting Prevalence of Malaria Parasite Infection among Pregnant Women in Benin City, South-South Nigeria (The ARIMA Approach): *Osabuohien-Irabor Osarumwense and Edokpa Idemudia W.* Pages 355 – 362, Vol. 22, (2012).

OSAFILE O.E

1. Strongly Correlated Electron Systems in The Half Filled Band of The Hubbard Model: *Osafile O. E., Ehika, S., Idiodi J. O. A., Fiase J.O.* Pages 213–226, Vol.20, (2012).

OSAGHAE E.O

1. The turning points in the solution of n-queens problem using backtracking method: *S. C. Chiemeke and E. O. Osaghae.* Pages 107-114, Vol.10, (2006).

OSAGIE E.O

1. Deformation of an elastic crust: *Edward O. Osagie.* Pages 225-226, Vol.8, (2004).

OSAGIE S.A

1. Mathematical Modelling of the Gradual Aging of Systems using the weibull hazard function: *Osemwenkhae E. Joseph and Osagie S. Aigbe.* Pages 73-76, Vol.17, (2010).
2. Logistic Analysis Of Acute Toxicity Of Hunteria Umbellata Extract In Mice Through Intraperitoneal Route: *Osagie S. A. And Osemwenkhae J. E.* Pages 135–138, Vol.19, (2011).
3. Measuring Acute Toxicity of Indomethacin In Rats Using The Weibull Model: *Osagie S. A. and Osemwenkhae J. E.* Pages 207 – 210, Vol. 22, (2012).

OSAGIEDE F.E.U

1. Inventory Replenishment Policy when Demand is Quadratic: Direct and Inverse Methods: *F. E. U. Osagiede and S. E. Omosigho.* Pages 301-308, Vol.4, (2000).
2. A simple algoraithm for the inventory problem with a linear incasing demand: *F. E. U. Osagiede and S. E. Omosigho.* Pages 83-88, Vol.7, (2003).
3. An Order Level Inventory Replenishment Model with Time Dependent Demand, Finite Production Rate and Partially Backlogged Shortage: *Ibe C.B. and Osagiede F.E.U.* Pages 487 – 494, Vol. 21, (2012).
4. An Inventory Model for Deteriorating Items with Time Decreasing Demand and Partial Backlogging: *Ibe C.B. and Osagiede F.E.U.* Pages 495 – 500, Vol. 21, (2012).

OSAGIEDE A.A.O

1. On Estimation of Entropy Value for an Organization: *S. E. Omosigho and A. O. Osagiede.* Pages 36-42, Vol.3, (1999).
2. An Application of Homogeneous and Non-Homogeneous Markov Chains: *A. A. Osagiede and S. E. Omosigho.* Pages 323-332, Vol.6, (2002).
3. Work Force Stability and Suitability: *S. E. Omosigho and A. A. Osagiede.* Pages 333-340, Vol.6, (2002).
4. Manpower Planning Model for Less Developed Countries: *Augustine A. Osagiede and Virtue U. Ekhosuehi.* Pages 485-490, Vol.11, (2007)
5. General convergence analysis of a modified steepest descent method: *Dickson E. Ativie Omorogbe and A. A. Osagiede.* Pages 353-358, Vol.12, (2008)
6. Convergence analysis of a modified conjugate gradient method: *Dickson E. A. Omorogbe and A. A.Osagiede.* Pages 359-368, Vol.12, (2008).
7. A measure of confidence for examination process: *Virtue U. Ekhosuehi and Augustine A. Osagiede.* Pages 337-342, Vol.13, (2008).
8. Application of mathematical models to educational planning: A review: *Virtue U. Ekhosuehi and Augustine A. Osagiede.* Pages 343-350, Vol.13, (2008).
9. A panacea to the asymptotic effect of examination malpractice in a malpractice-stamp-out scenario: *Virtue U. Ekhosuehi and Augustine A. Osagiede.* Pages 193–198, Vol.20, (2012).
10. A note on Markovian manpower models: *Augustine A. Osagiede, Virtue U. Ekhosuehi, N. Ekhosuehi and Francis O. Oyegue.* Pages 369–378, Vol.20, (2012)

OSAHON O.D

1. Investigation of beta dielectric dispersion in Bovine yellow bone marrow tissue: *O. D. Osahon and E. E. Aigbekaen.* Pages 461-466, Vol.11, (2007).

2. Measurement of radio frequency radiation (RFR) power levels from some GSM base stations and phones: *O.D. Nworgu, C.A. Anyaeji, O.D. Osahon and E. Sekegor.* Pages 469–474, Vol.17, (2010).

OSARENREN U.O
1. Geoelectric estimation of aquifer parameters in the Southern part of Edo State, Nigeria: *Aigbogun C.O. and Osarenren U.O.* Pages 355 – 360, Vol. 21, (2012).
2. Spherically Bounded States of a Spherical Quantum Dot: *Ejere I. I. A., Osarenren U. O. and Okedayo T. G.* Pages 49 – 52, Vol. 22, (2012).

OSARENWINDA J.O
1. Reliability of low pressure Steam Turbine for Electricity Power Generation: *Osarenmwinda J.O. and Okorie .A.* Pages 479–482, Vol.18, (2011).
2. Potential Of Fired Clay Bricks Produced From Aponmu Clay Deposits: *J.O Osarenmwinda and T. Ali.* Pages 527-530, Vol.18, (2011).
3. Manufacture of Power Hacksaw Blades From Locally Available Medium Carbon Steel: *Osarenmwinda J. O. and Nwachukwu J. C.* Pages 443–446, Vol.20, (2012).

OSAYANDE F.
1. Poisson impedance as an enhanced litho-fluid discriminator using crossplot analysis: *O. Ujuanbi, S. I. Jegede, F. Osayande and C. O. Molua.* Pages 279–284, Vol.12, (2008).

OSAYANDE R.O
1. Automated street lighting control: *S. O. Igbinovia, R. O. Osayande, and S. Omodamwen.* Pages 467–478, Vol.12, (2008).

OSAZUWA I.B
1. Some Results of Geoelectrical Sounding for Aquifer Determination In Northern Parts of Delta State – Nigeria: *Okan E. O. and Osazuwa I. B.* Pages 315–320, Vol.19, (2011).

OSEGHALE A.O
1. An Engineering Foundation Investigation using the Geoelectric Method. A Case Study: Southwestern Nigeria: *Ozegin K.O., Oseghale A.O. and Adepeko A.A.* Pages 245–248, Vol.20, (2012).
2. Geomagnetic and Geoelectric determination of Topography and Depth of constituent Bedrock in a Complex Environment: *Ozegin K.O. and Oseghale A.O.* Pages 343–348, Vol.20, (2012).

OSEGHALE I.O
1. A Financial Option Model for Pricing Cloud Compute Resources: *D. Allenotor, I.O. Oseghale and R. K. Thulasiram.* Pages 237 – 252, Vol. 21, (2012).

OSEMEKE REUBEN F.
1. Assessing the Validity of Normality Assumption Using Probability Plots and Letter Value Diagnostics: *Osemeke Reuben F. and Ehiwario J. C.* Paes 241 – 248, Vol. 22, (2012).
2. Assessing the Detection and Correction of Model Violations Using Residuals in a Linear Regression Diagnostics: *Osemeke Reuben. F. and Ehiwario, J.C.* Pages 249 – 256, Vol. 22, (2012).

OSEMWENKHAE J.E
1. Higher Order Forms for Optimal Widow Width in Multivariate Kernel Density Estimation: *S. M. Ogbonmwan and E. J. Osemwenkhae.* Pages 327-334, Vol.4, (2000).
2. Higher Dimensional Kernel Methods: *E. J. Osemwenkhae, S. M. Ogbonmwan and J. I. Odiase.* Pages 351-356, Vol.9, (2005).
3. Three algorithms for Egyptian fractions: *Orobosa Izevbizua and Joseph Osemwenkhae.* Pages 121-126, Vol.10, (2006).
4. Mathematical models to simulate the East African trypanosomiasis population dynamics: *Daniel Okuonghae and Joseph Osemwenkhae.* Pages 481-488, Vol.10, (2006).
5. Constructing an automorphism with discrete spectrum: *A. O. Isere and 2J. E. Osemwenkhae.* Pages 491-496, Vol.11, (2007).
6. Generalized biases in nonsymmetric univariate kernels: *J. E. Osemwenkhae and A. O. Isere.* Pages 497-500, Vol.11, (2007).
7. Endemicity of cholera in Nigeria: A mathematical model to investigate its nature: *J. E Osemwenkhae, A. O. Isere and D. U. Okuonghae.* Pages 165-170, Vol.14, (2009).
8. Detection of cholera outbreaks: A statistical scheme for its detection: *A. O. Isere, J. E Osemwenkhae and I. W. Edokpa.* Pages 171–176, Vol.14, (2009).
9. Mathematical Modelling of the Gradual Aging of Systems using the weibull hazard function: *Osemwenkhae E. Joseph and Osagie S. Aigbe.* Pages 73-76, Vol.17, (2010).
10. Rates of Convergence of Higher order forms of Multivariate Kernel Density Estimation: *F. O. Oyegue And J. E. Osemwenkhae.* Pages 353–356, Vol.18, (2011).
11. Efficient Data-Driven Rule for Obtaining an Optimal Predictive Function of a Discriminant Analysis: *Osemwenkhae J. E. and Iduseri A.* Pages 373–380, Vol.18, (2011).
12. Logistic Analysis Of Acute Toxicity Of Hunteria Umbellata Extract In Mice Through Intraperitoneal Route: *Osagie S. A. And Osemwenkhae J. E.* Pages 135–138, Vol.19, (2011).
13. A Modified Kernel nearest Neighbour Estimate Bandwidth Approach to Density Estimation: *Ogbeide E. M. and Osemwenkhae J. E.* Pages 185 – 194, Vol. 22, (2012).
14. Measuring Acute Toxicity of Indomethacin In Rats Using The Weibull Model: *Osagie S. A. and Osemwenkhae J. E.* Pages 207 – 210, Vol. 22, (2012).

OSENI B.N

1. Effects of damping and exponentially decaying foundation on the motions of finite thin beam subjected to travelling loads : *B. Omolofe and B. M. Oseni.* Pages 119-126, Vol.13, (2008).
2. Ranking of Simultaneous Equation Estimators to Outliers From Heavy-Tailed Quasi-Uniform Distribution: *Oseni B.M., Adepoju A. A. and Olubusoye O. E.* Pages 265 – 272, Vol. 22, (2012).

OSHUNGADE I.O

1. On a New Method of Bias Reduction: Alternative to Approximately Unbiased Ratio Estimators: *F .B. Adebola and I.O. Oshungade.* Pages 189 – 198, Vol. 21, (2012).

OSIELE O.M

1. Work function of elemental metals and its face dependence: Stabilized Jellium approach: *O. M. Osiele and O. Olubosede.* Pages 445-454, Vol.11, (2007).
2. Variation of positron annihilation rates in metals: *O. M. Osiele.* Pages 41–48, Vol.12, (2008).
3. Bulk modulus of metals according to structureless pseudopotential model: *O. M. Osiele and O. G. Edema.* Pages 197–204, Vol.14, (2009).
4. Model for structural defect characterization of metals based on positron beam technique: *O. M. Osiele and E. E. Akpomedaye.* Pages 217–222, Vol.14, (2009).
5. Study Of The Structural Properties Of Some Liquid Metals And Their Alloys: *O.M. Osiele and A. S. Olayinka,* Pages 81-88, Vol.17, (2010).
6. Effects of Screening on the Thermal Resistivity And Compressibility Ratio of Metals: *Osiele O. M. and Adesakin G. E. and Otobo S. I.* Pages 519–526, Vol. 19, (2011).
7. Computation of the Structure Factor of Some Transition Liquid Metals: *Osiele O. M. and Adesakin G. E.* Pages 527–532, Vol.19, (2011).
8. Surface Energy and Surface Stress of Deformed Metals: *Adeshakin G. E. and Osiele O. M.* Pages 421 – 428, Vol. 21, (2012).

OSIFODUNRIN ADEGOKE S

1. Class of intersection numbers of a homomorphic image in the study of difference sets with order 49: *Adegoke S. Osifodunrin.* Pages 13-26, Vol.12, (2008).

OSINUGA I.A

1. Further results on the classes of convex functions: *I. A. Osinuga.* Pages 515-518, Vol.11, (2007).
2. On the existence of global optimization solution on abstract spaces: *I. A. Osinuga.* Pages 17–22, Vol.11, (2007).

OSONWA B.N

1. Determination of the Spatial Variation of the Hole Current Injected into N-Type Material, in ID: *D.U. Onah, B.N. Osonwa and J.E Ekpe.* Pages 399-402, Vol.17, (2010).

OSU B.O

1. A stochastic iteration method for the solution of finite dimensional variational inequalities: *A. C. Okoroafor and B. O. Osu.* Pages 301-304, Vol.8, (2004).

OSUALA S.C

1. Properties of steady solutions of a reacting non-Newtonian viscous MHD poiseuille flow: *R. O Ayeni, S. O. Adesanya and S. C Osuala.* Pages 533-536, Vol.15, (2009).

OSUENI L.

1. Petroleum Potentials and Well Log Evaluation from Niger Delta Basin: *Eshimokhai S., Osueni L. and Akhirevbulu O.E.* Pages 157–164, Vol.18, (2011).

OSUJI S.O

1. Predictions of Total Deformations in Jebba Main Dam by Finite Element Analysis Technique: *B. U. Anyata and. S. O. Osuji.* Pages 479-492, Vol.9, (2005).
2. Modelling of California Bearing Ratio with Unconfined Compressive Strength for Cement Stabilized Laterite Soil: *Iyeke S.D And Osuji S.O.* Pages 605–610, Vol.18, (2011).

OSUJI W.I

1. Effects of static pre-loading on the dynamic stability of a column on nonlinear foundations stressed by a step load: *A. M. Ette and W. I. Osuji.* Pages 37-46, Vol.15, (2009).

OSUOJI O.U

1. On the kinetics of martensite formation in a duplex stainless steel: *O. U. Osuoji.* Pages 323–326, Vol.8, (2004).
2. The effect of deformation on the sigma phase occurrence in some stainless steels: *O. U. Osuoji.* Pages 327–330, Vol.8, (2004).

OTASOWIE P.O

1. Sensitivity Analysis of a Horizontal Earth Electrode under Impulse Current Using a 2nd Order FDTD approach: *Ubeku E. U & Otasowie P.O.* Pages 569–574, Vol.18, (2011).
2. Design and Development of a PC- Based temperature monitoring system: *Otasowie P.O.* Pages 465–470, Vol.19, (2011).
3. Determination of Transmission Line Impedance Matching Parameters: *Otasowie P.O.* Pages 471–474, Vol.19, (2011).

OTOLORIN O.O

1. Existence of a secondary flow for a temperature dependent viscous couette flow: *S. O. Adesanya, O.J Fenuga and O. O. Otolorin.* Pages 257-260, Vol.10, (2006).

2. Free Convective Flow between Vertical Porous Plates with Variable Suction and Periodic Heating Input: *Asibor R. E., Otolorin O., Adesanya S. O. and Hassan A. R.* Pages 259–272, Vol.19, (2011).

OTUNTA F. O
1. A Switching From Hansen's Method to Schultz-Herzberger's Method for the Guaranteed Inclusion of Matrix Inversion: *S. E. Uwamusi and F.O. Otunta.* Pages 36 - 47, Vol. 2, (1998).
2. A Control Operation for a Class of Regulator Problems: *Francis O.Otunta.* Pages 70 - 88, Vol. 2, (1998).
3. An Extended Conjugate Gradient Algorithm For Discrete Optimal Control Problems: *Francis O. Otunta.* Pages 75-88, Vol.3, (1999).
4. Interval Methods for Simultaneous Inclusion of all Zeros of a Polynomial: *M. N. O. Ikhile and F. O. Otunta.* Pages 293-302, Vol.6, (2002).
5. A Fourth Order Exponentially-Fitted Multiderivative Method for Stiff Initial Value Problems: *F. O. Otunta and C. E. Abhulimen.* Pages 295-306, Vol.9, (2005).
6. On the Convergence of the Extended Conjugate Gradient Method for Discrete Optimal Control Problems (DOCP): *J. S. Apanapudor and F. O. Otunta.* Pages 493-500, Vol.9, (2005).
7. Variable order one-step methods for initial value problems I: *G. C. Nwachukwu and F. O. Otunta.* Pages 91-96, Vol.10, (2006).
8. Second derivative continuous linear multistep methods for the numerical integration of Stiff system of ordinary differential equations: *F. O. Otunta, M. N. O. Ikhile and R. I. Okuonghae.* Pages 159-174, Vol.11, (2007).

OVIAWE C.I
1. Analysis of Direct Extrusion Operation Using The Bubnov-Galerkin Finite Element Model: *Oviawe C. I, Osifo G. E. and Omorodion I. I.* Pages 435–442, Vol20, (2012).
2. The Determination of Stresses in Wire-Drawing Operation Using the Finite Element Model: *Oviawe C.I. and Asikhia O.K.* Pages 589–596, Vol.18, (2011).
3. Analysis of Axisymmetric Forging Operation Using the Bubnov-Galerkin Weighted Residual Finite Element Method: *Oviawe, C.I. and Oviawe O.* Pages 597–604, Vol.18, (2011).

OVIAWE O.
1. Analysis of Axisymmetric Forging Operation Using the Bubnov-Galerkin Weighted Residual Finite Element Method: *Oviawe, C.I. and Oviawe O.* Pages 597–604, Vol.18, (2011).

OVUWORIE G.C
1. A Factorial Study of Electricity Supply in Nigeria: *Igboanugo A.C., Popoola E.O. and Ovuworie G.C.* Pages 413–422, Vol.20, (2012).
2. Parameter Estimation and Hypothesis Testing In a Two Epoch Dam Deformation Measurement: *J. O. Ehiorobo And G. C. Ovuworie.* Pages 273-284, Vol.17, (2010).
3. Fuzzy Failure Probability of Transmission Pipelines in the Niger Delta Region of Nigeria: The case of Third Party Activities: *Ariavie G.O, Ovuworie G.C and Ariavie S.S.* Pages 445–450, Vol.18, (2011).
4. Clark and Reza-Latif-Shabgahi Algorithm for the Determination of the Minimal Cut-Sets of the Fault Tree of Pipeline Failure in the Niger Delta Region of Nigeria ; *Ariavie G.O, Ovuworie G.C and Ariavie S.S.* Pages 451–458, Vol.18, (2011).

OWABOR C.N
1. Estimation of transport and degradation parameters for naphthalene and anthracene: Influence of mass transfer on kinetics: *C. N. Owabor, S. E. Ogbeide and A. A. Susu.* Pages 223-236, Vol.15, (2009).
2. Development of a transport model for the microbial degradation of polycyclic aromatic hydrocarbons in a saturated porous medium: *Owabor C.N., Agarry S.E and Azeez T.O.* Pages 317-324, Vol.16, (2010).
3. Predicting the Biodegradation of Polycyclic Aromatic Hydrocarbons (PAHs) in Continuous Stirred Tank Reactor by Artificial Neural Network: *Owabor, C.N.and Ayodele,B.V.* Pages 395–398, Vol.19, (2011).
4. Modeling the effect of operating variables on sorption of PAHs from aqueous streams onto orange peels using artificial neural network pattern recognition: *Owabor, C.N. and Issa A.A.* Pages 131–138, Vol.20, (2012).

OWOLABI K.M
1. A coupled mathematical model for a temperature dependant blood perfusion in a homogenous biological tissue during microwave heating: *E. A. Adebile, B. N. Akintewe and K. M. Owolabi.* Pages 183-188, Vol.13, (2008).
2. A three–step discretization scheme for direct numerical solution of second-order ordinary differential equations: *R. A Ademiluyi and K.M Owolabi.* Pages 265–276, Vol.16, (2010).

OWOLOKO E.A
1. A Note on Transient Convection With Chemical Reaction And Radiative Heat Transfer Past a Flat Porous Plate Moving Through a Binary Mixture: *P. O. Olanrewaju, O. S. Bolaji and E. A. Owoloko.* Pages 189–198, Vol.16, (2010).

OYANNA G.K
1. A Hamiltonian for Superconductors: *E.O. Aiyohuyin, A. Maduemezia, and G.K. Oyanna.* Pages 29-31, Vol. 1, (1992)

OYATOYE E.O
1. On the Existence of a Solution to the Optimal Economic Growth in an Aggregative Closed Economy: *E.O. Oyatoye and M.A. Ibiejugba.* Pages 313-318, Vol.18, (2011).

OYAWALE F.O
1. An approach for solving linear fractional programming problems: *A. O. Odior and F. A. Oyawale.* Pages 93–96, Vol.14, (2009).

2. Neuro - Fuzzy Analysis for Silicon Carbide Abrasive Grain Production: *A.O. Odior F. A. Oyawale J. A. Akpobi and E.S. Orsharh.* Pages 591-596, Vol.16, (2010).
3. An Assignment Problem for n Machines and m Operators: *A .O. Odior and F.A. Oyawale.* Pages 371-376, Vol. 17, (2010).
4. Design and Construction of Oil Fired Compact Crucible Furnace: *Oyawale F. A., Odior, A. O.2 and Aganwonyi, T. E.* Pages 537–548, Vol.18, (2011).
5. Development of a Livestock Feed Cubing Machine from Locally Sourced Materials : *Oyawale F. A., Odior A. O, Oyetunji O. R., and Saliu L.* Pages 555–562, Vol.18, (2011).

OYEGUE F.O
1. Higher Order Values of MISE in Kernel Density Estimation: *F. O. Oyegue and J. I. Odiase.* Pages 343-350, Vol.9, (2005).
2. Choice of smoothing parameters in boosting kernel density estimates: *C. C. Ishiekwene, S. M. Ogbonmwan and F.O. Oyegue.* Pages 443-454, Vol.12, (2008).
3. Rates of Convergence of Higher order forms of Multivariate Kernel Density Estimation: *F. O. Oyegue and J. E. Osemwenkhae.* Pages 353–356, Vol.18, (2011).
4. A note on Markovian manpower models: *Augustine A. Osagiede, Virtue U. Ekhosuehi, N. Ekhosuehi and Francis O. Oyegue.* Pages 369–378, Vol.20, (2012).
5. Estimation of P-Value: Bootstrap a Viable Alternative to Permutation Approach: *Ikpotokin O. and Oyegue F.O.* Pages 179 – 184, Vol. 22, (2012).
6. On the generalized optimal bandwidth for multivariate higher-order nonsymmetic kernels: *Afere B. A. and Oyegue F. O.* Pages 195 – 198, Vol. 22, (2012).

OYEKOLA S.O
1. Ionospheric Investigation using Analog Bottom Side Sounder Ionograms: *O. S. Oyekola and E. E. Iheonu.* Pages 223-232, Vol.6, (2002).
2. A Simple Correction to Absorption Theory in the Region of Quasi-Transverse Propagation of Radio Waves through the Ionosphere: *O. S. Oyekola, E. E. Iheonu, and J. Akinrimisi.* Pages 233-238, Vol.6, (2002).
3. Equatorial Ionospheric E-Region Critical Frequencies: *O.S. Oyekola.* Pages 245-250, Vol.7, (2003).
4. The F-Region Equatorial Ionospheric Electrodynamics Drifts: *Oyedemi S. Oyekola and Emeagi E. Iheonu.* Pages 27- 34, Vol.10, (2006).

OYENIYI EZEKIEL
1. Localization of Electrons in a One-Dimensional Disordered Crystal: *Oyeniyi Ezekiel and Popoola Oyebola.* Pages 273–284, Vol.20, (2012).

OYEOZILI A.I
1. On The Existence Of The Infinite Vol. Quantum Stochastic Dynamics: *Y. Ibrahim, A.A. Tijjani and A.I Onyeozili.* Pages 85-94, Vol.16, (2010).

OYERINDE A.S
1. Numerical Modeling of Dynamic Response of Water Absorption in Soaked Legume Grains: *A. S. Oyerinde, A. S. Adekola and O. V. Ayodele.* Pages 233-238, Vol.5, (2001).

OYESANYA M.O
1. Asymptotic Analysis of Imperfection Sensitivity of Toroidal shell Segment with Modal Imperfection: *M. O. Oyesanya.* Pages 197-206, Vol.6, (2002).
2. Asymptotic Analysis of imperfection sensitivity of the toroidal shell segment with random imperfection: *M. O. Oyesanya.* Pages 207-214, Vol.7, (2003).
3. Power series like relation of power law and coupled creep constrained grain boundary cavitation under strain gradient plasticity analysis: *M. O. Oyesanya.* Pages 25-34, Vol.8, (2004).
4. Duffing oscillator as model for predicting earthquake occurrence I: *M. O. Oyesanya.* Pages 133–142, Vol.12, (2008).
5. A mathematical model for predicting earthquake occurrence: *M. O Oyesanya and O. C Collins.* Pages 1-8, Vol.14, (2009).
6. Hopf bifurcations in a fractional reaction–diffusion model for the invasion and development of tumor: *T. A. Atabong and M. O. Oyesanya.* Pages 267–282, Vol.14, (2009).
7. A Generalised Mixed Boundary Value Problem For A Cylinder Under Anti- Plane Strain: *M.O. Oyesanya and J.E.Okeke.* Pages 153-162, Vol.16, (2010).
8. Energy Generation in the Human Body by the Human Cells: *Ejikeme C. L., Mbah G. C. E. and Oyesanya M. O.* Pages 99–106, Vol.19, (2011).

OYETUNDE B.S
1. Further on stokes expansions for the finite amplitude water waves: *B. S. Oyetunde.* Pages 227-236, Vol.8, (2004).
2. Analysis of Stokes waves theory as a diffusion problem: *E. O. Okeke and B. S. Oyetunde.* Pages 59-68, Vol.10, (2006).
3. On the impact of wave-current on Stokes waves: *B.S. Oyetunde1 and E.O. Okeke.* Pages 363-368, Vol.11, (2007).
4. On the effects of wave steepness on higher order Stokes waves: *B. S. Oyetunde.* Pages 369-374, Vol.11, (2007).
5. Analytic derivation of the wave profile and phase speed of sixth order Stokes waves in deep water: *Oyetunde Bamidele Sunday.* Pages 21–34, Vol.17, (2010).

OYETUNJI O.R

1. Development of a Livestock Feed Cubing Machine from Locally Sourced Materials: *Oyawale F. A., Odior A. O, Oyetunji O. R., and Saliu L.* Pages 555–562, Vol.18, (2011).

OYEWUMI K.J

1. Discrete Eigenvalues of a Modified Pöschl-Teller Potential Hole using Semi-Classical Approximation: *K. J. Oyewumi and E. A. Bangudu.* Pages 179-192, Vol.3, (1999).
2. WKBJ Approach to Quantum- Mechanical Tunneling Through a non-Rectangular Potential Barrier: *Kayode J. Oyewumi and Ezekiel A. Bangudu.* Pages 41-52, Vol.4, (2000).
3. Determination of the Phase Shifts for the Scattering Potential Ar-2 using the WKBJ Approximation: *K. J. Oyewumi, and E. A. Bangudu.* Pages 285-294, Vol.5, (2001).

OYIDI EMMANUEL F.

1. Evaluation of n + 16Fe reaction cross section at 14MeV incident energy: *Emmanuel F. Oyidi, Nasir F. Isa and Salihu S. Duwa.* 171-178, Vol.15, (2009).

OZEBO V.C

1. Electromagnetic fields and biotissue interactions: *O. O. Odusote and V.C. Ozebo.* Pages 161-164, Vol.12, (2008).
2. A geophysical study of structural foundations in Omolayo area, Ibadan, Nigeria: *V. C. Ozebo, O. O. Odusote, G. Omisore and A. I. Ibiyemi.* Pages 267–278, Vol.12, (2008).
3. The Radio And Very Low Frequency (VLF) Electromagnetic Response Of A Layered Earth Media With Variable Dielectric Permittivity: *V. C. Ozebo and J. A. Olowofela.* Pages 375-390, Vol.16, (2010).
4. Effect of Heat From Buried Metallic Object On Different Soil Textures: *V.C. Ozebo, J.A. Olowofela, R. Bello and A.O. Amure.* Pages 321–328, Vol.19, (2011).
5. Depth Estimation of Aeromagnetic Data of Gombe, North Eastern Nigeria, using the Method of Analytic Signal: *V.C. Ozebo, J.A. Olowofela and B.A Agboluaje.* Pages 373 – 380, Vol. 21 (2012).

OZEGIN K.O

1. Groundwater potential investigation using combined VLF and VES: *K.O. Ozegin, D.O. Isiwele and S.O. Azi.* Pages 403-410, Vol.11, (2007).
2. Geophysical investigation of Oke-Agbe-Oyin Road failure using VLF and double dipole: *K. O. Ozegin, S. O. Azi and D. O. Isiwele.* Pages 411-414, Vol.11, (2007).
3. An Engineering Foundation Investigation using the Geoelectric Method. A Case Study: Southwestern Nigeria: *Ozegin K.O., Oseghale A.O. and Adepeko A.A.* Pages 245–248, Vol.20, (2012).
4. Geomagnetic and Geoelectric determination of Topography and Depth of constituent Bedrock in a Complex Environment: *Ozegin K.O. and Oseghale A.O.* Pages 343–348, Vol.20, (2012).

PETER B.A

1. A Note on Unsteady Temperature Equation For Gravity Flow of A Power-Law Fluid Through A Porous Medium: *B. A. Peter and R. O. Ayeni.* Pages 181–186, Vol.18, (2011).
2. Analytical Solution of Unsteady Gravity Flows of A Power-Law Fluid through A Porous Medium: *Peter B. A. and Ayeni R. O.* Pages 223–228, Vol.19, (2011).
3. Asymptotic expansion of unsteady gravity flow of a power-law fluid through a porous medium: *B. A. Peter and R. O. Ayeni.* Pages 105–110, Vol.20, (2012).

POPOOLA A.O

1. Effect of Radiation on the Critical Frank – Kamenetskii Parameter of Thermal Ignition in a Combustible Gas Containing Fuel Droplets: *R.O. Ayeni, A.M. Okedoye, A.O. Popoola and T.O. Ayodele.* Pages 217-220, Vol.9, (2005).
2. Remarks on thermal explosions in the early evolution of the earth. : *R. O. Ayeni, A. O. Popoola and O. J. Fenuga.* Pages 69-70, Vol.10, (2006)
3. Biomechanics of the brain; some remarks on Biot's equations of consolidation theory with deformation-dependent permeability: *R. O. Ayeni, A. W. Ogunsola and A. O. Popoola.* Pages 511-516, Vol.10, (2006).
4. A free-boundary value problem related to auto ignition of combustible fluid in insulation materials: *a. O. Popoola and r. O. Ayeni.* Pages 95-102, Vol.11, (2007).
5. MHD flow and heat transfer of a viscous reacting fluid over a stretching sheet: *R. O Ayeni, A. O. Popoola, A. J. Omowaye and O. B. Ayeni.* Pages 485-490, Vol.15, (2009).
6. Effect of transmission rate in an SIR epidemic model: *R.O. Ayeni, O. Adebimpe, T.O. Oluyo, S.O. Adewale, A.O. Popoola and A.W. Ogunsola.* Pages 157-164, Vol.17, (2010).
7. Free Convective Flow of a Reacting Fluid between Vertical Porous Plates: *R.O. Ayeni, A.O. Popoola and O.T. Lamidi.* Pages 191–200, Vol.18, (2011).

POPOOLA O.I

1. Geophysical Investigation of Effect of Aba-Eku Public Refuse Dump Site in Ibadan (South-West Nigeria) on Groundwater Quality: *O.I Popoola, J.A Adegoke and M.A Fakunle.* Pages 111-118, Vol.18, (2011).
2. Modelling the Flow of Water in Stratified Layers of Sand: *O.I. Popoola, J.A. Adegoke and Alabi, O.O.* Pages 119-130, Vol.18, (2011).

POPOOLA O.O

1. Localization of Electrons in a One-Dimensional Disordered Crystal: *Oyeniyi Ezekiel and Popoola Oyebola.* Pages 273–284, Vol.20, (2012).

2. Modelling chaotic Hamiltonian systems as a Markov Chain: *Oyebola Olubusoye Popoola and R. Akin-Ojo.* Pages 199-202, Vol.8, (2004).

POPOOLA E.O
1. A Factorial Study of Electricity Supply in Nigeria: *Igboanugo, A.C., Popoola, E.O. and Ovuworie, G.C.* Pages 413–422, Vol.20, (2012).

RABIA SALIHU SAID
1. Application of the Radiative Transfer Equation (RTE) to Scattering by a Dust Aerosol Layer: *Rabia Salihu Sa'id.* Pages 363-370, Vol.16, (2010).

RABIU A.B
1. Simulation of the performance of photovoltaic system using heliophysical variables: *O. S. Bolaji and A. B. Rabiu.* Pages 297-304, Vol.13, (2008).
2. Simulation of the optimal size of photovoltaic system using heliophysical variables: *O. S. Bolaji and A. B. Rabiu.* Pages 223–234, Vol.14, (2009).

RAI B.M
1. The use of the Gauss- Legendre Quadrature in Solving Flow Problems in Reservoirs Containing Horizontal Wells: *E. S. Adewole, B. M. Rai and T. O. K. Audu.* Pages 89-100, Vol.5, (2001).
2. Pressure Drop Profile of an inverted Five-Spot Oil Production Pattern with a Horizontal Well Water Injector: *E. S. Adewole and B. M. Rai.* Pages 127-134, Vol.7, (2003).

RAUF K.
1. Jacobian approach to optimal determination of perturbation parameter for gradient method; *J. O. Omolehin, K. Rauf, B. Opawoye, and W. B. Yahya.* Pages 363-370, Vol.10, (2006).
2. Effect of matrix transformation on minimization of quadratic functional: *J. O. Omolehin, M. K. A. Abdulrahman, K. Rauf and A. O. Ameen.* Pages 417-422, Vol.13, (2008).
3. Embedded confusion matrix in Fuzzy logic for system appraisal: *J.O. Omolehin, L. B. Asaju, M. Olagunju, A. O. Ameen and K. Rauf.* Pages 355-362, Vol.15, (2009).
4. Control derivative to optimal control analysis: *J. O. Omolehin, K. Rauf, M. O. Ajisope, M. A. Mabayoje and L. B. Asaju.* Pages 399-404, Vol.15, (2009)
5. The Concept of Convexity in Fuzzy Set Theory: *Rauf K., Omolehin J. O. , Ma'ali A. I., Badeggi A. Y. and Lukuman A.* Pages 13–16, Vol.20, (2012).
6. Convergence Estimate of ECGM Algorithm for Reaction Diffusion Control Problem : *Omolehin J. O., Rauf K. , Badeggi A. Y. and Aliyu A.I. Ma'ali,* Pages 49–54, Vol.20, (2012).
7. A Control Approach to the Existence and Uniqueness of Solution of Nuclear Reactor Safety Characterization: *Aminu L., Omolehin J. O. and Rauf K.* Pages 407 – 410, Vol. 22, (2012).

REITER E
1. Evaluation of Data Mining Algorithms for Predicting Behaviour and Visualizing Daily Activities of the Elderly People living in Smart Homes : *Igene O. O. and Reiter E.* Pages 225 – 236, Vol. 21, (2012).

REJU S.A
1. Constructing the operator matrix for the optimal control of linear lower order non-dispersive waves: *Ifeanyi S. Ukwosa1 and Sunday A. Reju.* Pages 191-198, Vol.11, (2007).
2. The control operator for the optimal control model of higher order non-dispersive waves: *Ifeanyi S. Ukwosa and Sunday A. Reju.* Pages 199-212, Vol11, (2007).
3. A new analytical solution to the optimal control problem for the control of higher-order non-dispersive wave: *Ifeanyi S. Ukwosa and Sunday A. Reju.* Pages 253-260, Vol.13, (2008).
4. Numerical computation of the optimal control model of higher-order nondispersive wave with the extended conjugate gradient algorithm: *Ifeanyi S. Ukwosa, Sunday A. Reju and Victor O. Waziri.* Pages 79-84, Vol.15, (2009).
5. Computational procedures for implementing the optimal control problem of higher-order nondispersive wave using the extended conjugate gradient algorithm: *Ifeanyi S. Ukwosa, Sunday A. Reju and C. Isreal-Cookey.* Pages 85-90, Vol.15, (2009).

SADIKU S.
1. Torsional vibration of thin-walled elastic beams with doubly-symmetric cross-sections traversed by concentrated masses: *S. Sadiku.* Pages 55-70, Vol.15, (2009).

SADJERE E.G.
1. Economic Analysis, Design and fabrication of a Solar Powered Barbing Salon: *Ebunilo P.O.B, Kwasi-Effah C.C. and Sadjere E.G.* Pages 553 – 560, Vol. 22, (2012).
2. A Solar Power Design for Primary and Secondary Schools in Nigeria: *Ebunilo P.O.B., Izah L. A. and Sadjere E.G.* Pages 561 – 570, Vol. 22, (2012).

SA'ID M.
1. Simulation of the diffraction pattern of one dimensional quasicrystal: *Sa'id M. and Babaji G* Pages 285–292, Vol.20, (2012).

SA'ID R.S
1. Scattering Phase Functions of Constituents of Mineral Dust Aerosols: *Sa'id R. S. and Kashimbila M. M.* Pages 331–342, Vol.20, (2012).

2. Radiative Forcing of Saharan Aerosols in the Visible Region: *B. I. Tijjani and R. S. Sa'id.* Pages 163 – 172, Vol. 21, (2012).

SALEH M
1. Evaluation of Fractured Basement Complex Rock Porosity by Azimuthal Cross-Square Vertical Electrical Soundings : *Saleh M., Likkason O. K. & Mohammed Hassan.* Pages 315–320, Vol.20, (2012).

SALEH SANI
1. Theoretical estimation of global solar radiation and its derivatives in Katsina – Nigeria using temperature and relative humidity: *Taura L. S., Darma T.H. and Sani Saleh.* Pages 135 – 142, Vol. 21, (2012).

SALIHU S.D
1. A Basic Code For Plotting Dispersion Curves In A Cold Plasma: *S.D. Salihu, B. Chike-Obi.* Pages 71 - 75, Vol. 1, (1992).
2. The saturation of beam-excited ionospheric lower hybrid resonance through ion acceleration: *Salihu S. Duwa and B. Chike-Obi.* Pages 323-329, Vol.3, (1999).
3. Calculation of Phonon Dispersion curves and Density of States: Use of Simple Program with Personal Computers: *Salihu S. Duwa, & Lawan S. Taura and N. Harhiaran.* Pages 53-66, Vol.4, (2000).
4. Lifetimes of Precipitating Ionospheric Electron Beams: *B. Chike-Obi, S. Salihu Duwa and L. E. Akpabio.* Pages 67-72, Vol.4, (2000).
5. One- Dimendional Electrostatic (esi) Simulation of the Ionospheric Electron Beam- Plasma Interaction: *Salihu S. Duwa.* Pages 105-110, Vol.6, (2002).
6. Lower hybrid waves instability in a velocity–sheared inhomogenous charged dust beam: *Salihu S. Duwa.* Pages 211–214, Vol.8, (2004).
7. Excitation of Lower Hybrid Waves by Electron Beams In a Generalized Lorentzian Distribution: *Salihu S. Duwa.* Pages 111-115, Vol.6, (2002).
8. Streaming instability in a velocity–sheared dusty plasma: *Salihu S. Duwa.* Pages 601-606, Vol.10, (2006).
9. Computation of the Skyrme–Hartree–Fock equations in the Cartesian deformed harmonic-oscillator basis: *Fatima S. Koki and Salihu S. Duwa.* Pages 163-170, Vol.15, (2009).
10. Evaluation of n + 16Fe reaction cross section at 14MeV incident energy: *Emmanuel F. Oyidi, Nasir F. Isa and Salihu S. Duwa.* Pages 171-178, Vol.15, (2009).

SALISU ABDULLAHI
1. High Order Quasi - Runge - Kutta Methods By Refinement Process For The Solution Of Initial Value Problems: *Salisu Abdullahi and Adeboye K.R.* Pages 419 – 424, Vol. 22, (2012).

SALIU L.
1. Development of a Livestock Feed Cubing Machine from Locally Sourced Materials: *Oyawale, F. A1., Odior, A. O, Oyetunji O. R., and Saliu L.* Pages 555–562, Vol.18, (2011).

SANI BABANGIDA
1. Selecting The Best Initial Method For A Transportation Problem: *Madaki A.A. & Sani B.* Pages 333-344, Vol. 18, (2011).
2. An Economic Production Quantity (EPQ) Model for Delayed Deteriorating Items with Stock-Dependent Demand Rate and Linear Time Dependent Holding Cost: *Baraya, Y. M. and Sani B.* Pages 123–130, Vol.19, (2011).
3. Summary Of Branch And Bound Algorithm For BIP (0,1) Using LP Relaxation : *Abdullahi, N and Sani, B.* Pages 475–482 Vol.19, (2011)
4. An EOQ Model for Delayed Deteriorating Items with Linear Time Dependent Holding Cost : *Abubakar Musa and Babangida Sani.* Pages 393–398 Vol.20, (2012)
5. Estimating Time Series Trend Using Linear Programming Techniques On The Sales Data Of Kaduna Coca-Cola Bottling Company : *Aliyu, I. and Sani, B.* Pages 467–476 Vol.20, (2012)
6. LP-Relaxation of a Single Stage Capacitated Warehouse Location Problem (CWLP): A Study In Formulation Efficiency II: *Abdullahi N. and Sani B.* Pages 273 – 280, Vol. 22, (2012).
7. An Economic Production Quantity (EPQ) Model for Delayed Deteriorating Items with Stock-Dependent Demand Rate and Time Dependent Deterioration Rate: *Baraya Y. M. and Sani B.* Pages 345 – 354, Vol. 22, (2012).
8. An EOQ Model for Items That Exhibit Delay in Deterioration With Weibull Distribution Deterioration: *Yusuf A and Sani B.* Pages 307 – 318, Vol. 22, (2012).

SEKEGOR E
1. Measurement of radio frequency radiation (RFR) power levels from some GSM base stations and phones: *O.D. Nworgu, C.A. Anyaeji, O.D. Osahon and E. Sekegor.* Pages 469–474, Vol.17, (2010).

SEYDOU H.
1. Epiboron Neutron Activation Analysis with Nigeria Research Reactor -1: *Hankouraou Seydou, Osita Meludu and Adam Usman.* Pages 463-472, Vol.16, (2010).
2. Soil Contamination in Fadama Area in Zaria, Nigeria, Using X-ray Fluorescence Technique: *Hankouraou Seydou.* Pages 559–564, Vol.19, (2011).

SHABA M.M
1. A New Formulation for Symmetric Implicit Runge-Kutta-Nystrom Method for the Integration of General Second Order ODEs: *Z A. Adegboye and M.M Shaba.* Pages 575–582, Vol.19, (2011).

SHARMA L.K

1. A Least Squares Fit of Meson Spectra in the Dirac Equation with a Power–Law Potential Model: *J. O. Fiase and L. K. Sharma.* Pages 81-92. Vol.6, (2002)
2. Missing ideas: Self-Consistency Problem in the Derivation of the One-and Two-Body Effective Interactions for SD Shell-Model Calculations : *J. O. Fiase and L. K. Sharma.* Pages 93-104, Vol.6, (2002).
3. Binding Energy and Single–Particle Energies in the 160 region: *J.O. Fiase, and F. Gbaorun and L.K. Sharma.* Pages 65-68, Vol.9, (2005).
4. New One-Boson-Exchange Potential functions: *J. O. Fiase and F. Gbaorun and L. K. Sharma.* Pages 5-10, Vol.10, (2006).

SHITTA M.B.O
1. Pack nitriding of aluminium using cassava waste: *M. B. O. Shitta, A. K. Aladenika, K. A Aduloju.* Pages 277-280, Vol.15, (2009).

SHOLA P.B
1. A steady flow of fluid in an open rectangular container: *P. B. Shola.* Pages 275-285, Vol.3, (1999).
2. Propagation of Error in Polynomial Evaluation: *P. B. Shola.* Pages 113-122, Vol.4, (2000).
3. A liquid flow in an open container: *P.B. Shola.* Pages 181-190, Vol.7, (2003).
4. A flow in a trough: An integral equations formulation: *P. B. Shola.* Pages 137-146, Vol.15, (2009).

SHUAIBU A.
1. Comparative Study of Uranium and Thorium Content of Some Selected Nigerian and Nigerien Cereals Using Neutron Activation Analysis: *A.R. Usman1, N.F. Isa, A.Shuaibu.* Pages 239–244, Vol.20, (2012).

SKWAME Y.
1. Simple Algorithm for the Generation of Adomian Polynomial: *Adeyeye F.J., Ibijola E. A. and Skwame Y.* Pages 393 – 398, Vol. 22, (2012).

SILAS AGAJA
1. Application of Multivariate Analysis in Geographic Information System (GIS) For Spatial Distribution of Primary Health Care Centers In Warri South Local Government Area, Delta State: *Agaja Silas and Unueroh Kingsley,* pp 483 – 486, Vol. 21, (2012)

SMITH M.J.A
1. $4f6 \rightarrow 4f5(6fH)$5d Optical Transitions Of Sm2+ Ions in Potassium and Rubidium Halides : *I. M Mejeha and and M. J. A Smith.* Pages 225-239, Vol.2, (1998)
2. $4f14 \rightarrow 4f13\ 5d$ Electronic Transitions Of Yb2+ ions in Rubidium Halide Crystals: *I. M .Mejeha and and M. J. A. Smith.* Pages 240-266 Vol.2, (1998)

SODIQUE F.R
1. Modelling atmospheric temperature rise due to pollutants and its implications on agriculture: *R. O. Ayeni and F. R. Sodique.* Pages 431-436 Vol.15, (2009)

SOFOLUWE A.B
1. Treatment of Stiff Initial Value Problems using Block Backward Differentiation formula: *A. B. Sofoluwe, S. A. Okunuga, and J. O. Ehigie.* Pages 75–82 Vol.20, (2012).

SOKOTO A.M
1. A Four-Step Block Hybrid Adams-Moulton Methods For The Solution of First Order Initial Value Problems In ODEs : *Yahaya, Y.A and Sokoto A.M.* Pages 277–282, Vol.16, (2010).

SOLARIN A.R.T
1. On Some Algebraic Properties of Generalized Groups: *J.O. Adeniran; J.T. Akinmoyewa, A.R.T. Solarin and T.G. Jaiyeola.* Pages 401-406 Vol.16, (2010)
2. Hierarchical Structured Model for Nonlinear Dynamical Processes : *Agwuegbo S.O.N, Solarin, A.R.T, Asiribo, O.E.* Pages 15–20 Vol.19, (2011)

SOWOLE O
1. Recursive backstepping design for controlling chaos of three nonlinear Bloch equations: *F. Ayedun and 2O. Sowole.* Pages 49-54 Vol.13, (2008)
2. uv – Radiation Absorption By Ozone In A Model Atmosphere Using Data Of Ibadano: *O. Sowole and F. Ayedun.* Pages 371-37, Vol.16, (2010).

SULEIMAN A.B
1. Numerical calculations of ground state energy of H2 molecule using quantum Monte Carlo methods: *A . B. Suleiman and I. O. B. Ewa.* Pages 39-50, Vol.16, (2010).

SUSU A.A
1. Estimation of transport and degradation parameters for naphthalene and anthracene: Influence of mass transfer on kinetics: *C. N. Owabor, S. E. Ogbeide and A. A. Susu.* Pages 223-236, Vol.15, (2009).

SYLVESTER BAKUT
1. Effects of Perturbation on The Stability of The Autonomized Triangular Points in The Restricted Three- Body Problem With Variable Masses Under a Luminous Primary: *Oni Leke and Bakut Sylvester.* Pages 427-434, Vol.16, (2010).

TIMTERE PASCAL
1. Evaluation of Some Nonlinear Optical Parameters for Terahertz (THz) Radiating Uniaxial Crystals: *Timtere Pascal, Usman Adam and Ododo J. C.* Pages 129 – 142, Vol. 22, (2012).

TANIMU A
1. Dynamics of a Perturbed Linear Chain of Atoms: *Tanimu A. and Babaji G.* Pages 267–272, Vol.20, (2012.)

TAURA L.S
1. Calculation of Phonon Dispersion curves and Density of States: Use of Simple Program with Personal Computers: *Salihu S. Duwa, & Lawan S. Taura and N. Harhiaran.* Pages 53-66, Vol.4, (2000).
2. Collisional effect on lower hybrid waves instability in a dusty plasma: *Lawan S. Taura.* Pages 61-62, Vol.8, (2004).
3. Calculations of total energy in the density functional theory using FHI98MD code: *L. S. Taura and Babaji Garba.* Pages 357-362, Vol.13, (2008).
4. The effect of the parameter ecuti on the total energy convergence of bulk crystal using FHI98MD code: *L. S. Taura and Babaji Garba.* Pages 205–210, Vol.14, (2009).
5. Linearity and Non-linearity of Photorefractive effect in Materials using the Band transport Model: *Geh Wilson Ejuh and Lawan Sani Taura.* Pages 249–256, Vol.20, (2012).
6. Lattice dynamical calculations for bcc caesium chloride: *Taura L. S. and Abdulsalam M.* Pages 261–266, Vol.20, (2012).
7. Theoretical estimation of global solar radiation and its derivatives in Katsina – Nigeria using temperature and relative humidity: *Taura L. S., Darma T.H. and Sani Saleh.* Pages 135 – 142, Vol. 21, (2012).
8. The Effect of Electron Incident Energy on Total Cross Section Calculations for the Noble Gases: *Babaji, G., Abdu, S. G. and Taura, L.S.* Pages 143 – 150, Vol. 21, (2012).
9. Surface Characterisation of Copper Oxide Thin Films Prepared By RF Magnetron Sputtering: *Darma T.H. and Taura L.S.* Pages 111 – 118. Vol. 22, (2012).

TAIWO O.A
1. Perturbed segmented domain collocation Tau-method for the numerical solution of Second Order Boundary Value problems : *O. A. Taiwo and A. S. Olagunju.* Pages 293-298, Vol.10, (2006).
2. Viscous dissipation effects on the flow of a radiating gas between concentric elliptic cylinders: *R. O. Oladele, J. A. Gbadeyan and O. A.Taiwo.* Pages 299-304, Vol.10, (2006).
3. Numerical methods for solving non-linear integral equations: *O. A. Taiwo and O. S. Odetunde.* Pages 151–156, Vol.12, (2008).
4. Chebyshev definite analysis of velocity field computations for shape optimal design: *S. O. Abdul-Kareem, O. A. Taiwo.* Pages 307–312, Vol.12, (2008).
5. Asymptotic time complexity of an algorithm for generating the coefficients of the Chebyshev polynomials for the Tau numerical method: *Dele Oluwade and O.A. Taiwo.* Pages 409 – 412, Vol. 13, (2008).
6. Application of New Variational Homotopy Perturbation Method to Painlevé Equation I: *Taiwo O. A. and Abolarin O. E.* Pages 619–622, Vol.19, (2011).
7. Deflection range of water in heterogeneous permeable media: *Alabi O.O., Adelakun A. A. and Taiwo O. A.* Pages 349–352, Vol.20, (2012).
8. Application of New Variational Homotopy Perturbation Method For Solving Integro – Differential Equations: *Abolarin O. E. and Taiwo O. A.* Pages 497–504, Vol.20, (2012).

TAYO RAJI M
1. Functorial Localization Formula on Mirror Principles: *Raji M. Tayo And Ajibola S. A.* Pages 13-18, Vol.18, (2011).

TELE, FWANGSHAK M.
1. Kronecker Product of Non-Reduced Burau Representation of The Braid Group, B3 : *Fadipe-Joseph, Olubunmi A., Tele, Fwangshak M. and Makanjuola, Samuel O.* Pages 1 – 4 , Vol. 22, (2012).

TERHEMEN ABOIYAR
1. Solution of a Mathematical Model of Pollutant Concentration in a Channel Flow using Adomian Decomposition Method: *Ukoabasi Isip, Terhemen Aboiyar and Stephen E. Onah.* Pages 399 – 406, Vol. 22, (2012).

THULASIRAM R.K
1. A Financial Option Model for Pricing Cloud Compute Resources: *D. Allenotor, I.O.Oseghale and R. K. Thulasiram.* Pages 253 – 260, Vol. 21, (2012).

TIJJANI A.A
1. Conditional Expectations on Haagerup Lp -spaces: *A. A. Tijjani.* Pages 11-18, Vol.7, (2003).
2. Conditional Expectations on Crossed Product of Von Neunmann Algebras: *A.A Tijjani.* Pages 19-22, Vol.7, (2003).
3. A Stochastic Ergodic Theorem in Von-Neumann Algebras: *A. A. Tijjani.* Pages 37-42, Vol.9 (2005).
4. On non-commutative Lp spaces over a quasilocal Von Neumann algebra: *Y. Ibrahim and A.A. Tijjani.* Pages 1–6, Vol.12, (2008)
5. On The Existence Of The Infinite Vol. Quantum Stochastic Dynamics: *Y. Ibrahim, A.A. Tijjani and A.I Onyeozili.* Pages 85-94, Vol.16, (2010).

TIJJANI B.I
1. Radiative Forcing of Urban Aerosols in the Visible Region: *B. I. Tijjani.* Pages 151 – 162, Vol. 21, (2012).
2. Radiative Forcing of Saharan Aerosols in the Visible Region: *B. I. Tijjani and R. S. Sa'id.* Pages 163 – 172, Vol. 21, (2012).
3. Radiative Forcing of Urban Aerosols in the Visible Region: *B. I. Tijjani.* Pages 151 – 162, Vol. 21, (2012).
4. Radiative Forcing of Saharan Aerosols in the Near Infrared Regions: *B. I. Tijjani.* Pages 73 – 84, Vol. 22, (2012).
5. Radiative Forcing of Urban Aerosols in the Near Infrared Region: *B. I. Tijjani.* Pages 85 – 94, Vol. 22, (2012).

TITILOYE E.O

1. On the convergence of the dynamic series solution of a constrained elastic column subjected to wind gust: *J. A. Gbadeyan and E. O. Titiloye.* Pages 157-160, Vol.8, (2004).

TODO C.O

1. Investigating the Validity of the Estimate, of -Values for Supersaturated Design (SSD) Using Mean Square Error (MSE): *Mbegbu J. I. and Todo C. O.* Pages 115–118, Vol.19, (2011).
2. Alternative Approach for Estimating E(S2) Values For Supersaturated Designs: *Mbegbu J. I. and Todo C. O.* Pages 461 – 464, Vol. 21, (2012).

TOLORUNSAGBA J.M.

1. Rotatory Inertia Influence on the Highly Prestressed Orthotropic Rectangular Plates Under Travelling Loads: *S.T. Oni and J. M. Tolorunsagba.* Pages 103-126, Vol.9, (2005).

TOLULOPE OLAYEMI JAMES

1. On R^2 Contribution and Statistical Inference of the Change in the Hidden and Input Units Of The Statistical Neural Networks: *Christopher Godwin Udomboso, Tolulope Olayemi James and Mba Obasi Odim.* Pages 335 – 340, Vol. 22, (2012).

TUDUNKAYA S.M

1. Certain Quadratic Extensions: *S. M. Tudunkaya and S. O. Makanjuola.* Pages 271 – 280 Vol. 21, (2012)
2. Certain Construction of Finite Fields: *S. M. Tudunkaya and S. O. Makanjuola.* Pages 95 – 104, Vol. 21, (2012).

UBEKU E.U

1. Dynamic Performances of Asynchronous Machines: *Ubeku, E.U and Igbinovia, S.O.* Pages 347-352, Vol.17, (2010).
2. Optimal Safety Earthing – Earth Electrode Sizing Using A Deterministic Approach: *Ubeku E, U and Ogbeide, O.K.* Pages 439–444, Vol.18, (2011).
3. Sensitivity Analysis of a Horizontal Earth Electrode under Impulse Current Using a 2nd Order FDTD approach: *Ubeku E. U & Otasowie P.O.* Pages 569–574, Vol.18, (2011).
4. Optimal Design of Three Phase Induction Motor Using Geometric Programming Optimisation Approach: *Ubeku, E.U, Orukpe, P.E and Aigbodion, D. O.* Pages 47 – 52, Vol. 21, (2012)
5. Electrical Earthing Overcoming Grid Resistance in Restricted and Highly Resistive Soil Environments: *Attah J. E., Ojo K. O. And Ubeku E. U.* Pages 143 – 148, Vol. 22, (2012)
6. Multi-objective optimal design of a three phase induction motor using geometric programming: *Ubeku E. U., Ojo K. O., Attah J. E. and Atuba S. O.* Pages 149 – 154, Vol. 22, (2012).

UDEH S.N

1. On The Extensive Form Of N-Person Cooperative Games: *S. N. Udeh.* Pages 137-144, Vol.17, (2010).

UDOH M.O

1. Improved continuous method for direct solution of general second order ordinary differential equation: *A. O. Adesanya, T. A. Anake and M. O. Udoh.* Pages 59-62, Vol.13, (2008).

UDOH NSE S

1. Empirical Analysis of Priority on a FCFS Queue Discipline In Nigerian Banking System: *K.J. Bassey, N.S. Udoh and M. J. Iseh.* Pages 521-530, Vol.16, (2010).
2. Priority Queuing Models For Emergency Cases In Hospitals: *Nse S. Udoh.* Pages 191-196, Vol.17, (2010).

UDOH P.J

1. On Typical Elastic Problem of Green's Function For Rectangular Strip Using The Method of Separation Of Variables: *Udoh, P. J., Abasiekwere, U. A., Ekong, E. E.* Pages 163-168, Vol.16, (2010).
2. Rigid Body Motion Calculated From Spatial Co-ordinates of Markers: *P. J. Udoh.* Pages 435-440, Vol.16, (2010).

UDOMBOSO C.G.

1. On R2 contribution and statistical inference of the change in the hidden and input units of the statistical Neural Networks: *C.G. Udomboso, Tolupe O.J. and Mba Obasi Odim.* Pages 335 – 340, Vol. 22, (2012).

UDUH P.C

1. Einstein's Gravitational Field Equations Exterior and Interior to an Oblate Spheroidal Body: *S. X. K. Howusu and P.C. Uduh.* Pages 251-260, Vol.7, (2003).

UGBE F.C

1. Characterization of formations and groundwater potential of Amai and Obiaruku in Delta State using resistivity and seismic refraction measurements: *E. C Okolie and F. C Ugbe and J. E. A, Osemeikhian.* Pages 83-90, Vol.10, (2006).

UGBEBOR O.O

1. Optional Stopping Theorem as an Indispensable Tool in the Determination of Ruin Probability and Expected Duration of a Game : *Ugbebor, O.O.Ganiyu A.A., and Fakunle, I.* Pages 85 – 94, Vol. 21, (2012)

UGWOKE D.U

1. Some thermodynamic non-Fermi liquid properties of correlated electron systems: *G. C. Asomba and D. U. Ugwoke.* Pages 149-156, Vol.10, (2006)
2. Analytical determination of low velocity layer in 4-D hydrocarbon prospecting in parts of Imo State: *E. C. Okolie, 2F. C. Ugbe, 3B. O. Uyouyou.* Pages 393-402, Vol.11, (2007)

UGWU EMMANUEL I.

1. The effect of ZnS thin film's electrical conductivity on electromagnetic wave propagated through it : *Emmanuel I. Ugwu, Sunday Okorie, and Edmond A. Umahi.* Pages 337-344, Vol.15, (2009).

2. The study of the optical properties of copper based chalcopyrite semiconductors: *Emmanuel. I. Ugwu; Chinedu E. Ekuma and Hillary U. Igwe.* Pages 345-348, Vol.15, (2009).
3. Optical characteristics of crystalline antimony sulphide (Sb2S3) thin film: *D. U. Onah and E. I. Ugwu.* Pages 349-354, Vol.15, (2009).

UJUANBI O.
1. A Simplified Computer Iteration Technique for the Interpretation of Vertical Electrical Sounding: *M. B. Asokhia, S. O. Azi, and O. Ujuanbi.* Pages 269-280, Vol.4, (2000).
2. Interpretation of Vertical electric Soundings at Afuze and Eme-Ora using Resistivity Transform Functions: *O. Ujuanbi and M. B. Asokhia.* Pages 289-300, Vol.4, (2000).
3. The Vertical Electrical Sounding: A Viable tool for the investigation of Clay Deposits: *O.Ujuanbi and M. B. Asokhia.* Pages 79-88, Vol.5, (2001).
4. In Search of Clay Deposit in a Dual Geological Environment in the South-Southern Part of Nigeria. : *O. Ujuanbi.and M. B. Asokhia.* Pages 443-456, Vol.9, (2005).
5. Poisson impedance as an enhanced litho-fluid discriminator using crossplot analysis: *O. Ujuanbi, S. I. Jegede, F. Osayande and C. O. Molua.* Pages 279–284, Vol.12, (2008).
6. Enhancing refraction statics correction from first break interpretation - the Niger Delta example: *O. Ujuanbi, S. I. Jegede, E. C. Okolie and J. T. Erimafa.* Pages 391-396, Vol. 13, (2008).
7. Application of Dar Zarrouk parameters to evaluate aquifer transmissivity in Ekpoma, Edo State, Nigeria: *O. M. Alile and O. Ujuanbi.* Pages 239–248, Vol.14, (2009).

UKAOHA K.C
1. An application of the maximal independent set algorithm to course allocation: *V. V. N. Akwukwuma and K. C. Ukaoha.* Pages 97-106, Vol.10, (2006).

UKO L.U
1. An Error Estimate For Tremolieres' Method For The Discretization Of Parabolic Variational Inequalities: *L. U. Uko.* Page 2-6, Vol. 1, (1992).

UKOABASI ISIP
1. Solution of a Mathematical Model of Pollutant Concentration in a Channel Flow using Adomian Decomposition Method: *Ukoabasi Isip, Terhemen Aboiyar and Stephen E. Onah.* Pages 399 – 406, Vol. 22, (2012).

UKPEBOR L.A
1. Comparison of second and third orders Runge-Kutta methods for solving initial-value problems in ordinary differential equations: *L. A. Ukpebor, A. C. Esekhaigbe and E. Okodugha.* Pages 349–358, Vol.14, (2009).

UKWOSA I.S
1. Constructing the operator matrix for the optimal control of linear lower order non-dispersive waves: *Ifeanyi S. Ukwosa1 and Sunday A. Reju.* Pages 191-198, Vol.11, (2007).
2. The control operator for the optimal control model of higher order non-dispersive waves: *Ifeanyi S. Ukwosa and Sunday A. Reju.* Pages 199-212, Vol.11, (2007).
3. A new analytical solution to the optimal control problem for the control of higher-order non-dispersive wave: *Ifeanyi S. Ukwosa and Sunday A. Reju.* Pages 253-260, Vol.13, (2008).
4. Numerical computation of the optimal control model of higher-order nondispersive wave with the extended conjugate gradient algorithm: *Ifeanyi S. Ukwosa, Sunday A. Reju and Victor O. Waziri.* Pages 79-84, Vol.15, (2009).
5. Computational procedures for implementing the optimal control problem of higher-order nondispersive wave using the extended conjugate gradient algorithm: *Ifeanyi S. Ukwosa, Sunday A. Reju and C. Isreal-Cookey.* Pages 85-90, Vol.15, (2009).

UMAHI EDMOND A.
1. Periodic solutions of a certain nonlinear boundary value problem (BVP) of a fourth order differential equation: *H. M. Ogbu and A. E. Umahi.* Pages 479–484, Vol.14, (2009).
2. The effect of ZnS thin film's electrical conductivity on electromagnetic wave propagated through it: *Emmanuel I. Ugwu, Sunday Okorie, and Edmond A. Umahi.* Pages 337-344, Vol.15, (2009).

UMANA R.A
1. Relative null controllability of linear systems with multiple delays in state and control: *R. A. Umana.* Pages 517-522, Vol.10, (2006).
2. Relative controllability of nonlinear systems with multiple delays in state and control: *R. A. Umana.* Pages 523-528, Vol.10, (2006).
3. Necessity and sufficiency conditions for the absolute null controllability for Linear delay perturbations: *Celestin. A. Nse and R. A. Umana.* Pages 549-552, Vol.10, (2006).
4. Relative controllability of nonlinear neutral systems with multiple delays in state and control: *R. A. Umana.* Pages 559-564, Vol.10, (2006).
5. Relative controllability of nonlinear neutral systems with distributed and multiple lumped delays in control: *R. A. Umana.* Pages 565-570, Vol.10, (2006).
6. Relative controllability of nonlinear perturbed neutral systems with distributed and multiple delays in control: *R. A. Umana.* Pages 63–68, Vol.12, (2008).
7. Relative null controllability of nonlinear systems with multiple delays in state and control: *R. A. Umana.* Pages 69–78, Vol.12, (2008).

8. Relative controllability of neutral functional differential systems with nonlinear base: *R. A. Umana.* Pages 261-266, Vol.13, (2008).
9. Complete controllability of perturbed infinite delay systems: *Davies Iyai and Reuben A. Umana.* Pages 59–66, Vol.14, (2009).
10. Null controllability of nonlinear neutral volterra integrodifferential systems with infinite delay: *R. A. Umana.* Pages 95-100, Vol.15, (2009).

UMAR S.M

1. Multivariate semi-logistic distribution and processes: *S. M. Umar.* Pages 107-116, Vol.15, (2009).
2. Marshall-Olkin multivariate semi-logistic distribution and minification processes: *S. M. Umar.* Pages 405-414, Vol.15, (2009).
3. Multivariate Exponential Autoregressive and Autoregressive Moving Average Models: *S. M. Umar and Ibrahim Yusuf.* Pages 543-552, Vol.16, (2010).
4. Multivariate Pareto Minification Processes: *S. M. Umar.* Pages 553-562, Vol.16, (2010).
5. Methods of Parameter Addition to a Family of Multivariate Exponential and Weibull Distributions: *S.M.Umar.* Pages 325-332, Vol.18, (2011).
6. Multivariate Marshall and Olkin Exponential Minification Process : *Umar S.M.* Pages 385–392, Vol.20, (2012)
7. Characterization Properties of Multivariate Marshall-Olkin Gumbel Distribution: *S.M.Umar.* Pages 449 – 454, Vol. 21, (2012).

UMAR AISHETU

1. On The Stability Of Equilibrium Points In The Perturbed Restricted Three- Body Problem With Variable Masses: *Oni Leke, Umar Aishetu and Jagadish Singh.* Pages 413-426, Vol.16, (2010).
2. Stability of Triangular Equilibrium Points in the Photogravitational Elliptic RTBP with Oblateness: *Jagadish Singh and Aishetu Umar.* Pages 145-15,0 Vol.17, (2010).
3. Stability of Triangular Equilibrium Points in the Photogravitational Elliptic RTBP with Oblateness: *Jagadish Singh and Aishetu Umar.* Pages 145-15,0 Vol.17,(2010).
4. On The Stability of Collinear Points In The Photogravitational Elliptic Restricted Three-Body Problem: *Jagadish Singh and Aishetu Umar.* Pages 151-156, Vol.17, (2010).
5. On The Stability of Collinear Points In The Photogravitational Elliptic Restricted Three-Body Problem: *Jagadish Singh and Aishetu Umar.* Pages 151-156, Vol.17, (2010).

UNUIGBE A.I

1. A Numerical Simulation of Temperature Distribution and Power Loss of Slider Bearings Lubricated With Fluids Having Constant Viscosity : *Oladeinde, M. H, And Unuigbe, A. I.* Pages 531–536, Vol.18, (2011).

USAH EMMANUEL

1. Control of linear systems using pure time-delay: *Bede Asuquo and Emmanuel Usah.* Pages 55–62, Vol.12, (2008).

USAINI S.

1. Rhotrices and Elementary Row Operations: *S. Usaini.* Pages 37–42, Vol.20, (2012).

USIFO G.A

1. An investigation of groundwater by geoelectrical resistivity method: A case study in Ugbogui, Ovia South West Local Government Area, Edo State. : *A. G. Usifo, F. Esekhaigbe, C. V. O. Amadasun.* Pages 317–328, Vol.15, (2009).

USMAN A.R

1. Comparative Study of Uranium and Thorium Content of Some Selected Nigerian and Nigerien Cereals Using Neutron Activation Analysis: *A.R. Usman1, N.F. Isa, A.Shuaibu.* Pages 239–244, Vol.20, (2012).

USMAN ADAM

1. Gravitational time dilation and length contraction in fields exterior to static oblate spheroidal mass distributions: *Chifu Ebenezer Ndikilar, Adam Usman and Osita C. Meludu.* Pages 247-252, Vol.15, (2009).
2. Construction of A Trial Function In The Variational Procedure of Quantum Mechanics: *A. Usman and Ibrahim Y.Y.* Pages 77-84, Vol.16, (2010).
3. Epiboron Neutron Activation Analysis with Nigeria Research Reactor -1: *Hankouraou Seydou, Osita Meludu and Adam Usman.* Pages 463-472, Vol.16, (2010).
4. Fourth Order Nonlinear Intensity and the corresponding Refractive Index in Uniaxial Crystals: *Timtere Pascal, Adam Usman, and Ododo, J. C.* Pages 533–542, Vol.19, (2011)
5. Evaluation of Some Nonlinear Optical Parameters for Terahertz (THz) Radiating Uniaxial Crystals: *Timtere Pascal, Usman Adam and Ododo J. C.* Pages 129 – 142, Vol. 22, (2012).

USMAN GANA M.

1. Composite Targets and compositional inhomogeneities in sputter deposited thin films: *Usman M. Gana.* Pages 261-266, Vol.7, (2003).

UWAH EDET J.

1. Excitation of low-frequency electrostatic instability on the auroral field lines due to precipitation electron beam: *L. E. Akpabio and E. J. Uwah.* Pages 607-610, Vol.10, (2006).
2. Trajectory Coherent State And Coherent State For The Modified Caldirola-Kanai Oscillator: *Akpan. N. Ikot, Louis E. Akpabio, Edet J.Uwah and Akaninyene D. Antia.* Pages 15–20, Vol.17, (2010).

UWAMUSI S.E
1. A Switching From Hansen's Method to Schultz-Herzberger's Method for the Guaranteed Inclusion of Matrix Inversion: *S. E. Uwamusi and F.O. Otunta.* Pages 36 - 47, Vol. 2, (1998).
2. On a Nonlinear Differential Equation for the M(t)/D/1 Queueing System: *Stephen Ehidiahen Uwamusi.* Pages 62-69, Vol. 2, (1998).
3. On a family of methods for simultaneous inclusions of zeros of polynomial and analytic functions inside a simple smooth closed contour in the complex plane: *S. E. Uwamusi.* Pages 313-322, Vol.3, (1999).
4. Q-Step methods for Newton-Jacobi operator equation: *Stephen Ehidiamhen Uwamusi.* Pages 237-240, Vol.8, (2004).
5. Comparing Parallel Square Root Method with Extended Bell's Class of Iteration Method for Simultaneous Determination of Polynomial Zeros: *Stephen Ehidiamhen Uwamusi.* Pages 307-316, Vol.9, (2005).
6. Solvability of linear Interval System of Equations via Oettli-Prager Theorem and Rohn's bound: *Stephen Ehidiamhen Uwamusi.* Pages 25-28, Vol.18, (2011).
7. Successive Over Relaxation Method Which Uses Matrix Norms for Newton Operator: *Stephen Ehidiamhen Uwamusi.* Pages 29-34, Vol.18, (2011).
8. The divergence of Hansen-Sengupta method applied on Trapezoidal - Newton operator for nonlinear interval system of equations: *Stephen Ehidiamhen Uwamusi.* Pages 107–114, Vol.19, (2011).
9. Rigorous Verification for the Solution of Nonlinear Interval System: *Stephen Ehidiamhen Uwamusi.* Pages 31–36, Vol.20, (2012).

UWANTA I.J
1. Effects of Unsteady Flow Past An Infinite Vertical Plate With Variable Velocity, Temperature and Constant Mass Flux: *Uwanta I. J.* Pages 83–90, Vol.20, (2012).
2. Radiative Fluid Flow Between Fixed Vertical Plates With Suction/Blowing And Mass Transfer In The Presence Of Chemical Reaction: *Uwanta I. J.* Pages 91–100, Vol.20, (2012).

UYOUYOU B.O
1. Analytical determination of low velocity layer in 4-D hydrocarbon prospecting in parts of Imo State: *E. C. Okolie, F. C. Ugbe, B. O. Uyouyou.* Pages 393-402, Vol.11, (2007).

UZOEKWE S.A
1. Deformation Prediction Using Linear Polynomial Functions: *Ehigiator-Irughe R, Ehigiator M.O. and Uzoekwe S. A.* Pages 353–35,8 Vol.20, (2012).
2. Determination of Velocity And Acceleration of Structural Deformation Using Kalman Filter Technique: *Ehigiator-Irughe R, Ehigiator M.O. and Uzoekwe S. A.* Pages 359–368, Vol.20, (2012).

VLADIMIR S
1. Determining the Deformation Values using Structural Data Error Analysis: *S. Vladimir, R. Ehigiator-Irughe, M. O. Ehigiator and H. Oriakhi.* Pages 389 – 394 Vol. 21, (2012).

WARMATE A.G
1. Heat and mass transfer in the unsteady hydromagnetic free-convection flow in a rotating binary fluid II: *M. A. Alabraba, A. G. Warmate and C. Israel-Cookey.* Pages 169–178, Vol.12, (2008).

WAZIRI VICTOR O.
1. Numerical computation of the optimal control model of higher-order nondispersive wave with the extended conjugate gradient algorithm: *Ifeanyi S. Ukwosa, Sunday A. Reju and Victor O. Waziri.* Pages 79-84, Vol.15, (2009).

WEI Z.
1. Adaptive GFPS of a new four-dimensional hyperchaotic system with uncertain parameters: *Luo Runzi, Deng Shucheng and Wei Zhengmin.* Pages 111-118, Vol.16, (2010).

WILLIAMS R.A
1. Second law analysis of a reacting temperature dependent viscous flow through an inclined channel with isothermal walls: *S. O Adesanya, R. A Williams and R. O Ayeni.* Pages 549-556, Vol.11, (2007).

WONU N.
1. Horizontal and vertical projectile motion in a resistant medium under the influence of transverse magnetic field: *A. T Ngiangia, N. Wonu and F. Jim-George.* Pages 83-86, Vol.11, (2007).

WRIGHT C.K
1. A Note on Using Unbounded Functions on Totally Bounded Sets in the Context of the Lebesgue Covering Lemma: *C. K. Wright.* Pages 1-4, Vol.20, (2012).

YACUB TUNDE O
1. On certain isotopic maps of central loops: *John Olusola Adeniran, Yacub Tunde Oyebo and Daabo Mohammed.* Pages 7-12, Vol.18, (2011).

YAHAYA Y.A
1. Construction of two-step block Simpson type method with large region of absolute stability: *Y. A. Yahayaa and G. M. Kumleng.* Pages 261-268, Vol.11, (2007).
2. Formulation of a Symmetric Implicit Super Runge-Kutta Nyström Method for the Integration of Third Order ODEs: *Yahaya Y. A. and Adegboye Z A.* Pages 425 – 430, Vol. 22, (2012).

YAHYA W.B
1. Jacobian approach to optimal determination of perturbation parameter for gradient method: *J. O. Omolehin, K. Rauf, B. Opawoye, and W. B. Yahya.* Pages 363-370, Vol.10, (2006).

YAKASAI B.M

1. Failure-Time Model for a Component with Life Control Device: *Bashir M. Yakasal.* Pages 309-316, Vol.4, (2000).
2. Replacement Model Using Subjective Data: *Bashir M. Yakasai.* Pages 341-346, Vol.6, (2002).
3. Minimal Repair and Replacement Policy Based On Salvage Value: *Bashir M. Yakasai.* Pages 111-114, Vol.7, (2003).
4. Estimators of Parameters of the Exponential Family Distributions and Maintenance Problem: *Bashir M. Yakasai.* Pages 389-394, Vol.9, (2005).
5. Stationary Population Flow of a Semi-open Markov Chain: *Bashir M. Yakasai.* Pages 395-398, Vol.9, (2005).

YUGUDA K.B

1. On Rouche's theorem as a criterion for irreducibility of polynomial maps: *K. B. Yuguda.* Pages 21-22, Vol.13, (2008).
2. Complex analytic dynamics: A modern perspective of iteration in : *K. B. Yuguda.* Pages 27-36, Vol.14, (2009).

YUSUF A.

1. An EOQ Model for items that Exhibit Delay in Deteriotion with Weibull Distribution Deterioration: Yusuf A. and Sani B. pp 307 – 318, Vol. 22 (2012)

YUSUF AUWALU BICHI

1. Martingales of the Generalized Conditional Expectations on the Generalized Positive Operators of a von Neumann algebra: *Yusuf Ibrahim and Auwalu Yusuf Bichi.* Pages 1-6, Vol.17, (2010)
2. An EOQ Model for Items That Exhibit Delay in Deterioration With Weibull Distribution Deterioration: *Yusuf A and Sani B.* Pages 307 – 318, Vol. 22, (2012).

YUSUF I

1. Multivariate Exponential Autoregressive and Autoregressive Moving Average Models: *S. M. Umar and I. Yusuf.* Pages 543-552, Vol.16, (2010).
2. Simulation Modeling for the Stochastic Analysis and Performance Evaluation of a Repairable Series-Parallel System: *I. Yusuf and Nafiu Hussaini.* Pages 53 – 60, Vol. 21, (2012).
3. Stochastic Modeling and Performance Analysis of a Repairable Series-Parallel System with Independent Failures: *I. Yusuf.* Pages 61 – 72, Vol. 21, (2012).

YUSUF SALAU

1. Surface energy calculation of fcc metals using the new analytical algorithm for equivalent crystal theory: *S Yusuf, E Aghemenloh and J O A Idiodi.* Pages 57-68, Vol.16, (2010).

YUSUF T.T

1. Mathematical model for bird flu disease transmission: *T. T. Yusuf and K. O. Okosun.* Pages 465-470, Vol.10, (2006).

ZEBAZE KANA M.G

1. Numerical simulation of hole injection in high barrier metal-semiconductor short diodes: *M. G. Zebaze Kana , R. K. Odunaike and A. A. Oberafo.* Pages 69-74, Vol.8, (2004).
